Derval, comm. and tn., France, dep. Loire Inférieure, 32 m. N. by W. Nantes, arr. Châteaubriant. P.<2000.

Derval, vil., Scot., Ayrshire. See **Darvel.**

Dervenion, vil., Greece, prov. Argolis and Corinthia, on the S. shore of the Gulf of Lepanto, 30 m. WNW. Corinth. P.<2000.

Dervent, tn., Bosnia, prov. Banjaluka, on R. Ukrina, 11 m. SSW. Brod. P.<5000.

Dervock, tn., Ire., NW. co. Antrim, bar. Lower Dunluce, 8 m. E. Coleraine, on the Ballymoney and Ballycastle Rly., PMT.O. P.<500.

Derwen, par., Wales, Denbighshire, W. div., 10½ m. S. Denby, on the L. & NW. R. P.<500.

Derwent ('bright' or 'clear water'), riv., Eng., Cumberland, rising on the N. side of Scaw Fell, and flowing N. through Borrowdale, Derwent Water, and Bassenthwaite Lake, then W. through the Cockermouth div., into the Solway Firth at Workington.

Derwent, riv., Eng., Derbyshire, rises in the extreme N. of the county, flows S. past Matlock, Belper, and Derby, and joins the Trent on the l. bk. in the SE. of the county; not navigable.

Derwent, par., Eng., Derbyshire, High Peak div., 9½ m. ESE. Glossop, PMT.O. P.<250.

Derwent, riv., Eng., Yorkshire, rises in the moorlands of the N. Riding, and after flowing S., W., and SW. (for some distance forming the boundary between the E. and N. Ridings) turns S., and enters the Ouse at Barmby. Length, 60 m.; navigable from Malton, 40 m.

Derwent, one of the chief rivs. of Tasmania; has its source in Lake St. Clare, in the centre of the island; flows very tortuously SE. through the dist. New Norfolk and between Richmond and Hobart, and enters Storm Bay by an estuary 4 m. wide. Navigable to below New Norfolk. Length, 130 m.

Derwent Edge, hill, Eng., Derbyshire, High Peak div., 9 m. W. Sheffield.

Derwentwater, or **Keswick Lake,** lake, Eng., in SW. of co. Cumberland, in Borrowdale, Penrith div., stretches S. from Keswick for 3 m., and is about its centre 1 m. across. Its banks are rocky and abrupt; in it are several wooded islands, and a remarkable mass of soft land, which sometimes partly floats on its surface. It is an enlargement of the Derwent R., which enters at its S. and emerges at its N. extremity. See **English Lake District.**

Derwent Woodlands, eccles. par., Eng., Derbyshire, Hathersage and Hope pars. P.<500.

Derwydd, hamlet, Wales, Carmarthenshire, E. div., 13 m. NE. by N. Llanelly, 1 m. NW. **D. Road** stn., on the G. W. R.

Dés, tn., Hungary. See **Dees-Magyaros.**

Desaguadero (Spanish, 'outlet'), the name of several streams in Spanish America, the principal being (1) the river by which Lake Titicaca (Peru and Bolivia) is drained S. into Lake Aullagas, navigable by steamers downwards as far as Nasacara, the port of Corocoro (about one-third of its course) below that rendered too shallow by evaporation; (2) part of the course of the R. Salado, in the W. of the Argentine Republic.

Désaignes, comm., France, dep. Ardèche, on r. bk. of the Doux, arr. and 16 m. WNW. Tournon, with mineral springs. P.<2000.

Desana, comm., Italy, Piedmont, prov. and 17 m. SW. Novara. P.<2000.

Des Arc, vil., U.S., Arkansas, Prairie co., 87 m. W. by S. Memphis (Tenn.). P.<1500.

Desborough, par. and tn., Eng., N. div. of Northamptonshire, 11 m. NNW. Wellingborough, with a stn. (**D. for Rothwell**) on the M. R.; iron ore mined. PM.O. P.<3000.

Deschambault, vil., Canada, Quebec, Portneuf co., on the l. bk. of St. Lawrence, 38 m. W. by S. Quebec. P.<1500.

Deschenitz, vil., Austria, Bohemia, 34 m. S. by W. Pilsen. P.<2000.

Deschna, tn., Austria, Bohemia, govt. Pilgram, circle Kamenitz, with mineral springs and baths. P.<2000.

Deschutes, riv., U.S., Oregon, trib. of the Columbia, rises in the NW. of Klamath co., in the Cascade Range, flows N. through Crook and Wasco counties to the Columbia, which it joins on the l. bk. at Fultonville, in 120° 54′ W.; about 300 m. long.

Desconocida, cape, off the W. ct. of Yucatan, to the N. of Campêche, in 20° 50′ N., 72° 45′ W.

Descoose, vil., Canada, Nova Scotia, co. Richmond, on Isle Madame, 6 m. from Arichat. P.<1500.

Desenda, Cape, in the W. of Cape Colony, in 32° 8′ S.

Deseado, deseada, Spanish, 'desired.' See **Désirade.**

Desenado, Rio, riv., Argentine Republic (Patagonia), govt. of Santa Cruz, flows E. then SE. and enters the Atlantic in 47° 44′ S. by a long and wide estuary known as Puerto D., or Port Desire.

Desechio, isl., W. Indies, to the W. of, and belonging to, Porto Rico.

Desenzano sul Lago, comm., Italy, Lombardy, prov. Brescia, on SW. shore of Lake Garda, 8 m. WNW. Peschiera. P.<5000.

Deseronto, vil., Canada, Ontario, Hastings co., on the Bay of Quinté, 29 m. W. by S. Kingston. P.<3500.

Desert, or *disert,* in Celtic names 'a retired place,' from Latin *desertum.*

Desert, stn., Ire., co. Cork, bars. E. Carbery, E. div., and Ibane and Barryroe, 1 m. E. by S. Clonakilty. P.<250. See also **Desertserges.**

Desert, settlement, U.S., Nevada, Churchill co., 50 m. NE. Carson City, on the Central Pacific Railroad.

Desertas, Las, a group of islets in the Atlantic, to the SE. of Madeira; the largest, Tabla Deserta, is 6 m. long by ½ m. broad. P.<2000.

Desertcreat, par., Ire., E. co. Tyrone, bar. Upper Dungannon, 2½ m. S. by W. Cookstown; 14,398 ac. P.<3500.

Desertegny, par., Ire., NE. co. Donegal, bar. W. Inishowen, 14 m. NNW. Londonderry; 7580 ac. P.<1500.

Desertlyn, par., Ire., co. Londonderry, bar. Loughinsholin, containing part of Moneymore town; 5561 ac. P.<1500.

Desertmartin ('the retreat of St. Martin'), par., Ire., SE. co. Londonderry, bar. Loughinsholin, 9 m. NNE. Cookstown, on the Draperstown Rly., P.O.; 9579 ac. P.<3000.

Desertmore, par., Ire., co. Cork, bar. Muskerry East, 8 m. SW. Cork; 3943 ac. P.<500.

Desertoghill, par., Ire., E. co. Londonderry, bar. and 12 m. S. Coleraine; 14,466 ac. P.<3000.

Desertserges ('the retreat of St. Sergius'), par., Ire., S. co. Cork, bars. E. Carbery, E. div., and Kinalmeaky, 6½ m. W. by S. Bandon, with stn. (**Desert**) on the Cork, Bandon, and S. Coast Rly., P.O.; 15,729 ac. P.<2500.

Desford, par., Eng., Leicestershire, div. and 4½ m. E. Bosworth, on the M. R., PM.O. P.<1000.

Desha, co., U.S., Arkansas, on the Mississippi, where it is joined by the Arkansas R.

Deshayes, comm., French W. Indies, on the NW. ct. of Guadaloupe I. P.<2000.

Deshler, vil., U.S., Ohio, Henry co., 38 m. SW. by S. Toledo. P.<1500.

Desio, comm., Italy, Lombardy, prov. and 12 m. N. by E. Milan. P. 6000.

Desima, or **Deshima** ('front island'), an artificial island of Japan, opposite the city of Nagasaki, with which it communicates by a bridge. The island is about 600 ft. in length by 250 ft. in breadth. It is where the Dutch factory was established, and the place to which the Dutch were long restricted.

Désirade, an island of the Little Antilles, belonging to the French, 4 m. W. Guadaloupe, of which it is a dependency, in 16° 20′ N. Length, NE. to SW., 6 m.; average breadth, 2 m. Surface elevated, soil in great part sandy or rocky; climate arid, but healthy. Since 1728 it has contained on the bay of Mahault the leper colony of the French W. Indies. It was the first island discovered by Columbus on his second voyage, November 1493, and hence called by him **Desenda,** 'the desired.'

Désire, port, S. America, on the E. ct. of Patagonia, in 47° 45′ S.

Deskford, par., Scot., Banffshire, 4 m. S. Cullen, contains vil. **Kirktown of Deskford,** P.O.; 8155 ac. P.<750.

Deskry, hamlet, Scot., W. Aberdeenshire, on Deskry Water, 23 m. S. Keith.

De Smet, vil., U.S., S. Dakota, Kingsbury co., 105 m. N. Yankton. P.<1500.

De Smet, settlement, U.S., Montana, Missoula co., 92 m. NW. Butte City. Alt. 3213 ft. (R.R.).

Desmochados, vil., Paraguay, 60 m. E. of the confluence of the Paraguay and Paraná.

Des Moines, city, U.S., Iowa, Polk co., at junction of Des Moines and Raccoon R., 107 m. WSW. Cedar Rapids. Important railway centre and manufacturing town (wire fencing, woollens, &c.). Laid out in 1846. Alt. 800 ft. (City Engineer); 847 ft. (U.S. Signal Office); rfall. (5 yrs.), 42.72 in. P. (1870) 12,035; (1880) 22,408; (1890) 50,100.

Des Moines, co., U.S., Iowa, E. frontier, crossed by 41° N.

Des Moines, riv., U.S., Iowa, rises in SW. Minnesota, flows SE. to the Mississippi; 300 m. long.

Des Moines Rapids, in the Mississippi, U.S., Iowa, can be navigated in high water, avoided by a state canal 9 m. long at low water.

Desna, riv., Middle Russia, l. bk. trib. of Dnieper. Waters the govts. of Smolensk, Orel, and Chernigov; length, 550 m. Navigable from Bryansk. Important artery for interior navigation.

Desolation, Cape, Greenland, in the SW. extremity of Nunar Soak I., in 60° 50′ N., and 48° 50′ W.

Desolation, Cape, headland, S. America, Tierra del Fuego, on one of its W. isls., in 55° 46′ S., and 71° 37′ W.

Desolation Island, isl., Chile, 70 m. long by 15 m. broad, at W. end of Strait of Magellan, S. side; terminates W. in Cape Pillar.

De Soto, co., U.S., Florida, crossed in S. by 27° N., between Lake Okeechobee and co. Manatee, includes in SW. the shores of Charlotte Bay. Named after a Spanish explorer, Fernando de Soto, who reached the Mississippi from Florida in 1542.

De Soto, par., U.S., Louisiana, in the NW., on the W. frontier, crossed by 32° N.

De Soto, co., U.S., Mississippi, in the extreme NW.

De Soto, city, U.S., Missouri, Jefferson co., 39 m. SW. by S. St. Louis. P. <4000.

De Soto, vil., U.S., Nebraska, Washington co., on the r. bk. of the Missouri, 18 m. NNW. Omaha.

De Soto, vil., U.S., Wisconsin, Vernon co., on the Mississippi, 72 m. NNW. Dubuque (Iowa). P. <1500.

Despair Bays, Newfoundland, on the S. ct., in 55° 40′–56° 10′ W.

Despeñaperros, noted defile in S. Spain, by which the plateau of Mancha is connected with the great valley of Andalucia; traversed by railway from Madrid to Seville.

Desphina, vil., Greece, prov. Phthiotis and Phocis, on the inlet of Aspra Spitia, 45 m. E. Lepanto. P. <3000.

Des Plaines, vil., U.S., Illinois, Cook co., 18 m. NW. Chicago. P. <1500.

Despoplado (Spanish, 'unpeopled'), an uninhabited plateau of the Andes, Bolivia, Chile, and the Argentine Republic. Alt. 10,500–12,750 ft.

Despoto Dagh, or **Dospad Dagh** ('despot's mountains'), a name sometimes applied to the whole mountainous region known to geographers as the Rhodope Mts. (*q.v.*), sometimes restricted to the W. section of these mountains.

Des Rivieres, or **Malmaison,** post-vil., Canada, Quebec, Missisquoi co., 36 m. SE. Montreal. P. <1500.

Dess, stn., Scot., W. Aberdeenshire, on the Deeside Rly., 12½ m. E. by N. Ballater.

Dessau, tn., Ger., cap. duchy Anhalt, on R. Mulde, 17½ m. W. by S. Wittenberg, with various textile, iron, and other industries. P. (1849) 12,800; (1871) 17,500; (1890) 34,700.

Desselghem, comm., Belgium, prov. W. Flanders, arr. Courtrai. P. <4000.

Dessi, small isl., E. Africa, at the mouth of Annesley Bay, on the Abyssinian coast of the Red Sea, SE. of Massaua; called by the English **Valentia.**

Destelbergen, comm., Belgium, prov. E. Flanders, arr. Gand (Ghent). P. <4000.

Desterro, city, Brazil, cap. prov. Santa Catharina, on the W. side of the Ilha de Santa Catharina, 240 m. NE. Porto Alegre, in 25° 36′ S. P. 15,000.

D'Estree, bay, on the SE. of Kangaroo I., S. Australia.

Desuk, vil., Egypt, 32 m. NW. Tanta, on the r. bk. of the Rosetta arm of the Nile. P. 6900.

Desvres, tn., France, dep. Pas-de-Calais, arr. Boulogne, 20 m. WSW. St. Omer, with iron-mines; in the vicinity are mineral springs. P. <5000.

Detchant, par., Eng., Northumberland, div. and 11½ m. SSE. Berwick-upon-Tweed, 2½ m. NW. Belford stn. P. <250.

Detention River, post-tn., Tasmania, Devon co., 63 m. from Devonport. P. <1500.

Dethick and Lea, par., Eng., Derbyshire, W. div., 2 m. SE. by E. Matlock, 2 m. E. Matlock Bath stn. P. <1500.

Detling, par., Eng., Kent, P.O. P. <500. See **Debtling.**

Detmold, the *Theotmalli* ('people's court') of Charlemagne's reign, city, Ger., cap. principality Lippe-Detmold, 25 m. S. Minden. Two miles SW. is the *Hermannsdenkmal,* or monument to Arminius, who delivered the terr. E. of the Rhine from the hands of the Romans in the time of Augustus. P. 9700.

Detroit (from the French for 'strait'), chief city of the state of Michigan, U.S., Wayne co., a port of entry on W. bk. of Detroit R., on which it has a good harbour, at the outlet of Lake St. Clair, opposite Canadian town of Windsor. Centre of an extensive railroad system. Has numerous blast-furnaces and important manufacturing industries, large copper-smelting works. Settled by the French early in 18th century, passed into the hands of the English in 1763, who ceded it to the United States in 1783. Alt. 661 ft. Mean temp., yr. 48.4° F., Jan. 24.6°, July 72°; rfall. (12 yrs.), 36.19 in. P. (1870) 79,577; (1880) 116,340; (1890) 205,876.

Detroit, vil., U.S., Minnesota, Becker co., 176 m. W. Duluth. Alt. 1364 ft. (R.R.). P. <2000.

Detroit River, riv., between Canada and the U.S., connects Lake St. Clair with Lake Erie; length, 28 m. At D. it is ¾ m. wide, and is navigable throughout for all vessels for 8 months of the year. The principal channel is on the E. side of the Canadian shore. The islands Crosse and Fighting are near its mouth.

Dettelbach, tn., Ger., kgd. Bavaria, govt. Lower Franconia, on R. Main, 9 m. E. Würzburg. P. <3000.

Dettingen, vil., Ger., kgd. Bavaria, govt. Lower Franconia, on the Main, 15 m. ESE. Frankfurt. Scene of a victory of the allied British and Austrians under George II. over the French, 1743, and of a victory of the Prussians over the Bavarians, July 25, 1866. P. <2000.

Dettingen an der Erms, vil., Ger., kgd. Würtemberg, circle Black Forest, 13 m. E. Tübingen. P. <4000.

Dettva, market-tn., Hungary, prov. Sohl, 55 m. N. by E. Waitzen. P. 6300.

Dettweiler, comm., Ger., Alsace-Lorraine, 17 m. NW. by N. Strassburg, on the Rhine and Marne Canal. P. <3000.

De Tuin (Dutch, 'the enclosure'), settlement, Cape Colony, dist. and 142 m. NNE. Calvinia.

Deuben, vil., Ger., kgd. Saxony, circle and 5 m. SW. Dresden, in the Plauenscher Grund; has manufactures of glass wares, cast steel, &c. P. 6900.

Deudraeth, Wales. See **Penrhyn Deudraeth.**

Deuel', co., U.S., Nebraska, in the NW., on S. frontier, just W. of 102° W.

Deuel', co., U.S., S. Dakota, on the E. frontier, S. of 45° N.

Deuil, comm., France, dep. Seine et Oise, arr. Pontoise, 8½ m. N. Notre Dame, Paris. P. <3000.

Deule, riv., France, rises near Carency, in dep. Pas-de-Calais, flows through dep. Nord, past Lille and Quesnoy, and joins the Lys near Deulemont.

Deule, Canal de la, joins the Serape and the Lys, 41 m. long.

Deulgáon Rájá, tn., India, Berár, dist. Buldáná, 50 m. ENE. Aurangabad, in 20° N., 76° E. P. (1881) 7000; (1891) 7400; Hindus, 5900; Moham. 1100.

Deurne, comm., Belgium, prov. and arr. Antwerp. P. 6700.

Deutsch, Ger. 'German,' originally 'belonging to one's own people,' from *diot, thiuda,* Anglo-Saxon *theo'd,* 'the people.' For some names with this prefix, see under the second part of the name.

Devenport, settlement, U.S., N. Dakota, Cass co., 18 m. SW. Fargo.

Deventer, a fortified tn., Holland, cap. prov. Overijssel, on the IJssel, 18 m. S. by E. Zwolle. P. (of comm.) 23,000.

Deverel Down, hill, Eng., Sussex, 9 m. NE. by E. Dorchester.

Deverill Hill, P.O., Eng., Wiltshire, Westbury div., 12 m. S. Trowbridge.

Deverill Long Bridge, Eng. See **Long Bridge Deverill.**

Deveron, or **Blackwater,** riv., Scot., cos. Aberdeen and Banff, rises in the par. of Cabrach, flows NE. past Huntly and Turiff, and enters the North Sea at Banff. Affluents, Bogie and Isla. Length, 40 m.

Devgadh, seapt., Brit. India, Bombay, dist. Ratnágiri, with a safe and beautiful land-locked harbour, in 16° 22′ N. P. <5000.

Devi, riv., India, one of the S. arms of the Mahánadi delta, enters the Bay of Bengal in 19° 58′ N.; as a harbour rendered almost useless by bars of sand.

Devikota, or **Eravuśeri,** tn., Brit. India, Madras, dist. and 50 m. E. Madura. P. (1881) 8500; (1891) 9900; Hindus, 9400.

Devikota, small ruined fort, Brit. India, Madras, dist. Tanjore, on the E. ct., 26 m. S. by E. Cuddalore.

Devil Island, S. America, Tierra del Fuego, in 54° 58′ S., and 69° 5′ W. Cook gave the name **Devil's Basin** to a port in Christmas Sound, in 55° 16′ S., and 17′ W.

Déville, tn., France, dep. Seine Inférieure, arr. Rouen, on the Cailly, 2 m. NW. Rouen. P. 5200.

Devil River, Canada, Quebec, issues from Lake Trembling, in Argenteuil co., and flows S. into the R. Rouge (l. bk.), which it joins in 46° 4′ N., 74° 39′ W.

Devil's Beef Tub, large hollow, Scot., N. Dumfriesshire, 5 m. NW. Moffat.

Devil's Bridge, German **Teufelsbrücke,** a celebrated bridge over the Reuss, where it traverses a tremendous granite-walled chasm, in the canton of Uri, Switzd., a little below the place where the St. Gothard Pass road emerges on the Vale of Andermatt by the tunnel, 216 ft. long, known as the Urnerloch ('hole of Uri'; alt. 4640 ft.), pierced in 1707. The name properly belonged to an older bridge formerly existing below the present.

Devil's Bridge, hamlet, Wales, Cardiganshire, 10½ m. E. by S. Aberystwith, with lead and zinc ores, P.O. It takes its name from a double bridge, lower and upper, across a gorge traversed by the R. Mynach; the lower bridge was built in the 11th century, and the upper in 1753. Called by the Welsh Pont-y-Mynach ('bridge of Mynach').

Devil's Dyke, a great chasm in the South Downs, Eng., Sussex, 4½ m. NW. by N. Brighton, with a rly. stn. (**The Dyke**). A steel-wire cable-way, from which carriages for the conveyance of passengers are suspended, was opened across this chasm October 13, 1894.

Devil's Glen, wild ravine, Ire., E. co. Wicklow, bar. Newcastle, 6 m. NW. Wicklow, 4 m. from Rathnew stn., on the riv. Vartry.

Devil's Hole, Eng., Derbyshire. See **Peak Cavern.**

Devils Lake, tn., U.S., N. Dakota, Ramsey co, 95 m. SW. by W. Pembina. P. <2000. See **Minnewaukan.**

Devil's Punch Bowl, a deep dell, Eng., W. Surrey, on the S. side of Hindhead Hill, 2 m. N. Haslemere. See also **Mangerton,** mt., Ire.

Devil's Tower, U.S. See **Bear Lodge.**

Devirigi, Asia Minor. See **Divrigi.**

Devizes (devai'zes), ancient *de Vies,* denoting a place where two ways met (' *the Vize* '), mun. bor. (since the time of Henry II.) and market-tn., Eng., Wiltshire, on the Kennet and Avon Canal, 23 m. NNW. Salisbury, on branch line of G. W. R. Manufactures snuff, malt, and agricultural steam engines and implements. Market-day, Th. Mun. bor. P. 6400; par. (D. St. John the Baptist) P. <2000; D. St. Mary the Virgin, P. <2500; eccles. par. (D. St. John the Baptist with St. Mary the Virgin) P. <4500; D. St. Peter, P. <1500.

Devlins River, small riv., Ire., in the NE. of co. Meath, flows E. to the Mattock, a trib. of the Boyne.

Devon Falls, falls on the Sannaga R., German W. Africa, Kamerun Terr., in about 3° 56′ N., 10° 14′ E.

Devoke Water, lake, Eng., in the S. of Cumberland, Egremont div., 17½ m. SSW. Keswick, drained into the Esk.

Devon, or **Devonshire,** one of the largest cos. in Eng., situated in the SW., between the English and the Bristol Channels, and between Cornwall in the SW. and Somerset and Dorset in the NE. and E.; belonging almost wholly to the diocese of Exeter; cap. Exeter; other chief towns, Plymouth, Stonehouse, and Devonport, Dartmouth, Torquay, Totnes, Exmouth, Honiton, Axminster, Tiverton, Barnstaple, Great Torrington, and Ilfracombe; parl. bors., Exeter, Devonport, and Plymouth; divided into the following parl. divs.:—

	Acres.	P. 1891.
Eastern, or Honiton	167,063	52,025
NE., or Tiverton	210,794	52,763
Northern, or S. Molton	299,827	46,719
NW., or Barnstaple	207,316	61,331
Western, or Tavistock	379,209	50,616
Southern, or Totnes	191,117	49,642
Torquay	25,586	57,450
Mid, or Ashburton	178,589	53,005
Parl. boroughs	7,596	208,257
Total (ancient and administrative co.)	1,667,097	631,808

Surface varied, mainly under 500 ft. in height, and gently undulating, but rising in two places to upwards of 1000 ft. Towards the S. lies Dartmoor, a tableland or elevated dist. of plutonic (granite) rocks, containing the highest elevations in the SW. of England (Yes Tor, 2039 ft.), and with a certain solitary wildness. In the N., Exmoor Forest, a moorland region belonging to the Devonian system, extends W. into this county, where the broad, gently rising valleys on its outer slopes, clothed with a richly varied natural and artificial vegetation, present some of the most attractive scenery of the county. In the W., to the S. of Hartland Point, there are combes similar to those of the NW. of Cornwall. In the N. the Devonian rocks extend over the whole of the county above the parallel of Barnstaple Bay, and in the S. the same rocks occupy nearly the whole area to the S. of Dartmoor, terminating with Archæan prominences in the extreme S. The greater part of the remainder of the county (apart from Dartmoor) belongs to the Millstone Grit, which is succeeded eastwards by New Red Sandstone and Upper Cretaceous rocks, the latter rising into hills in the NE. There is an interesting outlier of Lias at Bovey Tracey (*q.v.*). The chief rivers are the Exe, the Dart, and the Tamar, all flowing into the English Channel; the Tamar separating Cornwall from D., and forming a fine harbour at Plymouth; and the Torridge and Taw, both flowing N. into Barnstaple Bay. The apples, from which is made the D. cider, grow on the hill-slopes and in the hedges, chiefly on the Devonian rocks. The red D. breed of cattle is highly valued, and the Dartmoor ponies and Exmoor sheep are famous. For agricultural statistics, see **Appendix,** pp. 7–9. The manufactures are serges, linen, gloves, lace, boots, paper, &c.; tanning also is carried on to some extent. D. has important pilchard, mackerel, dory, and salmon fisheries. The mineral wealth is important. The first place belongs to china and other clays: china clay being mined at Cornwood, Plympton, Newton Abbot, and Shaugh; fire-clay at Cornwood, Newton Abbot, Bovey Tracey, Torrington, and Kingsteignton; potter's clay at Bideford and elsewhere in N. Devon, and near Newton Abbot and Bovey Tracey. Copper ore is mined at Buckland Monachorum, Tavistock, Lamerton, and Okehampton; tin at Newton Abbot, Hexworthy, Sortridge, and Wheall Russell; slate at Totnes and Tavistock; arsenic at Tavistock and Mary Tavy; arsenical pyrites at Buckland, Tavistock, Belstone, and Horrabridge; barytes in the Teign Valley; a little iron ore at Molland; umber at Ashburton; ochre at Brentor; a little lignite at Bovey Tracey. The railway systems are the G. W. R. and L. & SW. R. The navigable portion of the Tamar was formerly connected by canal with Bude; Tiverton is still connected by the Great Western Canal with Taunton in Somerset; and the Exe is canalised for ships to Exeter. There are logan stones at Drewsteignton, old castles at Okehampton, Compton, Berry Pomeroy, Lidford, Totnes, and Tiverton, and abbey ruins at Tavistock and Buckfastleigh. The West Saxons made their first settlement in D. in 614. Their progress was slow, and it was not until 926 that the king of the Cornwelsh was driven beyond the Tamar. From 876 to 1003, however, D. was wasted by the Danes. See **England,** table.

Devon, small riv., Eng., rises in the NE. of Leicestershire, flows N. through a corner of Lincolnshire, again crosses Leicestershire, enters Notts, and falls into the Trent below Newark.

Devon, riv., Scot., rises in the Ochil Hills, and flows E., W., and S., through cos. Perth and Clackmannan, to the Forth, which it joins near Alloa, after a course of 25 m. It has falls near the Crook of D.

Devon, co., Tasmania, N. ct., crossed by 146° and 147° E.

Devonport, formerly Plymouth Dock, parl. bor. (two members), mun. bor. (since 1837), and co. bor., fortified naval arsenal and seapt., Eng., in SW. of co. Devon, at the mouth of Tamar,

which spreads out into the expanse called the Hamoaze, overlooked by the heights of Mt. Edgcumbe, and crossed by a steam floating bridge and by the Royal Albert (rly.) Bridge at Saltash, 1 m. W. and included in the parl. bor. of Plymouth, on the G. W. and L. & SW. Rlys. Mount Wise is a splendid military parade ground; view from it beautiful. D. is the seat of the military and naval government of 'The Three Towns' (D., Stonehouse, and Plymouth). On Mount Wise is the residence of the lieutenant-governor of the garrison, also of the port-admiral. Steamers regularly ascend the Tamar; Cotehele House, opposite the town, and the Morwell rocks, near Tavistock, are the chief attractions. Government Establishments—Raglan barracks (for two regiments; will accommodate 2000 men and 80 officers), Granby barracks, naval barracks and hospital, military hospital, dockyard, gun-wharf, Keyham steam-yard, and a powder depôt. D. has four docks, the longest 437 ft., with 32.1 ft. depth on sill at high water spring tides. Market-days, Tu. and Th. Mun. bor. P. (1851) 38,200; (1871) 49,400; (1891) 54,800; parl. bor. P. 70,200.

Devonport, or **Formby,** post-tn. and seapt., Tasmania, co. Devon, near the mouth of R. Mersey, 82 m. NW. Launceston, connected by tramway car with rly stn., Formby. Bar at river mouth being deepened. P. 1500.

Devonport, or **North Shore,** suburb of Auckland, New Zealand, North I., Waitemata co., 5 m. NNE. Auckland. P. <3000.

Devonport, East, tp., Tasmania. See **Torquay.**

Devon Road, stn., Ire., co. Limerick, on the Waterford and Limerick Rly., 4 m. E. Abbeyfeale.

Devonshire Street, stn., Eng., London. See **Globe Road.**

Devonside, vil., Scot., Clackmannanshire, on the l. bk. of the Devon, 3 m. WSW. Dollar, close to Tillicoultry stn. P. <750.

Dev'oran, eccles. par. and seapt., Eng., Cornwall, 5 m. SW. Truro; tin-smelting carried on. PMT.O. P. <1500.

Devrighi, tn., Asiatic Turkey. See **Divrigi.**

Devynnock ('a deep valley'), eccles. par. and vil., Wales, Brecknockshire, 7½ m. W. Brecknock, with a stn. (**Devynock**) on the M. R. P. <1000.

Dewas, tn., Central India, Mánpur Agency, cap. D. State, 20 m. NE. Indore. P. (1881) 11,900; (1891) 15,100; Hindus, 10,300; Moham. 3700.

Dewchurch, Little, par., Eng., Herefordshire, Ross div., 5½ m. S. by E. Hereford, 3½ m. SSW. Holm Lacey stn., P.O. P. <500.

Dewchurch, Much, par., adjoining **Little D.,** PM.O.; 4921 ac. P. <750.

Dewell, vil., Eng., Herefordshire, div. and 8 m. WSW. Leominster, 3½ m. ENE. Almeley stn.

Dewey, co., U.S., S. Dakota, bounded on the S. by 45° N., crossed in the middle by 101° W.; traversed by Moreau R.

Dewey's Flat, settlement, U.S., Montana, Beaver Head co., 27 m. SW. by W. Butte.

Dewhurst, the NE. prov. of Brit. N. Borneo.

De Witt, co., U.S., Illinois, N. of 40° N., and crossed by 89° W.

De Witt, city, U.S., Iowa, Clinton co., 48 m. S. by E. Dubuque. P. <1500.

De Witt, vil., U.S., Missouri, Carroll co., on the l. bk. of the Missouri, 90 m. E. Leavenworth (Kansas). P. <1500.

De Witt, co., U.S., Texas, in the SE., to the W. of 97° W., crossed in the S. by 29° N.

De Witt Land, region, Australia, on the NW. ct., between 120° and 123° S., opposite Dampier Archipelago, discovered 1628.

Dewlish, par., Eng., Dorsetshire, div. and 7 m. NE. Dorchester, P.O. P. <500. See **Milborne.**

Dewsall, par., Eng., Herefordshire, Ross div., 4½ m. SSW. Hereford, 1½ m. E. Tram Inn stn. P. <250; eccles. par. (**D. St. Michael with Callow**) P. <250.

Dewsbury, mun. bor. (since 1862) and parl. bor. (1 member), Eng., Yorkshire, W. Riding, 5½ m. W. by N. Wakefield, situated partly on the southern declivity and partly at the base of an eminence on the N. bk. of the R. Calder, with stns. on the L. & NW. R., L. & Y. R., and G. N. R., in the diocese of Wakefield, 182 m. by rail from London. In the borough and vicinity are many collieries, foundries, glass and dye works; the chief manufactures are blankets, carpets, worsteds, and heavy woollen goods of various kinds. It has a technical school, and the Wheelwright grammar schools, founded by a scheme of the Charity Commissioners. There is a free library, an infirmary, and a fine public park of 74 ac. Market-days, W. and S. Mun. bor. P. (1871) 24,800; (1891) 29,800; parl. bor. P. 73,000.

Dexter, vil., Canada, prov. Ontario, on the C. P. R., 1051 m. by rail W. Montreal. P. <1500.

Dexter, tn., U.S., Iowa, Dallas co., 33 m. W. by S. Des Moines. P. <1500.

Dexter, tn., U.S., Maine, Penobscot co., 28 m. NW. by W. Bangor. P. <3000.

Dexter, vil., U.S., Michigan, Washtenaw co., on Huron R., 42 m. W. Detroit. P. <1500.

Deynze, comm. and tn., Belgium, prov. E. Flanders, on the Lys, 9 m. SW. by W. Ghent. P. (comm.) <5000.

Dezfool, city, Persia. See **Dizful.**

Dhadhar, small riv., India, flowing W. into the Gulf of Cambay.

Dhahret el Kôlah, site, Palestine, *Hachilah* (Hill) in the O. T., 8 m. SE. by E. El Khulil (ancient *Hebron*).

Dhala, vil., southern Arabia, 60 m. N. Aden, cap. of a small state within the British sphere of influence.

Dhalak, isls., in the Red Sea. See **Dahlak.**

Dhaleswari, riv., India, flows N. from the Lushái Hills into Cachar dist. in about 92° 40′ E.; joins Surmá. Also the name of an offshoot of the Jamuná, Dacca dist.

Dhamar, Arabia. See **Damar.**

Dhámi, one of the Punjab native hill states of India, about 12 m. W. Simla.

Dhámpur, tn., Brit. India, NW. Provs., dist. Bijnaur, 50 m. ENE. Meerut. P. (1881) 5700; (1891) 6700; Hindus, 4000; Moham. 2500.

Dhámrá, riv. and estuary, India, Bengal, formed by the union of the Brahmani and Baitarani, enters the Bay of Bengal in 20° 47′ N. A fine navigable river, but with a dangerous bar at its mouth.

Dhámrá, port, Brit. India, Bengal, dist. Balasor, 72 m. ENE. Cuttack, embracing all the navigable channels forming the R. Dhamra, with customs station at the village of D. on the N. bk. of the river. P. <5000.

Dhamtárí, tn., Brit. India, Central Provs., dist. Ráipur, 160 m. E. by S. Nágpur. P. (1881) 6600; (1891) 6700; Hindus, 5900.

Dhamtaur, or **Dumtaur,** a valley in the Punjab, Hazára dist., in 34° and 34° 10′ N., 72° 55′ and 73° 15′ E. The valley has the appearance of having once been the bed of a torrent, and is still traversed by numerous watercourses, which empty themselves into the R. Dor. Numerous villages are scattered over the valley, which is populous. Sugar is so abundantly grown that it is the chief food of the cattle.

Dhanaula, tn., Brit. India, dist. Nábha. P. (1891) 7100; Hindus, 2800; Moham. 2300; Sikhs, 2000.

Dhanaurá, tn., Brit. India, NW. Provs., dist. Moradábád, 35 m. E. Meerut. P. (1881) 5300.

Dhandhúka, tn., Brit. India, Bombay, dist. Ahmadábád, 37 m. W. Cambay. P. (1881) 10,000; (1891) 9600; Hindus, 5700; Moham. 3500.

Dhaneswari, riv., Assam, flows N. then NE. into the Brahmaputra in 93° 42′ E. During the rainy season navigable by steamers to Golághát.

Dhangain, tn., Brit. India, Bengal, dist. Sháhábád, 57 m. NW. by W. Gayá. P. <5000.

Dhankuta, tn., Nepál, 60 m. W. by S. Darjíling.

Dhár, tn., Central India, cap. D. state, 35 m. W. by S. Indore, in 23° 36′ N., 75° 4′ E. P. (1881) 15,200; (1891) 18,400; Hindus, 13,900; Moham. 3400.

Dharampur, tn., India, cap. of D. native state, 111 m. NNE. Bombay. P. (1881) 5200.

Dhárangáon, tn., Brit. India, Bombay, dist. Khandesh, 120 m. S. by W. Indore, 32 m. ENE. Dhulia. P. (1881) 13,100; (1891) 15,100; Hindus, 11,600.

Dhárapuram, tn., Brit. India, Madras, dist. and 42 m. ESE. Coimbatore, a position of strategical importance in the campaigns with Haidar Alí and Tipú Sáhib. P. (1881) 7300; (1891) 7700; Hindus, 5900.

Dhárlwál, tn., Brit. India, Punjab, dist. and SW. of Gardaspur, on the railway to Amritsar; with woollen factory.

Dharma, tract of country, Brit. India, NW. Provs., in Kumáun dist., on the S. side of the main Himálayan range, crossed by 30¼° N. and 80⅔° E. **D. Pass,** leading into the Hundes, has an alt. of 15,000 ft.

Dharma Páls, city, India. See native state of **Kuch Behar.**

Dharmápuri, tn., Brit. India, Madras, dist. and 36 m. N. Salem. P. (1881) 7100; (1891) 6900; Hindus, 6000.

Dharmávaram, tn., Brit. India, Madras, dist. Anantápur, on Chitravati R., 75 m. SE. Bellary. P. (1881) 5900; (1891) 6800; Hindus, 5900.

Dharmkot, tn., Brit. India, Punjab, dist. Firozpur, 50 m. SSE. Amritsar. P. (1881) 6000; (1891) 6700; Hindus, 2400; Moham. 3200.

Dharmsála, hill stn., Brit. India, Punjab, cap. dist. Kángra, 95 m. NW. by W. Simla, connected by cart-road with Jalandhar. Occupies the site of old Hindu sanctuary or *dharmsála,* and has a monument to Lord Elgin, who died here in 1863. Alt. 4500–6500 ft. P. (1881) 5300; (1891) 6200; Hindus, 5500.

Dharur, tn., India, Haidarábád, 89 m. ESE. Ahmadnagar.

Dhárwár, tn., Brit. India, Bombay, cap. dist. D., 73 m. E. Goa. The dist. of D. is well adapted for the growth of American cotton, which was introduced here in 1842. D. is on the railway to the port of Marmagáo, and is the centre of a great trade (monopolised by the Lingáyats) in cotton, timber, and grain. P. (1872) 35,000; (1881) 27,200; (1891) 32,800; Hindus, 23,900; Moham. 7700.

Dhasán, riv., Central India, flows NE. then NNE. into the Betwa, its lower course forming the boundary between Jhánsi and Hamírpur dists., NW. Provs. Length, 220 m.

Dhaulágiri ('the white mountain'), mt., India, a peak of the Himálayas between Nepál and Tibet, in 29° 11′ N., and 82° 59′ E. Alt. 26,825 ft.

Dhaurahra, tn., Brit. India, Oudh, dist. Kheri, 80 m. N. by E. Lucknow. P. (1881) 5800; (1891) 5300; Hindus, 3500; Moham. 1700.

Dhenkánal, trib. state of Orissa, Bengal, crossed by 21° N., 85½° E. Area, 1463 sq. m.

Dheri Sháhan, vil., Brit. India, Punjab. Ráwal Pindi dist., in 33° 17′ N., 72° 49′ E., with remains extending over an area of 6 sq. m., identified by General Cunningham as those of the ancient *Taxila*, which is described by Arrian as the most populous city between the Indus and Hydaspes (Jehlam).

Dhibán, ruins, Palestine, *Dibon* in the O. T., 31° 29′ N., 35° 48′ E., 22 m. S. by W. the ancient *Heshbon*.

Dhola, tn. and rly. junc., India, Káthiáwár, 63 m. SW. by W. Cambay.

Dholera, former seapt., India, Bombay, dist. Ahmadábád, 25 m. W. by S. Cambay, now cut off from the sea by the silting up of its river; still an important seat of the cotton trade, giving name to a certain quality of cotton. P. (1881) 10,300; (1891) 10,100; Hindus, 7400.

Dholka, tn., Brit. India, Bombay, dist. Ahmadábád, 28 m. NNW. Cambay. P. (1881) 17,700; (1891) 16,500; Hindus, 11,200.

Dholpur, tn., India, Rájputána, 34 m. S. by W. Agra, near the l. bk. of the Chambal, cap. native state of D.; holds a fair for fifteen days in the latter part of October. P. (1881) 15,800.

Dhond, tn. and rly. junc., Brit. India, Bombay, dist. Poona, on Bhímá R., 45 m. E. by S. Poona. P. (1891) < 5000.

Dhoon, vil., Isle of Man, 5 m. S. by E. Ramsey.

Dhorájí, fortified tn., India, Káthiáwár, 80 m. NNW. Diu. P. (1881) 16,100; (1891) 20,400.

Dhor el Khodib, mt., Syria, one of the summits of the Lebanon, 20 m. SE. Tripoli. Alt. 10,625 ft.; snow-line, 9700 ft.

Dhrángadrá, fortified tn., India, Gujarat, 73 m. W. Ahmadábád; cap. of native state D. P. (1881) 12,300.

Dhrol, tn., India, Káthiáwár, 135 m. N. by W. Diu, cap. native state of D. P. (1881) < 5000.

Dhu, Loch, small lake, Scot., SW. Perthshire, SE. of Loch Chon, close to the Glasgow waterworks, with meteorological station, in 56° 14′ N., 4° 22′ W. Alt. 270 ft. Mean rfall. (1866–80), 82.7 in.

Dhubbooee, decayed tn., India. See **Dabhoi.**

Dhubrí, tn., Brit. India, Assam, dist. Goálpárá, on r. bk. of the Brahmaputra, 35 m. SE. by E. Kuch Behar; a stopping-place for Assam steamers. Alt. 115 ft. Mean temp., yr. 75° F., Jan. 63°, July 82°; rfall., yr. 93.5 in., May–Sept. 81.2 in. P. (1881) < 3000; (1891) 4800; Hindus, 2700; Moham. 1900.

Dhu Hearteach, lighthouse, Scot., off ct. of Argyllshire, on a rock in the Atlantic, 15½ m. SW. Iona; visible, 18 m.

Dhúliá, tn., Brit. India, Bombay, cap. dist. Khandesh, 128 m. E. by S. Surat; until the beginning of the present century an insignificant village. Since British occupation its growth has been steady, and it has recently developed a trade in cotton and linseed. Alt. 1000 ft. Mean rfall., yr. 21.9 in., June–Sept. 18.2 in. P. (1881) 18,400; (1891) 21,900; Hindus, 16,000.

Dhulipnagar, India. See **Edwardesábád.**

Dhundookha, tn., India. See **Dhandhúka.**

Dhúnn, comm., Prussia, Rhine Prov., govt. Düsseldorf, circle Lennep, dist. Wermelskirchen. P. < 3000.

Dhunourah, tn., India. See **Dhanowrá.**

Dhurbhangah, tn. India. See **Darbhangah.**

Dhurmsal, hill stn., Punjab. See **Dharmsála.**

Dhurrumpoor, a Rájput state, India. See **Dharampur.**

Dhúsan, riv., Bengal. See **Parwan.**

Dia, or **Standia,** small isl., Turkey, 6 m. off the N. ct. of the island of Crete, crossed by 25° 15′ E.

Diabat, Wady, riv., Morocco. See **Kseb, Wady.**

Diableret Peak. See **Alps,** SUBDIVISIONS, **II. B. 1.**

Diablo, Spanish, 'devil.'

Diablo, mt., U.S., California, S. side of Suisun Bay, 32 m. E. by N. San Francisco, with lignitic coal mines. Alt. 3856 ft.

Diablo Cañon, gorge, U.S., Arizona, Yavapai co., 167 m. SW. from the NE. corner of the terr.

Diablotin, Morne de, mt., on Dominica I., Windward Is. Alt. 5315 ft.

Diafarebe, inhabited isl. in the upper Niger, western Sudan, in 14° 10′ N., 4° 45′ W.

Diahot, principal riv., New Caledonia, flows NW. into the sea at Harcourt Bay; navigable 25 m. up. Length, 93 m. See **Balade.**

Diakophton, vil., Greece, prov. Elis and Achaia, 26 m. ESE. Patras. P. < 2000.

Dia'la, riv., Persia and Asiatic Turkey, flows first W. through the mountains in the W. of Persia, then SW. and finally SSW. till it enters the Tigris a few miles below Bagdad.

Dialakuru, tn., western Sudan, about 10° 55′ N., 8° 10′ W.

Diamant, cape, French W. Indies, on the SW. ct. of Martinique, in 14° 27′ N.

Diamante, riv., forming the S. boundary of Mendoza state, Argentine Republic, and becoming lost in the salt lagoons in the SE. of the state.

Diamante, tn., Argentine Republic, Entre Rios, on the l. bk. of Rio Paraná, 25 m. SSW. Paraná. P. 2000.

Diamantina, Diamentina, or **Mueller's Creek,** long riv., Australia, flows SW. through Queensland into S. Australia, in dry periods dries up in a stony desert, but in rainy seasons empties itself into the N. end of Lake Eyre through the Warburton R.

Diamantina, tn., Brazil, Minas Geraes, on the W. slope of the Serra do Espinhaço, 335 m. N. by W. Rio de Janeiro, with diamond mines. P. 14,000.

Diamantino, tn., Brazil, prov. Matto Grosso, 90 m. NNW. Cuyaba; diamond beds, formerly worked out. P. < 2000.

Diamente, comm., Italy, Calabrie, prov. Cosenza, on the W. ct., 65 m. S. Potenza. P. < 3000.

Diamentina. See **Diamantina.**

Diamond, vil., Canada, Ontario, Carleton co., 9 m. from Pakenham. P. < 1500.

Diamond, hamlet, Ire., 4 m. from Crumlin, co. Antrim, P.O.

Diamond, P.O., Ire., NE. co. Armagh, 5 m. W. Portadown.

Diamond, electoral div., Ire., co. Cavan, dist. Ballyconnell.

Diamond Butte, mt., U.S., Arizona, Mohave co., 45 m. ESE. from the NW. corner of the terr.

Diamond Creek, mining vil., Victoria, Evelyn co., 16½ m. NE. Melbourne. P. < 1500.

Diamond Harbour, port, Brit. India, Bengal, dist. 24 Parganás, at the head of the estuary of the Húglí, on the l. bk., 30 m. SSW. Calcutta, with which it is connected by a branch railway. In old times the anchorage of the Company's ships; since the introduction of steam, few vessels have to wait here for the tide. Now a telegraph station. P. < 5000.

Diamond Hill, post-tn., Victoria, Bendigo co., 96 m. N. Melbourne. P. < 1500.

Diamond Island, low-wooded isl., Burmah, in the estuary of the Bassein R., 12 m. SE. Cape Negrais. It abounds with turtles, and is the home-station of the Alguada Reef lighthouse establishment. Area, 1 sq. m.

Diamond Peak, mt., U.S., Oregon, Cascade Range, in the SE. of Lane co., 148 m. NE. of the SW. corner of the state. Alt. 8807 ft. (Wheeler).

Diamor, par., Ire., co. Meath, bar. Fore, 6 m. SE. Oldcastle; 5489 ac. P. < 250.

Diander, name of the Cape Verde Penin. and the adjoining dist., W. Africa.

Diano d'Alba, comm., Italy, Piedmont, prov. Cuneo, 27 m. E. Saluzzo. P. < 3000.

Diano, Val di, the upper part of the valley of the Tanagro, Italy, stretching about 20 m. NNW. to SSE., in the SE. of Campania.

Dnieper, properly **Dnyepr** (ancient *Borysthenes, Danapris* of the Romans, also *Eliel, Luosen,* and *Lerene* of mediæval maps), one of the chief rivs. of Russia in Europe, rises on Valdai plateau, in govt. Smolensk, within a short distance of the sources of both the Düna and the Volga; flows in a general direction southwards, and enters Black Sea. It becomes navigable at Dorogobuzh, and after having received the Pripyat and the Desna, becomes a large river, 470 yards wide, which flows past Kiev, making a great bend towards the E. Above Ekaterinoslav it attains a width of from 680 to 1750, and occasionally 2300 yards, and divides into several arms. Navigation is, however, impaired by numerous sandbanks and shallows, especially in periods of drought. Below Ekaterinoslav the D. pierces for 53 m. through a low granitic ridge, and has many rapids, which, though cleared to some extent, still offer great dangers to boats and rafts shipped down the river. From Alexandrovsk the D. suddenly bends south-westwards, and flows in a low and marshy or sandy valley, 4 to 12 m. wide, where the river, 600 to 900 yards wide, makes great bends. Sunken trees render navigation dangerous. It enters the Black Sea under 46° 30′ N. lat. and 32° 20′ E. long. by several branches in a wide *liman* or estuary, 15 m. below Kherson. Its chief tribs. are Berezina (r. bk.), Sozh (l. bk.), Pripyat and Teterev (r. bk.), Desna, Sula, Psiol, and Vorskla (l. bk.), all above the rapids. The D. has played a great part in the making of Russia before the Mongolian invasion (13th century), and in the life of Little Russia at a later period. The towns Dorogobuzh, Smolensk, Moghilev, Kiev, Kremenchug, Ekaterinoslav, Kherson, and many smaller ones, are situated on its bank. The D. is united by canals with the Vistula, the Düna, and the basin of the Volga. A considerable navigation is carried on on the D. and its numerous tribs. —no less than an average of 1,250,000 tons of corn, timber, hemp, and various goods being loaded every year on its banks, and 1,400,000 tons on its tribs. Length, 1334 m.; area of basin, 202,200 sq. m.

Dniester, properly **Dnyestr** (ancient *Danaster* or *Danastris,* Turkish **Turlia,** Roumanian **Nistrul**), riv., Austria and Russia, rises in Galicia, on NE. slope of Northern Carpathians (Beskid), near to Sambor, as also near to the sources of the San, trib. of the Vistula, at an alt. of 3000 ft.; flows towards SE. through Galicia and Bukovina, then enters Russia and makes frontier between Bessarabia in the W., Podolia and govt. Kherson in the E. Enters Black Sea in the estuary (*liman*) of same name. Its course is very rapid (alt. 730 ft. at Halicz), and its average width is from 180 to 350 yards, depth from 3 to 17 ft. Its cross-section and rapidity, however, decrease as it flows through the Steppes on approaching the Black Sea. High water twice a year, in the spring and the summer, its rise being considerable each time. About Yampol it crosses the granite ridge of South Russia, and has rapids which render navigation dangerous without preventing it. Its valley is thickly peopled, and the towns of Sambor, Halicz, and Zaleszczyki (Austrian), Khotin, Kamenets Podolsk, Mohilev, Soroki, Yampol, Dubosary, Grigoriopol, Kishinev, Bendery, Tiraspol, Mayaki, Akerman, and Ovidiopol are on or near its banks. It receives many tribs., but none is considerable—the Stryj, Strypa, and Seret, all in Austria, being the chief. The D. is a very important channel for shipping timber from Galicia, and corn from the fertile provs. of SW. Russia—Odessa (28 m. NE. of its mouth, and connected by rail with Bendery on lower D.) being the chief port of the valley of the D. Part of the goods shipped is, however, sent also to Akerman, situated in the estuary. Total length, 853 m. (403 m. in Galicia); area of basin, 16,510 sq. m.

Dnyeprovsk, tn., Russia, govt. Taurida, dist. Melitopol, 110 m. NE. Kherson, 12 m. from Dnieper. P. 8200.

Dnyeprovsko-Bugskiy, also **Korolevskiy,** canal, Russia, govt. Grodno, connects Mukhovets R., belonging to basin of Vistula, with Pina, basin of Dnieper. Length, 50 m.

Do, Korean suffix, 'province,' in names of provs. often omitted.

Doáb (*Dudb,* 'two rivers'), the term applied in India to a tract enclosed between two rivers which flow nearly parallel to one another before meeting, as the Great D., between the Ganges and the Jumna, from the Siwálik range south-eastward.

Domini'ca, or **Domenica,** Brit. W. India isl., Leeward group, lat. (Roseau harbour) 15° 18′ N., long. 61° 24′ W., 22 m. N. Martinique and S. Guadeloupe, and included in the federation of the Leeward Is. It is of volcanic origin, and the most elevated of the Lesser Antilles, the extreme height (Morne Diablotin) 5315 ft. It is in part mountainous and rugged, though interspersed with fertile valleys, and well watered. Hot and sulphurous springs abound. Lava is found in great quantities. Soil fertile, and well suited for coffee and sugar, cacao, limes, spices, and oils; other products are maize, timber trees, and cabinet wood. Hogs, poultry, bees, and game are plentiful. Principal harbours: Roseau on the W., and Prince Rupert Bay on the N. coast. Value of imports, £50,000–60,000; of exports (principally sugar, lime-juice, coffee, and cacao), £40,000–60,000. The legislative assembly is composed of a president and seven nominated and seven elected members. A fine bridge has been made across the Roseau R. Chief towns, Roseau (the cap.), and St. Joseph. It was discovered by Columbus in 1493, settled by the French about 1750, ceded by France to Great Britain in 1763, captured by the French in 1771, and again ceded to the British in the peace of Versailles in 1783. Length, N. to S., 29 m.; breadth, 10 m.; area, 291 sq. m. P. (1871) 27,178; (1881) 28,200; (1891) 26,800 (principally natives, the whites mainly French, about 300 aboriginal Caribs). See **Roseau.**

Don, or *Dun,* Celtic, 'hill-fort.'

Don, Ossetian 'stream.'

Don, small riv., Eng., Durham, flowing into the estuary of the Tyne at Jarrow.

Don, riv., Eng., in the NE. of Lancashire, trib. of R. Calder, which it joins on the l. bk. at Burnley.

Don, or **Dun,** riv., Eng., Yorkshire, W. Riding, rises on Wike Head, on the S. border of the Holmfirth div., and flows first E. then SE. to Sheffield, then past Rotherham and Doncaster, and finally joins the Ouse at Goole by an artificial cutting known as the Dutch R., having been carried out in 1625 and the following years by a Dutch engineer named Vermuiden. Previously to this the Don spread its waters over the areas now occupied by Thorne Level and Hatfield Chase, then consisting largely of swamps dotted with numerous pools, and finally the surplus waters entered the Trent at Adlingfleet. The river has been made navigable for boats drawing 6½ ft. to Tinsley, on the outskirts of Sheffield (*q.v.*), and is connected with Barnsley by the Dearne and Dove Canal, with the Trent by the Stainforth and Keadby Canal. Total length, 55 m.; area of basin, 600 sq. m. The **Little D.** is a head stream of this river, which joins the main stream on the r. bk. at Deepcar.

Don, riv., France, dep. Loire Inférieure, flows W. into the Vilaine. Length, 53 m.

Don, riv., SE. Russia, rises in govt. Tula (alt. 586 ft.), flows S., then describes a great winding towards the E., approaching the Volga (near Tsaritsyn), from which it is only separated by a range of hills, 55 m. wide; then turns SW. and WSW., and enters at the head of the Sea of Azov. Throughout its course it waters the fertile govts. of Ryazan, Tambov, Orel, Voronezh, Don Cossacks, and Ekaterinoslav; only in its lower course it has on its l. bk. the arid steppes of the Manych depression, while its r. bk. is covered with rich vineyards. The D. receives a great many tribs., of which the Krasivaya Mecha and Sosna (r. bk.), Bityug, Khoper (with Vorona), and Ilovlya (l. bk.), Chir and N. Donets (r. bk.) bring the D. into communication with most fertile parts of SE. Russia, while the Sal and Manych (l. bk.) water the Kalmuck Steppes of the Don Cossacks' Territory. The D. becomes navigable at Voronezh after having received the Sosna, and attains a width of from 200 to 350 yards, with a minimum depth of 4 ft. in its middle course, and of 600 yards in its lower course. Before entering the Sea of Azov it sends a long branch, Aksai, and divides into some thirty branches (*ghirla*) in its delta. Great inundations take place at high water. The D. in its middle course freezes, as a rule, in the very first days of December, and opens in the very last days of March, thus remaining free from ice for an average of from 241 to 246 days, and for 268 days at Rostov, near its mouth. The navigation on the D. is of a great importance for all SE. Russia, especially on account of its proximity to the Volga. Considerable amounts of goods (nearly 450,000 tons of corn, timber, naphtha, and so on) are transported every year from Tsaritsyn on the Volga to Kalach on the D., and thence shipped down the D. to Rostov and Taganrog for export, while part of these goods is sent up the D. to central Russia; foreign imported goods are shipped at the same time up the D. to

Kalach and thence forwarded to the Volga. Sandbanks and low water in summer offer considerable difficulties for navigation. In its upper parts the D. is connected by a canal with the Oka, large trib. of the Volga. On the average, 4000 to 5000 boats and 1200 rafts are loaded every year in the basin of the D., and nearly 550,000 tons of various goods are shipped—the chief ports being Rostov at the head of the delta, Taganrog on the Sea of Azov, Kalach, and Uryupina. The towns Epifań, Dankov, Lebedyań, Voronezh, Korotoyak, and many smaller ones, as well as many populous *stanitsas*, are situated on its banks. The fishing in the lower parts of the D. is of great importance—nearly 6000 cwts. of salmon, 7,000,000 herrings, and 300,000 cwts. of various fish being caught, and nearly 300 cwts. of caviare being exported. Total length, 1153 m.; area of basin, 166,130 sq. m.

Don, riv., Scot., co. Aberdeen, rises in Ben Aven, flows tortuously E. past Towie, Alford, Monymusk, Inverurie, and Kintore, and enters the N. Sea 1½ m. N. Aberdeen, after a course of 62 miles. Principal trib. the Urie; it has valuable salmon fisheries.

Joint Rly., and the M. S. & L. R.; locomotive and carriage works of the G. N. R., also iron and brass foundries, and agricultural implement works. Market-days, Tu. and S. Has fairs for horses and cattle on the first Thursday of February, April, and August, for cattle and hiring on that of November. The races for which it is noted were established here in 1703; the St. Leger stakes, for three-year-olds, in 1776. Mean rfall. (1866–80), 27.3 in. Mun. bor. P. (1801) 5700; (1851) 12,100; (1891) 25,900; parl. div. P. 73,000.

Donchery, tn., France, dep. Ardennes, on r. bk. of the Meuse, arr. and 3 m. W. Sedan. Part of the battle of Sedan, Sept. 1870, was fought around D. P. <2000.

Don Cossacks, Territory of the (*Zemlya Voiska Donskago*), prov. of SE. Russia, stretching from the Sea of Azov up the Don R. and its tribs., having the govts. of Ekaterinoslav, Kharkov, and Voronezh in W., Saratov and Astrakhań in E., Stavropol and Kubań in S. The terr. in the E. of the Don R. belongs to the Aral-Caspian deserts, both by its general aspects and flora. Elsewhere, undulating low plateaus, attaining altitudes of about 500 ft. in their higher parts, and having a hilly aspect in the Donetskiy plateau, very fertile, but almost quite devoid of forests, which only appear along the courses of the rivers. Coal, anthracite, iron ores; salt in many lakes in the E.,

especially in Lake Manych; limestone, gypsum, mica, and pyrites. Watered by the Don and its several navigating tribs. Agriculture and cattle breeding are carried on very extensively, and considerable amounts of corn and cattle are exported through the ports of Taganrog, Rostov, and Mariupol. Excellent breeds of horses reared by the Cossacks. Good orchards; vine culture in the S. Fishing is one of the chief sources of income of the Cossack *Voisko*, more than 300,000 cwts. of various fish being caught every year in the mouths of the Don. Part of it is exported fresh, the remainder is salted, salt being extracted for all local needs from the Manych salt-lakes. Mining has rapidly developed lately; manufactures are beginning to develop. Considerable trade in cattle, hides, sheepskins, wine, grapes, corn, linseed, fish, and coal exported. The fairs (chiefly at Uryupina) are very animated. The terr. almost entirely belongs to the *Voisko* (or army) of Don Cossacks, who have a separate self-government and a military organisation of their own (**Russia**); however, there are nearly 300,000 peasants settled in the terr. The Cossacks are living in large villages (*stanitsas*) of more than 1000 inhabitants, some of them being very populous. Some 30,000 Kalmucks are settled in the SE. corner of the terr. Divided into 9 districts: Cherkask (chief town, Novocherkask, cap. of terr.); 1st. Donskoi (chief town, Konstantinovskaya); 2nd. Donskoi (chief town, Nizhne-Chirskaya); Ust-Medvyeditsa (chief town same name); Donets (chief town, Kamenskaya); Salsk (chief town, Salskaya Martynovka); Khopersk (chief town, Uryupina); Rostov (chief town, same name); Taganrog (chief town same name); and Kalmuck dist. The state of education is in good condition, many schools, primary and secondary, being kept by the Voisko. Area, 63,557 sq. m. P. (1858) 896,870; (1888) 1,683,330.

Dondo, Cape, Eastern Archipelago, on the N. ct. of Celebes, in about 120½° E.

Dondo, tn., Portuguese W. Africa, on the r. bk. of the Kwanza, a few miles below the Livingstone Falls, in 9° 23′ S., 14° 48′ E., the principal centre of trade in this part of the interior. A macadamised road leads from D. to a large plateau on the E. Coal-mine on the opposite bank of the river.

Dondra Head, the most southerly point of Ceylon.

Donegal, maritime co., Ire., Ulster, in the NW., bounded W. and N. by the Atlantic, E. by cos. Londonderry and Tyrone, and S. by cos. Fermanagh and Leitrim, is divided into the following baronies:—

Baronies.	Acres.	Pop. 1891.
Banagh	177,354	26,263
Boylagh	156,285	20,637
Inishowen East	123,372	24,648
Inishowen West	76,849	12,043
Kilmacrenan	310,386	46,621
Raphoe North	79,422	16,063
Raphoe South	140,849	18,999
Tirhugh	125,753	20,361
Total, Donegal	1,190,270[1]	185,635

[1] Exclusive of 6885 ac. under larger rivers, lakes, and tideways.

The surface is in a large measure mountainous (in the NW., 2466 ft.) and boggy, with numerous small rivers and lakes, and cold poor soil. Geologically the rocks are mainly archæan and metamorphic and of Lower Silurian age, with a large area of granite in the W. The coast is indented by numerous bays, of which the principal, beginning in the NE., are Loughs Foyle and Swilly, Mulroy Bay, Sheep Haven, Gweedore, Trawenagh, Loughros More and Donegal Bays. The chief rivs. are the Foyle, which forms part of the boundary between D. and Tyrone and Londonderry, and its l. bk. trib. the Finn, which, flowing E., joins the Foyle at Lifford. The islands are numerous, the largest being Aran, Tory, and Gola Is. There are no minerals of great economic importance, and the inhabitants are mainly engaged in agriculture. (For statistics see **Appendix,** pp. 10–12.) The county contains some of the most severely congested dists. of Ireland, the principal being Glenties, Gweedore, and the Rosses, the last a granitic area on the mainland to the SE. of Aran I. With a view to relieve the congestion, the royal commission on public works of 1887 recommended the construction of light railways. The principal railways are those from Londonderry to Stranorlar, Letterkenny, and Buncrana. There is a line of light railway from Stranorlar to Donegal, and this has been continued to Killybegs; and another line of light rail from Stranorlar to Glenties is now (Oct. 1893) nearly complete. The linen manufacture is now reviving, and woollen manufactures are also now largely carried on, most largely in the town and neighbourhood of Raphoe. The D. Industrial Fund has done much for the promotion of home industries, especially in wool (hosiery and the weaving of woollen cloth). The female pop. is engaged in the worked muslin trade. The fisheries, which occupy large numbers of people on the coast, are of cod, sole, plaice, herring, and mackerel. For their promotion the above-mentioned commission recommended the construction of harbour works at Moville, Malin Head, Buncrana, Sheephaven, Tory I., Gola Roads, Burton Port (opposite Aran I.), and Killybegs. Kelp manufactured from seaweed is largely exported to Glasgow. The NW. of the county, in consequence of the grandeur of the scenery, is becoming a favourite resort for tourists. The county returns four members to Parliament, for the N., S., E., and W. divisions respectively. D. contains many memorials of St. Columba; St. Patrick's Purgatory is on an island in Lough Derg, and is a celebrated place of pilgrimage. See **Ireland,** table.

Donegal, par. and tn., Ire., S. ct. co. D., bar. Tirhugh, on R. Eask, 11 m. N. by E. Ballyshannon, with a stn. on the G. N. and Donegal Rly. It has two famous ruins, a castle and abbey, both founded by the O'donells, chiefs of Tyrconnell, in 1474. Par. 22,791 ac., P. <4500; tn. P. <1500.

Dorchester, tn., U.S., Massachusetts, Suffolk co., now in Boston City. P. 18,000.

Dordogne, dep., in the SW. of France, formed out of Périgord, one of the dists. of the ancient govt. of Guyenne; divided into five arrs., Périgueux, cap., Bergerac, Nontron, Ribérac, and Sarlat. The surface presents a succession of plateaux and hills, none however worthy the name of mountains. The highest points (up to 1570 ft.) are in the N. of the dep., in a chain overlooking the upper waters of the Dronne. This dist. is of granitic formation, with clayey soil, abounds in marshes, moorland, heath, chestnut woods, and meadows, but cold and poor in good arable soil. South of the dist. round Nontron stretch chalk and limestone plateaux, and arid hills, adapted to vineyards and copses; the valleys, however, are admirable. The extreme W. is occupied by the Double, a vast forest in which the clearings are constantly extending. Nearly the whole of the dep. belongs to the basin of the D., which receives the Vézère, from dep. Corrèze, and the Isle (navigable from Périgueux), which flows through the most central valley of the dep., and receives as chief trib. the Auvezère. The Dropt, or Drot, a direct trib. of the Garonne, partly bounds the dep. on the S., and is navigable from Eymet. The D. is navigable, or so reputed, throughout the dep., and by means of the Canal de Lalinde boats may avoid the rapids which occur above Bergerac. The climate of D., except in the Double, where marsh miasmas prevail, is very healthy. [**Périgueux.**] Principal cereals wheat; maize area also considerable (one-fourth to one-third of that of wheat). The vine occupies about 1.5 per cent. of surface; production per acre under average. Production of chestnuts by far the largest of any dep. The principal mineral riches of the dep. are its iron-mines; manganese was worked for the first time in France at St.-Martin-de-Fressengeas near Thiviers. Porcelain earth is obtained at Montagnac, and in other dists. granite, marble, and mill-stones (the last near Domme). Area, 3561 sq. m. P. 478,500. See **France,** table.

Dordogne, riv., France, formed at the foot of Mont Dore by the junction of the Dor and Dogne, flows W. through deps. Corrèze, Lot, D., and Gironde, and after a course of 260 m., of which 167 are navigable, joins the Garonne 13 m. N. Bordeaux; affluents, the Vezère and Isle. Discharge at low water at Bergèrac, above the confluence of the Isle and Dronne, 1270 cubic ft. per second (as against 1305 cubic ft. per second discharge of the Garonne at Tonneins); at extreme high-water, 141,000–176,500 ft. per second.

Dordon, eccles. par. and hamlet, Eng., Warwickshire, 3 m. NW. Atherstone, P.O. See **Polesworth.**

Dordrecht, municip., Cape Colony, Wodehouse dist., to the N. of the Stormbergen, about 125 m. NNW. of East London. Alt. 5500 ft. P.<1500.

Dordrecht, formerly spelt also **Dortrecht,** and popularly called **Dort,** or **Dordt,** seapt. tn., Holland, prov. S. Holland, on the l. bk. of the Maas, 10 m. SE. Rotterdam. In the middle ages one of the chief trading towns of the Netherlands, and still an important seat of trade, manufactures, and shipping; cut off from the mainland by the inundation of the Biesbosch (Nov. 18, 1421). D. was the original residence of the Counts of Holland, and the place where, in 1572, the independence of the United Provinces was first declared. The Synod of D., which anathematised the doctrines of Arminius, and was productive of much intestine disturbance in the Netherlands, was held here in 1618 and 1619. P. 32,600.

Doré, lake, Canada, in the N. of Saskatchewan, 25 m. long by 14 m. broad, crossed about the middle by 106½° W., drained by the Doré R. into the Beaver.

Dore, tn., Eastern Archipelago, in the NW. of New Guinea, on the W. side of Geelvink Bay, at the mouth.

Dorset, a maritime co. in the SW. of Eng., between Hants and Devon, belonging wholly to the diocese of Salisbury, cap. Dorchester; other chief towns, Poole, Weymouth, Bridport, Lyme Regis, and Sherborne, divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Northern	167,489	45,763
Eastern	179,144	57,217
Southern	94,664	49,896
Western	190,975	41,641
Total[1] . .	632,272	194,517

[1] The ancient and administrative county are co-extensive.

The surface is uneven but not mountainous; its most characteristic feature are the open downs which supply excellent pasturage to large quantities of sheep. This range of chalk hills or downs enters the county in the NE., and runs SW. and W. to Lyme Regis. It is succeeded on the NW. and SW. by Oolites (to which the Bill of Portland in the S. belongs), and these again are followed in the W. by Liassic rocks. On the SE. the chalk is succeeded by Eocene and Oligocene formations, and all the formations mentioned, except the Lias, succeed one another from N. to S. in the Isle of Purbeck, to the S. of Poole harbour. Besides this harbour the principal feature of the coast is the long line of shingle known as Chesil Bank, terminating in the Bill of Portland, to the N. of which a sheltered roadstead has been made by the construction of a breakwater. The bank consists of blue clay, covered with pebbles of spar, quartz, jasper, &c., to a depth of from 4 to 6 ft. The county is watered by the Stour, which flows SE. through the county into Hants, and the Frome and Piddle flowing SE. then E. into Poole harbour. For agricultural statistics, see **Appendix,** pp. 7–9. Dairy husbandry is carried to perfection, and Dorset butter is much esteemed. The manufactures are unimportant. The chief mineral productions are the celebrated Purbeck and Portland building-stones, coarse marble, and clays; pipe-clay being found at Wareham, marl at Wrexham, fireclay at Poole and Corfe Castle. Oil-shale is mined at Kimmeridge. The principal railways are the L. & SW. R., and the G. W. R., or lines worked in connection with these. Remains of colossal reptiles have been found at Lyme Regis; there are numerous barrows, cromlechs, rings, &c.; the ruins of Corfe Castle, a seat of the Saxon kings of Wessex, are among the finest in England. Anciently the county was inhabited by the *Durotriges* (Celtic, 'water-dwellers'), called by the Saxons *Dorsaetan,* the second part of which latter name is derived from the Anglo-Saxon *sæt* or *set,* 'a camp, settlement.' The county formerly gave the title of marquis to the Beauforts and Greys, and that of earl to the Sackvilles. See **England,** table.

Double Island, small isl., about 12 m. S. Amherst Point, Tenasserim, Lower Burma, with lighthouse, visible 19 m.

Double, or **Maluti Mountains.** See **Basuto-land.**

Doubs, the ancient *Dubis*, riv., France, rises in the Jura, at the S. extremity of the dep. D., flows first NE. Morteau, and then flowing through a very deep gorge between calcareous rocks, separates France from Switzerland, afterwards flows on the whole SW. through the N. and W. of dep. D., passing St. Hippolyte, Besançon, and Dôle, where its natural navigation commences, and joins the Saône on the left at Verdun-sur-Saône. Chief affluent the Loue. Near Morteau it forms a cataract 88 ft. high. From Vougeaucourt, SW. of Montbéliard, to Dôle, a distance of 53 m., it forms a section of the Rhone and Rhine canal. Length, 270 m.

Doubs, E. frontier dep., France, formerly part of the duchy of Burgundy, afterwards of the Franche-Comté (*q.v.*), bounded in the NE. by the German dist. of Alsace; divided into four arrs.—Besançon (the cap.), Baume-les-Dames, Montbéliard, and Pontarlier. The dep. is mountainous, traversed by four chains of the Jura, running parallel to each other, and decreasing in altitude as they recede from the Swiss frontier, namely from SE. to NW., the culminating point in the easternmost chain being the Mont d'Or (4800 ft). The natural divisions, or zones, are three, the plains (almost everywhere, however, above 500 ft. in height), between the Ognon (W. frontier) and Doubs, a dist. rich in cereals (principally wheat and oats), fruit-trees, and vineyards (for climate, see **Besançon**), the middle region a zone of moderate elevation (up to 2300 ft.), covering the central portion of the dep. with pastures, and the upper region, or region of plateaux. The minerals are unimportant apart from building-stones and rock salt (produced at Arc, Miserey, and Chatillon-le-Duc). Manufactures include iron-works, blast-furnaces, watch and clock-making [**Besançon**], and bell-founding. Montbéliard, the fort of Joux, and Besançon are fortified places. Area, 2052 sq. m. P. 303,100. See **France,** table.

Doulus Head, cape, Ire., SW. ct. co. Kerry, at the S. entrance to Dingle Bay.

Dounby, hamlet, Scot., Orkney Is., Mainland, 7 m. from Finstown, PT.O.

Doune, vil., Scot., W. Perthshire, on the Teith, 7 m. SE. by E. Callander, 3½ m. W. Dunblane, on the C. R.; once famous for its manufacture of Highland pistols and sporrans. PMT.O. Mean rfall. (Lanrick Castle, 3 in. WNW., 1866–80), 47.31 in. P. <1000.

Dour, tn., Belgium, prov. Hainaut, 9 m. WSW. Mons, with coal mines. P. (of comm.) 10,600.

Doura, mining vil., Scot., N. Ayrshire, 2½ m. NE. by N. Irvine, 1½ m. NW. by W. Cunninghamhead stn.

Dourbie, riv., S. France, deps. Gard and Aveyron, flows W. into the Tarn, just above Millau. Length about 43½ m. See **Causses.**

Dourdan, tn., France, dep. Seine et Oise, arr. Rambouillet, 20 m. SSW. Versailles, 10 m. NW. Étampes. P. <4000.

Dourdou, two rivs., France, dep. Aveyron. The **North D.** flows from SE. to NW., and enters the Lot on the l. bk. The **South D.** rises in dep. Tarn, and enters the Tarn R. on the l. bk. after a NW. course of 56 m.

Dourgne, vil., France, dep. Tarn, arr. and 10 m. SW. by S. Castres. P. <2000.

Douro, Spanish **Duero,** ancient *Durius,* 'water,' riv., Spain and Portugal, rises in the prov. Soria (Spain), flows first S. past Soria, then generally W. through Léon to Miranda, passing Toro and Zamora, then turns SSW., forming the boundary between Spain and Portugal, and, lastly, again W.; and having divided the Portuguese provs. Tras-os-Montes and Beira, and intersected the prov. Oporto, enters the Atlantic at São João da Foz, 3 m. W. Oporto. Total course estimated at 485 m. Its basin, between the Asturian Mts. N., and the Sierras Guadarrama and Estrella, is the most extensive of the Spanish penin., but its course is chiefly through narrow and craggy valleys. Chief tribs., the Pisuerga, Elsa, Eresma, Tormes, and Tavora. About 58 m. E. of Oporto commences the wine country of the D. Area of basin, 36,700 sq. m. (Strelbitsky).

Douro, North, vil., Canada. See **Lakefield.**

Dousland, stn., Eng., Devonshire, Tavistock div., on the G. W. R., 9 m. NNE. Devonport.

Dousse-alin, or **Little Khingan.** See **Bureya Mountains.**

Doustre, riv., France, dep. Corrèze, joins the Dordogne near Argentat after a S. course of 25 m.

Douthstown, Ire. See **Dowdstown.**

Douty, settlement, U.S., Washington, Pierce co., 38 m. E. Olympia.

Douvaine, tn., France, dep. Haute Savoie, arr. Thonon-les-Bains, 11 m. NE. Geneva. P. <2000.

Douve, riv., France, dep. Manche, enters the English Channel at Carentan, after a SE. course of 30 m. Navigable for small boats from St. Sauveur, 19 m.

Douvres, vil., France, dep. Calvados, arr. and 8 m. N. by W. Caen. P. <2000.

Doux, riv., France, dep. Ardèche, joins the Rhone near Tournon after a SE. then NE. course of 25 m.

Douze, riv., France. See **Midouze.**

Dovadola, tn., Italy, prov. Florence, 10 m. SW. Terra-del-Sole, on the Montone. Near here commence the Miocene deposits, which form precipices behind the vil., and from which issue the celebrated mineral waters of Castro-Fara. P. <3000.

Dove, riv., Eng., rises on Axe Edge, Derbyshire, forms the greater part of the boundary between Derbyshire and Staffordshire, and falls into the Trent on the l. bk. at Newton Solney. It is not navigable.

Dove, riv., Eng., Yorkshire, N. Riding, Whitby div., rising on Burton Howe and flowing to the Rye, which it joins on the l. bk. 5 m. NW. of Malton.

Dovea, tnld., Ire., co. Tipperary, bar. Eliogarty, 4 m. NW. Thurles, P.O. P. <250.

Dovebridge, Eng. See **Doveridge.**

Dove Canal, Eng., Yorkshire. See **Dearne and D. Canal.**

Dovecliffe, hamlet, Eng., Yorkshire, W. Riding, div. and 3 m. SE. Barnsley, on the M. S. & L. R.

Dove Dale, the upper part of the valley of the Dove, Eng., Derbyshire and Staffordshire.

Dove Holes, stn., Eng., Derbyshire, on the L. & N. W. R., 3½ m. NE. by N. Buxton. PM.O.

Dovenby, par., Eng., Cumberland, Cockermouth div., 4½ m. ESE. Maryport, 1 m. N. by E. Papcastle stn. P. <250.

Dover, settlement, Canada, New Brunswick, co. Westmorland, on R. Petitcodiac, 10 m. from Moncton.

Dover, the ancient *Dubris,* from Celtic *Dwyffyrha,* 'a steep place,' parl. bor. (1 member), mun. bor., cinque port, and market-tn., now also a favourite watering-place, Eng., co. Kent, St. Augustine div., on the NW. side of Dover Strait, at the terminus of the SE. R. and L. C. & D. R., the latter of which has two stns. (**Dover Priory** and the **Harbour**), 66 m. (76 m. by rail) ESE. London, 21 m. from Cape Grisnez, on the opposite side of the English Channel, and 25 m. NW. by W. Calais. Lat. of castle 51° 7′ 8″ N., long. 1° 19′ 5″ E. It is situated in a notch of the chalk cliffs which here form the coast-line, the notch running 2 or 3 m. inland north-westwards, and traversed by the highroad to Canterbury and the L. C. & D. R., the SE. R. entering the town from the SW. through a tunnel cut in the cliffs. On the chalk downs, N. of the town, are the castle (alt. 469 ft.), formerly the seat of administration of the Cinque Ports, citadel, and several strong detached forts, with large barracks. The castle is a collection of formidable works, occupying 35 ac., containing Roman and Saxon towers, a keep forming a bomb-proof magazine, and barracks for 2000 men. The opposite heights are also fortified. The town has a museum and philosophical institution belonging to the corporation. The harbour comprises two docks (the Granville and the Wellington) and a tidal basin, 145 ft. wide at the entrance, 16 ft. deep at high water ordinary neap, 21 ft. at spring tides. An Admiralty pier, begun in 1848, and designed to form the W. arm of a harbour of refuge, which, when completed, is to enclose an area of 520 ac., has at its sea end a turret fort armed with two eighty-two ton guns. The E. arm was begun in 1892. There is a patent slip 600 ft. long, with 500 tons lifting power. The principal traffic is that connected with the transit to the continent, the D.-Calais route having the shortest sea-passage (by the quickest steamers about 60 minutes in time). There is a large import of eggs and other rural produce from France, and a coasting trade and fishery. For port statistics, see **Appendix,** p. 13. Shipbuilding and rope and sail making are carried on. Market-days, T., Th., and S. Mean temp. (19 yrs.), yr. 49.6° F., Jan. 39.7°, Aug. 62.0°; rfall. (25 yrs.), 27.84 in. Par. P. 13,900; mun. and parl. bor. P. (1851) 22,200; (1871) 28,500; (1891) 33,300 (exclusive of 5000 military). See **Calais.**

Dover, Tasmania. See **Port Esperance.**

Dover, tn., U.S., Delaware, Kent co., on St. Jones Creek, 40 m. S. Wilmington. P. <4000.

Dover, tn., U.S., Massachusetts, Norfolk co., 14 m. SW. by W. Boston. P. <1500.

Dover, city, New Hampshire, Strafford co., 33 m. E. Concord, 10 m. NNW. Portsmouth, on Cochecho R., at the head of navigation for schooners of 400 tons, and at the lower falls of the river, which here descends 32 ft., affording water-power utilised in cotton factories and print-works. Water-power also afforded by the Bellamy, on which are large woollen mills. P. (1880) 11,700; (1890) 12,800.

Dover, formerly **Canal Dover,** vil., U.S., Ohio, Tuscarawas co., 52 m. NW. Wheeling (W. Virginia). P. <4000.

Dover, tn., U.S., Maine, Piscataquis co., on R. Piscataquis, 33 m. NW. by W. Bangor. P. <2000.

Dover, Strait of, French **Pas de Calais,** ancient *Fretum Gallicum,* the strait which separates England and France, and connects the English Channel with the North Sea. It extends from Dungeness and Cape Grisnez, in a NE. direction, to the S. Foreland and Calais (*q.v.*). Length, 22 m.; narrowest breadth, 21 m.

Down, a maritime co., Ire., Ulster, in the E., bounded N. by co. Antrim and Belfast Lough, S. and E. by the Irish Sea, and W. by co. Armagh, is divided into the following baronies:—

Baronies.	Acres.	P 1891.
Ards, Lower	38,454	21,564
Ards, Upper	29,706	10,164
Castlereagh, Lower	51,714	27,256
Castlereagh, Upper	53,888	20,031
Dufferin	17,215	6,030
Iveagh, Lower, Lower Half	46,040	17,003
Iveagh, Lower, Upper Half	47,573	23,273
Iveagh, Upper, Lower Half	96,305	24,102
Iveagh, Upper, Upper Half	63,301	22,997
Kinelarty	40,325	10,947
Lecale, Lower	30,976	6,459
Lecale, Upper	30,700	10,973
Newry, Lordship of	16,182	12,337
Mourne	47,878	10,872
Belfast City, part of	1,669	43,051
Total	611,927[1]	267,059

[1] Exclusive of 492 ac. under larger rivers, lakes, &c.

The surface is mountainous in the S., where are the Mourne Mts. (**Slieve Donard,** 2796 ft.), while the other parts are undulating and hilly, with fine meadows along the rivers, of which the chief are the Lagan in the N., flowing into Belfast Lough at Belfast, and which forms part of the boundary between D. and Antrim, and the Bann in the S. The principal indentations of the coast, besides Belfast Lough on the N. and Carlingford Lough on the E., are Strangford Lough and Dundrum Bay. Geologically the county is mainly composed of Lower Silurian rocks, with patches of granite in the SW., and Permian or Triassic deposits along the lower Lagan. The Newry canal admits vessels of 13½ ft. draught to Newry, and of 5 ft. to Portadown in Armagh, where it unites with the Bann and Lough Neagh navigation, and through that with the Ulster canal. The principal railway is the Belfast and Co. Down Rly., whose main line runs from Belfast to Downpatrick, and has connections with Bangor, Donaghadee, Ballynahinch, and Newcastle. In the W. of the county a line connected with the G. N. R. runs to Ballyroney. For agricultural statistics, see **Appendix,** pp. 10–12. There are no minerals of economic importance. The chief manufacture is linen, especially of the finer sorts, which is carried on in the houses of the small farmers; there are flax, cotton, and woollen mills, and manufactures of leather, hosiery, &c. The county returns four members to Parliament (for the N., S., E., and W divs. respectively), besides one for the borough of Newry. The population is decreasing. See **Ireland,** table.

Draa, Wadi, riv., or rather watercourse containing a river in times of rain, or when the snow melts on the mountains, in the W. of the Sahara. It rises by two headwaters, the Wady Idermi and the Wady Dades, on the S. slopes of the High Atlas, the Idermi flowing from the NW. and meeting the Dades (from the NE.) in about 30° 50′ N., 6° 17′ W., immediately after which the valley breaks through the Anti-Atlas and the Jebel Bani in a south-easterly direction, passing a number of oases, the principal of which is Tamgrut. It then flows WSW., expanding a little below the turning point into the large sandy plain (in high water a shallow lagoon) known as Ed Debaia, and finally joins the ocean in 28¾° N.

Draband Pass, a pass across the Suláiman Mts., about 25 m. S. of the place where the mountains are crossed by the Gumal R. *Proc. R. G. S.*, 1879, p. 55.

Dre'panon (Greek, 'a sickle'), cape, on the N. ct. of Crete, 15 m. NE. Kanea, with lighthouse, visible 15 m., in 24° 15′ E. Pronounced and frequently spelt *Drepano.*

Drepanon, cape, Turkey, Macedonia, forms the S. extremity of the central penin. of Chalcis.

Drepanon, cape, Greece, prov. Elis and Achaia, on S. side of the strait connecting the Gulf of Corinth with the Gulf of Patras.

Dresden, vil., Canada, Ontario, Kent co., on the Little Bear Creek, 56 m. SW. by W. London, a rly. junc. P.<3000.

Dresden, cap. city of the kgd. of Saxony, Ger., on both sides of the Elbe, here crossed by two bridges (the Augustusbrücke and Marienbrücke), which connect its old and new towns, 61 m. ESE. Leipzig, 100 m. SSE. Berlin, and 39 m. ENE. Chemnitz, occupying a charming situation which makes it a favourite residence of foreigners. The royal palace is an antiquated building, containing the state treasury (*das grüne Gewölbe,* or 'the green vault'), with a collection of valuable property. The Dresden gallery of paintings (the Museum) is famed. The Museum Johanneum contains the historical collections, and the collection of porcelains and vases, the richest of its kind in Europe. The palace of the princes, the Japanese palace or Augusteum, with the royal library of 350,000 vols. and a collection of antiquities, and the Zwinger (a rococo building, originally designed as the court of a magnificent royal palace), contains scientific treasures. Other objects of interest are the Brühl terrace (*Brühlsche Terrasse*), bounded by a high wall rising from the Elbe, the sole relic of the old fortification walls which were razed in 1817–1826; a splendid theatre, the imperial Leopold-Caroline Academy; a polytechnical school, &c. In recent years its manufacturing industries, favoured by the neighbouring coal-supplies of the Plauenscher Grund, have considerably increased. Among the most important are the manufacture of pianos, sewing-machines, straw hats, leather wares, and chemical products. D. is a town of comparatively modern growth. In 1270 Frederick the Pious, Margrave of Misnia, transferred his residence hither from Meissen (Misnia), but it was not till 1485 that it became the permanent cap. of the terrs. out of which the kingdom of Saxony has been formed. It then had a pop. of 5000. On August 26 and 27, 1813, the Allies were defeated under its walls by the troops of Napoleon I. Alt. 335 ft. Mean temp., Jan. 30.5°, July 68.7° F.; mean rfall. (28 yrs.), 21.36 in. P. (1815) 30,300; (1864) 146,000; (1871) 177,000; (1890) 277,000.

Dromdowney, par., Ire., co. Cork, bar. Orrery and Kilmore, 3 m. NW. Mallow. P. <250.

Drôme, riv., France, rises in dep. Hautes-Alpes, flows W. through dep. D. to the Rhone, which it joins on the l. bk., 12 m. SSW. Valence, after a course of 60 m. past Luc, Die, and Crest; unnavigable, but used for floating timber.

Drôme, dep., SE. France, bounded on the W. by the Rhone, and on the N. and part of the E. by dep. Isère; divided into four arrs.: Valence (cap.), Die, Montélimar, and Nyons. The surface slopes from W. to E., except upon the western margin, where the slope is from N. to S. The dep. falls into three principal natural divs., the N., W., and E. The first of these, part of the ancient *Viennois,* lies between the Rhone and Isère, and consists of plains and hills equally fertile; its northern portion is occupied by the fertile region of the Valloire (*Vallis Aurea,* 'golden valley'); the second skirts the Rhone on the W., from the Isère in the N. to the Aygues in the S.; the third, comprising the upper courses of the rivers (Drôme, Roubion, Jabron, Aygues or Eygues, &c.), occupies about two-thirds of the dep., is wholly mountainous, and composed of Jurassic and Cretaceous limestones. The highest point (7890 ft.) occurs in the angle between dep. Isère on the N. and Hautes-Alpes on the S., in the Dévoluy, a chain separated from the others of the dep. by the pass (3825 ft.) now crossed by the railway from Grenoble to Marseilles. Chief cereal, wheat. Before the invasion of the phylloxera, the vine covered more than 75,000 acres; now it occupies less than half that (about 2 per cent. of the surface), and the production per acre is small. In the production of mulberry leaves and the rearing of silkworms, the dep. is among the first in the country. Minerals unimportant. No railway crosses the dep. from E. to W., but a short line ascending the valley of the Drôme as far as Crest branches off from that which follows the course of the Rhone. D. was formed in 1790 from portions of Provence, Comtat-Venaissin, and Dauphiné, and belongs wholly to the Rhone basin. Area, 2533 sq. m. P. 306,400.

Dromedary, post-tn., in S. of Tasmania, Monmouth co., mun. dist. Brighton. P. <1500.

Druzes, Druses, a Syrian race inhabiting Mount Hermon and in considerable numbers the Hauran, whither they emigrated on the establishment of Christian rule in the Lebanon; the men tall, stalwart, brave, and of independent spirit, and able; the women with more delicate features than those of the Arabs, the physical type being apparently not Semitic, though Arabic is the language of their ordinary life. Their religious belief, according to Major Conder, may be best described as Moslem gnosticism. They are schismatics, whose chief distinguishing tenet is that the mad Khalif Hakem in the eleventh century was the final incarnation of the power of God.

Drws, Welsh, 'a door' or 'pass.'

Drws-y-nant, stn., Wales, Merionethshire, on the G. W. R., 6½ m. ENE. Dolgelly.

Dublin, a maritime co., Ire., Leinster, in the middle of the E. ct. of the island, divided into the following baronies :—

Baronies.	Acres.	Pop. 1891.
Balrothery, East	30,021	10,043
Balrothery, West	25,194	2,469
Castleknock	21,372	10,178
Coolock	28,198	25,087
Dublin	1,693	24,715
Nethercross	21,943	3,232
Newcastle	22,771	4,384
Rathdown	32,875	55,065
Uppercross	39,021	39,042
Dublin city	3,733	245,001
Total, Dublin	226,821	419,216

Surface is generally a level rich plain, with slight undulations, rising in the S. to a hill range, a continuation of the Wicklow Mts., the highest point of which is Kippure (2473 ft.), on the S. border of the county. North of this range the only prominent eminences are Lambay Isle, and the Hill of Howth (alt. 560 ft.) on the penin. of D. Bay. The only river of importance is the Liffey. The principal means of communication are those mentioned under D. city. Along the coast, which has twenty-six martello towers, are the bays of D., Killiney, Malahide, Rogerstown, and Lough Shinny, and the artificial harbours of Kingstown, Howth, and Balbriggan. D. is the best cultivated county of Ireland; its chief crops are oats, wheat, and potatoes. For agricultural statistics, see **Appendix,** pp. 10–12. There are no minerals of great economic importance, and among manufactures, besides Dublin whisky and porter, Balbriggan hosiery is the only one of note. The fisheries are important, and are of turbot, sole, plaice, cod, ling, haddock, whiting, and oysters. There are three cromlechs—at Howth and Brennanstown, and one to the S. of Killiney, and some round towers; at St. Dowlagh's is the most singular stone-roofed church in Ireland. The county returns two members to Parliament, one for the N. and one for the S. division. See **Ireland,** table.

Dublin (Irish, *Bally-ath-cliath,* 'the Town on the ford of the Hurdles;' *Dubh-linn,* 'Black Pool;' *Eblana* of Ptolemy), cap. city, Ire., and co. D., on both sides of the Liffey, at its entrance into D. Bay, Irish Sea, 60 m. W. Holyhead, 138 m. W. Liverpool, 334½ m. by rail and steamer WNW. London. Lat. of observatory 53° 23′ 13″ N., long. 6° 20′ 17″ W. The city proper is nearly surrounded by the Circular road, 9 m. in length, and which (accompanied by a branch of the Grand Canal on the S. and SE.), encloses an area of 1264 ac. The river is here crossed by six stone and four iron bridges, including a swivel bridge, and bordered on each side by quays faced with granite, 2½ m. in length. The Vartry water-works for the supply of the city are on a very extensive scale; the reservoir at Roundwood, 24 m. to the S. of D., holds when full 2,500,000,000 gallons of water. Principal buildings and institutions: the castle, the seat of government and official residence of the Lord Lieutenant, built on rising ground near the centre of the city, and containing an arsenal, an armoury, viceregal chapel, and police barracks; the courts of law, called the Four Courts; the King's Inn; D. University (founded in 1591), with the single college of Trinity; the Royal University of Ireland, an examining and degree-conferring body, founded in 1880; the University College on St. Stephen's Green, and the Cecilia St. medical school connected with it; custom-house; Bank of Ireland, formerly the parliament house; Post Office; colleges of surgeons and physicians; Rotunda (a public hall and place of recreation; the Royal Dublin Society; the National Gallery; School of Design, and Museum of Geology and Natural History; Kilmainham Royal Hospital for disabled soldiers; the cathedrals of Christ Church (or Holy Trinity) and St. Patrick (both belonging to the Anglican Church of Ireland, both restored, restorations completed in 1865 and 1878 respectively); the Roman Catholic Cathedral in Marlborough St.; the Blue Coat School for sons of decayed citizens, and Swift's Asylum for lunatics; Simpson's Hospital for the blind, gouty, &c. There are numerous medical and surgical hospitals, eleven of which receive parliamentary grants, and are placed under a board of superintendence. Fine cemeteries, Roman Catholic at Glasnevin, and Protestant at Harold's Cross. There are four barracks within the city, and five in the suburbs. In the Phœnix Park, comprising 1753 ac., are the Viceregal Lodge, Chief and Under Secretaries' lodges, the Hibernian School for soldiers' sons, military magazine, medical infirmary, zoological garden, constabulary barracks, Ordnance Survey office, and Wellington testimonial. The prisons are Newgate, Mountjoy Convict Depôt, and Richmond Bridewell. D. is not a manufacturing town. Its poplins are noted, but this branch of industry has fallen off, and the principal manufactured products for which D. is known are whisky and porter. D. communicates with the N., S., and W. of Ireland by rail, and with the W. by the Grand and Royal Canals, and by steam-packets with Belfast, Glasgow, Liverpool, Holyhead, Bristol, Cork, Plymouth, Southampton, London, and Havre. A loop line (the City of Dublin Junc.) connects the chief railway systems that have their termini in the city (Great Southern & Western, Midland Great Western, D. & Drogheda, and D., Wicklow, and Wexford Rlys.). Its harbour and docks, with the exception of the Spencer Docks, the Ringsend Basins, and the Royal Canal Dock, which belong to private companies, are under the management of the D. Port and Docks Board. The harbour is 14 ft. deep at low water, 27 ft. at high water, ordinary spring tides, but the Alexandra Basin has a depth at low water of 24–26 ft. For shipping statistics, see **Appendix,** p. 13. D. is the seat of a chamber of commerce. The Ouzel-galley Society, instituted in 1705, for the arbitration of commercial disputes, the expenses whereof were appropriated to the benefit of decayed merchants, ceased to exist in 1887. The see of the Anglican archbishop comprises the counties Dublin and Wicklow, with part of Kildare, and his jurisdiction is nearly coextensive with the provs. Leinster and Munster. D. is divided into the parl. divs. of College Green, D. Harbour, St. Stephen's Green, and St. Patrick's, each returning one member to the House of Commons, besides two members for the University. Market-days, M., Tu., Th., and S. Alt. 163 ft. Mean temp. (20 yrs., 1861–80), yr. 49.2° F., Jan. 40.4°, July 59.9°. P. (1841) 232,700; (1851) 258,400; (1871) 246,300; mun. bor. Dudley, mun. (incorporated 1865) and parl. and co. bor., Eng., in a detached part of Worcestershire, 5½ m. S. by E. Wolverhampton, on the G. W. R. and L. & NW. R., in the diocese of Worcester. A principal seat of the iron trade, with blast-furnaces, and the vicinity abounding with mines of coal and iron, and with limestone quarries. Nails, chain cables, grates, fire-irons, and iron utensils generally, with glass, are the principal manufactured products. The **D. Canal,** 13 m. in length, joins the Birmingham and Worcester Canal 4 m. S. Birmingham. D. Hill is composed of basalt. The limestone of D. belongs to the Silurian system, is full of organic remains, and has been wrought into caverns of vast extent. In the vicinity are chalybeate springs. The bor., which was extended in 1867, sends one member to House of Commons. Dudo, a Saxon prince, built a castle here in the 8th century, which was rebuilt during the reign of Henry III., but destroyed by fire in 1750. The massive keep is still standing, and the grounds are of great beauty. D. has a free grammar school, established in 1638. Market-day, S. P. (1801) 10,100; (1851) 38,000; parl. bor. P. Duluth (named after Sieur Daniel Greysolon du Luth, who in 1678 left Quebec to spend a year in N. Minnesota, where he built a fort), city, U.S., Minnesota, St. Louis co., on Lake Superior, 135 m. NNE. St. Paul. It has large deep-water harbours, reached by a ship canal. It is the Lake Superior terminus of the Northern Pacific Railroad, and being the point of convergence of other railways from the Red River valley and other rich wheat-growing parts of the prairies states, it has grown very rapidly in recent years, and its receipts of wheat are already in excess of those of Chicago. It is also a place of shipment of some of the iron ores of NE. Minnesota, and it has started smelting-works for the silver, copper, and lead ores of the region traversed by the N. P. R. Alt. 672 ft. Mean temp., yr. 39.9° F., Jan. 11.9°, July 66.7°; mean rfall. (12 yrs.), 34.1 in. P. (1880) <1500; (1890) 33,100.

Dulvadilla, or **Dulbydilla,** rly. stn., Queensland, Dublin co., 290 m. SW. Rockhampton, on the railway running W. from Brisbane.

Dulverton, par. and market-tn., Eng., Somerset, Wellington div., 10 m. N. by W. Tiverton, 1½ m. from its stn. on the G. W. R.; manufactures woollen stuffs. PMT.O. Market-day, S. 8741 ac. P. <1500.

Dulverton, post-tn., Tasmania, Devon co., 70 m. NW. Launceston. P. <1500.

Dulwich, suburb of London, Eng., Surrey, Camberwell bor. (see **Camberwell**), 4 m. S. St. Paul's, with a stn. (**D.**) on the L. C. & D. R., and two others (**North D.** and **East D.**) on the L. B. & S. C. R. D. College, founded 1619 by Edward Alleyne, a tragic actor, maintains a master and a warden (having the name of Alleyne or Allen), four fellows in holy orders, numerous poor brethren and sisters, and foundation scholars. The picture gallery, containing a choice collection of Italian and Flemish paintings, was left to the college in 1811 by Sir F. Bourgeois. New buildings were erected in 1870.

Duma, vil., Palestine, 33° 34′ N., 36° 22′ E., 6½ m. NE. by E. Damascus.

Dumaresque, riv., Australia, rises in the Macpherson Mts., flows W., forming the boundary between New South Wales and Queensland, and falls into the Macintyre R.

Dumaring, tn., Dutch Borneo, on the E. ct.

Dumayghah, port, on the E. side of the Red Sea, in 26° 38′ N. *Jour. R. G. S.*, 1879, map, p. 1 (enlarged inset).

Dumbarton, vil., Canada, Ontario, Ontario co., 17 m. NE. by E. Toronto. P. <1500.

Dumbarton, or **Dunbarton** (in the 6th century called by the Britons of Strathclyde *Alcluith*, 'height on the Clyde,' and by the Gaels *Dunbreatan*, 'fort of the Britons'), royal and parl. burgh, river port, and par., Scot., cap. co. D., on the Leven, near its confluence with the Clyde, 8½ m. NW. Paisley, on the N. B. R., 13 m. NW. Glasgow. D. Castle, on a bold, isolated, basaltic rock, at the river mouth (206 ft. above the Clyde), is a fortress of great antiquity and historical interest, and one of those maintained at the public expense by the terms of the Union of Scotland and England. The Leven is navigable at high water from its mouth to Loch Lomond for small craft, and to the bridge for larger vessels; and the town has iron and wooden shipbuilding, engineering, iron-founding, and rope-making. Various manufactures are carried on in its vicinity. It was erected into a royal burgh by Alexander II., 1222. Market-day, W. Par. 8291 ac., P. 14,100; tn. P. 17,600; (1891) royal burgh, P. 14,000; parl. burgh, P. 16,900. See **Kilmarnock.**

Dumbartonshire (formerly **Lennox**), co., Scot., chiefly enclosed by Lochs Lomond and Long and the Firth of Clyde, which separates it from the cos. Stirling, Argyll, and Renfrew; but having also a detached portion eastward, between the cos. Stirling and Lanark, and on Campsie branch of the N. B. R., and the Clyde and Forth Canal. The N. B. R. has termini at the foot of Loch Lomond (Balloch) and Helensburgh, and the West Highland Rly., which is worked by the N. B. R., has a line in continuation of the Helensburgh line along the shores of the Gare Loch, Loch Long, and Loch Lomond to join the railway to Oban at Crianlarich in Perthshire, and thence to Fort William. A line from Glasgow to Dumbarton and the Vale of Leven is now being constructed by the C. R. Principal river the Leven, which drains Loch Lomond into the Clyde. Surface mostly mountainous, and soil poor; but in the lowlands fertile and well cultivated. Coal and ironstone are mined at Maryhill and Kilsyth, coal also at Kirkintilloch, Duntocher, Cumbernauld, and Lenzie. Slates are quarried at Luss, and ganister is obtained in the county. The county contains cotton mills, glass-works, paper mills, and print fields, besides large shipbuilding works at Dumbarton. Principal towns, Dumbarton and Helensburgh. The county sends one member to House of Commons. 154,542 ac. P. 94,500. See **Scotland,** table.

Dumbleton, par., Eng., Gloucestershire, Tewkesbury div., 5 m. S. by W. Evesham, 2½ m. E. Beckford stn., PM.O. P. <500.

Dumbrek, vil., in the SW. of Asia Minor, 52 m. N. by E. Rhodes.

Dumbria, comm., Spain, prov. Corunna, dist. Corcubión. P. <4000.

Dum Dum, tn., Brit. India, Bengal, dist. 24 Parganás, 6 m. NE. by E. Fort William, Calcutta. Important military station, P. (1881) <5000; (1891) 11,000; Hindus, 6300; Moham. 4700.

Dumfries', royal and parl. burgh, river port, and par., Scot., cap. co. D., on the Nith, across which it communicates with its suburb Maxwelltown (in Kirkcudbrightshire), which is included in the parl. burgh, by three bridges, 9 m. from the mouth of the river in Solway Firth, and 28½ m. WNW. from Carlisle, with which, and with Glasgow, Edinburgh, and Portpatrick, it is connected by rails. Four endowed seminaries united under the name of the Dumfries Academy; several associations with libraries. The bar of the Nith has a depth of 19 ft. at dead low water. All the quays on the Nith are dry at low water; at high water springs the depth is 15 ft. at Glencaple, 5 m. below D., 10 ft. at Kingholm, 2 m. below D., and 8½ ft. at Dockfoot, close beside the town. Manufactures tweeds, hosiery, leather, baskets, clogs, and shoes. D. has a weekly market, W., and annual fairs for the sale of cattle. The burgh unites with Kirkcudbright, Annan, Sanquhar, and Lochmaben (forming the D. dist. of burghs) in sending one member to House of Commons. D. became a royal burgh in the 12th century, when a monastery was founded here, in the chapel of which John Comyn, a competitor for the Scottish throne, was stabbed by Robert Bruce in 1305. In St. Michael's Church burying-ground Robert Burns, the Scottish poet, is interred, and a monument is here erected to his memory. On the banks of the Cluden are the ruins of a nunnery. Mean temp., June 57.2°, Jan. 38.1° F. Alt. 85 ft. Mean rfall. (Cargen, 1866–80), 45.55 in. Royal burgh, P. 14,000; par. (10,032 ac.) P. 17,900; parl. burgh, P. (1871) 15,400; (1891) 17,800; parl. dist. of burghs, P. 26,200.

Dumfries House, stn., Scot., co. and near Ayr, on the C. and G. & SW. Rlys.

Dumfriesshire, a frontier co., Scot., bounded E. and S. by Cumberland and the Solway Firth. The co. is subdivided into Nithsdale (ascended by the G. & SW. R.), Annandale (ascended by the C. R.), and Eskdale (ascended as far as Langholm by a branch of the N. B. R.), watered by the rivers Nith, Annan, and Esk. There are nine lochs in the vicinity of Lochmaben; and Loch Skene, near the head of Moffat Water, whence issues the picturesque waterfall called the Grey Mare's Tail, is 1300 ft. above the sea. Lochar Moss, covering 10 m. of the valley between Nith and Annan, is principally a morass. A considerable part of the country is mountainous, especially towards the N. and NE. Amongst the highest mountains are Black Larg 2231 ft., the Lowther 2377 ft., Queensberry 2285 ft., and Hartfell 2651 ft. The high grounds afford good pasturage; and cattle, sheep, and pig-rearing form an important branch of rural industry. Soil fertile in the lowlands. For agricultural statistics, see **Appendix,** pp. 10–12. The mountainous districts are composed of mica slate of Silurian age. There are patches of new red (Permian) sandstone in the valleys of the Nith and Annan, and along the head of the Solway Firth, and this last Permian area has on the N. a considerable area of carboniferous limestones, followed by a strip of volcanic rock. Limestone is quarried at Barjarg in the par. of Keir, and Kelhead in that of Cummertrees; coal is mined at Sanquhar and Canonbie; lead at Wanlockhead; zinc ore at Abington. Gold was also in former times found here, and is still in minute quantities. Mineral springs at Moffat. Chief towns, Dumfries, the cap., Annan, Lockerbie, Langholm, Moffat, Sanquhar, and Lochmaben. The county sends one member to House of Commons. Dumfries originally comprised the stewartry of Kirkcudbright, and by the Romans was comprehended under the prov. *Valentia.* 680,217 ac. P. 74,200. See **Scotland,** table.

Düna, or **Western Dvina,** an important riv., W. Russia, rises in govt. Tver, on Valdai plateau, near the source of the Volga and Dnieper; flows at first SW. between the govts. Smolensk and Pskov, then through Vitebsk, and in the lower part of its course separates Livonia from Courland; enters the Gulf of Riga, 7 m. NW. Riga. Length, 625 m.; area of basin, 33,000 sq. m. Width varies from 230 to 460 yards in its middle and lower course, and from 620 to 1650 yards below Riga. Many smaller navigable tribs.: Toropa, Drissa, Ewst from the right; and Mezha, Kasplya, Ulla, Disna, and Bolder-aa from the left. Connected by canals with tribs. of Lake Ilmeñ (Neva), the Berezina, and the Niemen. Open for navigation for 246 days at Dünaburg (April 3 to Dec. 5), 236 days at Riga (April 7 to Nov. 29), and 229 days at Vitebsk (April 16 to Nov. 30). The D. has very great importance for W. Russia as a channel for navigation, the total yearly traffic attaining from 20,000,000 to 26,000,000 tons. The towns Velizh, Surazh, Vitebsk, Polotsk, Drissa, Riga, and Dünaburg are on its banks.

Dundee′, parl., mun., and royal burgh, seapt. tn., and par., Scot., co. and 14 m. SSW. Forfar, on the C. R. and N. B. R., and on N. bank of the Tay, 10 m. W. Buddonness light, at the entrance of its firth, across which there is a railway bridge (the longest in the world—3593 yards, or more than 2 m.), opened in 1887, and replacing a previous one which was blown down, Dec. 28, 1879. Terminus of the D. and Arbroath Joint (C. R. and N. B. R.) Rly. to Arbroath and Dubton. It stands mostly on the declivity between the river and D. Law, is 571 ft., and the well-wooded Balgay Hill further W. It is irregularly built. Among its buildings and institutions are—University College, founded in 1882 by Miss Baxter and Dr. Baxter, with fifteen professorships, affiliated to St. Andrew's University, technical institute, Kinnaird hall, the Albert institute, containing free library, museum, picture galleries, &c., St. Mary's and other churches. The town was surrounded by fortified walls, erected in the 16th century. The E. *port* or gate and an old tower of the 12th century, 156 ft. high, are still standing. The park, presented to the town by Sir David Baxter in 1863, at the E. end of the town, comprises 37 acres; Balgay Park, acquired in 1869, 36 acres; Lochee Park, gifted by Messrs. Cox Brothers in 1891, 25 acres; Dudhope Park, acquired in 1893, 24 acres; The Law, 18 acres; and the Magdalen Green, an old common, 17 acres. D. is the chief seat of the linen and jute trades in Great Britain. Previous to 1830 its manufactures were all made from flax, imported mostly from Russia; but at that time jute was introduced, and since then has come to be the raw material of the staple manufacture of the town. The quantity of jute imported increased from 81,740 tons in 1870 to 226,111 tons in 1890. The British navy is almost entirely supplied with canvas made here. Among other industries are tanning, the manufacture of marmalade and confectionery, iron-working, machinery, and shipbuilding, including the construction of iron

steamers. The seal and whale fishing is also an important industry, about a dozen screw steamers being engaged in it. The harbour consists of two tidal basins and four wet docks, the deeper of which (the Camperdown and Victoria) have a depth of 18 ft. over the sill at ordinary neap, 21¾ ft. at spring tides. A jetty outside the entrance to the Camperdown dock can be reached by vessels drawing more than 24 ft. There are two graving docks. For port statistics, see **Appendix**, p. 13. D. sends two members to Parliament. Birthplace of Hector Boetius, Fergusson the poet, and Admiral Lord Duncan, the victor of Camperdown. Market-days, Tu. and F. Mean rfall. (Eastern Necropolis, 1866–80), 30.01 in. Par. 4432 ac., P. (1891) 109,900; parl. burgh, P. 153,100; royal burgh, P. 153,300; tn. P. (1841) 63,700; (1871) 120,500; (1881) 140,100; (1891) 153,600. Dune'din, poetical name of Edinburgh.

Dune'din, city, port, and mun. bor., New Zealand, South I., cap. dist. Otago, Taieri co., 60 m. SSW. Oamaru, 200 m. by sea S. Christchurch; the most important commercial city of New Zealand, picturesquely situated on the south-western side of a bay running inland. Through the opening of the new Victoria Channel (from Port Chalmers), vessels drawing 19 ft. can now be brought to the wharves. Chief industry, the manufacture of woollen goods. The town is encircled by a reserve called the Town Belt, and has Gardens of the Botanical and Acclimatization Societies, and the Jubilee Park, formally opened on Jubilee Day (June 20, 1887). D. is the seat of the University of Otago, and has a Museum and Art Gallery, containing fine specimens of Maori carving. A settlement was first made here under the auspices of an association of members of the Free Kirk of Scotland in 1848, but progress was slight till 1861, when gold-fields of extraordinary richness were discovered near the site of the town of Lawrence. Mean temp. (alt. 500 ft.), yr. 50.6° F., Jan. 57.7, July 42.5; rfall. (4 yrs.), 34.84 in. P. city proper (1871) 14,900, (1891) 22,400; including suburbs (Anderson's Bay, Caversham, Mornington, Roslyn, Maori Hill, North East Valley, Ravensbourne, South Dunedin, and St. Kilda), about 23,500.

Dunfermline ('the fort of the alder-tree pool'), parl. and royal burgh, par., and tn., royal city (probably since the 12th century, though its charter of confirmation dates only from 1588), Scot., Fife, on Linn Burn, 5 m. NNW. North Queensferry, with two stns. (**Lower** and **Upper**) on the N. B. R. The abbey, originally founded by Malcolm and his queen between 1070 and 1086, was a monastery of Culdees. Edward I. of England was resident here for some months in 1304, and on leaving it set it on fire. It was rebuilt by King Robert Bruce, and here his body was interred. In 1589 the abbey, with its lands, was erected into a temporal lordship, and conferred upon Anne of Denmark, queen of James VI. The nave and tower, and some parts of the refectory, still remain, and are partly of Saxon and partly of Norman architecture. Manufactures linens, diapers, and damasks, large quantities of which are exported to the U.S.; it has also breweries, rope works, factories of tobacco, flour-mills, iron-foundries, fire-clay and terra-cotta works, &c. Coal has been worked for 600 years, and lime and iron are raised in the par. Market-day, Tu. Par. 20,764 ac., P. 28,900; parl. burgh, P. (1891) 19,600; royal burgh, P. 22,200; tn. P. 19,600. See **Stirling.**

Dünkirchen, the German name of **Dunkirk.**

Dunkirk, par., Eng., Kent, div. and 4 m. ESE. Faversham, 2 m. NE. Selling stn.; 5338 ac. P.<1000.

Dunkirk, French **Dunkerque**; Ger. **Dünkirchen** ('the church on the downs'), a fortified seapt. tn., the northernmost in France, dep. Nord, cap. arr., on the Strait of Dover, 24 m. E. by N. Calais, and 45 m. E. Dover, at the junction of three canals, and on rly. du Nord. It is defended by a citadel. A breakwater of about 1000 yards in length, on E. side of the harbour, was constructed in 1871, and since then the harbour has been greatly improved by extensive works. The entrance channel has been deepened to 24½ ft. at ordinary neap tides, 27.9 ft. at springs; and besides a tidal harbour, with 26 ft. of water at ordinary springs, there are four wet docks or basins, the deepest of which, the Freycinet Basin, is 21 ft. deep at ordinary neap, 24.4 ft. at spring tides. There are also four dry docks and a patent slip. In consequence of these improvements, and the development of manufactures in the neighbouring district, D. has come to be the rival of Bordeaux for the third place among the French seaports (excelled only by Marseilles and Havre) in respect of the amount of its shipping (now between two and three million tons entered and cleared annually). Principal imports, iron ore, nitrate of soda, wool, oil-seeds, grain, coal. Till recently the wool was brought mainly from the Argentine Republic and Algeria, but in 1891 a line of (British) steamers began to bring Australian wool (previously imported through England) direct to this port. Principal exports, sugar, phosphates, and other natural manures, rails. A large fleet belonging to this port sails annually for the Iceland cod-fisheries. In 1388 D. was burned by the English; in 1664 Charles II. of England sold it for £200,000 to Louis XIV., who had it strongly fortified at a vast expense. The old ramparts have been removed and new defences erected in their place. P. (1872) 34,000; (1891) 39,500.

Dunkirk, tn., U.S., Indiana, Jay co., 62 m. NE. Indianapolis. P.<1500.

Dunkirk, city, U.S., New York, Chautauqua co., on Lake Erie, 36 m. SW. Buffalo. Has an excellent harbour, protected by a breakwater, a port of refuge during bad weather. Extensive iron works, machine shops, &c. P. (1880) 7200; (1890) 9400.

Durham, vil., Canada, Ontario, co. and on R. Chateauguay, 40 m. SW. Montreal. P. <1500.

Durham, Canada, Quebec. See **Ormstown.**

Durham (Saxon, *Dunholme*, 'city on the river island'), ancient city, parl. bor. (one member) and mun. bor., and episcopal city and see, Eng., cap. co. D., Mid div., on R. Wear, 14 m. S. Newcastle, on the NE. R. It has a cathedral and castle, occupying the summit of a steep rocky eminence, surrounded by terraced gardens and plantations, and nearly encircled by the Wear, here crossed by three bridges, and beyond which on either side are the quarters Framwellgate and Elvet. The city of D. owes its origin to the followers of St. Cuthbert, whose body, originally buried at Lindisfarne (Holy Island), but in consequence of the Danish invasion transferred in 883 to Chester-le-Street, was brought thence in 995 by the monks who had charge of it, and who selected the site of the present city, at that time covered with woods, and almost uninhabited, as the final place of sepulture on account of its natural strength. The woods having been cleared, the original stone church was built by Bishop Aldhun in 999, but the present cathedral, which replaced the earlier building, was commenced by Bishop William de St. Carilef in 1093, and was practically finished in 1130. It is still in the main a Norman structure, though it has a later addition in the beautiful Chapel of the Nine Altars, commenced in the year 1242. Including the western porch, it is 507 ft. in length, by 200 ft. in greatest breadth, and has a central tower 218 ft. in height, a fine W. front with a Galilee chapel, and two richly ornamented towers, 144 ft. in height. There are also a grammar school founded by Henry VIII., blue coat and other endowed schools, school of art, and university museum. The see comprises the county D. and a very small portion of the N. Riding of Yorkshire. Among its most celebrated bishops were Cardinal Wolsey and Butler, author of 'The Analogy' (1750–1752). The castle, a little north of the cathedral, founded by William the Conqueror in 1072, was formerly the residence of the bishop, but is now the seat of the university. In 1646 Cromwell issued an order for founding a college here, but after his death the new university was dissolved. In 1831 it was re-established, and opened in 1833. The Newcastle College of Medicine and the Durham College of Science (Newcastle) form part of the university, and Codrington College, Barbados, and Fourah Bay College, Sierra Leone, are affiliated to it. The first charter of incorporation was granted to D. in 1179 by Bishop Pudsey. Has coal and blast-furnaces. Manufactures also carpets, and brass and iron goods. The city has long been noted for the excellence of its mustard. Market-day, S. Parl. bor. P. 15,300; mun. bor. P. (1851) 13,200; (1871) 14,400; (1891) 14,900.

Durham, maritime co., Eng., NE., having E. the North Sea, N. the co. Northumberland, W. Cumberland and Westmoreland, and S. Yorkshire; make up the entire see of D.; cap. D.; other chief towns, Gateshead, S. Shields, Sunderland, Hartlepool, Stockton, Darlington (all of which, besides the city of D., are parl. bors.), Jarrow, Bishop Auckland, Barnard Castle; divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Jarrow	17,001	80,607
Houghton-le-Spring	33,760	69,047
Chester-le-Street	47,510	70,202
North-Western	80,346	65,957
Mid	54,073	67,639
South-Eastern	155,075	64,047
Bishop Auckland	26,550	61,833
Barnard Castle	206,093	59,459
Parl. bors.	26,873	477,768
Total	647,281	1,016,559

Surface mountainous in the W., rising to the extreme height of 2342 ft. above the sea on the Cumberland border, from whence several parallel hill ranges decline towards the coast, enclosing many fertile tracts. The hills belong chiefly to the Millstone Grit, which has been denuded in some of the valleys as in Weardale down to the Carboniferous limestone. This portion of the county is traversed by the Great Whin Sill, a mass of intruded diabase, which is well seen in two fine falls of the Tees, the Cauldron Snout in the extreme SW. of the county, and the High Force a few miles lower down. To the E. the Millstone Grit is succeeded by the Coal Measures, which occupy about one-third of the county, and are followed in the same direction by the New Red Sandstone, this last forming only a narrow strip on the coast in the N., but spreading out in the S. to about 5 m. W. of Darlington. D. is the principal coal-producing county in the United Kingdom. A small quantity of iron ore is produced in Weardale, and there are blast-furnaces at Jarrow, Consett, Seaham Harbour, West Hartlepool, Spennymoor, Port Clarence, Stockton-on-Tees, Darlington, and Tow Law. D. is also one of the chief lead-producing counties, the ore being mined chiefly in Weardale and Teesdale, and at Forest in Frith. In recent years salt has been largely extracted from brine at Port Clarence, Haverton Hill, and Greatham. The R. Tees forms the S. boundary, the Derwent and Tyne the greater part of the N.; the Wear traverses the middle of the county. Heaths occupy much of the W. portion, where, however, agriculture is most advanced. The Teeswater breed of short-horned cattle is famous for fattening, and the horses of D. for draught and the saddle. Sheep, chiefly Cheviots and Leicesters, are numerous. For statistics of agriculture, see **Appendix,** pp. 7–9. Manufactures very various, among the principal being chemical products, glass, iron, and earthenware. Shipbuilding and the making of sails, anchors, and ropes are largely carried on. The NE. R., with its branches, traverses the county, by which communication is established with all parts of the kingdom. D. is a county palatine, and was formerly under the sovereignty of its bishop, whose jurisdiction is merged in that of the crown. See **England,** table.

Düsseldorf (name derived from the Düssel, a small riv. flowing into the Rhine at D.), is situated on the r. bk. of the Rhine in a beautiful plain, 22 m. below Cologne. It is the most convenient harbour on the Rhine for the manufacturing districts of Elberfeld and Barmen. Previously a place of little importance, it has grown rapidly since the middle of this century, and its splendid position on the Rhine makes it a serious rival of Cologne. Moreover, it is now an important manufacturing town, its principal manufactures being ironware of all sorts, machinery, cotton and woollen yarns, and calico. The town is well built, and forms one of the most attractive places on the Lower Rhine. Its 'Kunstschule' (Academy of Arts) is famous. P. (1816) 26,700; (1850) 30,000; (1870) 63,000; (1890) 144,642. Dvina, Northern (Syevernaya Dvina), riv., Russia, govts. Vologda and Archangel, is formed in lat. 61° by the confluence of the Sukhona, which flows in the SW., and the Yug. After receiving the Vychegda from the NE. becomes a large navigable river, flowing in a wide low valley, and enters by several mouths a gulf in the south-east of the White Sea, at Archangel, after having received the Vaga from the left and the Pinega from the right. Total length, about 1100 miles. Area of basin, 134,000 sq. m. It is connected through the Sukhona with the Neva, by means of the canal of Alexander of Würtemberg, and through the Vychegda with the Kama (Catherine Canal). The D. is free from ice for 177 days (May 13–Nov. 6) at Archangel, and 203 days (May 1–Nov. 20) at Krasnoborsk, in 61° 6′ N. lat. A considerable amount of goods (corn, flax, hemp, timber, pitch, and tar) is shipped down the D. to Archangel, the total yearly traffic being from 5,000,000–7,000,000 tons.

Dvina, Western. See **Düna.**

Dvinsk, new official name of **Dünaburg,** important fortress, W. Russia, dist. tn. of and 183 m. NW. Vitebsk, on the Düna R. Consists of four separate parts: the fortress on a meadow on r. bk. of Düna, two suburbs, and the town Griva, on the glacis of the fortress. Chief strategic position for the defence of the Düna. Considerable trade. P. (1860) 25,760; (1888) 72,290.

Dwaal Fontein, settlement, Cape Colony, dist. Prince Albert, 40 m. S. by W. Beaufort West.

Dwarf Tribes of Africa and Asia, native tribes which are met with in many parts of Africa and S. Asia. They are of diminutive stature, most of them being less than 5 ft. high. Ethnologically they are quite different from the full-sized natives who surround them, and the probability is that they are the last remnants of the original populations of the countries in which they live. The Asiatic pygmies are met with in India and Indo-China, as well as on many islands of SE. Asia. Dwarf tribes, like the Juangas, Putuas, Kanikars, and Naya Kurumbas, live on the eastern and southern highlands of India, and quite at the southern end we find the dwarfish Vedas of Cochin and Travancore. In Further India we have to mention the Orang Semangs and Orang Sakays of Malacca, and the Moys of Annam. In the interior of Ceylon a dwarf tribe, the Veddahs, are met with, whose very name points to a connection with the Vedas, who live not far distant on the mainland. More to the E., the Andaman Is. are the home of other pygmies, the Myncopies; and on many of the Sunda Is. we find traces of a similar race, in fact, Sir William Flower is of opinion that Sumatra and Java are the only large islands of this great area which contain no traces of them. Also on the Philippine Is. dwarfs are found, the Aëtas. Turning to Africa, many pygmy tribes have recently been discovered in various parts of Equatorial and S. Africa. Their principal abodes are the primeval forests of the Upper and Middle Congo and its tribs. From there they extend to the western sources of the Nile. The most important dwarf tribes of this region are the Akka, Wambutti, and Batwa. Other pygmies, the Akoa, Obongo, and Babongo, have been discovered N. of the Lower Congo, not far from the W. coast. Most of these dwarfs live scattered among the Bantu tribes, and some of them among the Mangbattu and other tribes of the Nuba races. E. of the Nile (S. of Kaffa) live other pygmies, the Doko. But also far to the S. we find pygmies, viz., the Mucassequere, in 15° S. lat., and 20° E. long., and the Mossaro still further S., in 17° 30′ S. lat. and 22° E. long. These are the connecting link between the Equatorial dwarfs and the Bushmen of the Kalahiri Desert, and the investigations of Fritsch and others prove that the *genuine* Bushmen belong likewise to the dwarf tribes. Other pygmies, the Kimos, are said to exist in Madagascar, but we know very little about them. All African dwarfs are nomadic hunters without fixed settlements, and in all probability hunting was also the original occupation of the Asiatic pygmies. For instance, the Vedas are, according to Childers, identical with the Vyadahs, the Sanskrit caste of hunters. The dwarfs are mischievous, and are, as a rule, either despised, or hated and dreaded by their full-sized neighbours. See Panckow, 'Über Zwergvölker in Afrika und Südasien,' *Zeitschrift der Gesell. f. Erdkunde,* vol. 27, 1892, pp. 75-120; Schlichter, 'The Pygmy Tribes of Africa,' *Scot. Geog. Mag.,* vol. 8, 1892, pp. 289–301, and 345–56. [**H. G. S.**]

Easter, High, par., Eng., Essex, Epping div., 7½ m. NW. Chelmsford, 4 m. S. by W. Dunmow stn., PM.O.; 4902 ac. P. <750.

Eastergate, par., Eng, Sussex, Chichester div., 4½ m. W. by S. Arundel, 1 m. NW. Barnham Junction, P.O. P. <250.

Easterhouse, stn., Scot., NW. Lanarkshire, on the N. B. R., 5 m. W. Airdrie.

Easter Island (Spanish **Pascua**), or **Waihu,** in the Pacific, in 27° 6′ S., 109° 17′ W., about 2500 m. W. the ct. of Chile, and belonging to the Chilean prov. of Atacama, and now used as a Chilean penitentiary. It is triangular in shape; greatest length, 12 m.; greatest breadth, 4 m.; area about 55 sq. m. Volcanic in its origin, it contains a number of craters; but these have been so long extinct that there is no tradition even of their activity. It is remarkable for the stone houses, sculptured stones, and gigantic figures carved in trachytic lava. In some of these the face and neck to the collar-bone measures 20 ft. Greatest height of the island, 1960 ft. above the sea. P. estimated at 1200. See *Jour. R. G. S.*, 1870, p. 167.

Ebrington, stn., Eng., Northumberland, on the NE. R., div. and 4½ m. W. by S. Hexham.

Ebro, ancient *Iberus,* riv., in the NE. of Spain, rises in prov. Santander, on a high plateau of the terrace of Reinosa at the foot of the Torre de Fontibre, flows on the whole SE., after passing through the defiles of Horadada and Montes Claros enters the wider valley of its upper basin winding to below Logroño between the fertile fields of La Rioja on its r. or S. bk., and barren steppes on its l. bk., a few miles below Logroño traverses a narrow rocky valley, where it forms several rapids, and then issues into its lower basin, formerly an inland lake, and now, except where irrigated by river or canal waters, a dreary, monotonous saline steppe-region, then winding to the N. passes through the coast mountains, again forming several rapids, and finally enters the Mediterranean through a small delta. The E. becomes navigable for small vessels at Logroño, but its navigation is greatly impeded not only by the rapids referred to, but also by numerous sandbanks and sand-islands, and for 60 m. in a direct line below Tudela the greater part of its water is withdrawn by the Imperial Canal (*q.v.*) on its r. bk., and the Tauste Canal on its l. bk. Sea-going ships can ascend to Tortosa, and a ship canal 5 m. long has been constructed from the Puerto de los Alfaques on the S. side of the delta to Amposta to enable vessels to ascend at all times. Chief affluents, on the r. bk. the Jalon, which joins a few miles above Saragossa; on the l. bk. the Aragon, Gállego (which enters just below Saragossa), and the Segre. Length, 470 sq. m.; area of basin, 38,580 sq. m. (Strelbitsky).

Ecuador, republic in S. America, one-third larger than Great Britain, between 2° N. and 5° S. lat., 73°–82° long. W., in the form of a triangle, with its base (W.) along the Pacific (for 590 m.), between riv. Mira and riv. Machala, having riv. Napo (NW.–SE.) as one side, and a conventional straight line from riv. Catamaya to riv. Napo as the other. But E. claims extensive terrs. (against Colombia) between riv. Napo and riv. Yapurá (N.) and (against Peru) as far as riv. Yavary (S.). The organised terr. is divided into the provs. enumerated below:—

Provinces.	Area in sq. m.[1]	Pop.[1]	Pop. per sq. m.
Azuay	3,874	132,400	34
Bolivar	1,160	43,000	37
Cañar	1,519	64,000	42
Carchi	1,495	36,000	24
Chimborazo	2,990	122,000	41
Esmeraldas	5,465	14,600	3
Guayas	8,216	98,100	12
Imbabura	2,416	68,000	28
Leon	2,595	109,600	42
Loja	3,707	66,000	18
Los Rios	2,296	32,800	14
Manabi	7,893	64,100	8
Oro	2,340	32,600	14
Pichincha	6,219	205,000	33
Tunguragua	1,686	103,000	61
Eastern Region (Oriente)	?	80,000	?
Total of enumerated provs.	53,871[2]	1,270,000	22

[1] According to Wolf.

[2] The total area on the mainland claimed by Ecuador is 273,150 sq. m., to which 2,869 sq. m. have to be added for the Galápagos. The area within the triangle above described is about 116,000 sq. m., or roughly, one-third larger than Great Britain.

E. is formed by (1) a highly volcanic portion of the Andes (see **Andes, B.**) stretching NE.–SW., with a plateau at more than 9000 ft. (and 30–40 m. wide); (2) the E. lands (*el Oriente*), between the Marañon and the Napo; (3) the W. low littoral, between the Cordillera and the sea. The four principal basins of the highlands are drained by (1) riv. Mira (N.) from Lake San Paulo to the Pacific; (2) riv. Guallamba-Chiuto-Esmeraldas (at the centre), from the Quito valley to the Pacific; (3) riv. Patate-Chambo-Pastaza (S.), from the Ambato-Riobamba valley to the Marañon (Amazon); (4) riv. Tarqui-Paute (S.), from the Cuenca valley to the Marañon. At the extreme S. the rivs. Yubones, Tumbez (W.), and Zamora (E.) drain the Loja knot. The waters of the E. slopes flow to the Marañon by riv. Napo (Coca, Curaray), riv. Tigre, and riv. Upano-Morona. The W. terrs. are principally drained by (*a*) rivs. Daule—Vinces—Babahoyo—Chimbo—Guayas, running S. or W., and meeting at Guayaquil [**Guayas**]; (*b*) rivs. Blanco—Toachi—Perucho, running W. or N., and meeting at Esmeraldas. All the rivers of the basin of the Amazon are very important. The **geological formations** of E. are in parallel bands along the general NE.–SW. direction of the Cordillera: (1) on the E. slopes, Archæan rocks (granite, gneiss, schists); (2) on the highlands, volcanic tufa and conglomerates, with a long zone of porphyries and diorites, lavas and andesites, around the more or less extinct or active volcanoes; (3) Mesozoic strata (Cretaceous) follow on the W. (from Chimbo valley to Guayaquil, Jipijapa, Puerto viejo, partially covered by the Guayas alluvia, and from Cuenca to the Loja interrupted by porphyrs); (4) from the Andes to the sea, Tertiary and Quaternary formations. **Mineral products.**—Gold is mined (Zaruma, Loja, £12,000 annually; Mácas, Paute valley, Playa de Oro, Cayapas); mercury, silver (Azogues, Cuenca, Condorosto); copper (Zaruma), iron, lead, coal, sulphur; emeralds (in old times); petroleum, *copé* (at Santa Elena, very abundant); mineral waters (Machachi, Illiniza, Tunguragua, Santa Elena). **Climate.**—All E. slopes are under the influence of trade winds water condensations. All lowlands have an equatorial climate. (See **Amazonas, Brazil.**) On the highlands, *tierras frescas*, temp. is moderate, but constant [**Quito**]. On the Pacific the dominant winds are: W. in the N., S. in the S. (*bochornos, bocas de hornos*, 'furnace mouths'), blows intermittently at Guayaquil (mean temp. 81° F.), or at Esmeraldas (mean temp. 82° F.), where the equatorial heat is permanent. On the coast to the W. (Manabi, mean temp. 76½ °F.) the S. winds are refreshing. On the plateau and W. lands a hot rainy season lasts from December to May (rains principally abundant in March). Storms come regularly nearly every evening (at Quito, 300 days in the year). July is the coldest month. **Flora.**—All lands under the trade E. winds are covered with dense equatorial forests, which in some points (at the S., Loja) extend also over the W. slopes. (Orchideæ; *Nectandria*—Cinnamomum; the *Condurango*, against cancer. The first cinchona bark, from *C. macrocalix, pubescens*, used in 17th century; the bark is now obtained from *C. succirubra*, on the E. slopes of the Cordillera and on the Chimborazo; *taqua*, or vegetable ivory.) Vast forests cover the NW. Large areas of porous volcanic soil have no important vegetation (Agavæ, Euphorbiæ, Eupatoriæ, Cacteæ). The W. forests are intersected by dry savannas (*Pajonales, Ichu*) and marshy tracts (*tembladeras*), some covered with bamboos (*Chusquea aristata*, 10 ft. high, up

to 5500 ft. alt.). The least wooded area stretches from the Gulf of Guayaquil to Cape Santa Elena and some parts of prov. of Manabi. Some highlands (*paramos*) give good pasture. The **fauna** is, in all essential points, that of Colombia and Peru. The llama does not go N. of Riobamba. Serpents plentiful below 13,000 ft. Only one species of fish in the rivers and lakes (the *preñadilla*, *Primelodes*, or *Cyclopium cyclopum*). **Ethnography.**—In the 16th century Peruvian Quichua dominated the Central and W. terrs. of present E. and their principal Indian tribes (Cava, Cañar, Huancavilca, Puruha, Quitu). Even to-day the general language is a Peruvian dialect, and there are still, it seems, some settlements of pure Quichua (Iloman). The Tochi and Cayapas, speaking a different language, are probably the last representatives of the ancient conquered nations. On the E. Amazonian valleys the Jivaros (riv. Pastaza) are related to the Guarani (see **Brazil**). The Zaparos, Piojes, Quijos (riv. Napo) speak very different languages. Many of the tribes of Brazilian Amazonas (Oregones, Encabellados) live on terrs. belonging to E. **Population.**—Pure descendants of the old Spanish colonists are very rare. There is very little immigration from outside S. America (German and other colonies on the valleys of Pailon and Toachi; in the E., forests). Some immigration from Colombia (Pastusos) and Peru. Few negroes. The pop. is concentrated on the healthy highlands (principally around Quito and Cuenca), or round Guayaquil; very sparse in the E. prov. (which, however, forms half of the whole area). The littoral is very unhealthy, with dangerous fevers (*chuchu*). **Productions.**—The littoral lowlands are extremely fertile (the Guayas valley), sugar-cane, tobacco (Esmeraldas), tropical fruits. Cacao (considered second only to that of Carácas) is the great commercial product. Its plantations cover large lowland areas on the Pacific. Coffee is cultivated on the slopes. Higher up (on the plateau) the products are wheat, barley, Indian corn, beans, clover, lucerne. The Indians feed on Yucca roots. The forests give very good woods and medicinal plants. On the highlands (*tierras frescas* and *frias*) cattle, horses, and sheep are largely reared. Agriculture is generally in a very backward condition. There are only some rudimental industries (cotton-spinning, woollen tissues used in the national costumes, *bayetas*, *ponchos*, straw hats from *Carludovica*, leather, some naval constructions at Guayaquil). **Means of Communication.**—The roads are mostly mule tracts. The interior is practically shut out from commerce for many months in the year. Quito (the capital) and Guayaquil (the principal commercial port) are at a distance of 160 m. A railway from Duran (opposite to Guayaquil) goes as far as the lower part of the Chimbo valley (63 m.). From Quito a carriage road reaches only Riobamba (81 m.). The access to the interior seems to be easier from some of the N. more neglected ports (Esmeraldas, the nearest; Pailon, the best; Bahia). Tulcan, Ibarra (N.), are the centres of intercourse with Colombia; Loja with the highlands of Peru; Puerto Napo, Archidona, Papallacta, are the chief river ports of the Amazonian basin. The Cuenca Andes are the narrowest (124 m., the source of riv. Paute, 35 m. from the Gulf of Guayaquil), thus affording a good place for future communication between the Pacific and the Amazon basin. Quito is connected by telegraph with Colombia, and through Guayaquil with the world. The **exports** are cacao, coffee, sugar, rice, gold, silver, caoutchouc, cinchona bark, tapia, hides, straw hats. The **imports** are articles of dress, furniture, and food (flour from Chile and California). Trade principally with France; next Great Britain, United States, Spain. **Public Institutions.**—There is a Congress, with two houses; two senators elected by each prov., and one deputy for 30,000 inhabitants. A President for four years. (The electors must be Roman Catholics, adults, able to write and read, and have a certain income.) The army has 33,000 men. Universities at Quito (with an astronomical observatory), Guayaquil, and Cuenca. The official religion is strictly the Roman Catholic, E. being in fact a sort of a theocracy. The Indians of *el Oriente* are under the guardianship of religious orders. The metrical system of **measures** and **weights** was officially adopted (1856), but is not in use. The money (silver, nickel, in circulation) unit is the *sucre* = 3s. and 4d. **History.**—In the end of the 15th century the Peruvian Incas conquered Quito. In 1526, Pizarro landed at the N. of Ecuador (Esmeraldas). In 1534, the Spaniards took possession of Quito and the E. plateau. In 1538 Quito was made an *audiencia*, successively dependant of Nova Granada (1710) and Peru (1722). In 1811 E. made itself independent from Spain, was united to Venezuela and Colombia (1819), and became an independent Republic (1830). The actual constitution dates from 1884 (modified in 1887). P. (1826) 550,700 (besides the wild Indians); (1886) 1,150,000; (1871) 800,000; (1891) 1,270,000 (of which 1,170,000 Indians and Mestizos). [**J. B. R.**]

Edinburgh, Gaelic *Dunedin*, city, parl. and royal burgh, and the metropolis of Scot., on the S. bk. of the Firth of Forth. Lat. of observatory 55° 57′ 23.2″ N., long. 3° 10′ 46″ W.; 396 m. N. of London, by G. N. R., NE. R., and N. B. R. The city is mainly built of a durable light-coloured sandstone found in the neighbourhood, and is picturesquely situated upon three ridges of hills. The old town occupies the more elevated ridge, which terminates on the W. in the bold rocky eminence of the Castle Hill (highest point 383 ft.), whence the High Street, continued by the Canongate (formerly separated from the High Street by an ornamental gateway called the Netherbow Port, demolished in 1762), leads down to Holyrood Palace and the remains of Holyrood Abbey, founded by David I. in 1128. The NW. corner of the palace, containing Queen Mary's apartments, was founded by James IV. in 1501, and enlarged by James V. in 1528, but the greater part of the building was erected after the restoration in 1671–79. Between the old and new town is a deep ravine, now traversed by the N. B. R., but to a considerable extent converted into gardens, now belonging to the corporation, and containing among other monuments that to Sir Walter Scott, the most conspicuous of all the monuments of the city, except, perhaps, the ugly tower dedicated to Lord Nelson on the Calton Hill. Many narrow wynds or closes on each side connect the High Street and Canongate on the S. with the parallel street called the Cowgate, and on the N. with the hollow in which the railway above mentioned runs. Formerly E. was a walled city, and part of the old walls are still to be seen in a street called the Vennel. As cap. of Scotland, E. retains its rank chiefly as the seat of the supreme courts of law, but the dignity is recognised also in its being the headquarters of many Scottish **institutions,** to which many of the principal **buildings** of the city belong. Among these are the law courts in the Parliament House, containing the old Parliament Hall, with an oaken roof built in 1632, and beneath which is the library of the Faculty of Advocates (barristers), which contains about 250,000 printed volumes and 2000 MSS., and is entitled to a copy of every book issued in the United Kingdom; the general Register House for Scotland, including the Scottish Census department, the Assembly Hall of the Church of Scotland, colleges and halls of the two leading non-established Presbyterian Churches of Scotland (the Free Church and the United Presbyterian), as well as of other religious bodies; the High Church of St. Giles, the present begun in 1387 on the site of an older one dating from the 9th century (for five years, 1633–38, the cathedral of the bishopric of Edinburgh), a building of no architectural beauty except in its tower, which is in the form of an imperial crown; the Tron Church, another old church without beauty; a modern cathedral of the Scottish Episcopalian Church; the Royal Institution, in which the Royal Society of Edinburgh (founded in 1783) holds its meetings; the National Museum of Science and Art; the Astronomical Observatory on the Calton Hill; the Royal Academy; the National Portrait Gallery, in which are the rooms of the Royal Scottish Geographical Society (founded in 1885). E. has long been noted also as an **educational** centre. At the head of the **institutions** of this class stands the University, founded by Royal Charter in 1582, and now conferring degrees in arts, divinity, law, medicine, science, and music, having 55 professorships and lectureships, and possessing four buildings, the oldest begun in 1789, and containing, besides lecture-rooms, the library, with about 184,000 printed volumes and 3000 MSS.; another, situated close to the Infirmary (general hospital), opened (though not completed) in 1880, accommodating most of the classes connected with the faculty of medicine, for which E. University has long been famous; a third containing a botanical class-room and museum in the Royal Botanic Garden; and the fourth consisting of the hall connected with the chair of music. In connection with the University there is now also a hall for the accommodation of a student's club. Among other notable educational institutions are a technical school, now known as the Heriot-Watt College; a college of agriculture (Minto House); a number of schools, locally called 'hospitals,' all originally intended for the education of children of parents in reduced circumstances, the principal of these being Heriot's Hospital, founded in 1624 by a bequest of George Heriot, goldsmith and banker to James VI., a wealthy institution, now converted into a great secondary school; Donaldson's Hospital, and the Trades Maiden Hospital, besides John Watson's Institution. The Merchant Maiden Hospital and George Watson's, Stewart's, and Gillespie's Hospitals have been converted into day-schools. The principal secondary schools are the High School, founded in 1519, now under the management of the school-board; the E. Academy, and Fettes College, the last modelled on the great public schools of England. There is a large and well-equipped free public library. E. is well provided with **public parks** and recreation grounds. The most important of these is the Queen's Park, a royal park (680 ac.) only partly within the city boundary, containing Salisbury Crags and Arthur Seat, the summit of which (822 ft.) is on the boundary. Among others, besides the gardens at the foot of the Castle Hill (Princes Street Gardens), already mentioned, are the Calton Hill (348 ft.), the Meadows and the Links, two adjoining open spaces, on the latter of which the people had for centuries the right of playing golf, though this right has recently been withdrawn, a new golfing-ground having been provided to the S. of the city boundary on the Braid Hills (highest point 606 ft.), which have been acquired by the corporation as a recreation ground. To these may be added the Royal Botanic Garden, founded in 1670, though it has existed on its present site only since 1824. As a seat of **trade** E. has long been noted as a publishing centre, but this branch of trade is rapidly being transferred to London, while, on the other hand, the printing-trade is becoming ever more important, and E. still remains the principal centre of this trade in the kingdom outside of London. Among other local industries are type-founding, and the manufacture of india-rubber goods, vulcanite, carpets, glass, agricultural implements, &c. E. has the head-offices of many important banks and insurances, is the headquarters of the N. B. R., and has a terminal station of the C. R. A circular railway, running for the most part outside the city boundary, starts from the central station of the N. B. R., and passing by the S. suburbs of Morningside and Newington and the watering-place of Portobello, returns to the same station. Its ports are Leith and Granton. The head of the corporation is called the Lord Provost, and is entitled to be styled Right Honourable. It sends four members to the House of Commons, one for each of the E., W., S., and Central divs., and the universities of E. and St. Andrews unite in returning another member. Simeon of Durham, writing in the year 854, mentions the fortress or castle under the name of *Edwinsburch*, or castle of Edwin, probably so called after Edwin, Prince of Northumberland. In 1128 the town received a charter from David I., still preserved in the archives of the city. In 1437 James II. was crowned here; and in 1633 Charles I., on the occasion of his coronation, created the burgh into a city, with all customary privileges. E. was the permanent seat of the Scottish parliament till the union with England; it was long a favourite abode of the Scottish sovereigns, and its ancient palace is still occasionally honoured with the visits of royalty. With regard to the site of old E., see an article with plan, in *Scot. Geog. Mag.*, 1893, p. 302. Alt. 230 ft. Mean rfall. (1866–80), 28.32 in.; Colinton, alt. 500 ft., 36.48 in. Market-day, W. Parl. burgh P. (1841) 140,000; (1851) 160,300; (1871) 197,000; (1881) 225,400; 1891 (parl., mun., and royal burgh) 261,200; tn. (including a small suburban portion) P. 263,600.

Edinburgh, vil., U.S., Pennsylvania, Lawrence co., on Beaver R., 41 m. NW. by N. Allegheny. P. <1500.

Edinburghshire, or **Midlothian,** the metropolitan co. of Scot., bounded N. by the Firth of Forth, E. by Haddingtonshire (E. Lothian), and Berwickshire, and W. by Linlithgowshire (W. Lothian). The SE. part of the county is intersected by the Moorfoot hills, of Lower Silurian formation, separated from the Lammermuir hills by the valley of the Gala Water, through which runs the railway to Galashiels and Melrose (Waverley route of the N. B. R.). From the SW. the Pentland range, continued by the Braid and Blackford hills, runs towards the NE., composed in the NE. of felstone, in the SW. of Silurian and Old Red sandstone, while the greenstone hills of Corstorphine extend from the Firth of Forth southward, and are continued by the greenstone and basaltic elevations of the castle rock, Arthur's Seat, and Calton, in the vicinity of the capital. The Pentland range contains the highest summits of the county (Scald Law 1898 ft., and Carnethy 1890 ft.). From the S. the county gradually slopes towards the borders of the firth, and on the E. and W. extends into level and fertile plains. The lowlands are principally composed of Lower Carboniferous sandstones and shales, including on the W. boundary of the county the valuable oil-shales, but there are also large patches of intrusive greenstone basalts and interbedded felstone. E. of the Pentland hills there follow Lower Carboniferous limestones with coal-seams interbedded, and still further E. a considerable area of true coal-measures. The coast line, 13 m. in extent, is in part sand downs. The principal rivers, none of which are large, are the Water of Leith, the Esk, the Almond, flowing through the NW. valley of the county, all belonging to the basin of the Firth of Forth, and the Gala, belonging to the Tweed basin. The principal minerals are the oil-shales already referred to (mined chiefly at Mid and W. Calder), E. ranking next after Linlithgowshire in the amount of this mineral produced, and coal, which is mined at Penicuik, Gorebridge, Dalkeith, Loanhead, Gilmerton, Musselburgh, Bonnyrigg, and Portobello in E. of co., and at West Calder in W. Ironstone is mined at Loanhead and Penicuik. Sandstone of a very superior quality abounds, and is extensively quarried at Craigleith and Hailes. Limestone is found in many localities, especially at Gilmerton, Crichton, and Burdiehouse. The county is chiefly agricultural, and farming is conducted on the best modern principles. The farms are large. For agricultural statistics, see **Appendix,** pp. 10–12. There are large paper-mills on the Esk and Water of Leith, and several distilleries, breweries, potteries, but no other manufactures of importance. The N. B. R. and C. R. traverse the county. Two lines of the C. R., entering the county from

the SW., unite to the NW. of the Pentland hills, and proceed along the base of their foot-hills to the city of Edinburgh. The remaining lines, including that across the Forth Bridge, belong to, or are worked by, the N. B. R. E., cap., is the only royal burgh. Dalkeith is a burgh of barony, and Musselburgh a burgh of regality. Principal towns and villages, Portobello, Newhaven, Lasswade, Loanhead, Ratho, Penicuik, and Roslin. Leith is the principal seaport. The county sends one member to Parliament. Mid-Lothian and the surrounding districts, at the period of the Roman conquest, was formed into the prov. of *Valentia*. The country was subsequently occupied by Saxon invaders from the N. of England, and by them chiefly retained till about the year 1020, when the Lothians were ceded to the Scottish monarch, Malcolm II. Principal antiquities, Roslin Chapel, Craigmillar, Borthwick, and Crichton castles. Area, 231,724 ac. P. (1891) 434,159; of the dist. forming the county constituency, P. 86,800. Egypt (origin of name uncertain, according to Brugsch derived from the ancient surname of Memphis, Ha-ka-ptah = belonging to Ptah), the most north-eastern country of Africa, comprises Lower E. (Bahari), Middle E. (Vostani), and Upper E. (Saïd); moreover, a part of the Mudirieh of Donkola in Nubia, the district of Koseïr on the Red Sea, el-Arish in Syria, the Isthmus of Suez, and the oases of the Libyan desert. The area of E. is about four times that of Great Britain, but before the Mahdi rebellion it was more than twice as large. **Physical Features.**—Mountain chains, running parallel to the Nile, separate the fertile valley of this river from the deserts E. and W. of the Nile. The Libyan desert to the W. is without any elevations worth mentioning, but the desert tract of land between the Nile and the Red Sea is formed of a plateau from 1600 to 3000 ft. high. Parallel to the shores of the Red Sea—towards which the ground slopes steeply—a number of mountains rise above the plateau, the most important being the Soturba (6900 ft.), Hammada Olaki (6600 ft.), Um Delpha (6650 ft.), Dukhan (5400 ft.), Harba (5200 ft.), and Garib (5400 ft.). The mountain ranges following the Nile terminate at Cairo, this town being situated on one of the last offshoots of them, Mount Mokattam. N. of Cairo commences the delta of the Nile, which has an area of about 8500 sq. m., and is more than 120 m. wide. The Nile (*q.v.*) is the only river of Egypt. The principal **lakes** are the Birket-el-Kerun (in the Fayum), the Bitter Lakes (on the Isthmus of Suez), the Natron Lakes (in the Natron valley), and the lagoons of the Nile delta, viz., the Mariut, Edku, Burlus, and Menzaleh Lakes. The once celebrated Lake Moeris has disappeared long ago. **Geologically** the S. and E. parts of the country principally consist of crystalline rocks, especially mica schists, clay-slates, and breccias; as well as of granite, gneiss, syenite, and porphyry. In the southern parts of the country a cretaceous sandstone is found, which is followed by extensive tertiary deposits covering Middle and Lower E. Nummulitic limestones, here and there overlaid by mighty sandstone masses, are the characteristic features of these tertiary rocks. From el-Kab (S. of Esneh) to the delta the Nile flows through the limestone formation. Besides these the fertile alluvial soil of the Nile valley has to be mentioned, the Nile, during the yearly inundations, depositing large quantities of mud, which greatly

adds to the fertility of the Nile valley. The whole of the delta has also been formed by alluvial deposits within the most recent geological period. The **climate** of Upper E. is very hot and dry throughout the year, whilst in Middle and Lower E. two seasons are distinguishable, the hot season from April to November, and the temperate one from December to March. In the delta the heat rarely exceeds 85° F., and during 9 months of the year north winds, laden with moisture, prevail, producing fogs in August, September, and during the winter months. But in summer the sky is cloudless and clear, and rain is of very rare occurrence. The khamsin, a hot S. wind, coming from the Equatorial regions, blows in May and June. The heat produced by this wind is very oppressive, and reaches extreme temperatures, especially in Upper E., where 140° to 150° F. have been registered at Assuan, and more than 110° F. at Philae and Thebes. The climate is on the whole healthier than that of many other subtropical and tropical countries; with the exception of some unhealthy tracts of land on the shores of the Red Sea. Upper E. is healthier than the delta, for, when the yearly inundation is subsiding, fevers, dysentery, and ophthalmia are of frequent occurrence in the delta. The **flora** of E. is partly that of the Mediterranean countries, partly that of the eastern Sahara. The date-palm is the most important fruit-tree of E., dates being the principal food of the inhabitants in various parts of the country. E. has no forests, but groves of palms and sycamores, as well as fig, orange, lemon, olive, and mulberry plantations. Lotus and papyrus, the celebrated plants of ancient E., are now but rarely met with in the delta. Celebrated are the roses of the Fayum; and there, as well as in the delta, splendid grapes grow, but on account of the prohibition of wine-drinking by the Mohammedan religion the culture of the vine has been neglected for centuries past. Wheat, barley, maize, durrah, rice are largely cultivated; cotton and cotton-seed belong to the most important export products of modern E.; sugar-cane, flax and hemp, beans, lentils, pease, bananas, melons, and onions are likewise of importance; clover grows in abundance. The **fauna** of E. is peculiar. Beasts of prey are but rarely met with on account of the absence of forests. The leopard, hyæna, fox, and jackal are the principal. The hippopotamus, a few centuries ago frequent in the Lower Nile, has now disappeared. Gazelles live in the deserts; and the ichneumon is found everywhere in the vicinity of the Nile. The most important domestic animals are the dromedary, the horse, the donkey, the sheep, and the ox. E. has a variety of birds; vultures, quails, plovers, wild ducks, pelicans, flamingos, herons, and bitterns have to be mentioned first. The ibis, the most celebrated bird of ancient E., is now rarely met with. Many of our European migratory birds visit the country in winter. Reptiles of importance are the uraeus serpent, the nilotic varane, and the chameleon; the crocodile is no longer found in Lower E., having retired more into the interior. The Nile abounds in fish, various kinds of silurus, carps, and eels being the most common. Of insects, bees, locusts, mosquitos, and the sacred beetle have to be mentioned. The fertility of E. is entirely dependent on the Nile (*q.v.*) and its yearly inundations. As a rule the river commences to rise in June, and reaches its maximum in September. But this is not always the case, and the time and duration of the inundations vary considerably. For instance, in 1892 the Nile, after falling during the summer months to a very low level, rose in the late autumn to an abnormal height. A regular **irrigation** of the country is therefore of the utmost importance. In modern times, Mehemet Ali commenced (in 1842) the construction of a large Nile dam, which was, however, after a short period of time, so much damaged, that it was practically useless from 1867 to 1883. The canal system of the Nile delta was in the same unsatisfactory state till 1883. But since the country has been under British influence the great Nile dam has been repaired, and the canal system regulated and completed. The importance of these irrigation works is best shown by the enormous influence which they have on the fertility of the country, *e.g.*, the average value of the cotton crops has increased since 1883 by £835,000 per annum. The irrigation works are not yet completed, and everywhere in Lower and Upper E., canals, sluices, syphons, escapes, weirs, &c., are in construction. The chief question to be dealt with in the near future is, how to make use of the surplus water of the inundations? This can be done in two ways, either by ponding up the river above Assuan, or by diverting a portion of the flood into the natural depression of the Raiyan basin south of the Fayum, and by forming there a storage reservoir. Financially, E. has greatly profited by the irrigation improvements of the last ten years; at present the cultivated and revenue-paying area is about 5,000,000 acres, and provided that no further political complications arise, E. will soon be able to reap the full benefit of its fertile soil. E. produces hardly any metals, and only a limited number of **minerals.** Small quantities of copper are found near Mount Dukhan, and of gold near Mount Ollagi and Mount Samerah; the mines which were worked in ancient times are no longer profitable. Natron and salt are found in the northern parts of the country: Natron valley in the Libyan desert. Petroleum is found near Mount Ez-Zet on the Red Sea, sulphur at Ras-el-Jimsah, and emeralds near Mount Zebara (S. of Koseïr). The working of the quarries was in former times of much greater importance than it is to-day: the granites and syenites of Upper E., the porphyry from Mount Duchan, the marble quarries of Mons Claudianus (NW. of Koseïr), the alabaster pits of Tel-el-Amarra, and numerous limestone and sandstone quarries below Assuan have to be mentioned. The **manufactures** of E. are of little importance: pottery; woollen, linen, and cotten cloths; morocco leather, and carpets being the most important. In the Middle Ages Alexandria was celebrated for its beautiful embroideries, and although the demand has lessened, this industry is still carried on in this town. **Means of communication.**—River navigation on the Nile and in the delta is considerable; and since the British occupation many agricultural roads have been constructed, and the use of wheeled transport is now becoming common. E. has at present 1400 miles of railways, and extensions in different parts of the country are under consideration. The most important lines are those connecting Alexandria and Cairo; Cairo, Ismailia, and Suez; and the Nile valley railway on the left bank of the river which has recently been extended to Sohagh. It is expected that the last-named line will, before long, be prolonged to Luxor. A very important railway bridge has just been completed near Cairo, connecting the railways of the delta with the Upper E. line, and another highly important railway bridge near Mansurah was opened at the end of April 1893. The railway receipts during the last five years were satisfactory; in 1892 they amounted to £1,680,000 Egyptian. Also telegraphs and post-office show considerable progress during the last three years. The centre of the export and import trade of E. is Alexandria, Rosette and Damiette being of much less importance. The **exports** consist almost exclusively of agricultural products: wheat, maize, barley, lentils, beans, and sugar; the cotton plant has been very largely cultivated since the American civil war, and the yield of the cotton crops in 1892 amounted to not less than 5,000,000 cantars (1 cantar=100.8 lbs.). The principal **imports** are textiles, coal, timber, indigo, live stock, metals, and machinery. **Money.**—10 millièmes=1 Piastre Tariff (P. T.); 100 P. T.=£1 Egyptian; 97½ P. T.=£1 sterling. The metric system was introduced in 1875 by a decree of the Khedive. About the relations of E. to the Porte, see **Turkey.** Nominally the **government** of E. is in the hands of the Khedive and of a ministry which is formed after European model. But since Arabi's rebellion the Khedive and his ministers are supported in all administrative matters by competent British advisers, and the re-organisation of the army has been put in the hands of British officers. The troops are partly fellaheen and partly Sudanese. **People.**—Ethnologically we meet in E. with mixtures of different races. The Arabian type is predominant. The fellaheen, the peasants of the Nile valley, are a mixture of Arabs and negroes. The race of the ancient Egyptians is represented by the Copts, most of whom live in Upper E. Also a considerable number of Europeans (especially Greeks, Italians, and Frenchmen) live in E. The valley and delta of the Nile are, of course, the most densely peopled parts of the country. The dominant religion is the Islam; an exception are the Copts, who profess the Christian faith (Jacobites). The language of E. is Arabic; the Copt language is no longer spoken, but still used in the liturgy. The cap. of E. is Cairo, and the commercial centre of the country is Alexandria. Siut it the most important town of Upper E. Port Saïd and Ismailia have become towns of importance since the opening of the Suez Canal (*q.v.*), but, contrary to expectation, Suez has not much profited by this great enterprise. Among other places of importance are: Rosetta, Damietta, Koseïr, Suakin, Medinet-el-Fayum, Assuan, Korosko, and Wadi Halfa. As regards history, the ancient history of E. is beyond the limits of this article. In 638 A.D., E.—which was at that time a prov. of the Byzantine empire—was conquered by the Mohammedans. From 970 to 1171 the dynasty of the Fatimides, and from 1171 to 1250 that of the Eyubites flourished. These were followed by the Mamelukes (Memluks) who ruled over E. till 1517, when Sultan Selim I. made the country a Turkish prov. A new era commenced with Mehemet Ali, who reigned from 1805 to 1849. On the one hand, he introduced a great many useful reforms, but, on the other, the country suffered by enormous taxation and oppressive conscription for carrying on of foreign wars. Ismaïl (1863–1879), during whose reign the Suez Canal (*q.v.*) was completed, made himself almost independent of the Porte. He extended his dominions to Darfur and to the Equatorial Nile Lakes, but contracted such enormous debts that he was deposed in 1879. Ismaïl was succeeded by his son Tewfik (1879–1892). Under his reign, in 1882, the rebellion of Arabi took place. Alexandria was bombarded by the British fleet (July 1882), and Arabi was finally defeated by a British force at Tel-el-Kebir (13 Sept. 1882). Since that time E. has been under British influence. The Sudan provs. of E. were lost by the Mahdi rebellion and the fall of Khartum (26 Jan. 1885). Tewfik

died in 1892, and was succeeded by his son Abbas, the present Khedive. Total area of E., 394,240 sq. m., but the cultivated and settled area only amounts to 12,976 sq. m. P. (1892) 6,817,265; of these 245,779 are nomads, and 90,886, foreigners. [**H. G. S.**]

Egypto, tn., W. Africa. See **Egito.**

Ehen, riv., Eng., issuing from Ennerdale Water, and flowing S. through the Egremont div. of Cumberland into the Irish Sea.

Eildon (il'don) **Hills** (corruption from *Moeldun,* 'bald hill.' See *Moel*—Blackie), three adjacent conical hills, Scot., Roxburghshire, just S. of Melrose; highest (the middle one) 1385 ft. *Eilean* (pronounced ai'lan), Gaelic, 'an island.'

Eilenburg, tn., Ger., Prussia, in the SE. of prov. Saxony, on riv. Mulde, 13 m. NE. Leipzig. Various manufactures. Birthplace (1819) of Franz Abt, the composer of songs. P. 12,400.

Eilendorf, vil., Prussia, Rhine Prov., govt., circle, and dist. Aix-la-Chapelle. P. <4000.

Eilethyos, Egypt. See **El Kab.**

Eilsen, vil., Ger., Schaumburg-Lippe, 2½ m. from Bückeburg, with noted sulphate of lime springs and mud baths. P. <2000.

Eilsleben, vil., Ger., Prussia, prov. Saxony, 20 m. W. Magdeburg. P. <3000.

Eimeo, or **Aimeo,** one of the Society Is., Pacific Ocean, to the NW. of Tahiti, in 17° 30′ S., and 150° 10′ W. Length 9 m., by 5 m. broad. P. <2000.

Elmsbüttel, tn., Ger., in the terr. of Hamburg, 2 m. N. of the Norder Elbe. P. (1880) 16,200; (1890) 46,200.

Einagh, electoral div., Ire., Clare, dist. Kilkee.

Einbeck, tn., Ger., Prussia, prov. Hanover, 20 m. N. by W. Göttingen; has textile and other manufactures. In the Middle Ages and down to the Thirty Years' War, an important fortress. P. 7700.

Eindhoven, comm., Holland, prov. N. Brabant, 19 m. ESE. Tilburg. P. <5000.

Einersheim, vil., Ger., kgd. Bavaria, govt. Middle Franconia, 17 m. ESE. Würzburg. P. <2000.

Einsiedel, comm., Austria, Silesia, 23 m. WNW. Troppau, and 1½ m. N. Würbenthal. P. <2000.

Einsiedel, vil., Saxony, govt. Zwickau, dist. Chemnitz. P. <4000.

Einsiedel, vil., Hungary, prov. Zips, 20 m. WNW. Kaschau. P. <2000.

Einsiedeln, tn., Switzd., cant. and 9 m. NNE. Schwitz, in the valley of the Sihl, owes its origin to the famous Benedictine Abbey, superior of all the abbeys of this order in Switzerland; founded in the 9th century; has a hospital, library, museum of paintings and Roman antiquities, and a marble chapel with an image of the Virgin, which in September annually attracts on an average 200,000 pilgrims. Its rich treasury was despoiled by the French in 1798. Birthplace of Paracelsus. Alt. 2986 ft. Rfall. (23 yrs.), 64.48 in. P. 8500. See **Morgarten.**

Eipel, riv., Hungary. See **Ipoly.**

Eipel, or **Ipice,** tn., Bohemia, 6 m. SE. Trautenau. P. <3000.

Eirias, par., Wales, Carnarvonshire and Denbighshire, Arfon div., 5½ m. E. by N. Conway, close to Colwyn Bay stn. P. <1000.

Eisack, riv., Austria, Tirol, rises on the S. slope of the Brenner, flows S. and enters the Adige (Etsch) below Bozen; 53 m. long.

Eisbergen, vil., Ger., Prussia, prov. Westphalia, on the r. bk. of the Weser, 7½ m. SE. by S. Minden. P. <2000.

Eischol, vil., Switzd., cant. Valais, 8 m. E. by S. Leuk. P. <2000.

Eisen, Ger., 'iron.'

Eisenach ('on a river [see *Aa*] impregnated with iron'), tn., Ger., gd.-duchy Saxe-Weimar, cap. circle, 17 m. W. Gotha, on the Hörsel (trib. Werra); has manufactures of white-lead, chemicals, &c. Near is the castle of Wartburg, once the residence of the Langraves of Thuringia, in which Luther spent ten months, 1521–22, under the friendly arrest of the Elector of Saxony, during which time he translated the Bible. The former principality of E. came into the hands of Saxony in 1440, and on the partition of the Saxon territories in 1485 fell to the Ernestine branch. P. (1871) 14,000; (1890) 21,400.

Eisenberg, comm., Austria, Moravia, 31 m. NW. by N. Olmütz, 4½ m. WNW. Schönberg. P. <2000.

Eisenberg, tn., Ger., duchy Saxe-Altenburg, 24 m. WSW. Altenburg; manufactures textiles, porcelain, &c. P. 7300.

Eisenbrod, or **Brod Zelezny,** tn., Austria, Bohemia, on the Iser, 29 m. W. by N. Trautenau, 7 m. SE. by S. Gablonz. P. <4000.

Eisenburg, Hungary. See **Vasvár.**

Eisenerz ('iron ore'), tn., Austria, Styria, 16 m. NW. Leoben, a little to the SE. of the northerly bend of the Enns, with the chief Austrian deposit of iron ore. The **Erzberg,** that is, 'Ore Mountain,' situated at this place, is almost one entire mass of an iron carbonate, and the ore which has been mined for 2000 years is obtained from open-air quarries. The mountain is already reached by rail to Eisenerz on the N., and Vordernberg on the S., and it has been proposed to pierce a railway tunnel through it, under the Prebühel Pass. Alt. 2445–2475ft. P. <3000.

Eisenhut, mt. peak in the Styrian and Carinthian Alps. Alt. 8005 ft.

Eisenmarkt, tn., Hungary. See **Vajda-Hunyad.**

Eisenstadt ('iron town'), royal free tn., Hungary, prov. and 14 m. NNW. Ödenburg; in the park are an orangery, and large gardens of exotic plants. N. of the town are zoological gardens. P. <3000.

Eisenstein, vil., Austria, near the SW. frontier of Bohemia, 43 m. S. by W. Pilsen. Alt. 2540 ft. P. <2000.

Ek- (or **Eke-**) **gol,** riv. See **Kosso-gol** (lake).

Ekaterinburg, dist. tn., Russia, govt. and 311 m. by rail SE. of Perm. Administrative centre for the mining industry of Middle Urals. Imperial mint for copper. Imperial manufactories for cutting decorative stones, especially quartz, jade, porphyry, &c. Assaying laboratory for all gold extracted in the Urals. Important machinery works; candle, soap, rope works. Many inhabitants are engaged in cutting semi-precious stones. Centre for trade with the Urals and Siberia. Several important iron-works are situated in the dist. of E., some of them close by the town. First-class meteorological and magnetic observatory (56° 49′ N., 60° 35′ E.; alt. 890 ft.). Average temp., yr. 32.8° F., Jan. 2.3°, July, 63.3°; yearly rfall. 14.3 ins., May to Sept. 11.3 ins. P. (1860) 19,830; (1888) 36,800.

Ekaterinenstadt (Caterinenstadt), Ger. colony, Russia, govt. of Samara, dist. Nikolayevsk, 34 m. NE. of Saratov, near l. bk. of Volga. Administrative centre for Ger. colonies. Considerable trade in corn and tobacco, exported. P. <5000.

Ekaterinhof, imperial palace, park, and small tn., Russia, W. suburb of St. Petersburg, at the very head of the Gulf of Finland.

Ekaterinodar, tn., Russia, chief tn. of Kubañ prov. of Ciscaucasia, 531 m. NW. of Tiflis, on r. bk. of Kubañ R., at its junction with Karasuk. Model fruit-garden of the state. P. (1860) 9620; (1888) 47,600.

Ekaterinoslav, prov., South Russia, having Poltava and Kharkov in the N., the Don Cossacks in the E., the Sea of Azov and Taurida in the S., and Khersoñ in the W. Surface an undulating steppe gently sloping towards the S., with a swelling of the Donets Plateau in the E., of which the highest spot is 530 ft. above the sea. Granites in the W.; carboniferous, permian, chalk, and tertiary elsewhere. Coal measures in the E., and rich mine-ores—the govt. becoming a very important centre of Russian mining and iron-works. Fire-proof clay, clay for earthenware, gypsum, and grinding-stones extracted. Watered by the Dnieper, the Don, the Donets, and their tribs., several of which navigable. Climate warm, but winters still cold; yearly temp. 46° at Lugañ. Mean rfall. 14.7 ins. (7.2 May to Aug.). Forests few; soil very fertile; rich wheat-fields, and meadows covered with steppe flora. This govt. began to be peopled by Russians only about the end of the last century, but is now one of the best peopled provs. of the Empire. Population chiefly Little-Russian and partly Great-Russian; about 35,000 of each Greeks and Jews, and about 20,000 of each Germans and Armenians. Wheat-culture chief source of income; good orchards; large amount of horned cattle and sheep. Important fishing at the mouth of the Don. Manufactures rapidly growing. The whole export trade of the Sea of Azov passes through Rostov, Taganrog, and Mariupol. Divided into 8 dists.: Ekaterinoslav, Alexandrovsk, Bakhmut, Novomoskovsk, Pavlograd, Rostov, Slavyanoserbsk, and Verkhnednyeprovsk. P. (1830) 600,000; (1860) 1,138,750; (1888) 1,905,540.

Ekaterinoslav, chief tn. of above govt., on r. bk. of Dnieper, 607 m. SSW. of Moscow; iron-works, flour-mills, candle and soap works. P. 49,200.

Ekaterinovskaya, Cossack vil., Russia, govt. Kubañ, dist. and 100 m. ESE. of Yeisk. P. 8300.

Elbe (name derived from the old German and Swedish *elf* or *alf* = 'river'), one of the largest and most important rivers of Germany. The E. takes its rise (at an alt. of 4600 ft.) in Bohemia, on the southern slopes of the Riesen-gebirge. It flows first southward, and then to the W. and NW. It becomes navigable at Melnik, where it is joined by the Moldau, the volume of this trib. being considerably larger than that of the Upper Elbe. Shortly afterwards the river makes its way through the Mittel-gebirge and the picturesque Elbsandstein-gebirge ('Saxon Switzerland'), having left Bohemia and entered Germany near Herrnskretschen. Below Meissen the river enters the North German plain, through which it passes, flowing in a NW. direction. Near Hamburg the E. divides into Norder and Süder Elbe, and forms numerous islands; but further down, at Blankenese, the arms unite again, and the river forms an estuary. It reaches the North Sea near Cuxhaven. The total length of the E. is 720 m., 550 m. of which are navigable. With the exception of the Rhine, the E. is the most important river of the German Empire; and, compared with the former, it has the advantage that its middle and lower course lie entirely within German territory. Moreover, navigable tribs., like the Saale, Havel (with Spree), and Elde, increase the commercial importance of the E.; and a number of canals, like the Finow, Müllrose, Plauer Canal, and others, connect these waterways with one another, and with the basin of the Oder, thus making the Lower E. the centre of the river traffic of Prussia. Moreover, its estuary being accessible to sea-vessels as far as Hamburg (84 m. from the mouth of the E.), its maritime traffic is of great importance (see **Hamburg**). Much has been done during the last twenty years to improve the navigation, and to increase the traffic of the E. The two principal companies are the Chain Steamboat Company and the Saxo-Bohemian Steamboat Company. A chain is laid from Rothenburgsort, near Hamburg, to Melnik, in Bohemia (a distance of 471 m.). New harbour works have been constructed at Magdeburg, Wittenberge, and other places; and the canal system in connection with the E. is increasing from year to year; *e.g.*, it is now proposed to connect the E. at Lauenburg with the Trave at Lübeck by a canal which, when completed, will form one of the most important commercial waterways of the empire. About the canal from the Baltic to the E., see **North Sea and Baltic Canal.** Alt. of zero of river-gauge at Hamburg, 3.3 ft.; of river-surface at Lauenburg, 16½ ft.; at mouth of Havel, 72 ft.; at Hohenelbe, 1490 ft. Area of basin, 55,340 sq. m. (Strelbitsky). [**H. G. S.**]

Elephant, isl., in the Gambia, W. Africa, 100 m. from its mouth.

Elephant and Castle, stn., London, Eng., Surrey, on L. C. & D. R., 1½ m. St. Paul's. It takes its name from an old tavern situated at the most important meeting-place of roads in London S. of the Thames.

Elephanta Island, called by the natives *Ghárápurí,* isl., Brit. India, in Bombay Harbour, 4 m. E. Bombay I.; has remarkable cave temples, in one of which is a colossal three-faced bust 17 ft. 10 in. in height, representing Siva in his threefold character of Creator, Preserver, and Destroyer. The great temple-cave is 130 ft. long and 123 broad, and is still used on Sivaite festivals, and specially by the Baniyá caste. The island received its name from the Portuguese after a large stone elephant which stood near the old landing-place.

Elephant Bay, small bay, Portuguese W. Africa, Benguella, in 13° 11′ S.; has excellent anchorage, but no fresh water.

Elephantine, isl. See **Assuan.**

Elephant Pass, Ceylon.

Elephant Point, cape, India, Bengal, on the W. ct. of Chittagong div., in 21° 15′ N.

Elgin, co., Queensland, touching in the S. 28° S., crossed in the W. by 149° E.

Elgin (*g* hard), royal and parl. burgh, ancient city and par., Scot., cap. co. E., on the Lossie, 11½ m. E. by N. Forres, 5 m. SW. Lossiemouth, its seaport, with stns. on the G. N. of S. R., and the H. R. It has an academy (a high-class secondary school), woollen manufactures, &c., and ruins of a cathedral founded in 1224, 289 ft. in length, with two western towers 83 ft. high. The chapter house is entire, and highly ornamented. There are also remains of a monastery of Grey Friars. E. was created a royal burgh by William I. Along with Banff and Macduff, Cullen, Inverurie, Kintore, and Peterhead (forming the E. dist. of bors.), it returns one member to House of Commons. The secluded valley of Pluscardine, in SW. of the par., contains the ruins of Pluscardine Priory, founded in 1230 by Alexander II. Market-day, F. Royal burgh (1891) P. 7600; par. 19,166 ac., P. 9300; city P. 7900; parl. burgh P. 7800; parl. dist. of burghs P. 33,300.

Elgin, New, vil., Scot., adjoining Elgin on the S., 1 m. to the SSE. P. <750.

Elgin, city, U.S., Illinois, Kane co., 35 m. WNW. Chicago. Much waterpower used in various manufactures. P. (1880) 8800; (1890) 17,800.

Elginfield, vil., Canada, Ontario, Middlesex co., 14 m. from London. P. <1500.

Elginshire, or **Moray,** maritime co., Scot., on the Moray Frith (with 30 m. of sea-coast), the central part of the ancient prov. of Moray, having Banffshire on E., Nairnshire on W., and Inverness-shire on S. and SW. The surface gradually rises from fertile alluvial plain along the coast to a mountainous dist. in the S., the culminating point being 2328 ft. in the Cromdale Hills (SE. frontier). The rivers are the Spey, on E., draining more than half the county; the Lossie, in the centre; and the Findhorn, in the W., expanding into Findhorn Bay. The geological strata are Old Red Sandstone, with fish remains, reptilious sandstone of the Triassic age, and in the S. crystalline rocks like those of the Central Highlands. The plain of Moray is largely composed of glacial deposits, and this dist. is noted by its advanced agriculture, favoured by an excellent climate; less than a third, however, of the county is in cultivation (see **Appendix,** pp. 10–12, for agricultural statistics). The chief manufacture is whisky. There are valuable salmon fisheries. Minerals unimportant. Besides excellent roads, this county has communications by the H. R. and G. N. of S. R. with Perth, as well as Aberdeen and Inverness. The ancient prov. of Moray included Nairnshire and part of Banff and Aberdeenshire. The chief antiquities of the county are Elgin Cathedral, the sculptured monument called Sweno's Stone, the 'Roman Well' at Burghead, and several castles. The counties of Elgin and Nairn, together, return one M.P. E. contains 19 entire pars., and is included in the Synod of Moray. The only royal burghs in it are the county town and Forres. P. of co. (1891) 44,800. See **Scotland,** table.

Elgóibar, comm., Spain, prov. Guipuzcoa, dist. Vergara. P. <5000.

Elgoll, P.O., Scot., I. of Skye, on the E. shore of Loch Scavaig, 9½ m. NNW. of the Point of Sleat.

Elisabethgrad (**Elisavetgrad**), fortress and dist. tn., Russia, govt. and 152 m. N. of Kherson, on Balta-Kremenchug Rly., on Ingul R. Petty trades in leather goods. Trade in manufactured goods imported from Odessa. Alt. 415 ft. Mean temp., yr. 46.2° F., Jan. 20.3°, July 71.2°. P. 57,900.

Elisabethpol, govt. of Russia, Transcaucasia, having Erivan and Tiflis in W., Daghestan in N., Baku in E., and Turkish Armenia in S. It thus spreads from SW. to NE. over the Armenian plateau, the Anti-Caucasus chain, from 42° 20′–47° 30′ E. long., part of the valley of the Kur, and the slopes of the Main Caucasus ridge, from 47°–48° 20′ E. long. The govt. thus includes in the SW. the high plateau and mountains up to the alt. of 12,000 ft., as well as the lowlands of the Kur. Watered by the Kur and its numerous short l. bk. tribs., the Aras along the Turkish frontier, and its l. bk. tribs. Touches Lake Gokcha in the W. Climate extremely varied. [**Elisabethpol,** tn., **Shusha.**] Pop. consists chiefly of Tatars (373,700), Armenians (258,000), and partly Kurds (28,000), Russians (13,500), and others. Agriculture prosperous, leaving a surplus for export. Tobacco, the vine, silkworm culture. Cotton-tree and liquorice plant recently introduced, and 10,000 cwts. of raw cotton, and 700,000 cwts. of liquorice-root every year. Fruit largely exported. Cattle-breeding in the lowlands (70,000 horses, 67,000 bisons, 394,000 horned cattle, 1,235,000 sheep). Mining is developing, there being several excellent copper-mines—the works of Kedabek and Kalakent yielding about 30,000 cwts. of copper, and five others about 7000 cwts. more. House industries in villages. Nearly 1500 small factories give occupation to 8000 workers; yearly production about £300,000. Divided into eight dists.; E., Nukha, Shusha, Aresh, Jebrail, Jevanshir, Kazakh, and Zanglzur. Area, 3666 sq. m. P. (1890) 728,250.

Elisabethpol, or **Ganja,** chief tn. of above prov., 128 m. SE. Tiflis. Very old Armenian town, later a Turkish fortress, annexed to Russia in 1813. Pop. Turkish and Armenian; excellent gardens and orchards. Culture of mulberry tree. House manufacture of silks. Average temp. (alt. 1460 ft.), yr. 13.1°, Jan. 0.1°, July 25.2°; rfall. (9 yrs.), 10.2 in., May–Oct. 6.6 in. P. 20,600.

Elkhorn, rly. stn., Canada, prov. Manitoba, on the C. P. R., 197 m. by rail W. Winnipeg.

Elkhorn, riv., U.S., Nebraska, rises in the S. of Holt co., flows ESE. then SSE. past Norfolk and West Point to the Platte R., which it joins on the l. bk. about 20 m. WNW. Plattsmouth; length about 200 m.

Elkhorn, vil., U.S., Wisconsin, cap. Walworth co., 41 m. SW. Milwaukee. P. <1500.

El Khulil, ancient tn., Palestine, *Hebron,* or *Kirjath-Arba,* the city of the Anakim, in the O. T., 31° 32′ N., 35° 6′ E., 20 m. SSW. Jerusalem. It stands partly on the slopes of two hills, partly in the deep narrow valley of Mamre, one of the heads of the Beersheba valley, now clothed with vineyards. Its sanctuary (*haram*), a walled enclosure, resembling that of the Temple of Jerusalem, but on a smaller scale, is believed by Major Conder to have been the work of Herod the Great or one of his im-

mediate successors, and was certainly in existence as early as 333 A.D. Within its walls are a mediæval church and a court-yard, built over a rock-cut cave, which early tradition identifies with the cave of Machpelah, purchased by Abraham from the sons of Heth, and believed to contain the tombs of Abraham himself, Sarah, his wife, Isaac and Jacob, Rebecca and Leah. Six cenotaphs stand in the enclosure, believed to mark the site of tombs beneath, the cave itself never being entered, though its interior can be seen through a hole in its roof. E. K. manufactures glass, trinkets, leather, and other goods. P. 10,000.

El Khurebe, ruins, Palestine, 3 m. W. of the Baheiret el Huleh (Waters of Merom), site of one of the places called *Hazor* in the O. T.

Emesa, Syria. See **Homs.**

Emfras, former tn. in Abyssinia, a short distance from the E. shore of Lake Tsana, in 12° 13′ N., now ruined.

Emhlangen, tn. and stn. of London Missionary Society, S. Africa, Matabili-land, in about 19° 40′ S., and 29° 10′ E. Alt. 4120 ft. (Montague Kerr, 1884).

Emil, valley, Western Mongolia, extending to the Russian frontier, crossed by 46½° N., and 83° E.

Emilia, govt. (*compartimento territoriale*), N. Italy, comprising the ancient duchies of Parma, Modena, and Massa-Carrara, and the N. part of the former States of the Church, and extending between the lower half of the Po, the Apennines [**Apennines, B.**], and the Adriatic. It owes its name to the important military roads (to which the railway now runs parallel) constructed in B.C. 186, by the censor, Æmilius Lepidus, which bisects the govt. diagonally from Rimini to Piacenza, running along the base of the mountains, and connecting the series of important towns, Cesena, Forli, Faenza, Imola, Bologna, Modena, Reggio, and Parma, which here succeed one another in a straight line at the emergence of the Apennine valleys on the plain. It is almost entirely situated in the basin of the Adriatic, being drained by the Po, which forms nearly the whole of the N. boundary, the principal tributary rivers being the Trebbia, Nure, Taro, Parma, Secchia, and Panaro; the Reno, Lamone, and Savio flow into the Adriatic. Climate temperate and healthy, except on the banks of the Po, and the marshes along the coast. Marshes occupy one-fifth of the surface, a larger proportion than in any other govt. in Italy, but from their situation they affect the health of only a small portion of the population. In the plains the soil is fertile, irrigated by many canals, and produces maize, wheat, tobacco, fruit, wine, silk, honey, hemp, and flax; rice is raised in some of the low grounds. In the hilly region little corn is grown; forests and pasture-grounds are extensive, and chestnuts and goats'-milk cheese are principal articles of food. The cultivation of the vine is rapidly extending. The area under this product in 1890 was four times that devoted to it in the quinquennium 1870–74, but the amount of wine produced did not increase in anything like the same proportion. In only one year of the whole period was it much more than one-half in excess of the average produce of 1870–74. Large quantities of salt are made annually, especially from the extensive lagoon of Comacchio. Of other minerals, sulphur, produced chiefly in the prov. of Forli, is the most important. There are extensive quarries of very beautiful marble. In the plain of Modena, 'Artesian wells' were constructed long before they were known in Artois. See **Italy,** table.

Emmaus Nicopolis, place named in O. T. See **Amwâs.**

Emmaville, formerly **Vegetable Creek,** post-tn., New South Wales, Gough co., 80 m. W. by N. Grafton; with tin and silver mining; emeralds found. P. <1500.

Emme, or **Emmen, Great,** riv., Switzd., cant. Bern, rises in the Bernese Oberland, flows N. 45 m. to the Aar, which it joins 1½ m. NE. Soleure. Its valley, the **Emmenthal,** is one of the finest in Switzerland.

Emmen, comm., Netherlands, prov. Drenthe, 20 m. SW. Assen. P. 14,500.

Emmen, vil., Switzd., cant. and 2 m. N. Lucerne. P. <3000.

Emmen, Little, riv., Switzd., cant. Lucerne, rises near the source of Great E., flows NE. for 30 m., and joins the Reuss 1½ m. NW. Lucerne.

Emmendingen, tn., Ger., gd.-duchy of Baden, 9 m. N. Freiburg. P. <4000.

Emmerich, tn., Ger., Prussia, Rhine Prov., on r. bk. of the Rhine, near the frontier of Holland, 16 m. E. Nijmegen; has a custom-house, and iron and other manufactures. Tn. P. 8200; comm. P. 9600.

Emmerich, vil., Prussia, on the W. ct. of Schleswig, in 54° 59′ N., 8½ m. WNW. Tondern, 3½ m. E. of the head of the channel known as the Hoyer Tief, where it is proposed to construct a harbour connected with E. by a railway embankment. P. <2000.

Emmetsburg, city, U.S., Iowa, Palo Alto co., 120 m. NW. by N. Des Moines, 96 m. ENE. Sioux city. P. <2000.

Emmett, co., U.S., Iowa, on N. frontier, E. of 95° W.

Emmett, co., U.S., Michigan, on the Straits of Mackinac and Lake Michigan.

Emmington, par., Eng., Oxfordshire, Henley div., 15 m. E. by S. Oxford, 2 m. W. Chinnor stn. P. <250.

Emmir Green, P.O., Eng., near Reading, Berkshire.

Emmittsburg, vil., U.S., Maryland, Frederick co., 61 m. by rail NW. Baltimore. P. <1500.

Emmons, co., U.S., N. Dakota, on the S. frontier, crossed in the E. by 100° W.

Emneth, par., Eng., Norfolk, NW. div., 11½ m. SW. King's Lynn, 1½ m. SSW. its stn. on the G. E. R., P.O. P. <1000.

Emo, vil., Ire., NE. Queen's co., bar. Portnahinch, 4 m. S. Portarlington, P.O.

Emöd, vil., Hungary, co. Borsod, dist. Csát. P. <3000.

Emon, or **Emine,** tn., Bulgaria, E. Roumelia, prov. Burgas, on Black Sea, 25 m. NE. by E. Burgas.

Empangeni, Lutheran (Norwegian) mission stn., S. Africa, Zulu-land, about 38 m. NE. by N. of the mouth of the Tugela.

Empe, or **Ennepe,** small riv., Prussia, Westphalia, an affluent of the Volme (trib. of the Ruhr). The lower part of its valley, from near Hagen, is known as the **Emper-,** or **Enneperstrasse,** and contains a succession of large iron-works and other factories.

Empedrado, tn., Argentine Republic, 30 m. S. Corrientes, on the l. bk. of the Rio Paraná. P. <2000.

Emper, electoral div., Ire., Westmeath, dist. Ballynacarrigy.

Empeza, large salt pan in the W. of Boliva, dep. and 100 m. W. by S. Potosi.

Empingham, par., Eng., Rutland, 6 m. E. Oakham, 3½ m. NNW. Ketton stn., PMT.O.; 4875 ac. P. <750.

Empire City, vil., U.S., Colorado, Clear Creek co., 50 m. W. Denver by rail; has smelting works and gold and silver mines. P. <1500.

Empire City, tn., U.S., Kansas, Cherokee co., 138 m. S. Kansas City, 6 m. NNW. of the SE. corner of the state. P. <1500.

Empire City, vil., U.S., Oregon, Coos co., on Coos Bay, 98 m. N. of the SW. corner of the state; coal found near. Rfall. (6 yrs.), 38.82 in. P. <1500.

Empoli, tn., Italy, Tuscany, on the Arno, prov. and 15 m. W. by S. Florence; various manufactures; celebrated in the conflicts of the Guelphs and Ghibellines described by Dante; seat of a bishop. The plain of E. has been called the 'granary of Tuscany.' P. 17,000.

Emporia, city, U.S., Kansas, Lyon co., on R. Neosho, 50 m. SW. by S. Topeka. P. 7600.

Emporium, bor., U.S., Pennsylvania, Cameron co., on Driftwood Creek, 106 m. SE. by E. Erie, 67 m. W. by N. Williamsport. P. <3000.

Empshott, par., Eng., Hampshire, Petersfield div., 15 m. SW. by S. Aldershot, 3 m. NNW. Liss stn. P. <250.

Ems, the ancient *Amisia,* riv., in the W. of Prussia, rises on the SW. slope of the Teutoburg Forest in Lippe, flows NW. then N. into the Dollart; length, 200 m. Navigable from Papenburg, 60 m. from the mouth of the Dollart, canalised to Greven, 130 m. higher up; floatable from Warendorf. A canal, in continuation of the canalised portion of the river to the coal-field of the Ruhr basin, is now projected. Emden (*q.v.*), at the head of the Dollart, is connected by canal with the Jade and with Wilhelmshaven. At Meppen it receives on the right the Hase, navigable from Hölze (37 m.); connected on the left with various canals in Holland.

Ems, or **Bad-Ems,** tn., Ger., Prussia, prov. Hesse-Nassau, on the r. bk. of the Lahn, 6 m. ESE. Coblenz; has celebrated mineral springs, mostly the property of the state, and rich lead and silver mines near. P. 5500.

Ems, or **Domat,** vil., Switzd., cant. Grisons, on the r. bk. of the Rhine, 4 m. WSW. Chur. P. <2000.

Emsche, Emscher, or **Embschers,** small riv., in the W. of Prussia, flows W. to the Rhine through the Ruhr coal-field between the basins of the Ruhr and Lippe; not navigable. The **E. Canal,** from Deusen to Dortmund, follows the course of the E. through a dist. rich in coal and industrial establishments.

Emscote, eccles. par., Eng., in co. and bor. Warwick. P. <3000.

Emsdetten, vil., Ger., Prussia, prov. Westphalia, 16 m. N. by W. Münster. P. <3000.

Emswell, par., Eng., Yorkshire, E. Riding, Buckrose div., 19 m. S. by W. Scarborough, 1 m. E. by N. Garton stn. P. (**E. with Little Driffield**) <500.

Emsworth, small port, Eng., Hampshire, Fareham div., on Langston Harb., 8½ m. ENE. Portsmouth, on the L. B. & S. C. R. P. (eccles. par.) <2000.

Emsworth, vil., U.S., Pennsylvania, Allegheny co., on Ohio R., 7 m. NW. Pittsburg. P. <1500.

Emu, post-tp., New South Wales, Cook co., on R. Nepean, 32 m. WNW. Sydney. P. <1500.

Emu Bay, bay and tp., Tasmania, Wellington co., on the N. ct., 67 m. WNW. Launceston, in 145° 56′ E. See **Burnie.**

Emu Creek, Victoria. See **Strathfieldsaye.**

Emu Park, or **Hewittville,** watering-place, Queensland, on N. side of Keppel Bay, 20 m. ENE. Rockhampton. P. <1500.

Emu River, Tasmania, rising in the N. of the island, and falling into Bass's Straits at Emu Bay.

Emyvale, tn., Ire., N. co. and 6½ m. N. Monaghan, bar. Trough, 3 m. from Glasslough stn., PMT.O. P. <500.

Enagh, electoral div., Ire., co. Antrim, dist. Ballymoney.

Enagh, electoral div., Ire., co. Monaghan, dist. Carrickmacross.

Enagh, electoral div., Ire., co. Monaghan, dist. Glaslough.

Enånger, comm., Sweden, prov. Gefleborg, on the E. ct., 59 m. S. by W. Sundsvall. P. <4000.

Enarea, Innarea, or **Inarya,** a Galla country, NE. Africa, Abyssinia, to the SW. of Shoa, cap. Saka; has immense coffee plantations, and is inhabited by one of the most civilised peoples of the Galla countries.

Enborne, par., Eng., Berkshire, div. and 3 m. WSW. Newbury. P. <500.

Enborne, riv., Eng., Berkshire, flowing into the Kennet, on the r. bk., 9 m. E. Newbury. It forms about 10 m. of the S. frontier of the county.

Encaramada, site, Venezuela, on the r. bk. of the Orinoco, above the confluence of the Apure. In the vicinity are numerous rocks covered with hieroglyphics.

Encarnacion, tn., Mexico, Jalisco, 65 m. NE. by E. Guadalajara. P. 5000.

Encarnacion, Paraguay. See **Villa Encarnacion.**

Encartaciones, dist., N. Spain, belonging to prov. Santander and the Basque prov. of Vizcaya, bounded on the S. by the prov. of Burgos, on the N. by the Bay of Biscay. At one time the mayors of the different villages of this dist. used to meet to discuss the common affairs at Avellaneda.

Encausse, vil., France, dep. Haute-Garonne, arr. St. Gaudens, cant. and 5 m. NW. Aspet, with warm springs. P. <2000.

Enciñal, co., U.S., Texas, crossed by 99° W., in the N. by 28° N.

Encinasola, comm., Spain, prov. and 60 m. NNW. Huelva. P. <5000.

Encoje, Angola. See **Enkozhe.**

Encounter Bay, large bay, in the S. of South Australia, which receives the outlet of Lake Alexandrina, in 35° 40′ S., 138° 45′ E.; formerly a whaling station.

Endau, riv., Malay Penin., Johor, flows N. into the China Sea, which it enters in about 2° 40′ N., 103° 40′ E.

Ende, vil., Prussia, prov. Westphalia, govt. Arnsberg. P. <4000.

Endeavour River, Queensland, enters the Pacific in 15° 26′ S. at Cooktown, where Cook beached his ship *Endeavour* in 1770 to repair a leak.

Endeavour Strait, Queensland, between Prince of Wales I. and the N. end of Cape York Penin., E. of the Gulf of Carpentaria, in 10° 45′ S., and 142° 10′ E.; 8 m. broad; named by Cook after the ship in which he explored and charted the E. coast of Australia.

Endeh, the eastern portion of Flores I., Eastern Archipelago.

Endelave, isl., Denmark, off the N. ct. of Fyn (Funen) I.

Endellion, ct. par., Eng., Cornwall, Launceston div., 8½ m. NW. by N. Bodmin, 4½ m. N. Wadebridge stn. P. <1500.

Endenich, vil., Prussia, Rhine Prov., govt. Cologne, circle and dist. Bonn. P. <4000.

Enderby, par., Eng., Leicestershire, Harborough div., 4½ m. SW. Leicester, 1½ m. N. Narborough stn. Ruins of Lubbesthorpe Abbey about 1½ m. NE. PMT.O. P. <2500.

Enderby Land, dist., in the Antarctic regions, discovered by Biscoe, 1831; in 67° 30′ S. and 50° E.

Endian, tn., Persia. See **Hindian.**

Endicott, vil., U.S., Washington, Whitman co., 55 m. S. by W. Spokane Falls. P. <1500.

Endingen, tn., Ger., gd.-duchy of Baden, 12 m. NW. by N. Freiburg. P. <3000.

End Moor, vil., Eng., Westmorland, div. and 5½ m. S. by E. Kendal, 2⅛ m. NE. Milnthorpe stn., PMT.O.

Endon, Longsdon and Stanley, par., Eng., Staffordshire, div. and 4 m. WSW. Leek, on the N. Staffordshire Rly., PM.O.; 5457 ac. P. <2000.

Endorf, comm., Ger., kgd. Bavaria, govt. Upper Bavaria, 36 m. ESE. Munich. P. <2000.

Endôr, vil., Palestine, the *Endor* of the O. T., 32° 38′ N., 35° 23′ E., 6½ m. SE. Nazareth.

Endrőd, vil., Hungary, prov. Békés, 50 m. E. Kecskemet. P. 10,900.

Ene, riv., Peru, Amazon basin, formed by the union of the Apurimac and the Mantaro, flows NNW. till it unites with the Perene, in about 11° 8′ S., 74° 17′ W., to form the Tambo.

Enego, comm., Italy, Venetia, prov. Vicenza, dist. Asiago. P. <4000.

Enez, Cymric, 'an island,' or 'peninsula.' See *Innis.*

Enfesta, comm., Spain, Galicia, prov. Corunna, dist. Santiago. P. <5000.

Enfield, market-tn. and par., Eng., Middlesex and Hertfordshire, E. div., 10 m. N. St. Paul's, London, with stns. on the G. E. (**E. Town**) and G. N. Rlys.; has a government small arms factory. To this place (10⅝ m. by rail from Liverpool Street) the G. E. R. runs probably the cheapest workmen's trains in the world (return fare, 2d.). Market-day, S. Alt. 108 ft. Mean rfall. (1866–80), 30.03 in. Par. 12,639 ac., P. 31,800; tn. P. 31,500; parl. div. P. 84,400.

Engis, comm., Belgium, prov. and 9 m. WSW. Liège, on the l. bk. of the Meuse. P. <2000.

Engkobo, vil., in Tembu-land, Cape Colony, 70 m. NNW. of the mouth of the Great Kei R.

England, the largest and most populous country of the United Kingdom, separated from Scotland by the Solway Firth, the Cheviot Hills, and the Tweed, and comprising the whole of Great Britain S. of that boundary and E. of the mountainous peninsula of Wales. The Cheviot Hills form the boundary for about 35 m. The dist. to the W. was formerly occupied by morasses. In former times, when communications were bad, such hills and morasses formed a natural boundary beween two countries, the bulk of whose population has always been settled at a considerable distance from this frontier. Wales was conquered by England in 1265–84, but for long after that retained its own system of law and administration. Since the time of Henry VIII., however, it has been fully incorporated with England, but for several reasons deserves, like Scotland, separate treatment in this work. Apart from Wales, England is divided into forty counties (now known as ancient counties—see below under local government), the area of which, along with the population at each census since the first, are shown in the table on the following page. The most striking fact brought out by this table, is the enormous increase that has taken place in the population of England since the beginning of the 19th century. In the ninety years between the first and last census, the population has increased about 3½ times. In previous centuries we have only estimates of the population, but some of these are based on data which afford fair ground for believing that the estimate is approximately accurate. In 1377 Parliament granted Edward III. a poll-tax, and from the returns made in connection with this tax the population of England (exclusive of Wales and Monmouth) is estimated by different authorities at about 2,050,000 to 2,220,000. Professor Thorold Rogers believed that from that time down to the close of the 16th century there was no material increase of the English population (see *Industrial and Commercial History of England,* chap. iii.), but his estimates with regard to the 16th century seem to be based on rather flimsy grounds, and to be quite irreconcilable with two estimates of the total fighting population for 1575 and 1583. These two accounts agree in representing the fighting men to have numbered about 1,172,000, from which a population of nearly 4,700,000 is deduced for the whole of England and Wales (see *Jour. Statist. Soc.,* IV. p. 202). A century later still more reliable data are available, and estimates have been made for every decade in the 18th century, based on the registers of births and deaths and the poll and hearth tax returns (see *Jour. Statist. Soc.,* XLIII. p. 462). In 1700 the population of England and Wales was estimated at 5,475,000, in 1750 at 6,467,000, and in 1790 at 8,675,000. The percental increase between this last estimate and the total for the first census year, namely 2.51, is markedly lower than that in the decade immediately following, and indeed than any subsequent decade, as shown in the census table; and though it is explained by wars abroad, troubles at home, and bad harvests (1795 and 1797), the difference is great enough to throw considerable doubt on the accuracy of the previous estimates, especially since two of these hindrances to the growth of population, war and bad harvests (1801, 1809–17), operated in the two succeeding decades. But in any case, these estimates must be near enough the truth to show how slow, comparatively speaking, was the growth of population in England before the beginning of the 19th, or, at any rate, before the 18th century. And this is in keeping with the slow rate of development of the resources of England, as set forth in subsequent paragraphs. **Surface.**—The principal elevations in England belong to the N. and W., especially the SW. The uplands of the Cheviots extend S. through a large part of Northumberland and Cumberland to the narrow line of valleys

belonging to the lower Tyne and the Irthing, and now traversed by the railway from Carlisle to Newcastle. Immediately to the S. of this line of valleys begins the highland tract known as the Pennine Chain or Range, sometimes called 'the back-bone of England,' which, according to the widest application of the name, extends to the middle of Derbyshire and N. of Staffordshire. To it belong Cross Fell (2892 ft.) in the N.; Whernside (2414 ft.), Ingleborough (2373 ft.), and Pen-y-gent (2273 ft.) in the middle; and the Peak (Kinder Scout, 2808 ft.) in the S. It is not, however, a mountain range, but a series of uplands, in most places above 1000 ft. in height. Midway it is interrupted by a partial depression, the level sinking below 500 ft., between the Ribble on the W. and the Wharfe on the E. Southwards it terminates in a number of finger-like spurs, between which flow several tribs of the Trent. To the W. of the northern part of the Pennine Chain, occupying the greater part of the peninsula between the Solway Firth and Morecambe Bay, there occurs a highland region of a different character, being furrowed by deep valleys which run out in all directions, many of them occupied by beautiful lakes. As these are the only lakes of importance in England, apart from the Broads (*q.v.*), this region is generally known as the English Lake District (*q.v.*). To it belong the only heights in England above 3000 ft., Scawfell or Sca Fell Pikes (3206 ft.), Helvellyn (3118 ft.), Skiddaw (3058 ft.). The dist. is not wholly cut off from the Pennine Chain, being joined to the latter by the saddle or connecting ridge of Shap Fell, over which has long passed the chief road from N. to S. in this part of England, the route being now followed also by the L. & NW. R. In the SW. of England the principal heights are the granite elevations of Cornwall and S. Devon (Yes Tor in the NW. of Dartmoor, 2077 ft.), the Devonian uplands of Exmoor in N. Devon and the W. of Somerset, and the limestone (Lower Carboniferous) ridge of the Mendip Hills in Somerset. The only other heights in the W. of England that need be mentioned are the Clee Hills, Longmynd, and the isolated igneous peak of the Wrekin, all in Shropshire, and the gneissose mass of the Malvern Hills in Worcestershire. Geologically, all these parts of England containing the higher elevations belong to the older series of rocks. The greater part of the higher ground from the Cheviots to the middle of England belong to the portion of the Carboniferous system underlying the coal-measures, and the principal coalfields lie on opposite sides of these highlands. In the S., these are surrounded by a large area of Triassic rocks, spreading over the W. midland counties as well as Cheshire, and extending on the E. as far N. as the mouth of the Tyne. In the

midst of these lie several other coalfields as inliers. In the Lake District, Ordovician and Cambrian and Silurian, as well as volcanic, rocks abound. The SW. peninsula, apart from the granitic areas, is mainly of Devonian and Lower Carboniferous age.

The SE. of England, from the Tees to the coast of Dorset, is mainly composed of more recent (Secondary and Tertiary) rocks, for the most part spread out in vast sheets with comparatively slight undulations, the older generally extending further W. than the more recent, and the chief contrasts of upland and plain being exhibited at the edges or escarpments where the strata terminate. There are few places in this area where the surface is more than 500 ft. above sea-level, and there is not a single elevation of 1500 ft. (the highest, Burton Howe, in the N. of Yorkshire, 1489 ft.). In the extreme E., on the coast of Norfolk and Suffolk, there is a considerable area of Pliocene rocks. To the S. that is followed by a wedge of older Tertiary rocks (largely London clay) on both sides of the Thames, gradually narrowing inland and terminating a few miles to the W. of Newbury. Both on the NW. and S. this wedge is succeeded by the chalk. On the NW. this formation forms a broad belt, generally of high ground, forming in Oxford and Bucks the Chiltern Hills, and further N. the E. Anglian Heights. On the S. it forms the series of bare downs extending, under the name of the N. Downs, from Salisbury Plain (also chalk) to the N. and S. Forelands in Kent, the S. Downs forming another range of heights extending SE. from Salisbury Plain to Beachy Head. Between the two is enclosed a wedge of Lower Cretaceous age, forming the Weald, once a vast forest. The area round the Wash is chiefly a tract of low-lying alluvium, extending far inland on the SW. and W. [**Bedford Level**], but further N. the chalk is again continued in the High Dyke or Lincoln Heights, and beyond the Humber in the Yorkshire Moors. To the W. of the chalk is a series of Oolitic formations in which occur the Cotswold Hills in Gloucestershire, Edgehill on the borders of the counties of Oxford and Warwick, and in the extreme N. the Yorkshire Wolds. Still further W., between the Oolites and the Triassic, lies a band of Lias of varying width, mainly belonging, like the Trias and most of the Oolites, to the great central plain. The principal **rivers** of England are the Thames, Severn, Trent, and (Yorkshire) Ouse, to which may be added, on account of their importance to shipping, the Mersey, Tyne, and Tees. All the great rivers are connected by canals in the midlands, the network of canals including also the Nen and the Witham, belonging to the Wash basin. Three lines of canals have even been laid across the Pennine Chain, bringing

the ports of Goole and Hull on the E. into connection with those of Manchester and Liverpool on the W., through the valleys of the Aire and Calder (tribs. Ouse). The **climate** is treated of more fully under the United Kingdom. Here it is enough to say that on the whole the western and northern counties receive, on the whole, the greater rainfall, and are more suited for dairy-farming, those on the SE. better adapted for corn-crops. The principal corn **crops** of England are wheat, barley, and oats; the principal green-crops, turnips, potatoes, and mangold. The minor corn-crops are rye, beans, and peas; the more important of the minor green-crops, cabbage, vetches, and tares. Lucerne occupies several thousand acres in Kent and in Essex, and is cultivated to a smaller extent in nearly all other English counties. The aggregate area under corn-crops is considerably more than twice that under green-crops. Clover, sainfoin, and grasses, whether for hay or not for hay, are grown over a greater area than any one other crop, and than all the green crops together; and the total in permanent pasture, or grass not broken up in rotation, is considerably in excess of all the rest of the area employed in agriculture, a feature by which English is markedly distinguished from Scotch agriculture. Among special crops the most important is hops, cultivated principally in Kent, but also in Sussex, Surrey, Hants, Herefordshire, and Worcestershire, and to a small extent in a few other counties. Flax is grown in nearly all counties, but is nowhere of importance. There are orchards also in all counties; but the leading counties under this head, if we consider the area under orchards relatively to the total area, are those of Hereford, Worcester, Middlesex, Gloucester, Somerset, Kent, Devon, and Monmouth. Middlesex and Kent stand pre-eminent in the cultivation of small fruit (strawberries, gooseberries, currants, &c.). The table on pp. 7–9 of the Appendix shows the enormous **decrease** that has taken place in recent years in the area under crops, and especially under **corn-crops** in recent years, chiefly, if not wholly, in consequence of the increasing imports from abroad. The salient facts are these: The total area under wheat has declined by nearly a half. The decline is greatest in the northern counties, Northumberland, Cumberland, Durham, Lancashire, Cheshire, and the N. Riding of York, in all of which the area under wheat in 1893 was about a third or less than a third of what it was in 1869, least in the counties between the Thames and the Wash, which have always been the principal wheat-growing counties. In Beds, Herts, Cams, Hunts, Essex, Norfolk, and Suffolk, the area under wheat in 1893 was still almost two-thirds or more than that proportion of what it was in 1869. In barley the decline is comparatively slight, and this crop has about maintained, or even extended, its area in the counties of Cambridge, Hereford, Huntingdon, Rutland, Salop, Kent, Suffolk, Norfolk, Lincoln, the E. and N. Ridings of York, and in Durham. In oats there has been a considerable increase, and that more or less in every county except Derby and Durham (those affected by the creation of the county of London being left out of account in the comparison). It is noteworthy that in the extent under corn-crops collectively the diminution has been least in Lancashire. Among green crops there has been an increase on the whole under potatoes, especially in the counties near London. In mangold there is little change—the increase greatest in the counties near London and in Norfolk. The extent under green crops collectively has increased only in the counties of Cambridge, Lincolnshire, and Middlesex, but has remained pretty steady in those of York and Lancaster. On the other hand, the area under permanent pasture has increased on the whole by not much less than one-third, the increase being substantial in every county except Rutland. The columns on p. 9 of the Appendix relating to live-stock, form an interesting supplement to those just considered. From these we see that there has been a small relative advance under horses (chiefly in the counties of Cambridge, Huntingdon, Monmouth, Norfolk, and Salop) and pigs; a large decrease in sheep, all counties sharing in this decrease except the northern counties (Northumberland, Cumberland, Westmorland, Lancaster, and the N. Riding of York), besides Monmouth, Salop, and Cornwall; but that there was, on the other hand, a large relative increase in the number of cattle; an increase shared in by every county for which the returns allow a comparison to be made, in all except Northumberland, Suffolk, Westmorland, and the E. Riding of York, besides two of the counties affected by the creation of the county of London, exceeding 20 per 1000 acres, in two (Chester and Cornwall) exceeding 60 per 1000 acres, in other two (Salop and Stafford) exceeding 50 per 1000 acres, and in seven others (Derby, Devon, Hereford, Hunts, Leicester, Rutland, and Warwick) exceeding 40 per 1000 acres. In 1869 only two counties, Chester and Leicester, had more than 200 cattle per 1000 acres. The former of these in the interval increased its stock of cattle by 63, the latter by 44, per 1000 acres; and the counties of Cornwall, Derby, Somerset, and Stafford were added to the number of those with cattle exceeding that proportion.

Notwithstanding the decline shown in the tables now under consideration, English agriculture is in some respects ahead of that of all the rest of the world, as is shown by the high average produce of wheat (still by far the most important corn-crop) relatively to area—about twenty-nine bushels per acre, a higher average than is obtained in any other country in which wheat is grown to any considerable extent. (The small wheat area in Scotland shows a somewhat higher average.) But this excellence of English agriculture is of comparatively recent date. The only agricultural product for which England has long been famous is wool, which for centuries was the leading English export, and is still the only British agricultural export of importance. The breeds of sheep which take their names from the counties of Leicester and Lincoln are among those yielding the finest long-stapled wool. Turnips appear to have been introduced (along with carrots) from Holland early in the 17th century, and the cultivation of this crop was the first important advance made in arable agriculture. By providing winter food for cattle it enabled greater numbers to be kept, and thus furnished greater supplies of farmyard manure, and rendered it possible for the people to have fresh meat for food all the year round, at the same time that the root served itself as an addition to the vegetable diet. By its means alone, according to Professor Thorold Rogers, leprosy and scurvy, previously endemic in England, were finally extirpated. Its cultivation, however, seems to have spread but slowly to some of the outlying counties. Borlase, the antiquary, writing in 1756, speaks of turnip husbandry as only having begun to obtain in Cornwall; and even in 1794 the writer of a report to the Board of Agriculture states that in that county the cultivation of turnips as a rotation crop was not general. About the middle of the 17th century clover was introduced also from Holland, and subsequently sainfoin and rye-grass from the same country. It was only in the 18th century that the cultivation of the potato became general in England. The cultivation of mangold is still more recent, and is for the most part limited in extent, except in the eastern counties, from Lincoln southwards, and some of the SW. counties, the plant being very sensitive to injury from frost. Sugar-beet, a variety of the mangold, has been cultivated only here and there experimentally. It was in the 18th century, also, that great improvement was made in the arable agriculture of the country by the extensive practice of marling; and in the latter half of that century that a beginning was made with that improvement of live-stock by breeding which, being ever since continued, has made England renowned for its cattle and sheep, as well as some of its breeds of horses. The principal pioneer in this department of enterprise was Bakewell, a Leicestershire agriculturist, to whom England owes the Leicester breed of sheep.

The principal **mineral wealth** of England was likewise slow in attaining its full development, though some English minerals attained a high degree of importance at a very early date. Whether the Phœnicians actually visited England for the sake of Cornish tin, or even traded in tin of English origin, is only matter of conjecture, though it is highly probable that they did both, and it is at least certain that the Cornish tin mines have been worked from a very remote period. During the Middle Ages, after the decline of the Spanish (Galician) mines, and before the discovery of those of Bohemia and Saxony (1240), England furnished the whole supply of tin for Christendom, a source of great wealth to the Earls of Cornwall (*q.v.*) after the Norman Conquest. The lead mines of England were also at an early date important sources of supply both of lead and silver, which were largely exported. In an essay on the trade and commerce of England, laid before James I. by Sir Walter Raleigh in 1603, lead and tin are the only two mineral commodities of England to which (from the wording of the document) special prominence seems to be given. Copper, iron, alum, copperas, and coals are also mentioned, but not in such a manner as to lead one to suppose the same importance was attached to them, although iron ordnance is specially spoken of as a jewel of great value peculiar to England. (See the document in Anderson's *History of Commerce*, II. 216–20.) Reference is made by him to the mighty store of salt in France and Spain, but none to that of Cheshire and Worcestershire. The fact is, that though the Worcestershire salt at least was certainly worked by the Romans, the art of refining it appears to have been lost, and not to have been rediscovered till the end of the 17th century. Iron ore was formerly smelted in England, as elsewhere, solely by means of charcoal, and the total production was scanty, and of inferior quality. The best ores (the hematites of Cumberland and N. Lancashire) were not known. Coal was first used with practical success in the smelting of iron by Dud Dudley in 1619, but the practice was then followed only by himself, and it was not till early in the 18th century (at least as early as 1718) that coked coal came to be regularly used in iron-smelting in the works of Abraham Darby at Coalbrookdale; and it was a good deal later before its use became general. Mr. Hull in his *Coalfields of Great Britain* has collected numerous notices of the use of coal in England in early times.

According to him, there are clear, or (in some cases) more or less probable, signs of coal having been used in Roman times at Manchester, near Newcastle, at Wroxeter (*Uriconium*), in Shropshire, and elsewhere. An Anglo-Saxon chronicle of 852 shows that it was an article of domestic consumption at that date. There are probable evidences of its use in Durham in the 12th century. In 1259 a charter was granted to the freemen of Newcastle, empowering them to dig for coals; and a sea trade in coal (hence called 'sea-coal') to London grew rapidly, and continued to grow in spite of a royal proclamation forbidding its use in 1306. Collieries are known to have been opened in the 14th century in various parts of Yorkshire, Durham, and Northumberland, and Hull believes it to be 'very probable' that coal was already extracted throughout this century near the outcrop of the beds of most, if not all, the coalfields of Britain and Ireland. But even subsequently to this date the references to the use of coal are for centuries only occasional [**Walsall, Cole Orton, Clee Hills, Wigan**]. It is from the discovery of the mode of smelting iron by means of coal that the growing importance of this fuel may be dated, an importance which the mechanical inventions soon after increased to such an extent as to make coal without a rival in an economic sense among the minerals of England, its annual value being six or seven times that of any other. (See table, **Appendix,** p. 14.) At present the **seven leading minerals** of England, which produces nearly three-fourths of the total value of the minerals raised in the United Kingdom, are coal, stone, iron ore, clays (exclusive of ordinary clays), salt, tin and lead ores. No others are produced to the value of more than £100,000 annually. About one-third of the total amount of English coal is produced in the coalfield in the E. side of the Pennine Chain, extending from S. Yorkshire into Notts. More than one-fourth is produced in the Durham and Northumberland coalfield, about one-sixth in the S. Lancashire and Cheshire coalfield, about one-tenth in the coalfield of S. Staffordshire and the adjoining parts of the cos. of Warwick and Worcester. Large amounts are also produced in N. Staffordshire and Monmouthshire, though this latter area must be regarded as a part of the great S. Wales coalfield; and smaller amounts in detached coalfields in Leicestershire, Gloucestershire, Somerset, Salop, and elsewhere. Stone is too widely diffused for the places of its occurrence to be enumerated. Of the iron ore of England, about two-thirds is produced in the following dists. and cos.:—the N. Riding of Yorkshire (that is, the Cleveland dist.), Cumberland, and N. Lancashire (the seat of production of the valuable red hematite), Lincolnshire, Northamptonshire and Leicestershire (in which counties lie the bulk of the open works), and in N. Staffordshire. The production of pig-iron, however, is more evenly and widely distributed, though the two first-mentioned dists. take the lead in this industry also, the coalfield of Durham and Northumberland ranking next. Of the clays mentioned in the mineral returns, the most important are fire-clay, produced chiefly in the coalfields of Durham, Staffordshire, Yorkshire, and Lancashire, and china clay, mainly in Cornwall, to a small amount, and in Devon. About two-thirds of the salt of England is produced in Cheshire, in the basin of the Weaver, but large quantities are also produced in the older locality in Worcestershire (Droitwich and Stoke Prior), and in the more recently discovered dists. at the mouth of the Tees (S. Durham and Middlesbrough, in Yorkshire), and N. Lancashire (at Preesall, whence the brine is pumped to Fleetwood). Tin ore is obtained almost entirely from Cornwall, a small quantity from Devon; and lead ore (mostly yielding also silver) from Durham, Derbyshire, Cumberland, Northumberland, Westmorland, Yorkshire, and to a smaller extent from several other counties. Among the minor minerals of England may be mentioned arsenic (Devon and Cornwall), barytes (chiefly Northumberland), gypsum (Notts, Devon, Cumberland, Stafford, &c.), zinc ore (Cumberland, Derby, Salop), phosphate of lime (Cambridge, Beds, Suffolk), copper ore (Cornwall, Devon, Carnarvon, &c.), and copper precipitate (Anglesey), ochre, umber, &c., oil shale, alum clay, and alum shale.

Manufactures in England were likewise comparatively slow in their development. The earliest to acquire importance was wool, for which the country supplied such an abundance of raw material. From Flanders, English kings introduced artisans with the view of improving the woollen manufactures of the country towards the close of the 11th century, in the first half of the 14th century, and towards the close of the 15th. In the following century English woollens had become a considerable article of export; but the cloth was still sent to Holland to be dressed and finished in 1603, and the finest kinds even after the middle of the 17th century. Early in the 18th century the woollen industry had risen to such importance, that woollen manufactures formed upwards of 40 per cent. of the value of English exports; and about 1780 this industry is spoken of as having long been the glory of England, and the envy of other nations. It was in this century, too, that the great mechanical inventions took place which made England pre-eminent in manufactures among all the countries of the world. The first mechanical invention of importance due to an Englishman may be said to be that of the fly-shuttle, patented by John Kay, of Bolton, in 1733. A machine for spinning by rollers was invented by Wyatt in Birmingham in 1738, but it was not till about 1769, when Arkwright took out his patent for the purpose, that this mode of spinning was successfully introduced. Previously to this the spinning-jenny of Hargreaves, the first machine by which more than two yarns could be spun at once, had been invented (1764), though it was not patented till 1770. The invention of Crompton's spinning-mule followed in 1779, and that of Cartwright's power-loom in 1785. These inventions were first applied in the cotton industry, which rapidly attained a position of unrivalled importance. In the end, however, they served as a stimulus to all textile industries, which received an additional stimulus when Watt's numerous inventions had at last, about 1785, rendered the steam-engine an efficient agent in textile as well as other manufactures; and numerous coal-mines were opened in the very districts in which the leading textile industries had already established themselves (see below). With the growth of these industries, the development of machine-making went on hand in hand.

The chief seats of the great English manufacturing industries have remained the same for long periods. In early times, indeed, the woollen industry flourished round London. In the 15th century, Surrey, Berks, and other counties round the capital are mentioned as noted for their woollen industry. So also are the counties of Somerset, Gloucester, and Dorset in the W. of England; and Flemings had already introduced the manufacture into Manchester (1328) and Kendal. Subsequently, however, this industry died out in the home counties, owing, it is said, to the dearness of provisions in consequence of the vicinity of London; and when, in 1489, Henry VII. introduced Flemish artisans into the country, they were principally settled in Yorkshire, at Leeds, Wakefield, and Halifax, 'places well supplied with water, fuel, and cheap provisions,' and which have ever since remained, along with neighbouring towns, the great centres of this branch of industry, where it is now promoted by the working of one of the richest coalfields of the country. The W. of England (the Stroud valley in Gloucestershire, and Bradford, and Trowbridge in Wiltshire) still retains a reputation for its woollens, especially its broadcloth. The cottons of Manchester are already mentioned in the middle of the 14th century, but were then, and till long after, really of wool or linen, or mixtures of wool or linen with cotton. It was not till after the great inventions already referred to that cotton yarn could be spun of sufficient strength to form the warp. Manchester then became the centre of the cotton industry in the strict sense of the term, and this industry is now carried on principally in the towns round Manchester, on the W. side of the Pennine Chain, where it is pursued under exceptionally favourable conditions, in consequence of the humidity of the atmosphere, and the richness of the underlying coalfield. Among other textile industries may be mentioned those of linen and silk, neither of which is a notably English manufacture. Manchester used to be noted for its linens, the yarn for which it obtained from Ireland, but now Barnsley is the principal English town engaged in this manufacture. The first silk-mill in England was erected at Derby in 1717, and the industry has since been mainly carried on in this county, N. Staffordshire and E. Cheshire, where streams of pure water abound. Spitalfields, in London, was also long known for its silk manufactures, though there it is now nearly extinct. A specially English branch of this manufacture, the spinning and weaving of waste silk by machinery similar to that used in woollen and cotton manufacture, has its chief centre at Bradford. The manufacture of machinery is mainly carried on in or near the great textile centres [**Oldham, Bolton, Keighley**]. Iron and other metal industries have long made Birmingham renowned, and Sheffield has long been noted for its cutlery. More recently many other towns within easy reach of coal and iron (Middlesbrough, Barrow, Leeds, &c.) have become celebrated for their iron and steel, and great seaports thus favourably situated (Barrow, the Tyne ports, Sunderland) also for their shipbuilding. The manufacture of earthenware has long been carried on principally in the dist. of N. Staffordshire known as the Potteries (round Burslem), with which the name of Wedgwood is associated in last century. Paper-making, which was first firmly established at Dartford, in Kent, in 1588, is still largely carried on in that county as well as elsewhere. The great chemical manufactures are chiefly pursued on or near the great Cheshire salt-basin (Widnes, &c.), salt as well as coal being essential to the most important of such industries, but are also largely pursued in other important towns on or near the coalfields. As to the **commerce** of England, see **United Kingdom.** The nature of the industries that has led to the great increase in the population of England since the end of the 18th century has necessarily led to an increasing concentration of population in **large towns,** as is well shown by the following table, exhibiting the percental increase (or decrease) of population within the present areas of the

twenty-eight largest towns of England since the census of 1801 :[1]—

	1801 to 1811.	1811 to 1821.	1821 to 1831.	1831 to 1841.	1841 to 1851.	1851 to 1861.	1861 to 1871.	1871 to 1881.	1881 to 1891.

[1] From a paper by Mr. Noel A. Humphreys in *Jour. Statis . Soc.*, liv. p. 322.

The history of **local government** in England, to which that of Wales has been assimilated, must be traced in connection with territorial divs. The following are the principal divs. in Anglo-Saxon times :—The *Shire* (A.S. 'scir, a share) was originally a sub-kingdom, or a 'share' of one. This division of the country appears to have been effected gradually, but was probably completed by the time of Edgar. The chief person in the shire was the hereditary 'ealdorman,' the military leader, representing the earlier sub-king; next to him was the 'shire-reeve' who, with the ealdorman and bishop, presided over the 'shire-moot' ('scir-gemot'), or county court, which comprised all the landowners of the county, and representatives from the hundreds and townships. To this court, civil, criminal, and ecclesiastical cases were referred from the inferior courts. The *Hundred*, a sub-div. of the shire, was probably originally the land occupied by a hundred free families, bound together for mutual protection and justice. The headman was the 'Hundred's ealdor.' The division into hundreds originated in the S.; in the Midland counties similar divs. were known as *wapentakes*, and in the N. as *wards*. The name 'hundred' was later extended to all the divs. The 'hundred-moot,' held once a month under the presidency of the hundred's ealdor, comprised all landowners within the dist. and six representatives from each township. The actual judges were a chosen body of twelve, who in the time of Ethelred III. appear as responsible for the presentation to justice of guilty persons; they became, in later times, the Grand, or 'presentment,' Jury, but in the 14th century the assembly of the county court gradually replaced the presentment jury of the hundreds, and assumed the duty of indicting. The Grand Jurors of the county are now selected from the notable freeholders. The hundred is still liable for damages caused by riot. The *tything* (A.S. 'teothing,' a tenth) in the S. (*tenmennetale* in the N.) was an association of ten for mutual protection and responsibility. It does not appear certain that in Anglo-Saxon times it was a territorial div., though it became so later; and under the Normans the members, bound by the oath of 'frankpledge' or 'frithborh,' were held responsible for crime committed within the tything, and for bringing an accused person to justice. *Lathe* ('lething,' a levy) was a div. peculiar to Kent; it included several hundreds, and had a court of its own. The *rape* ('rope') of Sussex, and the *ridings* or *trithings* (A.S. 'trething,' a third part) of Yorkshire and Lancashire, were other large sub-divs. of counties. The *township*, the representative of the old Teutonic 'mark,' and supposed by some to be the same as the tything, was the unit of local administration. It was the enclosure within which a few kindred families dwelt, at first holding the land in common. The chief official was the 'tun-gerefa,' usually elected, but sometimes nominated, by the king, or, in the case of dependent townships, by the great lord. The *burgh* ('burh,' a fortified place), or *town*, might originate in a township, or in the cluster of dwellings around a castle or monastery. The chief magistrate was the 'tun-gerefa,' or in mercantile places the 'port-gerefa' ('porta,' a market-place). The burghs became gradually freed from the jurisdiction of the Hundred Court, though still subject to that of the county. Some of the larger towns, however, on payment to the king of a fixed rent—'Firma Burgi'—obtained a charter of incorporation, with certain privileges, chief of which were the right of self-government and freedom from the exactions of the sheriff. With the growth of the feudal system under the Normans the liberties of the people were much curtailed, and their land alienated to the crown—'folkland was changed into bocland.' The authority of the county courts was diminished by the institution of separate ecclesiastical courts, and by the extension of private jurisdiction. Under Henry II. their importance was temporarily increased, but from the time of Edward I. they gradually decayed. The modern County Court was established in 1846 for the recovery of small debts. The Hundred Courts ceased to be of much importance after 1236, when the attendance of freemen was excused, though they were not actually abolished till 1867. Manorial courts, which grew out of the right of private jurisdiction, included 'Court Leet,' 'Court Customary,' and 'Court Baron,' the last held in every manor, and attended by the freeholders owning the supremacy of the lord of the manor, was the descendant of the court of the township, the township having generally been merged in the manor. The *ecclesiastical parish* was originally the township, or townships, forming the dist. to which one priest ministered. The division of the country into pars. does not appear to have been completed till Edward III. After the separation of the civil and eccles. courts, the 'vestry' was formed for the regulation of the ecclesiastical matters of the township, and later undertook any matter outside the jurisdiction of the manorial courts. The minister of the par. was chairman of the vestry, its officers were the churchwardens, and its members the burgesses. The *poor-law parish*, now known as the *civil parish*, dates from the reign of Elizabeth, when churchwardens were appointed to act as overseers for the relief of the poor. The civil and eccles. pars. were at this time identical, but subsequently many large pars. have been divided for civil or ecclesiastical purposes, or both; outlying townships have acquired the right of appointing separate overseers, certain extra-parochial and detached parts have merged in adjoining pars., and certain townships and pars. have been combined. Now townships and civil pars. are practically one, both being officially defined as areas in which a poor-rate is, or can be, separately levied; and the eccles. par. is of little importance in relation to local government. After the Norman Conquest the towns became of increasing importance. William I. granted charters to many. This policy was continued by succeeding sovereigns, and by the time of Henry III. nearly all the large towns had secured various privileges and immunities. Meanwhile the *Guilds*—close associations for various purposes, and invested with certain rights and privileges—were being formed in the towns. Of these the most important in relation to local government were the Merchant Guilds, which about the time of Henry III. became merged in the 'Corporation.' At first the mayor, elected by the burgesses, was the only official, but aldermen and councillors were added. The corporation soon became a close body, electing its own members, and having, in some cases, the right of electing members of Parliament. Matters continued thus till 1835, when the Municipal Corporation Act was passed, giving to the burgesses the right of electing the councillors, providing for the free exercise of local government, and depriving the corporation of trading privileges. This Act did not include London, the government of which has been regulated by special Acts. In modern times the great increase in the population has necessitated the creation of various additional organisations for purposes of local government; and the new administrative dists. have been formed with so little regard to existing divs., that boundaries frequently intersect, and authorities overlap. The Local Government Board, constituted in 1871, was invested with large powers of control in the various departments of local government. The functions of the Poor Law Board (1834) were transferred to it, as also other duties relating to the public health, sanitation, public improvements, workmen's dwellings, &c. The following are the principal administrative divs. existing in the country :—The ancient *county*, representing the old Saxon shire (42 in England, 12 in Wales), having for its chief officials the Lord-Lieutenant and the High Sheriff, both appointed by the crown, the former of whom nominates the county justices. The principal ordinary court is the Court of Quarter-Sessions, held twenty-four times a year by the Justices of the Peace for the county. The Courts of Assize are held twice, or in some cases thrice, a year. The county is divided into *Petty Sessional Districts* (732, in 1891, in England and Wales), in each of which there is a Court of Petty Sessions, held by two or more justices. It is the ancient county also on which the county representation in Parliament is based, each county returning to Parliament one member, or being subdivided into divisions, each returning one member. An *Administrative County* is 'an area for which a County Council is elected, not being a county bor.' There are 63 administrative counties (51 in England, 12 in Wales, the Ridings of York and Lincoln, 2 divs. of Suffolk, 2 divs. of

Sussex, Isle of Ely, Soke of Peterborough, Isle of Wight, isl. of Scilly, and London, form separate administrative counties). The Local Government Act, 1888, provides for the election of a council, consisting of a chairman, aldermen, and councillors, in every administrative county. All the administrative, as distinguished from the judicial, business of Quarter-Sessions is transferred to the County Council, including the levying of rates and the general regulation of the financial affairs of the county; control of county halls and other public buildings and property; licensing of places of amusement; care of pauper lunatic asylums, reformatory and industrial schools; maintenance of bridges and main roads; appointment of coroners and other county officials; arrangements for parliamentary elections; local execution of various Acts, &c. The control of the county police is vested in a joint-committee of the County Council and Court of Quarter-Session. The Local Government Board is empowered to transfer to the council (subject to Parliament) many of its functions, as also those of other depts. of the government. *Registration Districts* (632) are generally co-extensive with poor-law unions. *Registration Counties* consist of groups of registration dists.; they do not coincide with administrative counties. The *Civil Parish* (in 1891, 14,684 in England and Wales).—By the Local Government Act of 1894, all civil parishes with a population of 300 or more are required to elect a council, whose chief duties are to appoint overseers of the poor and to administer the Allotment Acts, and who are empowered to acquire land for allotments and other public purposes. Parishes with a smaller population are grouped for the election of councils. The *Poor-Law Union*, established under the Poor-Law Amendment Act, 1834, and now the unit for purposes of poor relief, consists of one or more pars., and the authority under the Act of 1894 being a Board of Guardians or (in any rural sanitary dist.) the dist. council. The members of either body are elected for three years (one-third retiring annually) by the parochial electors, *i.e.*, electors registered as such in a local government or parl. dist. There are now no *ex-officio* or nominated members, but a Board of Guardians may elect two additional members outside their own body. A *Municipal Borough* is any place subject to the Municipal Corporation Act, 1882. In 1891 there were 293 bors. (exclusive of London), of which 62 were county bors. (*i.e.*, bors. governed by their own sheriff and other magistrates, and thus independent of county government); of the county bors. 44, and of other bors. 59, had separate Courts of Quarter-Sessions; the *Parl. Bor.*, which returns one or more members to Parliament, and frequently differs in extent from the municipal bor. of the same name. Under the Public Health Act, 1875, the country is divided for sanitary purposes into dists.; in 1891, 1011 urban, and 575 rural. An *Urban Sanitary District* coincides with a bor., Local Board, or Improvement Act Dist.; authority, the town council, or an urban dist. council, composed of elected members. A *Rural Sanitary District* coincides with the area of a rural union, or so much of a union as is rural; authority, under the Local Government Act of 1894, a council composed of elected members superseding old board of guardians, and to which the powers of the highway authorities are transferred. Of Turnpike Trusts, formerly numerous, only two remain, and these expire in 1895 and 1896. There are besides about 58 *Port Sanitary Authorities*. The Elementary **Education** Act, 1870, under which the country is divided into school dists., provides that where the school accommodation is insufficient a dist. school board shall be elected for three years by the burgesses or ratepayers, for the purpose of carrying out the Act, subject to the Education Department of the Privy Council. Provision has also been made by Acts passed in 1889 and 1890 for technical and manual instruction to be given in schools, under the control of the county councils and other local authorities. The **ecclesiastical** div. of England and Wales is into the two provinces of Canterbury and York, each under an archbishop, the former of whom bears the title of Primate of all England, the province of Canterbury comprising the bishoprics of Bangor, Bath and Wells, Canterbury, Chichester, Ely, Exeter, Gloucester and Bristol, Hereford, Lichfield, Lincoln, Llandaff, London, Norwich, Oxford, Peterborough, Rochester, St. Albans, St. Asaphs, St. Davids, Salisbury, Southwell, Truro, Winchester, and Worcester; that of York comprising the bishoprics of Carlisle, Chester, Durham, Liverpool, Manchester, Newcastle, Ripon, Sodor and Man, Wakefield and York (in all 34 bishoprics). In 1891 there were 13,780 eccles. pars.

The **Administration of Justice** is effected through various courts, the supreme court for the kingdom being the High Court of Justice, or more properly the five branches which constitute it—Queen's Bench, Chancery, Common Pleas, Exchequer and Probate, Divorce and Admiralty. The Assize Circuits, into which for purposes of local jurisdiction the country is divided, are seven in number—South-Eastern and Home, Midland, Northern, Oxford, Western, North Wales and Chester, and South Wales. The Lord High Chancellor is at the head of the legal administration, and next to him the Lord Chief Justice. [Local government, &c., by **E. J. H.**]

English Bridge, stn., Eng., Shrewsbury, on the line to Hereford.

English Channel, called by the French, from its shape, the **Manche** ('sleeve'), by the Germans simply **Der Kanal** ('the channel'), the channel between the S. ct. of England and the N. and NW. ct. of France; about 300 m. long, 100 m. wide at the mouth, and 20 m. wide at its E. end, the Straits of Dover. Except in a long narrow valley to the N. of the Channel Is., known as **Hurd's Deep,** where the soundings reach a depth of 60–70 fathoms, the bottom slopes up from W. to E. from a depth of about 50 fathoms at the mouth to one of 20–30 fathoms at the entrance to the Straits. Owing to the peculiarities of the flow of the tides up the Channel itself and round the British Isles, and then down the North Sea, and also to the configuration of the coast-line, very high tides prevail on the S. shores (42 ft. at St. Germain, 37 ft. at Granville, 35 ft at St. Malo), and correspondingly low tides on the N. (Exmouth 12 ft., Portland Breakwater 7 ft., Poole 6 ft.). Near Beer Head is a point almost unaffected by the tides, which move slowly in a circle round this point. Between Poole and Southampton double high water occurs, the tidal wave advancing to Southampton first by the Needles up the Solent, and then 2½ hours later by Spithead. The ebb tide from the Solent flows into Poole Bay, causing a second high water at Poole 3½ hours after the first. See *Scot. Geog. Mag.*, 1893, pp. 17–28, with plates (Physical Conditions of E. C.).

Englishcombe, par., Eng., Somerset, Frome div., 2½ m. SW. by W. Bath, P.O. P. <500.

English Harbour, fishing settlement, Newfoundland, on N. side of Trinity Bay, 7 m. from Trinity.

English Harbour, Brit. naval stn., on the S. ct. of Antigua I., is one of the best harbours in the W. Indies.

English Lake, lake, U.S., Indiana, between Starke and La Porte cos., 54 m. SE. Chicago (Ill.).

English Lake District, the dist. in the NW. of Eng., in the cos. of Cumberland, Westmorland, and Lancashire, containing most of the larger English lakes. According to Mill, it may be roughly described as a circular mass of elevated land, highest in the centre, and furrowed by a series of valleys, mostly containing long narrow lakes of considerable size, running from a centre towards the circumference like the spokes of a wheel. The centre from which these valleys radiate is a little to the E. of Sca Fell Pikes, the radius including the whole set being 15 m. long. The following table gives, in the case of most of them, particulars as to length, &c., as determined by Mill (see *Geog. Jour.*, iv. p. 238). The order gives their arrangement in accordance with the motion of the hands of a clock, except that Grasmere and Rydal are two small lakes traversed by the feeder of Windermere which enters the lake at its N. end (the Rothay), and Buttermere and Crummock Water, and Derwent Water and Bassenthwaite, form respectively two pairs, each consisting of an inner and outer, now separated by low alluvial deposits, but each pair no doubt formerly a single lake. It may be noticed that three of the lakes—Windermere, Coniston, and Wast Water—have depths below sea-level :—

Name.	Length, miles.	Breadth, yards.		Elevation of Surface above Sea, feet.	Depth, feet.			Area sq. miles.	Volume Million cubic feet.

Entre-deux-Mers, dist., France. See **Gironde,** dep.

Entremont, val., Switzd., cant. Valais, at the foot of Great St. Bernard, traversed by the riv. Drance.

Entre Rios, prov. or state of the Argentine Republic, occupying the S. half of the Argentine Mesopotamia, between the rivers Parana and Uruguay, separated from the prov. of Buenos Aires on the S. by the Parana, Pavon, and the Canal del Ibicui, the northern of the two main arms of the Parana delta. The principal heights of the prov. are two ranges of hills running from N. to S., the Cuchilla Grande in the E., and the Cuchilla Grande del Montiel in the W., enclosing the basin of the Gualeguay, which flows from N. to S. throughout the prov., entering the Canal del Ibicui, and is the only important river besides those on the frontiers. To the W. of the Cuchilla Grande del Montiel, hilly country stretches W. to the bend of Parana about the middle of the prov., and this portion of the W. frontier is almost the only part affording good sites for towns. Here stands Parana, the cap. of the prov. Elsewhere the dists. on the Parana are mostly too low and marshy. Marshes also border the interior streams and the lower part of the Uruguay. There are, nevertheless, large tracts (mostly in the middle latitudes, where the railway runs from Parana to Concepcion del Uruguay) well adapted for cattle-rearing and agriculture, and there are already many agricultural colonies. With the exception of deposits of limestone, the minerals are unimportant; but there are large forests of acacias, algarrobos, and other trees, including palms (principally the *Trithrinax brasiliensis*). See **Argentine Republic,** table.

Entre Rios, colony, Brazil, Rio Grande do Sul, in the angle 'between the rivers' Pardo and Pardinho, 77 m. W. by N. Porto Alegre.

Érere, Serra de, ridge on the l. bk. of the Amazon, Brazil, in about 52½°–54° W.

Eresby, eccles. par., Eng., Lincolnshire. See **Spilsby.**

Eresma, riv., Spain, Old Castile, flows NNW. from the Pico de Peñalara (Sierra de Guadarrama) past Segovia, and unites with the Adaja a few miles above its confluence with the Douro.

Erewash (e-re-wosh′), riv., Eng., flows S. to the Trent, on the E. border of Derbyshire. Its valley, which contains the towns of Pinxton, Heanor, and Ilkeston, is traversed by the main line of the M. R., and by the **E. Canal** (which connects the Trent navigation with the Cromford canal; length, 11½ m.), and abounds in coal-mines.

Erft, riv., Prussia, Rhine Prov., rises in the N. of the Eifel, flows N. into the Rhine (l. bk.), which it enters somewhat to the S. of Düsseldorf; length, 70 m.

Erfurt (in the 8th century *Erpisford, Erpesfurt,* &c., 'ford of Erpe'), tn., Prussia, in S. of prov. Saxony, 14 m. W. Weimar; for centuries the most important town in Thuringia, having an excellent situation at the point where the natural route along the N. base of the Thuringian Forest, connecting the towns of Eisenach, Gotha, E., and Weimar, just S. of the parallel of 51°, is crossed by the route into the heart of Thuringia afforded by the valley of the Gera. It was already an important seat of

trade in the time of Charlemagne, but it suffered greatly in the religious wars of the 16th and 17th centuries. It came into the hands of Prussia at the beginning of the present century. It has an ancient Gothic cathedral. The monastery of St. Augustine, in which Luther's cell is pointed out, is now an orphan asylum. Seat of a university from 1378 to 1816. It carries on various manufactures, and since the razing of its ramparts in 1874 has expanded considerably. Flower-gardening is an important industry. The town gives name to a circle and govt. Alt. 680 ft. P. (1816) 18,000; (1871) 43,600 (including 4400 military); (1891) tn. P. 71,200; comm. P. 72,400, including Ilversgehofen 79,000.

Erg, Sahara. See **Areg.**

Ergasteria, mining tn., Greece, on the SE. ct. of prov. Attica and Bœotia, opposite Makronisi I., 40 m. SE. Athens by road. The town was founded in 1865, when a mining company settled here, comprising Greeks, French, and Italians, having acquired the right to reopen the tin, lead, and silver mines (of Laurion), which were worked in the vicinity by the ancient Greeks for eight centuries. P. <4000.

Ergene, or **Erginch,** riv., Turkey, vilayet Edirne, joins the Maritsa S. of Adrianople, in about 41° N.

Ergeri, Ergir, or **E. Kasri** (Turkish corruption of the Greek name **Argyrokastron**), tn., Turkey in Europe, Albania, 47 m. NW. by W. Yanina; manufactures the best Turkish snuff. P. 10,000.

Ergham, part of eccles. par., Eng., Yorkshire. See **Sewerby.**

Erghéni, range of hills, about 200 m. long, Russia, govt. Astrakhan, separate Volga from Don.

Ergik-Targak-Taiga, name given to an Alpine land in Siberia, on the frontier of Mongolia, between Yenisei R. and Lake Kosogol; forms NW. border of Great Plateau, and in its eastern part consists of several chains running NE. Highest summits reach above 8000 ft.

Erginch, riv., Turkey. See **Ergene.**

Ergoldsbach, vil., Ger., kgd. Bavaria, govt. Lower Bavaria, 23 m. S. by E. Regensburg. P. <2000.

Ergolz, l. bk. trib. of the Rhine. See **Basel** (canton).

Erh-hai, lake, China, in NW. of Yünnan, about 30 m. long by 4–8 or more miles wide, crossed in the N. by 26° N., just E. of 100° E.; bounded on the E. by mountains which sink to the water's edge; while on the W., where lies the city of Tali-fu, there lies a flat rice-plain extending to the Tsang-shan range.

Eriboll, Loch, inlet, Scot., Sutherland, running 8 m. SSW. from the N. ct., having its mouth in 4° 36′–39′ W.

Ericeira, maritime tn., Portugal, prov. Estremadura, near the Atlantic, dist. and 22 m. NW. Lisbon; has warm mineral baths. P. <3000.

Erichdie Water, small riv., Scot., W. Perthshire, flows E. into the Garry, which it enters about 4 m. W. Blair Athole.

Ericht, Loch, lake, Scot., Inverness-shire, S. half on the border of Perthshire, 14 m. long by ½–1 m. broad; drained by the **riv. Ericht** from its SW. end S. into Loch Rannoch. Excellent fishing.

Eridge Green, eccles. par., Eng., Sussex, 4 m. SW. Tunbridge Wells, with stn. (**Eridge**) on the L. B. & S. C. R., PT.O. P. 1000.

Erie, vil., Canada, Ontario, co. Haldimand, 9 m. from Cayuga. P. <1500.

Erie, lake, Canada and U.S., the southernmost of the five great lakes of the St. Lawrence basin; receives at its W. end the Detroit from Lake St. Clair, and discharges by the Niagara into Lake Ontario. See **America, North,** and **Canada,** internal communications.

Erie, vil., U.S., Colorado, Weld co., 20 m. N. Denver; lignite mines. P. <1500.

Erie, city, U.S., Kansas, Neosho co., on R. Neosho, 104 m. S. by E. Topeka, 55 m. NW. by N. of the SE. corner of the state. P. <1500.

Erie, co., U.S., New York, at the E. end of Lake E.

Erie, co., U.S., Ohio, on Lake E., crossed by 82½° W.

Erie, city, U.S., Pennsylvania, E. co., 115 m. N. Pittsburg, on the shore of the excellent natural, but artificially improved, harbour (9–25 ft. deep), sheltered by the island (formerly peninsula) of Presque Isle. Has a rapidly growing trade, importing chiefly Lake Superior iron ore and Canadian lumber, and exporting coal. Various manufactures. Alt. 681 ft. Mean temp., yr. 49.3° F., Jan. 27.5°, July 51.8°; rfall. (10 yrs.), 42.39 in. P. (1860) 9400; (1870) 19,600; (1880) 27,7000; (1890) 40,600.

Erie Canal, the largest and most important canal in the U.S., extends W. to E. through the state of New York from Buffalo to Albany on the Hudson, passing Rochester, Syracuse, Rome, Utica, and Troy, and in its E. portion following the Mohawk valley. It was completed in 1825, and is now 70 ft. wide at surface, has locks 18 by 110 ft., is 7 ft. deep E. of Rochester, 7.83 ft. W. of Rochester; navigable throughout by boats of 250 tons. It is generally frozen for about half the year, but in a single season it has conveyed more than 45 million bushels of grain and flour from Buffalo to the Hudson; length, 363 m.

Erieux, riv., France, a l. bk. trib. of the Rhone, dep. Ardèche; flows through a narrow and picturesque gorge.

Eriha, vil., Palestine, 31° 51′ N., 35° 27′ E., 15 m. E. by N. Jerusalem. Close by is **Ain es Sultân,** the site of the *Jericho* of the O. T., and a little to the NW. **Tullûl Abu el 'Aleik,** that of the *Jericho* of the N. T.

Erima, plantation on Astrolabe Bay, in E. of Ger. New Guinea, in 5° 27′ S.

Erin. See **Ireland.**

Ering, valley, Switzd. See **Hérens.**

Erinview, settlement, Canada, Manitoba, 38 m. NW. by N. Winnipeg.

Eriska, isl., Scot., Argyllshire, in mouth of Loch Creran. P. 17.

Eriskay, small isl., Scot., Inverness-shire, separated from S. Uist by the **Sound of E.,** P.O. P. 454.

Eriskirch, vil., Ger., kgd. Würtemberg, on the E. shore of Lake Constance, 3 m. SE. Friedrichshafen, 16 m. E. by S. Constance. P. <2000.

Erlswell, par., Eng., Suffolk, Stowmarket, div. and 13 m. NW. Bury St. Edmunds, 2½ m. NNE. Mildenhall; 6658 ac. P. <500.

Erith, tn. and par., Eng., Kent, Dartford div., on the Thames, 5½ m. E. Woolwich, on the SE. R. Near it are various factories, including a gunpowder factory in the marshes to the W. of the town. E. marshes, however, lie mainly E. of the town. P. 13,400.

Eritrea (from *erythraia,* 'red,' part of the Greek name of the Red Sea), the official name of the Italian colony and sphere of influence on the Red Sea, the boundaries of which on the side of Egypt were determined by a protocol on the 15th of April 1891, and on the side of Abyssinia by the treaties of the 2nd of May 1889, and the 6th of February 1891. It embraces the whole coast from the Ras Kasar in 18° 2′ N., to the sultanate of Raheita at the mouth of the Red Sea, S. of Assab, extends about 200 m. inland W. of Massaua (the cap.), and about the same distance W. of Assab, comprising here as a protectorate the plains inhabited by the Afar or Danakil to the E. of the escarpment which forms the frontier of Abyssinia, and includes also the Dahlak Archipelago in the neighbourhood of Massaua. The N. portion of this region consists of a narrow hot coast-strip, succeeded by a subalpine region of 1000–6000 ft. in height, and that again by a plateau reaching 7000 ft., furrowed by valleys belonging either to the basins of the Anseba and Barka in the N., or that of the Mareb (Gash) in the S. These N. highlands include dists. inhabited by the Bogos, the Hababs (Ababdeh), and the Beni Amer, and are said to be well adapted for the production of a great variety of crops if only a settled and peaceful existence could be secured for the people. The trade is largely in the hands of Greeks. A railway, 16 m. long, leads from Massaua to Saati, at the foot of the hills. Estimated area, 95,500 sq. m. P. 450,000.

Erivañ, govt., Russia, Transcaucasia, has the govts. of Kars in the W., Tiflis in the N., Elisabethpol in the E., Turkish Armenia in SW., and Persian prov. Azerbaijan in SE. Occupies the high Armenian plateau, 6000–8000 ft. above the sea, covered with volcanic formations, and has the volcano of Alaghöz (13,436 ft.) in NW., Mount Ararat (16,916 ft.) in S., and the spurs of the Anticaucasus in the E., all rising over the surface of the plateau. The depressions of the plateau, covered with tertiary deposits, are fertile, with the exception of the stony and barren valley of the Lower Arax. Rock-salt is raised at Nakhichevañ and Kulpa; copper-ore at Miskhan. Watered by the Arax, which enters from prov. Kars, crosses part of the govt., and then flows on its S. frontier, separating from Persia (alt. 3030 ft. at Kulpa, 1963 ft. at Ordubad), and by its tribs. Arpachai, Karasu, Zanga. Climate varies very much with altitude. At **Aralykh** (2732 ft.) the average temp. are: yr. 52.7° F., Jan. 20.5°, July 79°; yearly rfall. 6.1 in. At Alexandrapol (5078 ft.) they are: yr. 41.8° F., Jan. 12°, July 65°; yearly rfall. 17 in. The pop. is chiefly clustered in the valleys, and consists of Armenians (54 per cent.), Tartars (39 per cent.), some 28,000 Kurds, about 5000 Russians, and a few Aisores and Greeks. Agriculture (375,000 quarters of various grains, more than 200,000 quarters exported) and gardening are the chief occupations. Nearly 90,000 acres are under cotton crops, and 17,000 acres under vineyards. Extensive cattle-breeding. Silkworm culture. Manufactures in infancy. About 10,000 tons of rock-salt extracted every year. Divided into seven dists.:—Erivañ, Alexandrapol, Nakhichevañ, Novobayazet, Surmalinsk (chief town Igdyr), Sharuro-Daralaghöz (chief town Norashen), and Echmiadzin (chief town Varshapad). Area, 10,075 sq. m. P. (1873) 547,690; (1892) 703,510.

Erivañ, chief tn. of above prov., 42° 14′ N. lat., 44° 57′ E. long., 173 m. SSW. Tiflis, on l. bk. of Zanga R. Fort on a hill. Very old town, already known in history since A.D. 661;

formerly belonged to Persia; annexed to Russia in 1827. Alt. 3230 ft. P. (1873) 11,940; (1890) 14,740.

Eriza, tn., Asiatic Turkey. See **Erzinggan.**

Erjes, riv., Spain and Portugal. See **Ilerjaz.**

Erzberg, mt., Styria. See **Eisenerz.**

Erzerum, Erz-Rum, or **Arzerum,** in Armenian **Garin,** city, Turkish Armenia, cap. vilayet E., 110 m. SE. Trebizond, on a plain watered by the Kara-Su, or W. branch of the Euphrates, a little to the S. of the river. Has a citadel, and an extensive trade, being a principal station on the trade-route from Trebizond to Teheran, and one of the chief halting-places of the caravans from Teheran to Mecca. Chief exports, cattle, horses, mules, and sheep, furs, and gall-nuts. Seat of Protestant and Roman Catholic missions. The citadel of E. was founded by the Emperor Theodosius the Younger about 415 A.D., and the large town that gradually grew up round it received the common Armenian place-name of Arzen, which was afterwards changed by the Turks into Erzen-er-Rum ('Erzen of the Romans'), from which the name E. is corrupted. Alt. 6650 ft. P. 39,000; Moham. 26,500; Christians, 11,000, mostly Armenians (Cuinet).

Erzgebirge ('ore mountains'), mt. range between the kgd. of Saxony and the NW. of Bohemia, length about 120 m. It descends with a steep slope generally about 1600 ft. high to the valley of the Eger on its S. side, but slopes gradually down on the Saxon side, where for the most part it presents the appearance of plateaux intersected by narrow valleys. Highest peaks towards the W. end, the Keilberg (4080 ft.) in Bohemia, and the Fichtelberg (3980 ft.) opposite it in Saxony. Mostly of primary formation—gneiss, mica-shists, graywacke, and clay-slates. Lignite or coal-fields are found both at its S. base and on its N. slopes, and the range yields various metallic ores, principally on its S. side, whence the name. Between the valley of the Elbe and its W. end it is crossed by only two railways, one between Freiberg and Klostergrab, the other between Marienberg and Komotau.

Erzinggan, Erzinggyan, Erzinga, Eriza, or **Erzinjan,** tn., Turkish Armenia, vilayet and 86 m. W. by S. Erzerum. Mainly destroyed by earthquake in 1784. Alt. 3800 ft. P. 23,000; Moham. 15,000; Armenians, 7500.

Erzsébetváros, Hungary. See **Elisabethstadt.**

Esashi, or **Ezashi,** tn., Japan, isl. of Yezo, 34 m. W. Hakodate. The harbour is exposed. P. 12,600.

Esbjerg, seapt., Denmark, on the SW. ct. of Jutland, prov. Ribe, 43 m. S. by E. Ringkjöbing. The harbour has a depth of 13–15 ft. at high water, 8–10 ft. at low water. Depth of water over sill, 12 ft. Cattle exports to England. Direct steamers to Harwich and Grimsby. Sometimes spelt in English, **Esberg.** P.<5000.

Esbly, comm., France, dep., Seine-et-Marne, on the Marne, arr. and 6 m. SW. by S. Meaux. P.<2000.

Eskimo, French spelling (adopted also formerly in English) **Esquimaux,** a race inhabiting the northern coasts of America from Greenland and the N. of Labrador to the W. ct. of Alaska, and also parts of the NE. of Asia, mainly within the Arctic Regions. Height 5 ft. 4 in. to 5 ft. 10 in. Language agglutinative. Live chiefly by fishing, principally seal-fishing, the skins furnishing their clothing; the industry pursued in peculiar kind of boats, called *kayaks,* each holding only one man, who sits in a hole in the middle, the mouth of which he closes tightly with a waterproof covering. In summer they dwell in tents, in winter they occupy houses of stone, turf, or earth, half underground; occasionally temporary huts made of snow. See Dr. H. Rink's '*Eskimo Tribes,*' vol. xi. of the *Meddedelser om Groenland,* with supplement. There is an exhaustive report on the central E., inhabiting the archipelago on the NE. of the American continent and the neighbouring coasts of the mainland, in the *Annual Report of the Bureau of Ethnology,* Washington, 1888.

Essentuki, or **Essentukskaya,** Cossack vil., Russia, govt. Terek, 12 m. NW. of Pyatigorsk; mineral waters, much visited in summer. Alt. 1980 ft. Average yearly temp. 56° F., Jan. 22°, July 70°. P. 7800.

Essequibo, or **Essequebo,** a riv. which flows from S. to N. through the whole length of Brit. Guiana. Principal tribs.: (1) the united Cuyuni and Mazaruni, (2) the Potaro, (3) the Rupununi, all on the l. bk. Its navigation is interrupted by numerous rapids and falls. The first, proceeding upwards, are the **Aretaka Cataracts,** 15 m. long, in about 6°–6° 10′ N.; a great cataract occurs in about 5° 16′ N., and above that their occurrence is very frequent. *Proc. R. G. S.*, 1880, map, p. 528.

Essex, co., Canada, in the extreme S. of Ontario, between Lakes St. Clair and Erie. Wine grown in the county.

Essex, maritime co., Eng., bounded on the S. by the Thames and its estuary, divided into the following parl. divs.:—

	Acres.	Pop. 1891.
SW. or Walthamstow . .	8,871	101,236
S. or Romford	40,194	103,546
W. or Epping	163,678	55,416
N. or Saffron Walden . .	180,990	47,449
NE. or Harwich . . .	142,898	55,623
E. or Maldon	122,807	54,572
Mid or Chelmsford . . .	145,341	58,304
South-Eastern	166,208	69,837
Parl. Bors.	16,037	239,462
Total . .	987,028[1]	785,445[1]

[1] The administrative county excludes part of Sudbury urban sanitary district and part of Haverhill, both in the administrative county of W. Suffolk. Area, 985,545 ac. P. 784,258.

Surface towards the Thames and the sea flat, marshy, and much broken into penins. and islands; coast-line 85 m.; in the centre and N. beautifully diversified and richly wooded. Geologically it belongs mainly to the London clay, but NW. of a line stretching from about Bishop Stortford in Herts to Sudbury in Suffolk to the chalk. Foulness and some neighbouring islands are composed of recent alluvium. Principal rivers, the Thames, Lee, Stour, Roding, Crouch, Colne, Chelmer, and Blackwater. Soil mostly a fertile loam. Climate on the coast moist; inland clear and healthy, with little rain. The county is almost wholly agricultural. Its farming is ranked among the best in England, and the quality of E. wheat is very superior, and E. is on that account one of the counties which have suffered most severely by the agricultural depression of recent years. See **Appendix,** pp. 7–9. Besides the usual crops, teazels, saffron, carraway, and hops are largely grown. Great numbers of calves are fattened for the London market. The county has silk, velvet, crape, lace, straw-plait, and other manufactures, and there is a government powder factory at Waltham Abbey. The minerals of the land, apart from chalk, used for lime, and brick-earth, are unimportant; but salt is extracted from the sea. There are valuable oyster fisheries. The Tilbury and the Victoria and Albert docks of the port of London are in E. The East India Barracks are at Warley. At Purfleet there are powder stores, and at Shoeburyness is an extensive practice-ground for government artillery. Epping Forest [**Epping**] is in the SW. of the county. Hainault Forest adjoining was disafforested in 1851, and is now mainly enclosed. There are several watering-places on the coast. The county is ramified by branches of the G. E. R., whose port for continental traffic is at Harwich. The only other railway is the London, Tillbury, & Southend. The county contains the county bor. of West Ham, six other mun. bors. (Chelmsford, Colchester, Harwich, Maldon, Saffron Walden, and Southend), and two

parl. bors. (West Ham and Colchester). It is mainly in the diocese of St. Albans, but part of six eccles. pars. are in that of Ely. See **England,** table.

Esthonia (**Ehstland,** Esthonian *Eesti-maa*), Baltic prov. of Russia, on S. coast of Gulf of Finland; has the govt. of St. Petersburg in E., Livonia in S., and Baltic Sea in W. Several islands (Dagö, Worms, Kassar, &c.), as well as smaller islands off Reval, belong to it. A low plain, less than 100 ft. above the sea, stretches along the coast, and gradually rises in the interior to 250–300 ft., while a range of hills, 500–550 ft., occupies its southern parts. Entirely covered with the bottom moraine of the Scandinavian glacier lying upon Silurian sandstones and limestones, and covered with recent sands and clays. Watered by Narova, flowing from Lake Peipus or Chudskoye to Gulf of Finland, and many small rivers. Many marshes, gradually transformed into meadows. Good forests. Climate moist. Average temp. at Baltischport, 40.2° F.; Jan. 21.2°, July 60.6°; yearly rfall. at Reval, 19.7 in. (June to Nov. 13 in.). Pop. chiefly Ehstes, Germans (12,000), Swedes (5000), and a few thousands of Russians. Religion chiefly Lutheran. Agriculture in good state, especially on landlords' estates; grain exported. Potatoes largely cultivated, partly for manufacture of spirits. Considerable cattle-breeding; good races of ponies kept. Considerable fishing. Various manufactures give occupation to about 10,000 workers. Chief ports, Hapsal, Werder, and Dagö on Baltic Sea; Kunda, Reval, and Baltischport on Gulf of Finland. A line of railway runs along the coast of the Gulf of Finland from Baltischport to St. Petersburg. Divided into four dists.: Harrien (chief tn. Reval, cap. of govt.), Wieck (chief tn. Hapsal), Wierland (Wesenberg), and Jerwen (Weissenstein). Area, 7818 sq. m. P. (1819) 227,000; (1870) 323,960; (1888) 395,980.

Esthonians, Ehstes, Finnish stem, inhabiting chiefly the Baltic provs. of Russia (Esthonia and Livonia), and also in small numbers those of Pskov and St. Petersburg. Small colonies in E. Russia, and even in Siberia. Have been driven northwards by the Letts. Speak a dialect of Finnish; Lutherans in religion.

Esthwaite Water, small lake, Eng., in the extreme N. of Lancashire, 9½ m. W. by N. Kendal, between Coniston Water and Windermere, drained SE. into Windermere.

Estill, co., U.S., Kentucky, in the E., S. of 38° N., crossed by 84° W.

Estrella, Serra da ('star-range'), the ancient *Mons Herminius,* a granitic mountain range, Portugal, in the old prov. of Beira, trending 75 m. from NE. to SW. between the valleys of the Mondego and the Zezere, the latter of which separates it from the Spanish Sierra de Gata. Slopes gently towards the N., abruptly southwards. The SW. end of it is sometimes known as the Serra de Lousa. Highest peak Malhãoda Serra, 6535 ft. There is a meteorological stn. at the height of 4728 ft.; rfall. (5 yrs.), 137.8 in.

Estrella, vil., Brazil, Rio Grande do Sul, 60 m. NW. by W. Porto Alegre.

Estremadura, in Portuguese spelling **Extremadura** (the *last* permanent Christian conquest, in Portugal as well as in Spain, to the beginning of the 13th century, or *extrema Durii* the *furthest* Christian land beyond the Douro), one of the old

central littoral provs. of Portugal, between the Beiras (or Douro and Beira-Baixa in 1834, N. and E.), Alemtejo (E. and S.), and the Atlantic (W.), divided into two parts by the lower valley of riv. Tagus, formed (N.) by a long peninsula-like territory stretching NE.–SW. between the Tagus and the sea, with Serra d'Aire–Monte Junto–Cintra as a backbone; (S.) by a littoral strip of land between the Tagus and Alemtejo, drained by riv. Sado. Hilly in the N., with extensive plains in the valley of the Tagus and S. Forests of oak, chestnuts, and, principally, olive and pine trees. Numerous vines, producing celebrated wines. The alluvial lands on the Tagus are the best producing wheat dist. of Portugal, where good horses and bulls, for the fights, are reared. Lisbon in the centre, and Setubal (S.) are the seaports of E. The old prov. of E. is substituted (since 1842) by three dists: Lisbon, Leiria, Santarem. See **Portugal, Lisbon.**

Estremadura (*extrema-ora*, the *furthest* conquest over the Moors in the 13th century), an old, natural and historical div. of Spain, continuation (at 1600 ft. mean alt. forming a double inclined plan N. to S., E. to W.) of the Castillian plateau (some 190 m. by 90 m.) and of the Tagus and Guadiana valleys, between Sierras de Gata and de Gredos (dividing it from Leon and Old Castille on the N.), Sierra Morena (dividing it from Andalucia on the S.), spurs of the latter and of Sierra Guadalupe (dividing it E. from New Castille), Sierras de Gata, São Mamede, rivs. Tagus and Guadiana (dividing it W. from Portugal). The middle parts of the parallel valleys (NE.–SW.) of riv. Tagus (N.) and Guadiana (S.), and a high water-parting (Sierras Altamira–Guadalupe–Montanchez–San Pedro) between the two, form, with their vast hilly lands (*barros*, *dehesas*), the whole of E., and furnish the winter pastures (*invernaderos retasados*), on more than one-third of its total area, to the *transhumantes* sheep (*mesta*, see **Castille**) of the N. provs. (*agostaderos*), and the acorns (*bellotas*, from extensive oak woods), to numerous swine. In the Roman (see **Merida**) and Moorish times wheat was extensively cultivated. The population is now very scarce, and the land mostly neglected. There are important mines. The Guadiana valley is unhealthy. E. is now a military *Capitania general* (seat at Badajoz), a judicial *Audiencia* (seat at Cáceres). Administratively it was substituted (since 1833) by two provs. (the largest of all Spanish provs.), Cáceres (the N. half of E.) and Badajoz (the S. half). See **Spain,** table, &c.

Estremoz, fortified tn., Portugal, Estremadura, prov. Evora (in old prov. Alemtejo), 21 m. W. Elvas. P. (comm.) 7300.

Eu, tn., France, dep. Seine Inférieure, on the l. bk. of the Presle, 18 m. ENE. Dieppe. The Château d'Eu contains a collection of historical portraits, and is surrounded by a park. The forest of Eu extends for a considerable distance to the E. and S. P.<5000.

Eua (e-u'a), one of the Tonga Is., SE. of Tongatabu, in 21° 25′ S., 174° 52′ W.

Eubœa (Greek pronunciation, ev-vi'a; meaning land of 'good cattle feeding'), formerly known, from the Middle Ages onwards, as *Euripo*, *Egribos*, or *Egripos* (the name of the channel on the SW. in a corrupt form being transferred to the isl.), or *Negropont* (Italian, 'black bridge'), the largest island of the kingdom of Greece, in the Ægean Sea, lying along the N. coast of the provs. (*nomoi*) of Phthiotis and Phocis and Attica and Bœotia, separated from the mainland by the channel of E. or *Euripos*, which is crossed by a bridge at its narrowest and shallowest point opposite Chalkis, the portion N. of this strait being known as Atalantē, or the Talantian Euripos, and that to the S. as Eritrēa. Length, 115 m.; greatest breadth, 33 m. With the northern Sporades (the islands of Skopelos, Khiliodromia, Skyros, &c.), it forms a prov. (*nomos*) of Greece. Surface mountainous, but fertile. Highest mountains, St. Elias, near the SE. extremity, 4840 ft., and Delphi, near centre on N. coast, 5725 ft. Principal products, corn, wine, cotton, wool, pitch, and turpentine. Many cattle, sheep, and goats are reared. Principal towns, Chalkis, cap. of the N. div.; Karystos, chief town of the S. div. The mean depth of the N. portion of the channel of *Euripos* is 435 ft.; of the S. portion, 165 ft.; at Chalkis, 23 ft. The channel is remarkable for the repeated occurrence of high water frequently observed in the course of the day—in the S. basin of the harb. of Chalkis, where the phenomenon is most remarkable, about fifteen times a day on many days in the month. (For an account and discussion of this phenomenon, see *Petermann's Mitteil.*, 1888, pp. 331, &c.). Both sides of the Euripo Channel suffered by a most destructive earthquake towards the end of April 1894. The channel is now (1894) being deepened. Area, including small islands adjacent, 1420 sq. m. (Wisotzki). See **Greece.**

Euchar, River, Scot. See **Scamadale, Lake.**

Eucla, tp. and small pt., W. Australia, Eucla div., on the S. ct., 128° 52′ E., the Western Australian terminus of the telegraphic line from Albany towards Adelaide. Mean temp., yr. 63.0° F., Jan. 69.8°, July 54.2. P.<1500.

Euclid, vil., U.S., Ohio, Cuyahoga co., 10 m. ENE. Cleveland. P.<1500.

Eudokeef, or **Foggy Islands,** group of small isls. in the N. Pacific, off the SE. ct. of Alaska, N. America.

Eufaula, city, U.S., Alabama, Barbour co., on the r. bk. of the Chattahoochee R., which is navigable to this point for the largest boats at all seasons, 75 m. ESE. Montgomery. P.<5000.

Euganean Hills, low range of mts., Italy, Lombardy, in the W. of prov. Padua, extending for about 10 m. NW. to SE. The mountains are of volcanic origin, trachyte being the principal rock, and are covered with wood. Warm mineral springs occur at Albano, Battaglia, and Ortone. Highest point, Monte Venda, alt. 1920 ft.

Eugene City, vil., U.S., Oregon, Lane co., on Willamette R., here navigable for steam-boats, 102 m. S. by W. Portland. Alt. 451 ft. (R.R.). P.<1500.

Eugowra, post-tn., New South Wales, Ashburnham co., on Manadgery R., 170 m. W. by N. Sydney. P.<1500.

Eulengebirge ('owl mountains'), chain of mts., Prussia, Upper Silesia, stretching NW. from the Neisse to the N. of Glatz. Hohe-Eule Peak is 3370 ft. high.

Eungella, mining locality, Queensland, Carlisle co., 52 m. W. Mackay. P.<1500.

Eupatoria (Tatar *Ghezler*, formerly *Kozlov*), dist. tn. and seapt., Russia, govt. Taurida, 51 m. NW. of Simpheropol, on W. ct. of Crimea, 45° 12′ N. lat., 33° 51′ E. long. Open roadstead, 4–16 fathoms deep; dangerous on account of inland NE. wind. Exports corn, wool, hides, butter, tallow, and salt. Many salt lakes in E. dist. P. 17,350.

Eupen, tn., Ger., Prussia, Rhine Prov., cap. circle E., 11 m. S. by W. Aix-la-Chapelle, close to the Belgian frontier. Carries on wool-spinning and weaving and various other manufactures. Tn. P. 14,500; comm. P. 15,400.

Euphrates (native **Frat, Furat, Furad**), riv. of Asiatic Turkey, the easternmost part of which it drains; rises by two heads in the tableland of Armenia, the name Frat being locally given to the northern or so-called western branch, called by the Turks Kara-su ('black river'), which rises about 20 m. NE. Erzerum, the other being called the Murad or Morad-su, and rising between Lake Van and Mount Ararat. Both branches have a W. course, and they unite in 39° N., 39° E., whence the E. has successively a S. and SE. course, encompassing on three sides the whole basin of its chief tributary the Tigris, and separating Turkish Armenia and Mesopotamia from Syria and the Arabian desert. In 31° N., 47° E., the Tigris unites with it to form the Shat-el-Arab, which, about 100 m. below, enters the head of the Persian Gulf, and including which the total length of the E. to the source of the Murad may be estimated at 1600 m. In its upper third it traverses a mountainous country, forming numerous rapids and cataracts. From Someisat, or Samsat, in 37½° N., it was formerly navigable to the sea, but the upper part of its course can now only be reached during the periodical risings of the waters (at the melting of the mountain snow), but it is still navigable by light boats and rafts as high as Birejik, in 37° N. (E. of Aintab). A steamer has even descended the river from this point (to which it was conveyed in sections by land), but at present rapids and falls, caused mainly by irrigation dams, entirely prevent steam navigation during low water, though a commission appointed by the Turkish Government has reported that it could be made navigable for steamers at all seasons at little cost. For vessels of larger size the river is navigable only from the sea to 50 m. above its confluence with the Tigris, or for a distance of about 150 m. in all. There is no river in the world of anything like the dimensions of the E. the practical value of which is so trifling. The breaking down of the long-neglected embankments in 1834, caused by an unusually high flood from the melting of the snows on the mountains near its source, and the consequent spreading of the waters into huge, shallow, and pestilential morasses, closed the history of this famous stream. Formerly it was the highway for the export of vast quantities of grain raised in the provinces around it. Now its navigation amounts to nothing, its flourishing towns have decayed, and the industries of the provinces have ceased. Besides the Tigris, it receives on the l. bk. the Khabur. The principal towns on its banks above the confluence of the Tigris are Suk-esh-Sheyuk, Hilleh, Hit, and Anah; below the confluence is the important seaport of Busra (Bussora). Estimated length, 1600 m. Area of basin, 260,000 sq. m. See **Irak Arabi.**

Eurasia. See **Europe.**

Eure, the anct. *Ebura* (contains the Gaelic root *bior*, 'water'), riv., in the NW. of France, rises in dep. Orne, flows NE. through the deps. Eure-et-Loir and Eure, past Chartres, Nogent-le-Roi, Ivry, Louviers, and joins the Seine on the left near Pont-de-l'Arche. Chief affluent the Iton, on left. Length 112 m., for 50 of which it is navigable.

Eure, dep., NW. France, belonging entirely to the basin of the Seine, which traverses it in the E., and whose estuary washes its NW. frontier, making it almost maritime in character; formed from three dists. of the ancient prov. of Normandy; the county of Évreux contributed one-third of the whole area of the dep., which includes an insignificant strip off Perche; the arrs. are five: Évreux, the cap., les Andelys, Bernay, Louviers, and Pont-Audemer. The surface consists of a succession of plateaux (eight in number), for the most part very fertile, formed of chalk

and tertiary rocks, and varied by charming valleys. These plateaux are in the W., the Lieuvin between the Charentonne and Rille, Pays d'Ouche between the Rille and Upper Iton, the plateau of Breteuil and Conches succeeded to the N. by those of Neubourg and Roumois. The plain of Saint-André (in the SE. of the dep.) lies between the Iton, Avre, and Eure; the Ile-de-Grâce between the Eure and Seine, and the Vexin-Normand between the Seine, Epte, Andelle, and N. frontier of the dep. The climate is moist and clement. With the exception of the Pays d'Ouche, the dep. is throughout very fertile; one-fifth is covered with wood and coppice. Principal cereals wheat and oats, the productiveness of both of which per acre far exceeds the average of France. Among other important crops are mangolds and apples for cider-making, and the production of sugar-beet and colza is considerable, that of flax moderate. Minerals unimportant. The first rank in the industries of the dep. is held by the manufacture of textile fabrics, both woollen and cotton, especially in the arr. of Louviers. Area, 2331 sq. m. P. (1891) 349,471. See **France,** table.

Eure-et-Loir, dep., N. France, SE. of dep. Eure, formed of parts of Orléanais (Beauce, dists. Chartrain and Dunois), Normandy (Perche-Gouet, Thimerais), and Ile-de-France (Dronais). Four arrs.: Chartres, cap., Châteaudun, Dreux, and Nogent-le-Rotrou. The E. and W. of the dep. differ much in physical configuration. In the E. is the Beauce, a region relieved only by broad undulations; in the W., the Perche, or highland region, abounds in smiling hills crowned with fine forests, and varied by fertile valleys traversed by numerous watercourses. The dep. is divided almost equally between the two basins of the Seine and the Loire, the N. being traversed or bordered by the Eure and its tribs., the Blaise and Avre (l. bk.), and the Vesgre (r. bk.), the S. part by the Loire and Huisne. None of these rivers, except the Eure in that part of its course which borders the dep. of Eure, is navigable or floatable, and there is no navigation canal in the dep. The climate is generally mild; somewhat colder in the Perche dist. than in the Beauce, the former being essentially healthy, whilst in the latter, especially in autumn, intermittent fever prevails, occasioned by the insalubrity of the pools in which rain water is stored for village and farm use. Agricultural produce similar to those of Eure, except that sugar-beet, colza, and flax are absent, or nearly so. Minerals unimportant. The principal manufacturing industry of the dep. is flour-milling in the valleys of the Loir and Eure; among others, manufactures of hats, textiles, and boots. Area, 2293 sq. m. P. (1891) 284,683. See **France,** table.

Europe, the smallest of the continents (apart from Australia), is physically a penin. of Asia, and for certain purposes it is convenient to view the entire land-mass composed of E. and Asia as one, to which the name of **Eurasia** has been given. The distinction between the two finds its original explanation in history. It dates back to the time when the civilised nations of the West were gathered round the Mediterranean, where E. and Asia are separated by water. According to Egli, the two names are of Semitic origin, the name E. being connected with the word *ereb*, or *irib*, of the Assyrian inscriptions, meaning 'sunset,' or 'west'; Asia with *asu*, meaning 'sunrise,' or 'east.' The distinction between the two continents is, moreover, indefeasibly justified by the fact, that where they are not separated by water, the most populous regions of both, inhabited by peoples having a totally different history and civilisation, are separated by vast tracts of thinly peopled country or absolute desert. With respect to the **surface,** the mainland of E. may be divided into three regions. (1.) In the N. there is a highland or mountain region occupying the peninsula of Scandinavia. (2.) Another mountain region occupies the greater part of the S., reaching farthest N. about the middle, where its boundary advances in central Germany nearly to the latitude of London, receding thence south-westwards through the middle of France to the Pyrenees, and south-eastwards to the mouth of the Danube. The principal mountain ranges in this area are the Pyrenees, Alps, Apennines, Jura, Vosges, Carpathians, and Balkan mountains. Remote from this area is the long series of ranges in the E. of Russia known collectively as the Urals. (3.) Between these two mountain areas in the N. and S., there is a vast plain which stretches continuously from the shore of the English Channel and the German Ocean to the E. of E., and in Russia spreads out N. and S. from the shores of the Arctic Ocean to those of the Black Sea. The chief **rivers** radiate from two far-distant centres: (*a.*) The Alps, whence flow the Rhine to the German Ocean; the Rhone, Po, and Adige to the Mediterranean; and several tribs. of the Danube to the Black Sea. (*b.*) The region in the heart of Russia, of which the Valdai Hills are the centre, the region from which flow the Volga to the Caspian Sea, the Don and Dnieper to the Black Sea, the Western Dvina and Niemen to the Baltic, and a trib. of the Northern Dvina to the White Sea. The principal **lakes** are in two great groups. One group lies round the Baltic, and includes large lakes in Russia (Ladoga, the largest in E. Onega, and Peipus), and in Sweden (Wener Wetter, and Mälar), and a large number of small ones in Russian Finland and N. Germany. The other group is situated N. and S. of the Alps, chiefly in Switzerland and Italy, the largest in this group being only about one-third of the size of the smallest of those mentioned as belonging to the former group. The situation and outline of the continent are peculiarly favourable to its **climate.** The difference in the size of E. as compared with Asia makes it impossible for it to have such vast tracts as the latter continent, remote from the sources of moisture, the essential condition of fertility and cultivation, or rendered unfit for cultivation by the duration and the rigour of frost. The whole area, except a small fraction in the N., lies within the temperate zone, and the great irregularity of its outline causes it to enjoy in a higher degree than any other continent the mitigating effects of the sea on extremes of heat and cold. Its westerly situation is of even greater importance in this respect [**Asia,** climate], and its southern penins. have a peculiarly warm and equable climate, not only in consequence of the moderating effect of the Mediterranean Sea on the temperature, but also because these penins. are to a large extent protected from cold northerly winds by mountain barriers on the N. In temperate E. there is the same increase in extremes of temperature from W. to E. as in other parts of the N. temperate zone, and this is true to a certain extent even of the countries belonging to the Mediterranean region. Besides these penins., or the greater part of them, nearly the whole of France and the British Isles, and the whole of Belgium and Holland, are outside of the area in which the mean daily temperature sinks below the freezing-point for at least one month in the year. On the other hand, the area in which the mean daily temperature is above 50° Fahr. for at least eight months in the year is almost confined to the Mediterranean region, although it includes also the W. of France from about the Loire southwards. In the E. of Russia the area in which there is at least one month with a mean daily temperature above 68° Fahr. extends as far N. as the latitude of the Orkney Islands. By far the greater part of the area of E. has a sufficient rainfall for cultivation, so that S. of the region in which the temperature puts a limit on agriculture, almost the whole of the lowland area, and even in the far S., land at the height of between two and three thousand feet is capable of being tilled. The deficiency of rainfall prevents the pursuit of agriculture chiefly in the SE. of Russia and in the interior of Spain. But though the rainfall is thus generally distributed, and occurs everywhere more or less all the year round, it is most abundant at different places during different seasons. The W. and, above all, the NW., is the region in which autumn rains prevail, the E. that in which there is a predominance of summer rain, but the Mediterranean Penins. are the only region in which there is a marked deficiency of rain during any particular season. There the rains are chiefly winter rains, and the middle of summer is remarkable for its drought, to the S. of about 40° N. almost rainless. (With respect to the climate of E., the following papers and maps may be referred to as amongst the most instructive:—Supan, On the Mean Duration of Warm Periods, *Petermann's Mitteil.*, 1887, p. 165, with maps, plate 10; Hildebrandson's map showing the date at which the mean temperature rises above the freezing point in different parts

of E., copied in Longman's New Atlas; Supan, On the Seasonal Distribution of Rain in E., W. Asia, and N. Africa, in *Petermann's Mitteil.*, 1890, p. 296, with maps, plate 21; Elfert, On the Extent of Cloud in Central E., *ibid.*, p. 137, with map, plate 11). So far as can be judged by language, the **people** of E. are mainly of Aryan stock. Six families of Aryan languages are spoken: the Slavonic, in the E. and SE.; the Lithuanic, including the Lithuanian and Lettic, in W. Russia; the Teutonic, in Germany, Scandinavia, Denmark, Holland, part of Belgium, and the British Isles; the Thraco-Hellenic, including Greek and Albanian, in the southern parts of the Balkan Penin.; the Italic or Romanic, in certain countries where Roman influence formerly prevailed (Italy, the Iberian Penin., France, part of Belgium, part of Switzerland, Roumania); and the Celtic or Keltic, now confined to certain isolated dists. in the British Isles and Brittany. Among the non-Aryan peoples, the most important are those speaking the languages known as the Finno-Ugric, including the Finns and Lapps in the N., the Esthonians on the S. side of the Gulf of Finland, and the Samoyedes, Siryänians, and Voguls in the NE. of Russia. The Basques on both sides of the W. Pyrenees speak a language quite peculiar. As regards **religion,** Christianity is that of the great majority. About half the Christians are Roman Catholics (chiefly in the S.), and the remainder are nearly equally divided between Protestants (chiefly in the Teutonic part of the continent) and adherents of the Greek Church (in Russia and the Balkan Penin.). Mohammedanism is the religion of the Turks and some other inhabitants of eastern E., and there are between five and six million Jews scattered through different countries, mainly, however, in that part of central E. which lies between the E. limit of the Dnieper basin in the E. and the upper Oder and the Alps in the W. The great fact in the history of E., which helps to explain the high **density of population** in that continent, is the long duration of its advancing civilisation, together with the remarkably rapid strides taken within the last hundred years in consequence of the great mechanical inventions which have taken place in E. In civilisation, however, this continent was preceded by Asia and northern Africa (Egypt). In the earliest glimpses that we get of the commerce between western Asia and southern E., we find the latter region supplying only the produce of their herds and forests—hides, wool, wood, wild honey, cattle, and sheep, besides male and female slaves; and the articles received in return are ready-made clothes, iron and other metal tools, weapons, images, boxes of bronze, and vessels of glass. The commerce thus carried on by Asia with E. seems, in fact, to have been not unlike that carried on partly by Europeans, partly by Arabs, with the people of Africa at the present day. Many of the **cultivated trees and plants** now thoroughly characteristic of certain parts of E. are known, or appear to have been introduced into that continent within historic times. The olive, the cypress, and the laurel, the evergreens now so characteristic of the Mediterranean Penins., and so well adapted to stand the dry summers of that region, seem all to be of Asiatic origin, though introduced at a very early date. The olive began to clothe the hills of Sicily as far back as the seventh century, B.C. Of oriental origin also is lucerne, the equally characteristic fodder-plant of that region, the deep-rooted ally of the clover, which survives the driest summers, and has hence been introduced into many other parts of the world with a similar climate to the Mediterranean. From Asia also came the fig, mulberry, almond, walnut, chestnut, and apricot, all before the birth of Christ. The mulberry of the ancients, however, was the black mulberry, the sycamine of the Greeks, the white mulberry being a much later arrival from the E. From Asia likewise came at various dates, mostly after the beginning of the Christian era, rice, cotton, and several members of the orange genus (citrons, lemons, and oranges proper); and after the discovery of America agaves and cactuses, potatoes, maize, and tobacco were added to the vegetation and agriculture of this continent. The chief cereals of E., however, seem all to have been cultivated there in pre-historic times. Wheat and barley, as well as two kinds of millet, are proved by remains found beside the lake dwellings of Switzerland to have been cultivated in the later Stone Age; but the evidence of language would appear to show that many of our common cultivated plants, including cabbages, peas, vetches, parsley, and onions, were introduced into cultivation in central and northern E. directly or indirectly from Italy. As regards its **fauna,** E. belongs entirely to the Palæarctic Region of Sclater and Wallace, which embraces also the N. and W. of Asia (exclusive of Arabia) and N. Africa as far as the S. of the Atlas and the head of the Nile delta, and is characterised in its mammalian fauna by its abundance of carnivores (ounces, lynxes, wolves, foxes, bears, weasels, gluttons), rodents (marmots, beavers, pikas), and ungulates (sheep, deer, chamois, and musk-deer), and by the absence of monkeys, lemurs, and frugivorous bats, as well as elephants and the hyrax. A sub-region is formed by the countries round the Mediterranean. At the present day E. is to a larger extent a manufacturing region than any other continent, but the predominance of **manufactures** is characteristic only of certain countries. The British Isles, France, Germany, and Switzerland, all have manufactured goods as the leading export of native origin, and to these must be added Belgium, if not Holland, though the mode in which the commercial statistics of these countries are prepared does not make this evident. In all other European countries the chief exports are still products of the soil, the forest, or the sea. One of the most important facts in the commercial history of the continent within recent years, is the extent to which its agriculture has been affected by the rapid development of commerce in grain with many parts of the world, in which wheat and other crops are produced under exceptionably favourable conditions. For particulars as to the limits, area, &c., see **Continents,** and for table of countries, see **Appendix,** p. 1.

Falkenstein, tn., Ger., kgd. Saxony, 17½ m. S. by W. Zwickau; manufactures of lace curtains, textiles, &c. P. 7100.

Falkingham, Lincolnshire. See **Folkingham.**

Falkirk, parl. and mun. burgh, market-tn., and par. of Scot., co. Stirling, on an eminence at the SW. extremity of the fertile tract called the Carse of F., 24 m. WNW. Edinburgh, 2½ m. SW. by W. Grangemouth, 1 m. NE. of its stn. on the N. B. R., but containing Grahamston station in the middle of the town. The Carron iron-works, and several extensive coal-mines, are within 2 m. of the town, which is itself now the centre of the Scotch iron-founding trade. The three annual cattle fairs, called trysts, held in August, September, and October, are gradually dying out. The burgh unites with Linlithgow, Lanark, Hamilton, and Airdrie (forming the Falkirk dist. of bors.), in sending one member to House of Commons. In 1298 a battle was fought here between the troops of Sir W. Wallace and of Edward I., the latter victorious; and in 1746 an engagement in which the Highlanders, under Prince Charles Edward, were defeated by the English under General Hawley. Market-day, Th. Mean rfall. (Kerset, 1866–80), 32.9 in. Par. 19,551 ac., P. 30,700; tn. P. 19,800; parl. burgh (1891) P. 16,600; mun. burgh P. (1801) 8800; (1871) 9500; (1891) 17,300; parl. dist. (1891) P. 65,300.

Falkland, royal burgh, par., and vil., Scot., E. Fife, 9 m. ENE. Kinross, 2½ m. NW. by W. of its stn. (**F. Road**) on the N. B. R. F. has an ancient palace, in which James V. died (1542). PMT.O. Par. 8265 ac., P. <2500; vil. P. <1500; royal burgh P. <1000.

Falkland Islands (French **Malouines**, Spanish **Malvinas**) a group in the S. Atlantic Ocean, belonging to Great Britain, and consisting of 2 large and 200 small isls., between 51° and 52° 30′ S., 57° 40′ and 61° 20′ W., about 310 m. E. the Strait of Magellan, Patagonia. The East Falkland I. is nearly 100 m. in length NE. to SW., by 60 m. in greatest breadth, and the West Falkland about 90 by 50 m.; they are separated by Falkland Sound, from 9 to 12 m. in breadth. Shores greatly indented, and mostly low, afford good harbours. Surface more lofty in the W. than in the E. portion of the group, but in the latter are hills 1700 ft. above the sea. Mount Adam, the highest land of the group, is 2315 ft. in elevation. Clay slates of the Silurian system constitute the greater part of the level country, and quartz rock the mountain summits. Climate temperate and healthy, but moist westerly winds, often very violent, prevail. Mean temp., yr. 47°.2; summer, 53°.3, winter, 39°.9 F.; mean rfall. 28–29 in. Grass lands are extremely luxuriant, and sheep-rearing is now the chief occupation of the people (in 1890, sheep 676,000; cattle 7200; horses 3700). The tussac grass grows to the height of 6 ft. Shrub trees are the only timber. Peat is abundant to the depth of 10 ft. Some vegetables are raised in the settled parts, but little or no corn. The only indigenous quadruped is a large fox; sea-fowl are in considerable numbers; snipe, quails, hawks, &c., and a species of vulture, are found in the islands. Copper and iron ores have been discovered; whales are plentiful around the coasts; and fish, especially cod, are abundant in the bays. The sealing trade suddenly collapsed in 1870, owing to the seals having been exterminated or driven away from the island. The trade is almost entirely with the United Kingdom; annual value of imports £50–60,000; of exports, £90–120,000; chief article of export, wool. The export of frozen meat is increasing. These islands form a convenient station for ships to procure provisions and fresh water. Stanley Harbour was founded in 1853. The Falkland Is. were discovered by Davis in 1592, colonised by the French in 1763, taken by the Spaniards in 1767, and ceded in 1771 to the British, who have held uninterrupted possession of them only since 1833. Government is administered by a governor, an executive, and a legislative council. Since 1885 the colony has been self-supporting. Total area, 7500 sq. m. P. (1891) 1789, mostly of European descent; of Stanley, 694.

Falkner Island, U.S., Connecticut, off the entrance to Guilford Harbour.

Falköping, tn., Sweden, prov. Skaraborg, 35 m. NW. by N. Jönköping, in the fertile plain of Falbygden. Here Queen Margaret of Denmark gained a victory over King Albert of Sweden, 24th Feb. 1389. P. <3000.

Fallagh, Lower, tnld., Ire., co. Tyrone, bar. Upper Strabane, Lower Bodoney par. P. <250.

Fall River, vil., U.S., Kansas, Greenwood co., 132 m. SSW. Kansas City. P. <1500.

Fall River, city and port of entry, U.S., Massachusetts, Bristol co., on Mount Hope Bay, near frontier of Rhode I., at the head of deep-water navigation. The harbour is safe, easy of access, and will admit vessels of the largest class. It is one of the most important and most rapidly growing seat of the cotton manufacture in the U.S., the situation affording every facility for obtaining supplies of the raw material and fuel, and the atmosphere the requisite degree of moisture. Besides cotton mills, there are large establishments for the dyeing and finishing of textiles, foundry and machine shops, &c. Has an admirable High School belonging to the city. Fall R. derives its name from a small stream of that name entering the Taunton near its mouth. It was first settled in 1659. P. (1870) 26,800; (1880) 49,000; (1890) 74,400.

Fall River, co., U.S., S. Dakota, in the SW. corner.

Falls, city, U.S., Nebraska, cap. Richardson co., 85 m. S. by E. Omaha. P. <3000.

Falls, co., U.S., Texas, crossed by 97° W., N. of 31° N., traversed by the Brazos R.

Falmouth, vil., Canada, Nova Scotia, Hants co., on R. Avon, 47 m. NNW. Halifax. P. <1500.

Falmouth Bay, Eng., on the S. ct. of Cornwall.

Falmouth, seapt., mun. bor., market-tn., Eng., Cornwall div. and 7 m. S. by W. Truro, with a stn. on a branch of the G. W. R. F. forms a parl. bor. with Penryn (*q.v.*). The harbour, formed by the estuary of the Fal, with numerous creeks, is 5 m. in length and 1 m. in breadth. Two breakwaters, 1000 ft. long, protect the port, which, besides the tidal harbour with anchorage for vessels of any draught, has spacious graving docks, and is the first safe harbour for vessels sailing up the English Channel. F. was a mail-packet stn. from 1668, till in recent years it was superseded in this respect by Southampton. For shipping statistics, see **Appendix,** p. 13. F., previously named Smithic, received its present name by royal proclamation in 1660, and in 1661 had its charter of incorporation bestowed on it. Exports china clay, fish, tin, &c. Market-day, S. Mun. bor. P. (1891) 4700, but at the same date within the limits of the bor. as extended Nov. 9, 1892, 12,800.

Falmouth, tn., Jamaica, Cornwall co., on the N. ct., 18 m. E. Montego Bay, in 77° 39′ W. P. 4000.

Falmouth, post-tn., Tasmania, Cornwall co., on the E. ct., 56 m. E. by S. Launceston, in 41° 30′ S. P. <1500.

Falmouth, tn., U.S., Maine, Cumberland co., on Casco Bay, 5 m. N. Portland by rail. P. <2000.

Falmouth, tn., U.S., Massachusetts, Barnstable co., on the coast, 17 m. ESE. New Bedford. P. <3000.

Falmouth, vil., U.S., Pennsylvania, Lancaster co., on the l. bk. of Susquehanna R., 12 m. SE. by S. Harrisburg. P. <1500.

Falmouth, seapt., West Indies, on the S. ct. of Antigua I.

False Bay, bay, in the SW. of Cape Colony, 25 m. S. Table Bay. See **Simon's Town.**

False Bay, New Zealand, on the W. side of North I., in 36° 33′ S.

False Bay, South Australia, on the western shores of Spencer's Gulf, and near its head.

False Cape Horn. See **Horn, Cape.**

False Point, cape, harbour, and lighthouse, Brit. India, Bengal, in Cuttack dist., on the E. ct., to the N. of the mouth of the Mahánadí, in 20° 20′ 10″ N. So called because often mistaken by ships for Point Palmyras, one degree further N. It is the best harbour on the E. ct. of India, S. of the Húglí; safe and roomy. The port, opened in 1860, has had its trade greatly promoted by the opening of canals, the principal being the Kendrapara Canal, which extends from Cuttack 42½ m. Lighthouse, visible 19 m.

Falset, tn., Spain, prov. and 22 m. W. Tarragona; has important silver-lead and manganese mines. P. <4000.

Falsgrave, eccles. par., Eng., Yorkshire, N. Riding, ½ m. W. and included in the parl. bor. of Scarborough. P. 10,900.

Falster (probably from *fala,* 'a plain,' with suffix *str*), isl., Denmark, off the S. ct. of Seeland; length, 30 m.; breadth, 2–13 m.; surface flat, well watered, and fertile. Malarial fever is, however, endemic in the low and marshy parts. Chief tn., Nykjöbing. P. (1890) 32,639. See **Masnedö.**

Falsterbo, tn., Sweden, prov. Malmöhus, 15 m. SW. by W. Malmö, on a tongue of land jutting out into the sea, and crowned by a lighthouse. P. <2000.

Falstone, eccles. par., Eng., Northumberland, on the l. bk. of the North Tyne, div. and 19 m. NW. Hexham, on the N. B. R., PM.O.; has coal. P. <750.

Falta, vil., India, Bengal, Twenty-four Parganás, on the Húglí, nearly opposite its junction with the Dámodar. Site of an old Dutch factory. P. <5000.

Falterona, Mount, a summit of the Apennines, Italy, 25 m. ENE. Florence. Alt. 5380 ft. The Arno rises on its S. side.

Falticeni, tn., Roumania. See **Folticeni.**

Falu, or *Falva,* Hungarian, 'a village.'

Falun, or **Fahlun,** tn., Sweden, cap. prov. Kopparberg, 50 m. W. Gefle. Specially noted for its copper-mines, which date back at least 600 years, and in the middle of the 17th century yielded 3000 tons of copper annually. Alt. 380 ft. Mean temp., yr. 38.9° F., Feb. 20.0°, July 61.8°. P. 8000.

Falunières, Le Plateau de, dist., France. See **Indre-et-Loire.**

Famagusta (a name in use since Venetian times, Turkish, *Ma'usa,* both forms probably connected with the Semitic, *hamath,* 'a castle,' the town being of Phœnician origin—*Egli*), walled seapt. tn., Cyprus, on the E. ct., in 35° 8′ N., and 33° 59′ E., is built on the ruins of the ancient *Arsinoe.* Under the Venetian rule it was one of the chief commercial cities of the Levant; but the port is now available for small ships only. About 5 m. to the NE. is Old F., the ancient *Salamis* and *Constantia,* a site covered with ruins. The walls still remain in good repair, but the town within is in ruins, and all the business is now carried on at Varoshia, a new town outside the gates. F. gives name to one of the six dists. into which Cyprus is divided. Tn. P. <2000; dist. P. (1891) 41,400.

Famagusta Bay, the large bay in the E. of the isl. of Cyprus.

Famaka, tn., En. Sudan, on the r. bk. of the Bahr-el-Azrek, 180 m. SE. by S. Sennar, cap. of Fazokl.

Famars, comm., France, dep. Nord, arr. and 4 m. S. by W. Valenciennes, with remains of the ancient fort called *Fanum Martis* ('the temple of Mars'). P. <2000.

Famatina, vil., Argentine Republic, Rioja, 197 m. NNE. San Juan, 56 m. NW. by W. Rioja.

Famatina, Sierra, mt. range, Argentine Republic, state Rioja, trending nearly N. and S. in 68° W., between 28° and 30° S. Highest peak Nevado de F., 19,750 ft.

Fambridge, North and **South,** two pars., Eng., Essex, SE. div., on the N. shore of the estuary of the Crouch, 6 m. S. Maldon, with stn. (**Fambridge**) on the G. E. R. North F. P. <250; South F. P. <250.

Famine (or **Hunger**) **Port,** penal settlement, S. America, Chile, on the W. side of **F. Reach,** a portion of the Strait of Magellan, in 53° 38′ S. and 70° 58′ W. Now abandoned.

Famine River, riv., Canada, Quebec, flows SE. to the R. Chaudière, which it joins about 54 m. SSE. of Quebec.

Fanma, par., Ire., co. Kilkenny, bar. Gowran, on the Nore, 2 m. SE. Thomastown. P. <250.

Fämö, isl., Denmark, to the N. of Laaland.

Fämund, or **Faemund,** lake, Norway, dist. Hedemark, near the Swedish frontier, 85 m. SW. Trondhjem. Length, N. to S., 37 m.; breadth, varying to 5 m.

Fanad, penin., Ire., co. Donegal, to the W. of Lough Swilly, terminating in **F. Point,** in 7° 38′ W., on which is a lighthouse with fixed light (Lough Swilly), visible 14 m.

Fanano, comm., Italy, prov. and 30 m. SW. Modena, near Monte Cimone. P. <5000.

Fanar, suburb, Constantinople. See **Phanar.**

Fanaraki, vil., Turkey in Europe. See **Feuer-köi.**

Fancheng, tn., China, Hupe, on the l. bk. of the Han-kiang, opposite Siang-yang, 162 m. NW. Hankow; important commercial centre at the meeting-place of the trade-routes leading up the valley of the Han-kiang to southern Shensi, NW. across the Tsin-ling P. to Singan-fu, and N. up the valley of the Pei-ho

to Honan, or up the valley of the Tang-ho, then NE. to Kai-fong. P. about 100,000.

Fane River, Ire., in the SE. of co. Monaghan, and the N. of co. Louth; flows SE. then E. into Dundalk Bay.

Fang, tn., in the Shan states, Indo-China, 77 m. N. by E. Chieng-mai.

Fangaloa Bay, N. ct. Upolu I., Samoan group, S. Pacific, in 13° 55′ S., 171½° W.

Fangloss, vil., Eng., Yorkshire. See **Barmby Moor.**

Fangfoss with Spittle, par., Eng., Yorkshire, E. Riding, Howdenshire div., 10½ m. E. York, on the NE. R. P. <250. See **Barmby Moor.**

Fang-ki, small isl., China, off the S. ct., prov. Kwangtung, in 21° 18′ N. and 110° 35′ E.

Fangshan-hsien, tn., China, Pechili, 25 m. SW. Peking; coal-mining.

Fanjeaux, comm., France, dep. Aude, arr. Castelnaudary, 17 m. W. Carcassonne. P. <2000.

Fanling-Tao, isl., in the Sea of Japan, E. of Korea, in 36° 48′ N. and 128° 50′ E.

Fanlobbus, par., Ire., co. Cork, bar. Carbery E., W. div., on R. Bandon; contains Dunmanway tn.; 35,606 ac. P. 6300.

Fannich, Loch, lake, Scot., Ross-shire, 9 m. E. Loch Maree, drained E. and then SE. by the F. R. into the Bran; 6½ m. long by ¾ m. broad. Alt. 822 ft.

Fannin, co., U.S., Georgia, on N. frontier, W. of 84° W.

Fannin, co., U.S., Texas, in the NE., on the Red R. (N. frontier), crossed by 96° W.

Fanning, coral isl., in the Pacific, in 3° 63′ N., 158° 23′ W.; has a large lagoon, in which large quantities of mother-of-pearl shell are found. A kind of guano found on the island itself. On the route of the proposed cable from Vancouver to Australia. Annexed by the British in 1888.

Fannystelle, stn., Canada, Manitoba, on a branch of the C. P. R., 31 m. WSW. Winnipeg.

Fano, Greek **Othonos,** one of the Ionian Is., 14 m. NW. Corfu.

Fano, the ancient *Fanum Fortunae,* 'the temple of Fortune,' tn., on the E. ct. of Italy, The Marches, prov. and 8 m. SE. Pesaro; has manufactures of silk twist, a cathedral, and a university college. P. 20,600.

Fanö, isl., Denmark, off the SW. ct. of Jutland. Mean temp., yr. 45.8° F., Feb. 32.4°, July 61.5°. P. (1890) 3202.

Fans, Mfan, Pangwe or **Mpangwe, Osheba** or **Osyeba,** a people of W. Africa, inhabiting the highlands of the French Congo Terr. and German Kamerun Terr., between the equator and 3° or 3½° N.; of a light brown colour, hair neither crisp nor woolly, jaws not protruding, and in other respects differing from the negro race. They are quite savage, live chiefly by hunting, a little by agriculture. Cannibals.

Fanshawe, a lofty cape projecting into Prince Frederick Sound, W. ct. Alaska, in 57° 11′ N.

Fanti, coast-tribe and dist., in the middle of the Gold Coast, W. Africa.

Fanualoa, 'great land,' Samoan name of Bowditch I.

Fanum Fortunæ, tn., Italy. See **Fano.**

Fao, tn., Asiatic Turkey, at the mouth of the Shat-el-Arab, head of the Persian Gulf, where the Ottoman govt. telegraph line is connected with the cable to Bushire and India.

Faou, Le, fishing-tn., France, Finistère, on the W. ct., 16 m. ESE. Brest, arr. and 8 m. NE. by N. Châteaulin. P. <2000.

Faouët, Le, tn., France, dep. Morbihan, arr. Pontivy, 21 m. N. by W. Lorient. P. <2000.

Fara in Sabina, comm., Italy, Umbria, prov. Perugia, 24 m. NE. by N. Rome. P. <3000.

Faraday, settlement, Canada, Ontario, Hastings co., 41 m. from Madoc.

Farafangana, place with indiarubber trade in the SE. of Madagascar, near Fort Dauphin.

Farafreh, or **Farafrah,** an oasis, Africa, in the Libyan desert, in 27° N., and 28° 4′ E., 100 m. NNW. the oasis of Dakhel; it comprises several villages and a town with traces of Greek and Roman edifices. P. <2000. See *Petermann's Mitteil.,* 1875, p. 205.

Faraglioni, small group of basaltic islets on the E. side of Sicily, near Acireale; on the coast near is a cave supposed to be identified as the one described by Homer as the cave of the Cyclops Polyphemus.

Farah, or **Farrah,** vil., Afghanistan, near the **F. Rud** (a river flowing SW. then S. to the Hamun-i-F.), 136 m. S. Herat; surrounded by an earthen rampart and ditch.

Fârah, site, Palestine, *Parah* in the O. T., 31° 50′ N., 35° 18′ E., 6 m. NE. Jerusalem.

Farahy, par., Ire., co. Cork, bars. Condons and Clangibbon, and Fermoy, 7 m. SW. Mitchelstown, 9 m. from Ballyhooley stn.; 5493 ac. P. <750.

Farakhabad, Farahabad, Farhabad, or **Ferahabad,** tn., Persia, near the Caspian Sea, 25 m. NE. Barfrush. In the vicinity are ruins of a city and of a vast palace, favourite residence of Shah Abbas, who died in it in 1628.

Farallones (Spanish, 'islets'), a group of six small, lofty, rocky isls., 30 m. W. by S. of the entrance to San Francisco Bay, U.S., California. The eggs of the gull and murre are collected here in enormous numbers; the coasts abound in seals; lighthouse (Farallon) in 37° 42′ N., 123° W., visible 26 m. Rfall., yr. 18.17 in., May–Sept. 1.30 in.

Farasina Canal, strait, Austria, Istria, joins the Gulf of Quarnero with the Gulf of Fiume.

Farbill, bar., Ire., in the SE. of co. Westmeath.

Farcet, par., Eng., Huntingdonshire, Ramsey div., 3 m. S. by E. Peterborough, 1½ m. NE. by N. of its stn. on the G. N. R., PM.O.; 4487 ac. P. <1000.

Farcheú, mt., Carpathians, Transylvania, in 47° 55½′ N., 24° 27′ E. Alt. 6430 ft.

Farciennes, tn., Belgium, prov. Hainaut, 4 m. S. Fleurus. P. 6100.

Far Cotton, eccles. par., Eng., Northamptonshire, 2 m. S. Northampton, PMT.O. P. <2500.

Fardassi, Sennar. See **Fadusi.**

Färder, or **Faerder,** small isl., off the S. ct. of Norway, at the entrance to Christiania Fjord; has a lighthouse, visible 20 m.

Fardes, riv., Spain, prov. Granada, flows N. from the Sierra Nevada, and unites with the Guardal to form the Guadiana Menor.

Fardlehill, Scot. See **Elderslie and Fardlehill.**

Fareham, small port, market-tn., and par., Eng., Hampshire, F. div., on Harbour and 5 m. NW. by N. Portsmouth, with a stn. (**F. Junc.**) on the L. & SW. R.; with shipbuilding, brick-making, and some manufactures of earthenware. 6386 ac. P. 7900; parl. div. P. 66,000.

Faremoutiers, comm., France, dep. Seine-et-Marne, on the Grand Morin, 13 m. SSE. Meaux, arr. and 5 m. W. by S. Coulommiers. P. <2000.

Fareskur, tn., Egypt, on r. bk. of the Damietta mouth of the Nile, 9 m. SW. Damietta. P. 5000.

Farewell and Chorley, par., Eng., Staffordshire, div. and 3 m. NW. by W. Lichfield. P. <250.

Farewell (Danish **Farvel**), cape, the S. point of Greenland, in 59° 49′ N., 43° 54′ W.

Farewell, Cape, the N. point of South I., New Zealand, in 40° 31′ S., 172° 47′ E.

Far Forest, Bewdley, eccles. par., Eng., Worcestershire and Salop, Rock and Slottesden pars. P. <750.

Farn, Teutonic 'fern.'

Farn, or **Ferne Islands** (the first is the spelling of the Admiralty lists, the second of the English census), or **The Staples,** a group of 17 basaltic islets and rocks off the E. ct. of Eng., co. Northumberland, lying between 1½ and 5 m. from the mainland, opposite Bamborough. There are two lighthouses (Inner Fern and Longstone), the highest, on the SW. point, revolving; the other, on NW. point, fixed. Lat. 55° 37′ N., long. 1° 39′ W. The passage between the islets is, in rough weather, very dangerous. Here the *Forfarshire* was wrecked in 1838, when nine persons were saved by the heroism of the lighthouse-keeper and his daughter, Grace Darling. P. 15.

Faro, riv., Adamawa, flows N. into the Benue above Yola.

Farö, isl., Sweden, off the NE. extremity of Gotland, separated from it by F. Sound, 2 m. across.

Faro, seapt. and fishing tn., Portugal, S. ct., prov. Algarve, 54 m. W. by S. Huelva, cap. of dist. **F.,** which is conterminous with the prov. Algarve; has a cathedral, citadel, and arsenal. P. 8600.

Faro, Punta del, cape, Sicily, in the extreme NE., in 38° 16′ N., with lighthouse (Cape Peloro) visible 19 m.

Faroe Islands (in Danish, or rather old Norse, **Fär-öer,** 'sheep islands'), a group of islands in the North Sea belonging to Denmark, 180 m. NW. of the Shetlands, between 61° 20′ and 62° 25′ N., 6° 20′ and 7° 40′ W. It consists of 21 islands (formerly 22, Monken, or Munken, the southernmost of the group, having since 1885 completely disappeared), 17 inhabited. Coasts steep and rugged; interior mountainous; highest peaks, in Österö, 2790 ft., and in Strömö, the central island and largest of the group, 2415 ft. The channels which separate the islands afford several good bays. The islands enjoy all the advantages of an insular climate, and derive great benefit from the N. branch of the Gulf Stream, which, besides raising the temperature, carries to their shores considerable quantities of drift wood. Winters extremely mild [**Thorshavn**]; so much so, that sheep and cattle require no housing. Summer moist and foggy. There is no timber on the islands, but peat is abundant. Barley is cultivated, but does not always ripen. Turnips and potatoes yield good crops. Most of the inhabitants are employed in the fisheries, of which that of a species of small whale (the pilot-whale, called by the islanders the *grind*) is the most important, and in the preparation of wool. Sheep form the chief riches of the islanders. The horses are small but powerful; waggons are not employed. Sea-fowl are numerous, and feathers form a considerable article of commerce. The flora is of Germanic type. Among minerals, the chief are fine opals and coal, the last especially in Syderö. The people, of Norwegian descent, are robust and healthy; their spoken language is a dialect of the North German, but their written language is Danish. The islands are governed by an amtmann, who is also military commandant, a judge, and a provost. Thorshavn, on the S. coast of Strömö, is the cap. and the only town. The chief islands are Strömö, the central and largest of the group, Borö, Viderö, Österö, Vaagö, Sandö, Syderö. Total area, 510 sq. m. P. (1870) 9992; (1890) 12,954.

Faro Ploppeto, cape, Italy, in N. of Procida I., 40° 45½′ N.

Fårösund, seapt., Sweden, between the main isl. of Gotland, N. end, and the small isl. of Farö. Safe harbour, with 24–28 ft. of water and two public piers; depth alongside, 19½ ft.

Far Out Head. See **Fair Aird.**

Fell, Fjeld, Scandinavian, a 'hill,' 'mountain,' or 'rock,' probably cognate with Ger. *Fels,* the former occurring in English and Icelandic proper names (in Icelandic also *Fjöll*), the latter (plur. *Fjeldene*) in Norwegian and Swedish; usually in proper names a suffix, and spelt everywhere, except in England, in one word with the name proper (like Snæfell, in the Isle of Man and in Iceland). See *Elf.*

Fella, riv., in the SE. of Carinthia, and NE. of Venetia, l. bk. trib. of the Tagliamento; its valley is ascended by the railway from Udine to Villach and Klagenfurt.

Fellahîn. See **Egypt.**

Fellata, Fulah, Fulbe, called by the Haussa **Fellani,** or **Filiani,** one of the most important and interesting peoples of Africa. They inhabit the western and central Sudan from Senegambia to the Chad region, and S. of it to Adamawa. Nowhere in these countries do they form the sole population, but they live among the other races that have been subdued by them, *e.g.,* the Haussa (*q.v.*). The F. are a fine race of light colour. Their intelligence is far superior to that of the negro inhabitants of the western Sudan. Intermarriage between the two races is frequent, and the distinction of red and black F. is due to this fact. The great majority of the F. are Mohammedans, those of Adamawa are pagans. Their occupation is cattle-rearing and agriculture. On the Gambia, the upper Niger, and in Adamawa the former prevails, whilst the inhabitants of Sokoto and Gando chiefly follow agricultural pursuits. Trade and industries are on a comparatively high level in these semi-civilised territories: cotton cloths, salt, leather goods, guru nuts, and pottery ware are the chief trade articles. The chief trade centre for the western F. sultanates is Timbuktu (*q.v.*), and for the states E. of the Niger, Kano (P. 60,000). The ethnological position of the F. and their origin are entirely unknown. We are able to assert, however, that in the 16th century they inhabited the territories of the lower Senegal, especially Futa Toro, and from there they began their first conquests. But it is only since the beginning of this century that they have obtained their present standing. Sheikh Othman, whose first conquests were in 1802, was the founder of the great F. empire which flourished under his successors, Mohammed Bello and Atica. But during the last thirty years the vast territories of this state have been split up into a number of sultanates, the most important of which are those of Futa Jallon, Futa Toro, Segu-Kaarta, Massina, Gando, Yoruba, Abeokuta, and the great sultanate of Sokoto, including Adamawa. But even in countries more to the E., such as Bornu, Bagirmi, Wadai, and Darfur, F. colonies are to be found. About areas and P., see **Sokoto, Adamawa, Massina, Gando.** [**H. G. S.**]

Feret, Cape, France, dep. Gironde, at N. entrance of the Bassin d'Arcachon; dangerous for navigation.

Fergana, prov., Russian Turkistan, formerly khanate of Kokan, has Syr-daria on W. and N.; Semiryechensk and Kashgaria on E.; the Pamirs, the khanates of Karategin and Darvaz, and Russian prov. Zerafshan in S. Occupies the rich valley of the upper Syr and Naryn opening to the W., and extends in the N. over the mountains of the Tian-Shan system, while it spreads in the S. over the Alai Mts. and part of the Pamirs, the S. frontier still remaining unsettled. The pop., which consists chiefly of Sartes (about 350,000), nomadic Kirghizes (about 130,000), Tajiks (about 12,000), and Kipchak Tatars (70,000), with a few thousands of Russians, is chiefly settled in the valley, the Kirghizes living nomadically in the mountains. The fertile parts of the valley are well irrigated and cultivated. Chief towns: Kokan (cap. of prov.), Andijan, Namangan, Margelan, Osh, Uzgent, Gulcha; divided into seven dists. Area, 35,654 sq. m. P. 716,000.

Fergus, vil., Canada, Ontario, Wellington co., on the Grand R., 53 m. W. by N. Toronto, on a railway. P. <2000.

Fergus River, Ire., in the S. of co. Clare, passes Ennis and enters the Shannon by a wide but shallow estuary after a SE. course of about 27 m.

Fergus, co., U.S., Montana, crossed by 47° N., and in the middle by 109° W.

Fergus Falls, city, U.S., Minnesota, cap. Ottertail co., on the Red River of the N., 168 m. NW. by W. Minneapolis. P. <4000.

Fergushill, vil., Scot., N. Ayrshire, 2½ m. N. Irvine, 2 m. E. Kilwinning stn. P. <500.

Ferguson, co., Queensland, crossed by 150° E., and in the N. by 24° S., bounded on the W. by the Dawson R.

Fergusson, co., S. Australia, occupying nearly the whole of Yorke's Penin.

Fergusson, the middle of the three main islands of the D'Entrecasteaux group.

Feria, tn., Spain, prov. and 29 m. SE. Badajoz. P. 3000.

Feriana, tn., Tunis, on the r. bk. of the Wadi F., 103 m. SW. by W. Kairwan, a few miles to the SW. of the ruins of the ancient *Thelepte.*

Ferintosh, a detached portion of Nairnshire, Scot., at the head of the Cromarty Frith, about 2 m. E. by S. Dingwall.

Ferkan, tn., Algeria, 133 m. SSE. Constantine.

Ferkela, tn., Morocco, prov. Tafilelt.

Ferla, comm., Sicily, prov. and 20 m. W. by N. Syracuse. P. <5000.

Ferman'agh, co., Ire., Ulster, bounded W. by co. Leitrim, N. by cos. Donegal and Tyrone, E. by co. Monaghan, and S. by co. Cavan; divided into the following baronies:—

Baronies.	Acres.	P. 1891.
Clanawley	72,876	9,616
Clankelly	39,068	7,223
Coole	17,302	3,320
Knockninny	27,730	5,800
Lurg	66,167	12,361
Magheraboy	79,121	12,504
Magherastephana	58,978	10,412
Tirkennedy	56,423	12,934
Total, Fermanagh	417,665	74,170

The surface is irregular, and mostly hilly, the highest points being Cuilcagh (2188 ft.) and Belmore (1312 ft). The geological formation is mainly limestone (with underground watercourses), millstone grit, and Old Red Sandstone. The riv. Erne, with its two fine lakes, drains nearly the whole county, dividing it into two equal parts by its course from SE. to NW. The lower lands are fertile, owing to their rich, loamy soil. For agricultural statistics, see **Appendix,** pp. 10-12. Antiquities: A round tower and ancient abbey on one of the lake-islands, Danish raths, and some ruined castles. In 1688-89 this county distinguished itself in the Protestant cause, so that 'Enniskilleners' became synonymous with 'brave and loyal.' The Sligo and Dundalk Rly. intersect F. The county returns two M.P.'s, one for each div.; it contains 23 pars. in diocese of Clogher, except a small portion in Kilmore. The population, which has steadily declined since 1841, was in 1891, 74,200. See **Ireland,** table.

Fermersleben, vil., Prussia, prov. Saxony, govt. Magdeburg, circle Wanzleben, near Magdeburg. P. <3000.

Fermo, comm. Sicily, prov. and 20 m. W. by N. Syracuse. P. <5000.

Fermeuse, fishing settlement, Newfoundland, on coast, 51 m. S. St. John's.

Fermo, tn., Italy, The Marches, prov. Ascoli, 34 m. S. by E. Ancona; seat of an archbishop. P. 17,800.

Fermoselle, the ancient *Ocellum Durii,* frontier tn., Spain, prov. and 26 m. SW. Zamora, at the confluence of the Tormes and the Douro. P. 5400.

Fermoy, par. and tn., Ire., NE. co. Cork, bar. Condons and Clangibbon, 14 m. W. Lismore, with a stn. on the G. S. & W. R.; an important military station. Has large flour-mills, and a Roman Catholic college (St. Colman's). Alt. 176 ft. Mean temp. (7 yrs., 1867-73), yr. 50.1° F., Jan. 40.7°, July 60.9°. Market-day, S. Par. 3481 ac., P. 6800; tn. P. 6500.

Fermoy, bar., Ire., co. Cork, in the N.

Fernandina, city and port of entry, U.S., Florida, Nassau co., at the mouth of St. Mary's R., 19 m. N. by W. of the mouth of St. John's R.; has an excellent land-locked harbour, capable of being entered at high tide by vessels drawing 20 ft. Its entrance is marked by a lighthouse, in 30° 40′ N., visible 16 m. P. <3000.

Fernando, Spanish form of Ferdinand.

Fernando Po (Spanish **Póo**), isl., W. Africa, in the Gulf of Guinea, between 3° 10′ and 3° 48′ N., 8° 25′ and 8° 58′ E. Length, NNE. to SSW., 45 m.; breadth, 5 to 15 m. Its coasts are rocky and steep, its interior entirely mountainous, and it presents an appearance of extreme beauty and fertility. It rises by regular slopes to two peaks, the northernmost and highest of which (Clarence Peak, or Santa Isabel) is 9350 ft. above the sea; the southern, 8760 ft. A great portion of the island is covered with dense forests of valuable timber. Cultivated products, cotton, coffee, and yams, the last being the principal food of the natives. It abounds in monkeys, some of which are remarkable for their great size, and contains also many wild goats and sheep. Its climate is excessively hot, and it is exposed to the *harmattan,* a pestilential wind from the continent, but is healthy after the rainy season. The interior is inhabited by negroes under native chiefs. F. P. is now in regular communication with the northern country by means of a Spanish line of steamers. The island was discovered at the close of the 15th century by the noble Portuguese Fernão do Pao. In 1827 the British (Baptist) settlement of Clarence Town

was established at the NE. end of the island. The Baptist missionaries were bought out by the Spaniards in 1858, and went to a new station at Victoria, near the Kamerun mountains, and the name of the settlement on F. Po was changed to Santa Isabel, though the name of Port Clarence is still given to the bay on English Admiralty charts. For an account of the geology, see *Petermann's Mitteil.*, 1887, p. 265. Mean temp. (4½ yrs. 1859–63), yr. 78.1° F., Jan. 81.9°, July 76.4°. Area, 800 sq. m. P. including Annobon, Corisco, and the Elobey Islands, 45,000.

Fernand Vaz, port, French Congo Terr., in 1° 18′ S.

Fernan Núñez, tn., Spain, prov. and 15 m. S. by E. Córdoba. P. 5500.

Fernão, Portuguese form of Ferdinand.

Fernão (frequently **Fernando**) **do Noronha,** isl., S. Atlantic Ocean, 125 m. from the E. extremity of Brazil, to which it belongs; peak, SE. side, in 3° 50′ 4″ S., 32° 25′ 5″ W. Length, NE. to SW., 8 m. F. do N., in the wayside of the commerce of the world, is sighted by more ships, and visited by fewer, than perhaps any other spot of earth. It is a broken, picturesque, volcanic rock (basaltic, with peaks of phonolite) in mid-ocean, covered with verdure, including trees of some size, and the top of the main island is cultivated in small farms. Climate hot, but tempered by frequent sudden showers. The soil is a ferruginous clay of the richest description. The native vegetation (Euphorbiaceæ, Ipomæas, &c.) is rapidly giving way before an invasion of foreign intruders. No native mammals. The island is a convict station of the Brazilian government. Females are prohibited from landing on this island. P. <2000; about three-fourths convicts. Named after the Count of Noronha, commander of the ships which first sighted it (1503). See *Proc. R. G. S.*, 1888, pp. 424–35.

Fernão Veloso, bay, Portuguese E. Africa, in 14° 24′ S. The fine harbour of **Port Nakala,** 13 m. long by 5 m. wide (*Proc. R. G. S.*, 1885, p. 431), runs SSW. from its head. Native name **Masisima. Belmore Harbour** opens from it to the N.

Ferro, *Portuguese, Spanish* **Hierro,** *French* **Ile de Fer,** the most SW. of the Canary Is., about 13 m. long by 10 m. broad. Highest point in centre, 4670 ft.; area, 50 sq. m. Chief town, Valverde. The use of the meridian of F. as the first meridian, may be said to have originated with Ptolemy (second century A.D.), whose prime meridian is the westernmost of the Canary Is., the westernmost land of the then-known world. The so-called meridian of F., as now used (mostly in Germany), exactly 20° W. of the meridian of Paris, was fixed as the first meridian by an ordinance of Louis XIII. of France, dated the 1st of July 1634. It is 17° 39′ 45″ W. Greenwich, and runs nearly 2 m. E. of the island.

Ferro, Capo di, cape, Sardinia, in the NE., at the mouth of the Gulf of Arsachena, in 41° 8½′ N.

Ferrol, bay, N. ct. of Peru, in 9° 8′ S., with a well-sheltered roadstead, and a low, sandy coast; on its shore, Chimbote.

Ferrol, seapt. tn., and one of the principal naval arsenals of Spain, prov. and 12 m. NE. Corunna, on the N. arm of the Bay of Betanzos. Lat. of mole 43° 29′ 30″ N., long. 8° 13′ W. Its harbour is entered by a strait which admits only one ship at a time, and is defended by the castles of San Felipe and Palma. The town, on its N. shore, is strongly fortified on the land side. Its arsenal and dockyard cover nearly 24 ac., and comprise many docks and storehouses. The harbour is deep, but alongside the quay of Muille de Perez there is only 16 ft. at high water. Manufactures comprise spirits, earthenware, chocolate, leather, naval stores, and textiles. P. (1877) 23,800; (1887) 25,700.

Fez, or **Fas,** city, Morocco, about 3 m. from the l. bk. of the Sibu (*q.v.*), 36 m. E. by N. Mekinez, in 34° 6′ N., 4° 55′ W. F. is the holy city of the empire, and one of the three residences of the Sultan; founded by Mulai Edris the younger about 793. It is surrounded by old walls, and has an ancient fort at each of its extremities E. and W., with three in ruins outside the walls. It consists of two parts, Old F. and New F. (the latter containing only the palace and the Jewish quarter), both enclosed in walls. The chief mosque, called *El Karaouin,* has 300 pillars and numerous fountains; its tower contains a library of MSS., globes, and astronomical instruments; the Mulai Edris, like all buildings containing tombs of 'saints,' is an old sanctuary for criminals, the founder of the city being buried here. Manufactures carpets, morocco leather, woollens, silks, jewellery, saddlery, and earthenwares. The leathers of F. are esteemed the finest and most durable made in N. Africa. The red caps, or fezes, for which it was once noted, are now made chiefly in Austria, France, and Turkey. The Jews used to coin money in the mint, a rather handsome building forming part of the Sultan's palace, but the coinage is now struck in Paris. It is the seat of the once famous university of Morocco, and contains numerous schools. F. is the leading commercial town of Morocco; it has a large wholesale trade. The principal articles imported from Europe are raw and manufactured silk, cotton stuffs, cloths, paper, weapons, powder, tea, sugar, drugs, spices, &c. Alt. 1285 ft. (Schnell); 1155 ft. (Duveyrier, *mb.*). P. about 60,000 (when the Sultan is in residence), including about 10,000 Jews and 10,000 negroes.

Fezzan, the ancient *Phazania,* country, Africa, S. of Tripoli, is formed by a number of oases in the middle of the desert, and extends between 23° 30′ and 30° 50′ N., 12° and 19° E. It forms, with Tripoli and Barka, a regency of the Turkish dominions in Africa. It is said to comprise about 100 towns and villages, or inhabited oases, which are fertile, especially in palms. It is inhabited by Tuaregs, Arabs, Moors, and negroes. The chief takes the title of Sultan, and resides at Murzuk, towards the S. of the prov. (alt. 1450 ft.). The chief town in the N. is Sokna (alt. about 1000 ft.). Wheat and barley are raised, but dates form the chief article of food. Trade in slaves, ivory, senna, and gums. The prov. abounds in salt lakes, and is the seat of pernicious endemic malarious fevers (Hirsch). P. estimated by Rohlfs at 200,000.

Fezzara, lake, Algeria. See **Fetsara.**

Fiener Bruch, morass, Prussia, in the E. of prov. Saxony, to the S. of the Plauen Canal.

Fierles, tnld., Ire., N. co. Kerry, bar. Maguniby, 8 m. NNW. Killarney. P.<250.

Fiesole, tn., Italy, Tuscany, prov. and 3 m. NE. Florence; was anciently one of the twelve chief cities of Etruria, and has remains of Cyclopean walls, a cathedral, and a Franciscan monastery. Alt. 970 ft. P. 13,700.

Fife, stn. of African Lakes Co., Brit. Central Africa, near the Songwe, about 80 m. W. of the head of Lake Nyassa.

Fife, or **Fifeshire,** maritime co., Scot., forming a penin. on its E. coast, between the Firth of Tay on the N. and the Firth of Forth on the S. Greatest length, 44 m.; greatest breadth, 18 m. Surface diversified. The R. Eden flows through the length of the county into St. Andrew's Bay, traversing a highly productive valley known as the 'Howe (hollow) of Fife,' composed of Upper Old Red Sandstone, to the N. of which the principal rocks are igneous outpourings of the Old Red Sandstone age. The rocks in the S. and larger portion of the county are mainly of Carboniferous age, the stratified deposits consisting chiefly of Calciferous Sandstone and Carboniferous Limestone, with a considerable area of Coal Measures extending from Dysart to Largo Law on the coast, and inland northwards as far as Markinch. To the W. of Kirkcaldy are interbedded basalts of the Calciferous Sandstone period, and large patches of intrusive basalt are distributed over all the S. part of the county. The Coal Measures are traversed by the Leven, the outlet of Loch Leven. Highest points, E. Lomond, 1471 ft.; W. Lomond, 1713 ft.; Largo Law, 965 ft. Agriculture is in an advanced state. For statistics, see **Appendix,** pp. 10–12. Coal (to a large extent parrot and splint coal) is mined to the value of upwards of £1,000,000 annually, the mines occurring not only at Dysart, West Wemyss, Leven, Markinch, and other places on or close to the Coal Measures, but also at Dunfermline, Kelty, Lochgelly, Cowdenbeath, Cardenden, Kirkcaldy, and other places amongst the older Carboniferous rocks in the W. of the county. A large amount of oil-shale was formerly produced at Burntisland, and limestone and ironstone are still worked. There are blast-furnaces at Cowdenbeath and Lochgelly. Linen manufactures are carried on at Dunfermline, Kirkcaldy, Dysart, Cupar, Newburgh, Auchtermuchty, &c. All the railways of the county now belong to the N. B. R. system. One line is carried across the Firth of Tay to Dundee. Contains 13 royal burghs, and a number of towns and villages, chief of which are Cupar, the county town, Dunfermline, St. Andrews, Kirkcaldy, Elie, and other towns on the SE. shore. For parl. purposes the county is divided into two divs., E. Fife (P. 50,996) and W. Fife (P. 58,458), which, together with the St. Andrews dist. of burghs (P. 18,941), make up the whole county. Area, 314,952 ac. P. 187,300. See **Scotland,** table.

Fifehead Magdalen, par., Eng., Dorsetshire, N. div., on the Stour, 9 m. E. by N. Sherborne, 3 m. E. Henstridge stn. P.<250.

Figuig, Sahara. See **Figig.**

Figuilar, electoral div., Ire., Monaghan, dist. Glaslough.

Fijenoord, suburb of Rotterdam, on l. bk. of the Maas, with steam-engine and other works.

Fiji (formerly spelt also **Feejee,** or **Fidji**) **Islands,** a group composed mainly of volcanic islands situated to the N. of New Zealand, and mostly lying between the parallels of 16° and 19° S. Their total area is about equal to that of Wales, and Viti Levu, the largest of the islands, embraces more than half the land-surface belonging to the group. Fijian names are variously spelt, owing to the fact that certain letters have peculiar sounds: *b* is pronounced as *mb*, *c* as *th*, *d* as *nd*, *g* as *ng* (in sing), and *q* as *ngg* (*ng* in finger). In the following list of the chief islands, the spelling is phonetic (vowels sounded as in Italian):—Viti

Levu, Vanua Levu, Taviuni, Kandavu, Mango, Vulanga, Yathata, Vatuvara, Lakemba, Vanua Mbalevu, Mothe, and Mbau. As to climate, see **Mbua** and **Delanasau.** The rainfall varies greatly in different parts of the islands. The native Fijians are a dark copper-coloured race of the Polynesian type, all at least nominal Christians, and mostly belonging to the Wesleyan body, which has maintained mission work actively on the islands since 1835. The islands were ceded in 1874 by their native king to Britain, and now form a British Crown colony. Even before that time people of European origin had established plantations of tropical crops on several of the islands, and since that date the products of such plantations (chiefly sugar, but also coco-nut, maize, tobacco, coffee, a little tea, arrowroot, and cotton) have increased very greatly, and a large trade has thus grown up. The plantation labourers are partly natives of the islands themselves; but as these are not enough, Indian coolies and labourers from other islands (principally the New Hebrides and the Solomon Islands) are introduced to work for the planters for a period of years. The introduction of these labourers and their treatment on the plantations are entirely under the control of the government. Cattle run wild, and a few horses and sheep are reared. The annual value of the exports is £300,000 to £500,000; imports, £200,000 to £300,000. The principal exports are sugar, fruit (fresh bananas, pine-apples in cases, &c.), and copra; among others are trepang, coco-nuts, cotton, hides, maize, peanuts, tortoise-shell, and spirits. About nine-tenths of the total trade is with the colonies of New Zealand, New South Wales, and Victoria. The export of fresh fruit to New Caledonia is growing. The chief towns of the group are seaports, with fine harbours protected by coral reefs. The capital is Suva, in the SE. of Viti Levu. The next in importance is Levuka, the former capital, on a small island to the E. of Viti Levu. The small island of Rotumah, to the N. of the F. group, is now annexed to the colony of F. Total area, 8034 sq. m.; inhabited islands, 7740 sq. m. P. in 1859 estimated at 200,000; in 1874, 140,000, a number which was still further reduced by a deadly epidemic of measles in 1875; at the census of 1884, 128,000 (3513 Europeans); in 1891, 124,000 (Europeans, 2036; Fijians, about 111,000; Indians, 7500; Polynesians, 2300).

Fik, vil., Palestine, *Aphek* in the O. T., 32° 47′ N., 35° 42′ E., 9 m. E. Tiberias.

Finika, probably the ancient *Phœnicus*, small seapt., on S. ct. Asia Minor, vilayet Konia, 105 m. E. by S. Rhodes. Open and shallow roadstead exposed to S. winds. Large vessels anchor 1 m. from shore. P. 3000, in great part orthodox Greeks (Cuinet).

Finish, isl., Ire., W. co. Galway, at the N. of the entrance to Kilkieran Bay.

Finisk, riv., Ire., in the W. of co. Waterford, flows S. then W. to the Blackwater, which it joins on the l. bk. about 2 m. below Cappoquin.

Finistère ('land's end'), dep., NW. France, at the end of the penin. of Brittany (*q.v.*), and composed of the old dists. of Léon, or Léonais, in the N., Cornuaille occupying the SW. penin., and Tréguier; now divided into five arrs., Quimper, the cap., Brest, Châteaulin, Morlaix, and Quimperlé. The dep. is essentially composed of primitive granites, schists, micaschists, and gneiss. Without being mountainous, F. is undulating, with two chains of hills, the Montagnes d'Arrée, with the highest point of the dep. (1280 ft.), and in the S. the Montagnes Noires, both chains trending ENE. On the W. coast the Capes of Raz and St. Mathieu are respectively of gneiss and granite. The intervening softer schistose rocks have been washed away by the violence of the waves, which have thus carved out, behind the larger gulf known as Iroise, between the I. of Ouessant (Usbant) on the N. and that of Sein on the S., the roadstead of Brest and the bay of Douarnenez. The coast line of this dep., including its small bays, has a length of 375 m. The only river of importance is the Aune, or Aulne, in Breston *Aown*, with its valley enclosed between the Montagnes d'Arrée and the Montagnes Noires; navigable for sea-going ships as far as Port Launay. The Odet, or Quimper, riv. is 37 m. long, and the Laita, or Quimperlé, riv., in the extreme SE., about 45 m. Climate remarkably mild and temperate [**Brest**]. Arable land occupies more than one-third of the dep., and its fertility is increased by sea-weed manure. Principal cereals, wheat and oats. Vegetables and fruits are largely cultivated in many cantons, for the supply of Brest, Paris, and England. The silver lead-mines in the vicinity of Huelgoat and Poullaouen, formerly the richest in France, worked since the fourteenth century, are now exhausted. The fine grey granite of Kersantôn is noted; slates are quarried at Morlaix and Châteaulin, and porcelain-clay obtained near Daoulas. Brest is an important centre of iron shipbuilding, and linen is manufactured at Landerneau. Sardine-fishery is profitable, and extensively carried on, Douarnenez and Concarneau being celebrated for this specialty; the latter of these places also breeds lobsters and oysters. Two railways traverse the dep., one N. of the Montagnes d'Arrée from Paris to Brest, *viâ* Morlaix and Landerneau, another from Nantes to Landerneau, near the S. and W. coast, *viâ* Quimperlé and Quimper, with a branch to Douarnenez. Area, 2730 sq. m. P. (1891) 727,012. See **France,** table.

Finisterre, comm., Spain, Galicia, prov. Corunna, govt. Corcubion. P. <5000.

Finisterre, cape, Spain, on the W. ct., 38 m. W. Santiago, at the S. end of a small penin., with lighthouse, in 42° 53′ N., visible 21 m.

Finke, principal riv. in the central part of the Colony of S. Australia (N. of Lake Eyre), derives its headwaters chiefly from the S. slopes of the Macdonnell Ranges, and comes to an end in sandy flats in about 26½° S., and only in times of flood supplies a little water to the basin of Lake Eyre; the country through which it flows embraces much well-watered land fit for pasture.

Finkenwärder, comm., Ger., Hamburg. P. <4000.

Finland, Archduchy of, a part of the Russian Empire, situated between 59° 48′ and 70° 6′ N., 20° and 32° E., bounded N. by Lapland, E. by the Russian govts. Archangel and Olonets, S. by the Gulf of F., and W. by the Gulf of Bothnia and Sweden. It was ceded to Russia by Sweden in 1809, and has preserved, by special grant of Alexander I., the chief features of its ancient constitution. It is governed by a 'Seim,' consisting of elected representatives of the four estates—the nobles, the clergy, the burghers, and the peasants—and convoked by the Grand Duke, Emperor of Russia. The schemes of laws are elaborated by a 'Committee for the affairs of F.,' sitting at St. Petersburg, and are proposed to the Seim by the Grand Duke, who also has the right of veto. The executive is in the hands of a Senate, which sits at Helsingfors, and is composed of members nominated by the Crown, under the presidency of a Governor-General. It is composed of two departments, Justice and Finance, which have under them the administration of education, justice, police, post, railways, canals, custom-houses, and hygiene. The military department and the foreign affairs are under Russian ministries, and the posts and telegraphs have recently been brought under the supervision of the Russian authorities. None but Finnish citizens can be employed in the civil service of the country. F. has also its own army (eight battalions of riflemen), as also its own money and custom tariffs. It is divided into eight provinces:—

Provinces.	Area. sq. m.	Out of it under Lakes. sq. m.	Population. 1873.	Population. 1890.	Inhabitants per sq. m.	Average yearly Increase.
Åbo-Björneborg	9,332	400	310,159	395,474	41	5,029

Finnish part of Lake Ladoga	3,094	3,094	..	..	..	..
Finland (1890) .	144,254	16,086	1,857,035	2,380,140	16	30,771
,, (1850) .	..	..	..	1,636,915	11	18,581
,, (1815) .	—	..	..	1,095,957	8	16,456

The average number of births (79,245 in 1886–90) exceeded the average number of deaths (45,953) by 33,292 every year, while emigration (45,000–50,000 every year) but slightly exceeds immigration.

F., in its southern part, may be considered as an undulating pentagonal penin., 300–500 ft. high, stretching NE. to SW., and limited by the Gulf of Bothnia in the NW., and by the Gulf of F. and the depression of Lakes Ladoga and Onega in the SE.; its surface is intersected by low undulating hills and flat depressions, occupied by lakes. Beyond the 65th degree of latitude, the hills rise to above 1000 ft., attaining 1330 ft. in the Man-selkä hills, and from 2200 to 2245 ft. in the Soula-selkä hills of Laponia. Countless small islands are scattered along the shores of F., part of them forming the **Åland** archipelago in the SW. The rocks are granites, gneisses, and a variety of Archean (Laurentian) schists, thickly covered all over with glacial and post-glacial deposits. Southern F. is covered by a labyrinth of lakes connected together by short streams, which, with the aid of many canals, offer great facilities for navigation, as well as for floating timber from the interior to the coast region, while the streams supply the motive-power to hundreds of saw-mills. The chief lakes are Lake Ladoga; Saima, whose outlet, the Vuoksen, flows into Lake Ladoga, forming the Imatra rapids, while the Saima is connected by a canal with locks with the Gulf of F.; Pyhä-selkä, Ori-vesi, and Pielas-järvi, connected by streams and canals with the above; Pajäne, discharging its waters through the Kymmene into the same gulf; Näsi-järvi and Pyhä-järvi about Tammerfors; Uleå-träsk and several smaller ones sending their waters into the Gulf of Bothnia; and Enare, in the Kola Penin., discharging its waters into the Arctic Ocean through the Patsjoki. The climate is extreme, with protracted winters and hot but short summers, early frosts often damaging the crops. The soil is fertile in the middle and W., but stony and poor in the SE. and N., where failures of crops are frequent. Grain is exported from Uleåborg, but has to be imported in the S. and SE. Chief crops, rye, barley, and oats. The land was owned in 1890 by 114,582 persons (89,000 holding less than 67 acres), and is rented by the large owners to small farmers (nearly 70,000), whose condition is generally precarious. An

average crop attains 52,000 hectolitres of wheat, 4,500,000 of rye, 2,300,000 of barley, 5,000,000 of oats, and about 6,000,000 of potatoes. In addition to this, about 110,000 tons of cereals are imported every year, while from 45,000 to 50,000 tons, chiefly of oats, are exported. Cattle breeding is an important pursuit, especially for the export of milk and butter. Forests cover immense areas, those of the Crown alone covering 35,276,000 acres, while the saw-mills give occupation to more than 7000 workers. Hunting in the N., and sea hunting in the archipelagoes, are substantial branches of income. Bog iron is found in very many lakes, 20,000–25,000 tons of pig iron being obtained every year. The manufactures are steadily developing, and give occupation to an aggregate of nearly 60,000 workers; their yearly production attains about £6,500,000. The chief are iron and mechanical works, textiles, wood works, distilleries, paper and leather works. The chief commerce of F. is with Russia, Germany, and Great Britain, the exports attaining, in 1886–91, from about £3,000,000 to £4,000,000, while the imports vary from £3,600,000 to £6,000,000. The chief exports are timber, butter, paper, leather, flour, cottons, hides, tar and pitch; and the chief imports corn and flour, coffee and colonial goods, iron, textiles, raw cotton, chemicals, tobacco, &c. With the exception of some 42,000 Greek Orthodox and Nonconformists in Karelia (East F.), and about 500 Roman Catholics, the population are Lutherans; and out of a legal population of 2,371,092, no less than 2,048,445 were Fins, and only 322,647 Swedes. F. is well provided with schools. It has one university at Helsingfors (over 1700 students), and a considerable number of schools for secondary and professional education, both for boys and girls. The primary schools are in a good condition, and owing to a system of ambulatory schools in the least peopled parts of the territory, only 12,000 children out of 420,000 in the school age received no instruction. F. has 1930 kilomètres of railways (1891), all very economically built by the state. A main line runs from St. Petersburg to Helsingfors, Hangöudd, and Åbo, with branches to Sestroryetsk, on Lake Ladoga, and Kotka, Borgo, and Sveåborg on the shores of the Gulf of F.; two main lines branch northwards, one to Kuopio, and the other to Vasa and Uleåborg. The chief towns are **Helsingfors,** cap. of F. (61,000 inhabitants, with Sveåborg, its fortress), **Åbo** (29,000), **Tammerfors** (19,000), **Viborg** (18,000), **Uleåborg** (12,500), **Björneborg** (10,500), **Nikolaistad,** or **Vasa** (9500), and **Kuopio** (9100). The aggregate population of the towns attained 235,300 in 1890. All units of measures and money are on the metric system (mark=franc).

Finland, Gulf of, great arm of Baltic Sea, extending E. between 58° 40′ and 60° 40′ N., 23° and 30° 10′ E., having Finland in N., and Russian govts. St. Petersburg and Esthonia in E. and S. Length, 260 m.; breadth, 25–90 m. Contains numerous islands: Kotlin, on which Kronstadt is built, Hogland, Tütters, Nargen being the chief. Receives the Neva, Luga, Narova, and is connected by Saima canal (a canal with locks) with the interior lakes of Finland. St. Petersburg is at its E. end, and the towns Hangöudd, Ekenäs, Helsingfors, Sveåborg, Borgo, Kotka, Viborg, and Sestroryetsk are on its N. coast; Baltisch Port, Reval, Narva, and Oranienbaum on its S. coast. Two lines of railway run along both coasts, with branches to above towns. Chief channel for Russian export trade. Free from ice for 207 and 220 days at Helsingfors and Kronstadt, and 309 and 332 days at Hangöudd and Baltischport.

Finlay, riv., Canada. See **Peace River.**

Finlayson Channel, strait, Brit. Columbia, between Roderick and Sarah and Princess Royal Is., in about 52° 30′–50′ N., 128° 15′ W. At its N. end are Hiehish Narrows.

Finmark, stn., Canada, prov. Ontario, on the C. P. R., 1031 m. by rail W. Montreal.

Finmark, a bailiwick, or amt, Norway, prov. and diocese Tromsö, forms the most N. part of continental Europe, and is situated between the Arctic Ocean and Russian Lapland. See **Norway,** table.

Fitzwilliam's Mill, vil., U.S., Texas, Bastrop co., SE. of Austin. P. <1500.

Fiume (Ital. 'river'; called in the Middle Ages *Fanum Sancti Viti ad Flumen*, 'temple of St. Vitus by the river,' corrupted in German into *St. Veit am Flaum*, called in Croatian *Rieka*, a translation of the Italian name), seapt. tn., Hungary, forming with the adjoining territory an independent dist., surrounded by the prov. of Croatia Slavonia, on the Gulf of Quarnero, at the mouth of the Fiumara, in the Adriatic, 40 m. SE. Trieste. At the time of the adoption of the Hungarian constitution (1867) F. had only a small trade, but much has been done since by the Hungarian government, as well as by the local government, to improve the port. It has been connected by rail with the interior of Hungary (as well as the Austrian provs.). Since 1872 a harbour has been formed, sheltered by a breakwater 1552 yards long, and accessible to ships of any size, which load and unload at quays. There is also a petroleum port, besides the old port in the Fiumara channel, and a timber port and a floating dock intended for the port are now (1893) in course of construction. F. has in consequence become the chief place of shipment of Hungarian grain and flour, as well as the seat of a large export trade in timber and other products, total value £4,000,000 to £5,000,000. Its import trade is only about two-thirds of that value; principal articles, petroleum, rice, wine, coal, jute, and other raw materials. The shipping frequenting the port increased from 4331 vessels of 280,919 tons entered and cleared in 1871, to 12,522 vessels of 1,855,226 tons in 1891 (12,510 vessels of 1,627,927 tons in 1892). Till July 1891 F. was a free port. The chief drawback that still remains to the development of the port lies in the fact that the railways connecting it with the interior are only single lines. F. is also a manufacturing town; chief manufactures, machinery, hemp and jute fabrics, paper, &c., besides shipbuilding. Difference between highest and lowest tides 27½ in. Mean temp. (15 yrs.), yr. 57.3° F., Jan. 42.8°, July 74.5°. Area, tn. and dist., 8 sq. m. P. (1869) 17,900; (1880) 21,000; (1890) 29,500.

Fiumefreddo Bruzio, comm., Italy, Calabrie, prov. Cosenza, on the coast, 37 m. NW. Catanzaro. P. <500.

Fiumicello Urago, comm., Italy, prov. and 1 m. W. Brescia. P. <4000.

Fiumicino, small seapt., Italy, prov. and 15 m. WSW. Rome; founded in 1825.

Fiumorbo ('river of disease,' the ancient *Hierus*), small riv., Corsica, flowing E. into the sea about 42° N.; so called on account of the noxious exhalations of its marshy banks.

Flamborough, par., Eng., Yorkshire, E. Riding, Buckrose div., 16½ m. SE. Scarborough, 3½ m. ENE. Bridlington, 2 m. E. of its stn. on the NE. R., PMT.O. P. <1500.

Flamborough Head, cape, Eng., consists of a range of limestone rocks, 450 ft. in elevation, extending along the shore for several miles, with a lighthouse 214 ft. in height, in 54° 7′ N., 0° 5′ W., visible 21 m. The rock is perforated by caverns, which are the resort of numerous sea-fowl.

Flamstead, par., Eng., Hertfordshire, St. Alban's div., 4 m. S. by W. Luton, 2½ m. NW. Redbourn stn., P.O., and P.O. at F. End; 6004 ac. P. <2000.

Flanders, the former name of an extensive country of Europe comprised between the Lower Scheldt, the North Sea, Artois, Hainaut, and Brabant. It was long governed by the Counts of F., and in 1369 passed by marriage to the house of Burgundy, and then in 1477 to that of Habsburg [**Austria** and **Spain,** historical notes]. Louis XIV. of France conquered part of it, and it now forms the provs. of E. and W. Flanders in Belgium, part of the prov. Zeeland in the Netherlands, and the greater part of the dep. Nord in France. The people are called in English, Flemings; and their language (nearly akin to Dutch), Flemish. See **Belgium,** table.

Flandreau, vil., U.S., S. Dakota, Moody co., 90 m. NNE. Yankton. P. <1500.

Flanigan's, vil., Canada. See **M'Gillivray.**

Flannan Isles, or the **Seven Hunters,** Scot., 21 m. WNW. Gatton Head (Hebrides), off the W. side of Lewis I. The *Insulæ Sacræ* of Buchanan, with Culdee remains. A rocky group, comprising Rodhoreim I., Brona Cleit, Eilean a Ghobha, Eilean Mhor, Gealtaire Mhor, and Soraidh, the seventh island having no name. These islands swarm with eider ducks, gannet, and other sea-fowl; sheep are also fattened on them.

Flannery, co., U.S., N. Dakota, on the N. frontier, crossed by 103° W., bounded on the S. by R. Missouri.

Flasby with Winterburn, par., Eng., Yorkshire, W. Riding, div. and 4½ m. NW. Skipton, 16½ m. NNE. Burnley, 2½ m. NNE. Gargrave stn.; 4340 ac. P. <250.

Flintham (traditionally pronounced flint'am, though the educated are beginning to say flin'tham), par., Eng., Nottinghamshire, div. and 6½ m. SW. by S. Newark, near the Trent, 3 m. SE. Thurgarton stn., PM.O. P. <500.

Flint Hill, P.O., Eng., Surrey, 2 m. from Dorking.

Flintshire, maritime co., N. Wales, in two unequal parts, separated by the co. Denbigh, having N. the Irish Sea, E. the estuary of the Dee and Cheshire, S. Salop, and W. Denbighshire. Surface level in the N., elsewhere diversified, and a hill-range runs parallel with the Dee throughout the main part of the county. Chief rivers, the Dee, Clwyd, and Alyn, the last a trib. of the Dee running parallel to the range of hills just referred to. The E. part of the main section of the county belongs to the Upper Carboniferous series, including the Coal Measures and the Millstone Grit, which are succeeded to the W. by Lower Carboniferous and Silurian rocks, and then in the Vale of Clwyd by New Red Sandstone. Rocks of this last period cover the greater part of the detached section between Denbigh and Salop, though here also there is a narrow strip of the Coal Measures bordering the Dee. Soil fertile in the plains and vales. For agricultural statistics, see **Appendix,** pp. 7–9. The mining industries are varied and important. Coal, the principal product, is mined at Wrexham, Mostyn (which has blast furnaces), Holywell, Mold, Flint, Hawarden, Bagillt, Northop, and Buckley; lead ore at Holywell, Mold, Halkyn, Dyserth, and elsewhere; zinc ore at Holywell and Rhyl; iron ore at Bodfari; fire-clay at Buckley and Buckley Mountain; barytes at St. Asaph; cobalt and nickel at Cwm. The railways are the L. & NW. R. and the Wrexham, Mold, & Connah's Quay Rly. in the main section of the county, and the Cambrian in the smaller section. F. contains one city (St. Asaph), one mun. bor. It sends one member to House of Commons for the county, and one for its bors. [**Flint.**] The county belongs wholly to the diocese of St. Asaph, except the eccles. par. of Whitewell and parts of Dodleston and Lache-with-Saltney in that of Chester, and the eccles. par. of Penley in that of Lichfield. Area, 164,050 ac. P. (1891) 77,277. See **Wales,** table.

Florence, Italian **Firenze,** ancient *Florentia,* city, Italy, cap. prov. F., previous to 1860 cap. gd.-duchy of Tuscany, and for some time cap. of the kingdom of Italy. Situated at the head of navigation on the Arno, 42 m. E. Pisa, and 140 m. WNW. Rome, at the foot of the Apennines and at the S. end of a plain stretching to Pistoja, 20 m. NW. Florence. The city was formerly surrounded with walls; eight of the ancient gates are still open, and there are two Medicean fortresses. Principal buildings, the cathedral of Santa Maria-del-Fiore, with a cupola 384 ft., and a tower 266 ft. in height; the churches of Santa Croce, Santa Maria Novella, and many others, remarkable for their architecture and the magnificent works of art they contain; the Palazzo Vecchio, or palace of the ministers; the Pitti palace, former residence of the Grand Duke, now a royal palace, in the Boboli Gardens, containing a rich collection of paintings; the Palazzo del Podestà, also with many fine paintings; the Palazzo Riccardi, formerly residence of the Medici, with many valuable manuscripts; the Palazzo Spini, now the town house, and the place where all marriages in Florence must take place. There are also numerous private palaces. The Imperial, or Uffizzi, gallery contains rich collections of paintings, sculptures, and antiquities. Among its many educational establishments are the university (founded 1438), Accademia della Crusca, the Laurentian library; besides the national library composed of the Palatine library and the library of Magliabecchi or the national library, with upwards of 200,000 volumes and 10,000 manuscripts; a botanic garden and an astronomical observatory, connected with which is an extensive museum of natural history. Chief manufactures, silks, straw hats, porcelain, glass flasks, besides several branches

of art-work, including sculpture in marble, alabaster, and serpentine (carried on on a commercial scale), wood-carving, *pietre dure* mosaics (of which there is a royal factory, originally founded in 1574), painted glass, and jewellery. F. was an important place during the wars of Sulla; in the Middle Ages it was one of the most powerful of the Tuscan republics; under Napoleon I. it was cap. of the dep. Arno in the French Empire. After being for some years the seat of the government of the kingdom of Italy, F. had to cede this honour to Rome when the latter city was abandoned by its French garrison in 1870, after the outbreak of the Franco-German war. It is the birthplace of Dante, Leonardo da Vinci, Boccaccio, Machiavelli, Guicciardini, Amerigo Vespucci, Pope Leo X., and Cherubini, and was long the residence of Michael Angelo, in whose house a collection of his works is still shown. Alt. (Campo di Marte) 180 ft. Mean temp., yr. 57.9° F., Jan. 40.6°, July 76.3°; rfall. (1832–91), yr. 35 in., Oct.–Nov. 8.9 in. P. (1872) 167,100; (1881) 169,200; (1891, estimated) 198,000. See **Italy,** climate.

Florence, city, U.S., Alabama, Lauderdale co., on the r. bk. of the Tennessee, 100 m. NNW. Birmingham, at the head of steam navigation on Tennessee R. Iron, coal, and limestone abound in the neighbourhood, and since 1887 various manufactures have arisen. P. (1880) 2000; (1890) 6000.

Flores, or **Floris,** isl. of the Malay Archipelago, and the largest of the chain that extends from Java to Timor, between 8° and 9° S., 120° and 123° E. Length, W. to E., about 230 m.; average breadth, 35 m. Surface hilly, two or three chains of limestone running parallel to the N. coast; on its S. side are several lofty volcanic peaks. Coasts skirted by coral reefs. Rice and maize are grown on the coasts, but the only exports are sandal-wood, sappan, cinnamon, bees'-wax, and ponies. The native inhabitants are mainly Papuans, who live in fortified villages of low huts. On the coasts are several colonies of Malays and Bugis, which latter possess the valuable port of Endé, on the S. coast. At its E. extremity is Larantuka, a former Portuguese station, and now the seat of the Dutch administrator, who is dependent on the resident at Kupang in Timor. The principal trade of F. centres in Singapore. The *Straits of Flores,* on the E., separates this island from those of Solor and Sabrao, or Adenara. There are two anchorages with 20–25 fathoms of water. Vessels load and discharge by means of lighters. Area about 9200 sq. m. P. vaguely estimated at about 250,000.

Florian, or **Floriana,** suburb of La Valetta, Malta, surrounded by a separate wall.

Floriana, one of the Galapagos group. See **Floreana.**

Florida, the southernmost of the U.S., N. America, between 25° and 31° N., 80° and 87° 44′ W., having N. Georgia and Alabama, E. the Atlantic Ocean, S. and W. the Gulf of Mexico; 385 m. in length by 333 m. in breadth, the greater part forming a penin. stretching N. to S. between the ocean and the Gulf of Mexico, and separated from Cuba by F. Strait, 140 m. across. Surface mostly level, nowhere more than 250 or 300 feet above the sea. The S. point of the penin. is underlaid by a succession of coral reefs, covered with fresh water, and called the Everglades, an immense area, 120 by 40 m., 6 ft. deep, filled with islands covered with a dense jungle of vines and evergreens, pines and palmettos. Included in it is the Okechobee Lake, 40 m. long. With regard to the growth of the coral reefs of F., see Alex. Agassiz, *The Three Cruises of the 'Blake,'* Boston and New York, 1881. The lands of F. are curiously distributed in high and low hummock, swamp and savanna, and covered with pine woods. In the S. half of the state, which is very scantily peopled, large tracts uninhabited, there flourishes a subtropical forest vegetation, including mahogany, ironwood (*Sideroxylon Mastichodendron*), the sea-grape (*Coccolaba urifera*), the coco-nut, and other palms. The cabbage-palm is met with all over the state. The principal rivers are the Appalachicola, Suwanee, St. John's, St. Mary's, Kissimee, and Escambia. On its E. side are inlets and good harbours. Maize, cotton, tobacco, rice, sugar, and coffee, flax, and silk are raised; timber is an important product. Figs, pomegranates, oranges, and dates grow freely in F. For oranges, which are largely exported to the northern states, the soil and climate are especially well adapted, the only drawback in the climate being a liability to occasional frosts severe enough to do great injury to the plantations, as in 1835 and 1886. Round the S. coast sisal hemp, first introduced in 1836, grows wild, but is now again an object of cultivation. The only mineral of importance is phosphate rock, which has been found since 1888 in a belt of 6–10 m. in width at a distance of 20–30 m. from the northern part of the W. coast of the peninsular portion of the state, and also round Bartow in Polk county. On the extensive grazing lands of the state many cattle are reared. The climate of the state, especially the peninsular portion, is in high repute for its mildness, hence the dist. is a favourite winter resort of invalids suffering from pulmonary diseases. As to the climate of West F., see **Cedar Keys** and **St. Marks,** East F. **Jacksonville,** and South F., **Key West** and **Punta Rassa.** Chief towns, Tallahassee (the cap.), St. Augustine, Pensacola, Jacksonville, and Key West. F. was discovered on Easter Day (in Spanish, *Pascua Florida*), March 27, 1512, by Juan Ponce de Leon, who gave it the name of F., both with reference to the date, and on account of the flourishing condition of the vegetation which he saw on its shores (near St. Augustine); settled by the Spaniards in 1565; and ceded to the United States by a treaty concluded in 1819, and ratified by the King of Spain in 1821. Area, 58,680 sq. m. P. (1890) 391,422. See **United States,** table.

Fogo, cape, on the E. of Fogo I.

Fogo, dist., Newfoundland, to the S. of Notre Dame Bay and the Bay of Exploits.

Fogo, one of the Cape Verd Is., W. of Santiago, nearly circular, and 40 m. in circumference. Produces the best grain and fruit in the archipelago. Chief port, Nostra Senhora da Luz, in 14° 53′ N., 24° 30′ 5″ W.

Fogo, small isl. off the E. ct. of Africa, Mozambique Channel.

Fogo, par., Scot., Berwickshire, on Blackadder Water, 3 m. SSW. Duns, 1 m. E. Marchmont stn.; 4652 ac. P. <500.

Fogo Rocks, N. of Fogo I.

Fohanagh, par., Ire., co. Galway, bars. Clonmacnowen and Kilconnell, 2 m. S. Ahaseragh; 8686 ac. P. <750.

Föhn, a wind which blows moisture-laden up one side of a mountain, and dry down the opposite side. In the ascent the moisture is condensed into rain, the heat thereby liberated raising the temperature, so that the descending current is warm. Hence this wind in the Alps is known as the great snow-melter. So also in the Rocky Mt. region, where such winds are known as *chinook* winds. Where such winds blow in lower latitudes, as in New Zealand across the Southern Alps, the descending current is withering.

Fohnsdorf, vil., Austria, Styria. P. <4000.

Föhr, isl., Prussia, prov. Schleswig-Holstein, off the W. ct., in 54° 43′ N., 8° 30′ W.; oysters largly exported to Hamburg, and numerous wild fowl taken in autumn.

Foilnaman, electoral div., Ire., Tipperary, dist. Borrisoleigh.

Foix, tn., France, cap. dep., arr. F., and on the Ariège, 45 m. S. by E. Toulouse. F. was the birthplace of Gaston de Foix, and cap. of the old county of F., part of the domain of Henry IV., now forming more than two-thirds of dep. Ariège. Alt. 1421 ft. Mean temp., yr. 52.4° F., Jan. 39.6°, July 66.9°. P. <5000.

Foja, Asia Minor. See **Focha.**

Fojanodella Chiana, comm., Italy, Tuscany, prov. and 15 m. S. by W. Arezzo, in the Valle di Chiana. P. 7700.

Fojnica, vil., Bosnia, 30 m. WNW. Sarajevo; iron-mines and blast-furnaces. Alt. 1915 ft. P. <2000.

Fokla, Asia Minor. See **Focha.**

Fokien, Fuhkien, or **Fukian,** maritime prov., China, mostly between 23° 30′ and 28° 30′ N., 116° and 121° E., having SE. the China Sea, and on other sides the provs. Chekiang, Kiangsi, and Kwangtung. Surface mountainous, scarcely any considerable plain. Principal river, the Min-kiang, Niaotung-kiang, or Si-ho, which enters the sea below Foochow, the cap. city. Produces the finest black tea, and the best camphor, tobacco, sugar, iron, indigo, and alum; these articles, with porcelain, umbrellas, cloths, and other manufactured goods, form its chief exports. Principal imports are grain, pulse, drugs, salted meat, fruit, and silk piece goods, received from the N. provs. Contains the treaty ports of Foochow and Amoy. Till 1887 the isl. of Formosa formed a dependency of this prov. Area 46,332 sq. m. P. (estimated) 20,500,000. See **China,** table.

Fola, vil., Brit. W. Africa, Lagos, on the Bight of Benin, 61 m. E. by S. Lagos, in 3° 55′ E.

Fola Rapids, on the White Nile below Dufle (Dufile), in 30° 42′ N., the only insuperable obstruction to navigation between Lado and Lake Albert Nyanza. See *Jour. R. G. S.,* 1876, pp. 431–32.

Föld, Hungarian, 'land.'

Folda, hamlet, Scot., Forfarshire, 13 m. NW. Alyth, *P.O.*

Földeák, comm., Hungary, co. Csanád, dist. Központ. P. <5000.

Folden Fjord, inlet, Norway, W. ct., its mouth about 64° 40′ N., one of the largest fjords of Nordland.

Földes, comm., Hungary, co. Hajdú, dist. Nádudvar. P. <5000.

Földvár, Hungary. See **Marienburg.**

Foleshill, par., Eng., Warwickshire, Nuneaton div., 3 m. NE. by N. Coventry, 1½ m. E. of its stn. on the L. & NW. R. P. 8700; eccles. par (**F. with Longford**) P. <5000.

Foligno, or **Fuligno,** tn., Italy, Umbria, prov. and 20 m. SE. by E. Perugia. F. suffered greatly from the earthquake of 1832; near it is a remarkable natural grotto filled with stalactites. The R. Topino, on which the town stands, falls in beautiful cascades. P. (comm.) 22,400.

Folke, par., Eng., Dorsetshire, N. div., 3 m. SE. by S. Sherborne. P. <500.

Folkestone, an old mun. bor., seapt., and market tn., Eng., co. Kent, St. Augustine div., on the S. ct., 4½ m. E. Hythe, and 5 m. WSW. Dover, of which cinque port it is a member, and included within the parl. bor. of Hythe, with two stns. (**F.** and **F. Harbour**) on the SE. R.; 70 m. from London. The construction of a deep sea harbour was begun in 1881. For shipping statistics, see **Appendix,** p. 13. The town partly lies in a hollow, between two high cliffs, on the English channel, opposite Boulogne, with which it communicates by steamers daily (distance, 29 m.; average passage, 1½ hours; railway journey London to Paris 28 m. shorter than by Dover and Calais). It has a battery, a harbour admitting vessels of from 10–12 feet draught at high water, and a market house. F. has a promenade pier and pavilion, public museum, and lending library and reading-rooms. The parish church is of great antiquity, and the free grammar school, founded in 1674, was endowed by Sir Eliab Harvey, brother of the celebrated Dr. William Harvey, the discoverer of the circulation of the blood, who was born here in 1578. Market-days, W. and S. Mun. bor. P. (1801) 3300; (1851) 6700; (1871) 11,300; (1891) 23,900. See **Hythe.**

Folkingham, or **Falkingham,** par., Eng., Lincolnshire, S. Kesteven div., 10 m. E. by S. Grantham, 2½ m. W. by S. Billingborough stn., PMT.O. P. <750; eccles. par. (**F. with Laughton**) P. <750.

Folkington, par., Eng., Sussex, div. and 4½ m. NW. Eastbourne, 1½ m. SW. Polegate stn. P. <250.

Folksworth, par., Eng., Huntingdonshire, Ramsey div., 6 m. SSW. Peterborough, 3½ m. SW. by W. Yaxley and Farcett stn. P. <250.

Folkton, par., Eng., Yorkshire, E. Riding, Buckrose div., 5½ m. S. by E. Scarborough, 2 m. S. Cayton stn.; 5499 ac. P. <500.

Follett, co., Victoria, on the W. frontier, just S. of 37° S.

Folleville, comm., France, dep. Somme, 15 m. S. by E. Amiens, arr. and 10 m. WNW. Montdidier. P. <2000.

Follifoot, par., Eng., Yorkshire, W. Riding, Ripon div., 2½ m. S. by W. Knaresborough, 2 m. NW. by W. Spofforth stn. P. <500.

Follistown, par., Ire., co. Meath, bar. Skreen, 3 m. SE. Navan. P. <250.

Follonica, maritime vil., Italy, prov. Pisa, on the Mediterranean, opposite Elba; deserted from July to October on account of malaria. The ore from Elba is smelted here.

Folly Island, small isl., U.S., S. Carolina, Charleston co., on the S. of Charleston Harbour.

Folsom City, vil., U.S., California, co. and 21 m. ENE. Sacramento. P. <1500.

Folticeni, or **Falticeni,** tn., Roumania, cap. prov. Suceava, 9 m. S. by E. Czernowitz (Bukovina). P. 8500.

Foman, or **Fommanah,** vil., W. Africa, Ashanti (Upper Guinea), S. of Kumassi.

Fönchou, tn., China. See **Fenchou.**

Fonda, vil., U.S., New York, Montgomery co., on the Mohawk R. and Erie Canal, 40 m. WNW. Troy. P. <1500.

Fonda's Bush, vil., U.S., New York, on F. Creek, 37 m. N. Albany. P. <1500.

Fond du Lac, fort, Canada, NW. Terr., on N. shore of Lake Athabasca, towards E. end.

Fond du Lac, vil., U.S., Minnesota, St. Louis co., on St. Louis R., at the head of Lake Superior, 10 m. SW. Duluth. P. <1500.

Fond du Lac, city, U.S., Wisconsin,, cap. F. du L. co., among hills, at the head of Lake Winnebago, 60 m. NNW. Milwaukee; has numerous artesian wells, and a large lumber trade. P. (1880) 13,100; (1890) 12,000.

Fondeadero, Spanish, 'anchorage.'

Fondi, the anct. *Fundi,* tn., Italy, Campania, prov. Caserta, 13 m. NW. by N. Gaeta. F. is unhealthy from the proximity of a salt lagoon (anct. *Lacus Fundanus*); has a Gothic cathedral, and extensive remains of Cyclopean walls. Thomas Aquinas taught theology in the Dominican convent here. Its vicinity (the anct. *Cæcubus Ager*) is extremely fertile, and was formerly famous for its wine, the cultivation of which has rapidly increased in the prov. since 1885. P. 7000.

Fondo, vil., Austria, Tirol, 12 m. WSW. Botzen. P. <2000.

Fondra, vil., Italy, Lombardy, prov. and dist. Bergamo; has iron-mines and smelting-works.

Fonduk, Le, vil., Algeria, dep. Algiers, cap. cant. P. <2000 (about half of whom are natives).

Fongyang, tn., China, Nganhwei. See **Fungyang.**

Fön-ho, riv., China. See **Fen-ho.**

Fonni, comm., Sardinia, prov. and 55 m. SE. by S. Sassari. P. <1000.

Fön-ning, tn., China, prov. Pechili, 110 m. NNE. Peking.

Fonsagrada ('holy well'), tn., Spain, Galicia, prov. and 23 m. ENE. Lugo, 76 m. ENE. Santiago. P. 16,400.

Fonseca, tn., Colombia, Magdalena, 174 m. E. by N. Cartagena. P. <2000.

Fonseca, Gulf of, large gulf in the W. of Central America, bordered by the states of Salvador, Honduras, and Nicaragua; entrance between the volcanic cones of Conchagua and Coseguina, 20 m. wide, 35 m. in breadth from mouth to head of innermost bay, 47 m. from head of bay in NW. to head of bay in SE. Admits everywhere vessels of the largest size. Discovered in 1522 or 1523 by Gil Gonzalez de Avila, and named by him in honour of his patron the Bishop of Burgos.

Font, Fontaine, French, 'a fountain' or 'well.' See *Fonte.*

Font, riv., Eng., flowing through part of the Hexham and Wansbeck divs. of Northumberland, trib. of the Wansbeck, which it joins on the l. bk. at Mitford.

Fontaine, comm., France, arr. and 7 m. E. by N. Belfort. P. <2000.

Fontainebleau, tn., France, dep. Seine-et-Marne, arr. F., 35 m. SSE. Paris, 10 m. S. by E. Melun, in the middle of a fine forest, occupying a tract of sandstone furnishing excellent material for glass-making. F. is celebrated for its ancient royal palace, long the favourite residence of the French kings, surrounded by gardens and parks; has manufactures of porcelain, large trade in grapes, and quarries of paving stones. Pope Pius VII. was detained here for eighteen months, and here Napoleon I. signed his first abdication in 1814. P. 10,800.

Fontaine Française, tn., France, dep. Côte d'Or, arr. and 21 m. NE. Dijon. P. <2000.

Fontaine-le-Dun, tn., France, dep. Seine Inférieure, arr. Yvetot, 13 m. SW. by W. Dieppe. P. <2000.

Fonzaso, comm., Italy, Venetia, prov. Belluno, 35 m. NNE. Vicenza. P. 5400.

Foo, Chinese, 'provincial city.' See *Fu*.

Foochow, Fuchou, or **Fuchau,** city, China, cap. prov. Fokien, on the Min R., 34 m. from its mouth, in 26° 5′ N., 185 m. S. by W. Hangchow, one of the treaty-ports opened to foreign commerce after the first Chinese War in 1842. The city proper is surrounded by walls 8½ m. in circuit. It occupies a healthy situation on a soil of red clay and disintegrated granite, affording excellent drainage, and begirt at the distance of about 4 m. by hills. It is the residence of a viceroy and a British and other foreign consuls. The town is commanded by a fortified hill 500 feet above the plain, and inside the walls is another height, crowned by a conspicuous watch-tower. The river is here divided into two channels by the densely peopled island of Chung-Chow, or the 'Middle Island.' Between this island and the northern bank of the river extends the 'bridge of Ten Thousand Ages,' believed to have been built in the 11th century, a quarter of a mile in length, about 14 feet wide, and resting on forty piers of hewn granite. Formerly occupied in part by shops, the bridge is now wholly devoted to the use of passengers and for the conveyance of merchandise. Foreign ships are obliged to anchor at a point 18 m. below the city, as there is not sufficient depth of water higher up. The port has a dry dock 390 ft. long, 15 ft. deep on sill. Large quantities of cotton goods and superior dyed blue cloths are manufactured here, and 500 ovens for the production of porcelain are constantly employed in the city and its vicinity. There is now also a govt. shipbuilding yard for the building of ships of war on European models. Near it are also extensive lead-mines; the black tea district is within 70 m., and tea is the only article of importance among the exports. Of late years it has been rapidly declining in amount and value. The import trade is mostly by way of Hong-Kong. Opium is the principal article, cotton goods are next in importance, and then tin and lead. The total value of the exports of local origin is about £1,500,000. F. is the *Fugiu* of Marco Polo, which represents a pronunciation more closely approximating to the Chinese pronunciation than the spelling current in English. Mean temp. (1½ yr., 1886-87), yr. 65.5° F., Feb. 48.8°, Aug. 80.8°. Estimated P. (1891) 636,000. For other Chinese towns of this name, see **Fuchou.**

Foolow, par., Eng., Derbyshire, W. div., 9 m. ENE. Buxton, 4 m. N. Longstone stn. P.<250.

Forez, an old div. of France, in prov. Lyonnais, whose cap. was Montbrison, now forming the greater part of dep. Loire.

Forez, Monts du, mt. chain, central France, deps. Loire and Puy-de-Dôme, between the basins of the upper Loire and Allier; culminating point Pierre-sur-Haute, or Pierre-sur-Autre. Alt. 5380 ft.

Forfar, par., tn., parl. and royal burgh (since the reign of David I.), Scot., Forfarshire, on E. shore of Loch of F., 13 m. N. by E. Dundee, on the C. R.; has manufactures of linen, especially coarse linen. The town cross stands on the site of an old castle demolished by Robert Bruce in 1308. It is a member of the Montrose (*q.v.*) parl. burghs. Market-days, M. and S. Par. 8353 ac., P. 13,700; tn. and parl. burgh, P. (1801) 5200; (1871) 11,000; (1891) 12,100; royal burgh, P. 12,800.

Forfarshire, or **Angus,** maritime co., Scot., having N. the cos. Aberdeen and Kincardine, E. the North Sea, S. the Firth of Tay, and W. co. Perth. Surface naturally divided into four parallel belts, running from NE. to SW., viz., the Braes of Angus, forming part of the Grampians (furrowed by Glen Isla, Glen Prossen, Glen Clova, and Glen Mark, or upper Glen Esk, in succession from W. to E.), the Vale of Strathmore (here known as the Howe, or hollow, of Angus), the Sidlaw Hills, the plain on the Firth of Tay and the sea. The principal mountain in the county is Glas Meal, 3502 ft. (at the meeting-place of counties F., Perth, and Aberdeen). Bulg mountain, 1986 ft., 9½ m. NNW. Brechin, is a station in the Ordnance Survey. Mean height of county, 856 ft. Geologically the greater part of the county belongs to the Lower Old Red Sandstone, succeeded to the NW. by the Metamorphic Quartzites, &c., of the highlands. In the Sidlaw Hills and elsewhere are volcanic rocks of the Old Red Sandstone Period, along with some intrusive basalt. Round the basin of Montrose lie some Post-Tertiary marine deposits (raised benches). There are no minerals of great economic importance. Chief rivers, the North and South Esks and Isla. Climate in elevated parts rather chilly and moist. Soil various. Agriculture greatly advanced For statistics, see **Appendix,** pp. 10 12. It is the chief seat of the coarse linen manufactures of Scotland. The county has five royal burghs, viz., Dundee, Arbroath, Forfar, Montrose, and Brechin. It sends four members to House of Commons, one being for the county, two for Dundee, and one for the Montrose dist. Area, 560,186 ac. P. (1891) 277,800; parl. dist. P. 67,500. See **Scotland,** table.

Formazza, Val, the uppermost part of the valley of the Toce, in the extreme N. of Eastern Piedmont, Italy.

Formby, ct. par., Eng., Lancashire, div. and 7 m. SSW. Southport, on the L. & Y. R., PMT.O.; 6619 ac. P. 5900.

Formby, post-tn., Tasmania. See **Devonport.**

Formby Point, cape, about 2 m. W. Formby, Eng., the most westerly point of S. Lancashire. See **Crosby Channel.**

Formentera ('wheat island'), the anct. *Ophiussa,* or *Pityusa Minor,* one of the Balearic Isles, Spain, to the S. of Ibiza (Ivica), of which it is a dependency. Area, 35 sq. m.

Formentor, cape, Spain, the NE. point of the isl. of Majorca.

Formerie, tn., France, dep. Oise, arr. and 22 m. NW. Beauvais. P.<2000.

Formia, comm., Italy, Campania, prov. Caserta, on the Gulf of and 3 m. N. by E. Gaeta. P. 9700.

Formica, La (Italian, '*ant*'), small rocky islet, one of the Egadi Is., Italy, 5 m. WSW. Trapani, with a lighthouse, visible 8 m. The name is applied in the plural form (**Formiche**) to this island and a smaller island adjacent; also to a group of islets off the mouth of the Ombrone, in the S. of Tuscany (**F. di Grosseto**).

Formiche, Punta delle, cape, the most southerly point of Sicily, with a lighthouse on Correnti Islet, visible 9 m.

Formicola, comm., Italy, Campania, prov. Caserta, 7½ m. N. by E. Capua. P.<3000.

Formiga, tn., Brazil, prov. Minas Geraes, 212 m. NW. Rio de Janeiro. P. 2000.

Formigas, group of rocks in the Azores Archipelago, to the NE. of Sta. Maria I.

Formigine, comm., Italy, Emilia, prov. and 8 m. SW. by S. Modena. P. 6800.

Formosa, terr. or govt. of the Argentine Republic, forming the N. portion of the Gran Chaco (*q.v.*), and separated from the govt. of Chaco by the rivs. Bermejo and Teuco.

Formosa, colony, Argentine Republic, F. territory, on the r. bk. of Rio Paraguay, 62 m. SW. by S. Asuncion. Alt. 330 ft. Mean temp. (4 yrs., 1879–82), yr. 72° F., Jan. 80.8°, July 63.3°.

Formosa, the northernmost of the Bissagos Is., off the W. ct. of Africa; is fertile and well-wooded, but has no good water.

Formosa (Chinese *Tai-wan*), isl. of the Pacific, between 21° 53′ and 25° 16′ N., and 120° 15′ and 122° E., about 100 m. from the Chinese coast, from which it is separated by the channel of Fokien or F. Length, 235 m.; breadth (average), 65 m. A mountain chain, highest summits, Mount Morrison (12,850 ft.) and (towards the N.) Mount Sylvia (11,300 ft.), traverses the centre of the island, separating the Chinese colonists (principally from Fokien and Kwangtung) of the N. and W. from the wild Formosans on the E. side. This range is imperfectly explored, and its geological structure unknown, but in the N. of the island there are various signs of volcanic activity. Tatung-shan, N. of the Tamsui R., is an extinct volcano, and there are numerous geysers and sulphur springs. The coasts are peculiarly dangerous. The W. ct. is bordered by broad mud-banks, deposited in times of flood by the rivers on this side, and the annual number of wrecks on these banks is considerable. The E. ct. is rock-bound. Surface of the Chinese portion well watered and generally extremely fertile, producing rice, sugar, camphor, tobacco, wheat, tea, maize, millet, various fruits and spices, rhea, jute, manilla, hemp, silk, timber, and dye-woods. Rice is the principal food-crop, and is so abundantly produced as to have won for the island the name of the 'Granary of China;' but with the increase in the number of labourers on tea and sugar plantations, &c., the available surplus of rice for export has greatly diminished. The tea plantations are principally in the N., near Tai-pei and Tamsui, and are rapidly extending as the forest gets cleared; the sugar plantations mainly in the neighbourhood of Tainan. The tea is mostly exported to the United States. As to the climate, see **Tamsui.** The mountains are forest clad, and in this region camphor is a valuable product. There are immense carboniferous deposits, and coal is known to exist both in the N. and S. of the island. The chief coalfield is on the NE. ct., near Kelung, but the mines have not yet been worked with any great success. Sulphur is extracted from sulphur springs not far from Tamsui, and a little gold is derived from washings near Kelung. Petroleum wells have been worked (near Takow and Ulan), but not with success. A railway has been constructed from Kelung to Hsinchu near the W. ct., in 24° 50′ N., and its continuation to Tainan is projected. There are no good natural harbours. The best is that of Kelung. It is a dependency of the treaty-port of Tamsui. The only other treaty-port is Tainan, with its dependencies Anping and Takow. The Chinese colonists are of a very mixed description, F. having been a kind of 'Botany Bay' to China; but among them there are many wealthy and active traders. The native Formosans are of Malayan type, but present in some cases a hirsuteness not usual in that race. They are mostly savages, but some of them, known to the Chinese as Pepohwans, or 'savages of the plain,' have settled down to agriculture under Chinese rule, inhabiting the W. base of the mountains to the E. of the Chinese settlers and the Kapsulan plain in the NE. F. received its name from the Portuguese, the first Europeans who visited it (1590). In 1642 the Dutch became masters of the island, but they were expelled by the pirate Coxinga, whose successors ruled here till 1683, when the island was taken by the Chinese. It remained a dependency of the Chinese prov. of Fokien till 1887, and was a separate prov. from 1887 to 1895, when it was ceded to Japan. Area, 13,330 sq. m. P. about 3,000,000. See Consular Report by Mr. Hosie (*Commercial,* No. 11, 1893).

Fort Good Hope, Canada, NW. Terrs., on r. bk. Mackenzie, at the confluence of the Hare Skin R., in 66° 10′ N. **Old F. G. H.** is on the l. bk., in 67½° N.

Fort Grant, Brit. E. Africa, in Ankoli, to the E. of Lake Albert Edward.

Fort Grant, U.S., Arizona, 105 m. NW. by N. of the SE. corner of the terr. Alt. 4860 ft. Mean temp. (17 yrs.), 61.4° F., Jan. 44°, July 79.1°; rfall., yr. 16.85 in., July–Aug. 7.08 in.

Fort Gratiot (grash'i-ot), city, U.S., Michigan, St. Clair co., at the outlet of Lake Huron. P.<3000.

Forth, bar., Ire., in the E. of co. Carlow.

Forth, bar., Ire., in the SE. corner of co. Wexford.

Forth, electoral div., Ire., Wexford, dist. Taghmon and Glynn.

Forth, vil., Scot., S. Lanarkshire, 7 m. NE. by N. Lanark, 1 m. SW. Wilsontown stn., with coal-mine, P.O. P.<750.

Forth, riv., Scot., formed by the union of two headstreams, the Duchray Water, which rises on the NE. side of Ben Lomond, co. Stirling, and flows E., and just above Aberfoyle joins the Laggan, which is wholly in Perthshire, and drains Lochs Chon and Ard (to the S. of Loch Katrine). The Forth then flows past Stirling and Alloa, where, after a winding course through picturesque scenery, it expands into the arm of the sea called the Firth of Forth (*Bodotria*, or *Boderia Æstuarium*, 'Scots Water'), dividing the cos. Perth, Clackmannan, and Fife on the N. from Stirling, Linlithgow, Edinburgh, and Haddington on the S. The course of the F., including its many 'links' or windings, is estimated at 170 m. Breadth of estuary at Queensferry, 3 m.; at Leith Fort, 6 m. Chief tributaries, the Teith, Allan, and Devon. The Forth has many good harbours; St. Margaret's Hope, above Queensferry, where the Firth begins, is one of the safest roadsteads in Scotland. The river is navigable to Stirling for vessels of 100 tons, and to Alloa for vessels of 300 tons. The **Forth and Clyde Canal,** 35 m. long (exclusive of a branch to Glasgow, 3⅝ m. long), connects the F. at Grangemouth with the Clyde at Bowling, and admits vessels of 8 ft. 9 in. draught. It is proposed to supersede this canal by one capable of being used by large ocean-going vessels. On the present canal Symington tried his first steamer in 1801–2.

Fort Hamilton, vil., U.S., New York, King's co., on Long I., about 5 m. S. New York. P.<3000.

Forthampton, par., Eng., Gloucestershire, div. and 2 m. W. Tewkesbury, P.O. P.<500.

Fort Harris, fort, S. Africa, Pondo-land, 140 m. NE. East London (Cape Colony).

Fort Hastings, fortified hill, Brit. India, NW. Provs., dist. Kamáun, in 29° 25′ N., 80° 5′ E.

Fort Hawley, settlement, U.S., Montana, Choteau co., 204 m. SW. by W. from the NE. corner of the state.

Forth Bridge, rly. bridge across the Firth of Forth at Queensferry in connection with the N. B. R. system, 2765 yds. long, with two spans of 1700 ft. each, beneath each of which there is, for a length of 500 ft., a clear headway for navigation of 150 ft. above high water spring-tides. Opened in 1890.

Forth End, P.O., Eng., Essex, 3 m. from Chelmsford.

Fort Hope, Arctic Regions, on Repulse Bay, in 66° 32′ N., 86° 56′ W. Mean temp. (2 yrs., 1846–47, 1853–54), yr. 3.7° F., Feb. – 31.6°, July 41.0°.

Fort Hoskins, U.S., Oregon, in 45° 6′ N., 123° 26′ W. Mean rfall. (7 yrs.), 66.70 in.

Fort Howard, city, U.S., Wisconsin, Brown co., at the head of Green Bay, on the l. bk. of the Fox R. P.<5000.

Forth Mountains, range of hills, Ire., co. and 4 m. SW. Wexford. In 1798 about 15,000 insurgents encamped here previous to the attack and capture of Wexford.

Fortingall, par., Scot., W. Perthshire, on the Lyon, 7½ m. W. by S. Aberfeldy; 2½ m. NE. of the village are the ruins of Garth Castle, in the latter part of the fourteenth century the stronghold of the Wolf of Badenoch (Earl of Buchan), PMT.O., 196,683 ac. P.<1500.

Fort Independence, one of the defences of the inner harbour of Boston, U.S., Massachusetts.

Fort Isle aux Noix, or **Fort Lennox,** unoccupied fortress, Canada, Quebec, in riv. Richelieu.

Fortitude Valley, NE. suburb of Brisbane, Queensland.

Fort James, settlement, Canada, prov. Brit. Columbia, 335 m. N. Vancouver, at the SE. end of Stewart Lake.

Fort Jefferson, large fort, U.S., Florida, on Garden Key I., with lighthouse in 24° 38′ N., 82° 53′ W., visible 13 m.

Fort Johnston, stn., Nyassa-land, Brit. S. Africa, at the outlet of the Shire from Lake Nyassa, immediately opposite Mponda's Town.

Fort Kearney, U.S., Nebraska, Kearney co., on the r. bk. of Platte R., 160 m. WSW. Omaha, 29 m. W. by N. Hastings.

Fort Kent, tn., U.S., Maine, Aroostook co., on St. John R. P.<2000.

Fort Keogh, fort, U.S., Montana, Custer co., 195 m. SSW. from the NE. corner of the state.

Fort Kipp, settlement, Canada, dist. Alberta, 92 m. SSE. Calgary.

Fort Klamath, military post, U.S., Oregon, Klamath co., 122 m. ENE. of the SW. corner of the state.

Fortland, tnld., Ire., co. Sligo, bar. Tireragh, Easky par. P.<250.

Fort Lapwai, settlement, U.S., Idaho, Nezperces co., 8 m. E. by S. Lewiston. Alt. 2000 ft. Rfall. (9 yrs.), 16.68 in.

Fort Laramie, vil., U.S., Wyoming, co. and on riv. Laramie, 2 m. from its mouth, 88 m. NNW. from the SE. corner of the state. Alt. 4472 ft. Rfall. (18 yrs.), 14.45 in. P.<1500.

Fort Leavenworth, vil. and military post, U.S., Kansas, Leavenworth co., on riv. Missouri, 2 m. above Leavenworth. P.<1500.

Fort Lee, tn., U.S., New Jersey, Bergen co., on the r. bk. of Hudson R., 12 m. ESE. Paterson, 10 m. NNE. New York Harbour. P.<1500.

Fort Lennox, Canada. See **Fort Isle aux Noix.**

Fort Liard, on the Mountain R., or Rivière aux Liards, about 55 m. from the NE. corner of Brit. Columbia.

Fort Liberté, seapt. tn., Haiti, on the N. ct., in 19° 42′ N., 71° 57′ W.

Fort Liefkenshoek, Belgium, prov. E. Flanders, on the l. bk. of the Scheldt, 7 m. NW. Antwerp.

Fort Lillo, Belgium, prov. and 8 m. NW. by N. Antwerp, on the r. bk. of the Scheldt.

Fort Lister, military post in the Milanji country, Nyassaland, S. Africa, due E. of Blantyre.

Fort Livingston, U.S., Louisiana, protects the entrance of Barataria Bay.

Fort Liwonde, fort, Brit. Nyassa-land, on the Shire, above the rapids, in 15° S.

Fort Lorne, Brit. E. Africa, between Lakes Albert and Albert Edward.

Fort M'Dowell, U.S., Arizona, in 33° 38′ N., 111° 38′ W. Alt. 1250 ft. Mean temp. (22 yrs.), yr. 69.0° F., Jan. 49.1°, July 92.3°; rfall., yr. 10.38 in., July–Aug. 2.74 in.

Fort M'Leod, tn., Canada, dist. Alberta, 92 m. S. by E. Calgary. Alt. 2400 ft. Mean temp. (4½ yrs., 1875–79), yr. 42.6° F., Jan. 14.4°, July 67.4°.

Fort M'Leod, Canada, Brit. Columbia, on an affluent of the Parsnip R., 155° N., 125° 10′ W.

Fort M'Murray, Canada. See **Athabasca River.**

Fort Madison, city, U.S., Iowa, cap. Lee co., on r. bk. of Mississippi R., 18 m. NE. Keokuk; has various manufactures, and is a busy river-port. P. 7900.

Francavilla sul Sinni, comm., Italy, prov. Potenza, 25 m. E. Lagonegro. P.<4000.

France, a repub. in the W. of Europe, situated mainly between Spain and Belgium, with a coast-line on the SE. on the Mediterranean, in the W. on the Atlantic, and in the NW. on the English Channel, and to a small extent on the North Sea, but including also the island of Corsica. The mainland portion lies between lat. 42° 20′ and 51° 6′ N. All except about one thirty-fifth of its surface lies wholly to the S. of England, and more than half of the area even of the mainland wholly to the S. of Germany. The country is divided into the 86 departments, together with the territory of Belfort, enumerated in the following table, the population, in which is the 'legal' population, including absent persons domiciled at the places where the census was taken:—

Departments.	Area in sq. m.	Population in Thousands.				Pop. per sq.m. 1891.
		1801.	1846.	1872.	1891.

1 Census returns imperfect.

2 Exclusive of arr. Montbéliard, transferred from dep. Haut-Rhin in 1814.

3 Including till 1808 a portion of the present dep. of Tarn-et-Garonne.

4 Including till after 1856 a small part of the present dep. of Basses-Pyrénées.

5 Formed in 1871 out of the portions of the old deps. of Meurthe and Moselle not ceded to Germany.

6 See note 4.

7 Ceded by Italy in 1860.

8 Formed in 1808 out of portions of the deps. Lot, Lot-et-Garonne, Haute-Garonne, Gers, and Aveyron.

9 Including till 1860 the arr. of Grasse, now forming part of the dep. Alpes-Maritimes.

10 Till 1871, 2386 sq. m., 81 sq. m. of the dep. having been ceded in that year to Germany.

11 According to a more recent measurement the total area of France is 207,206 sq. m.

French Possessions and Dependencies.[1]

1 In round numbers based on the *Résumé Colonial* in Levasseur's *La France et les Colonies* (1893), vol. iii., pp. 365–71.

The **surface** of F. is in great part elevated, but the highest mountains are on the frontiers. The S. part of the E. frontier is formed by the Alps, separating F. and Italy, and having in the N. part of this frontier Mont Blanc (15,775 ft.), the culminating peak of the whole system. The highest peak wholly within French territory is the Barre des Ecrins, in the Pelvoux (13,460 ft.). The Rhone valley and the Lake of Geneva separate the Franco-Italian Alps from the Jura, which, owing to their structure, present a considerable obstacle to communication, necessitating large expense in the construction of roads and railways between F. and Switzerland. A broader opening than that between the Jura and the Alps divides the Jura from the Vosges. This opening contains the fort of Belfort, and is traversed by the Rhone and Rhine Canal and the railway from Besançon to Mülhausen in Alsace, N. of which the Vosges present an interruption to railway communication till the crossing-place of the Rhine-aux-Marne Canal is reached beyond the French frontier, in about the lat. of Paris. The only other frontier mountains of F. are the Pyrenees on the side of Spain, a range with peaks above 11,000 ft., as yet uncrossed (though rounded at both extremities) by railways, and crossed by few highways. The highlands within F. lie almost wholly towards the E., and form a continuous series curving round from the neighbourhood of the Pyrenees to the Vosges, and separated on the E. from the Alps and the Jura by the narrow valley of the Rhone and Saône. The great feature is what is known as the Central Highlands (*le Massif Central*), divided from the northern spurs of the Pyrenees to the SE. of Toulouse by the passage of Naurouse, which is traversed at the height of 625 ft. by the Canal du Midi, connecting the Garonne with the Mediterranean. These highlands form a large area, mainly of primitive granite and gneiss, about 200 m. in extreme length and extreme breadth, for the most part above 3000 ft. in height, bordered on the E. and SE. by the Cévennes and their continuations, sloping more gradually or descending in terraces to the W. and NW., and crowned in the middle by extinct volcanic cones, rising to the height of more than 6000 ft. [**Auvergne.**] The northern limit of these Central Highlands is formed by the narrow opening between the Monts du Charolais and the Côte d'Or, traversed at the height of about 1000 ft. by the Canal du Centre, connecting the Loire and Saône. In a geological sense, however, the Central Highlands may be regarded as prolonged northwards, or more properly as having a semi-detached bastion in the granitic heights of the Monts du Morvan (2960 ft.), at the source of the Yonne, separated in the E. from the Côte d'Or by the valley of the Arroux. The Côte d'Or again is limited on the N. by the passage followed by the Burgundy Canal (highest alt. about 1000 ft.), and is succeeded to the N. by the plateau of Langres, and this again by the Triassic Monts Faucilles, curving round to the granites at the S. end of the Vosges, and bounding on the N. with the concavity of the curve, the valley of the Saône. Both these ranges are comparatively easy to cross. Several railways across the plateau of Langres connect

the Saône valley with the basins of the Seine and Meuse, and the Monts Faucilles are crossed by the railway from Épinal to Vesoul and Besançon. To the W. and NW. of the Vosges there lies a stretch of country of variable but generally moderate elevation, composed of Triassic, succeeded to the W. by Jurassic deposits. The so-called plateau of Lorraine, is, relatively speaking, a depression between the Vosges and the heights bordering the deeply-cut valley of the Meuse, but is itself so varied in surface, and so deeply furrowed by river valleys, as to have necessitated great outlay for cutting tunnels and bridges in constructing the great eastern railways from the N. of F. to Germany. To the W. of the heights of the Meuse lies the short but important range of the Forêt d'Argonne. To the NW. lies the easily traversed Jurassic and Carboniferous plateau of Ardennes. It is in the series of highlands just described that all the great rivers of F., except the Rhone and Garonne, take their origin. The remainder of F. to the W., traversed by the lower course of all its great rivers except the Rhone, may be roughly spoken of as the plain, the elevations of this region generally reaching no great alt., and being quite detached from the main highland regions. The principal heights of this part of F. are in the W. penin. of Brittany and the adjoining parts of Anjou and Poitou, and are rather to be regarded as a hilly region, composed of ancient Cambro-Silurian and Metamorphic rocks studded with bosses of granite, lying to the W. of the plain proper. The greatest elevation of this region does not reach 1400 ft. (Les Avaloirs in Normandy, near Alençon, 1370 ft.). Most of this hilly region lies N. of the Loire, but S. of that river there lie the sterile granitic heights of the Gâtine, inclosing the upper valley of the Sèvre-Nantaise, succeeded to the NW. by the more fertile and lower elevations of the Vendean Bocage. The remainder of F. is almost entirely composed of Secondary and Tertiary rocks. Paris lies in the middle of a large Tertiary basin, bordered by more or less continuous Cretaceous deposits, these latter forming in the E. the somewhat bare plateau of Champagne, which is separated on the E. by the plain of Châlons from the Jurassic elevations already mentioned, and is continued on the SW. to the neighbourhood of Paris by the Tertiary clay or marl hills of La Brie. Of the more low-lying tracts of this Tertiary area may be mentioned the fertile Beauce, N. of the great bend of the Loire, followed to the SW., but still N. of the Loire by the barren Gâtinais, to the S. of the great bend of the Loire the marshy, unhealthy, and unproductive Sologne, and further to the SE., separated from the main Tertiary area by Cretaceous and Jurassic deposits, the great Tertiary lacustrine area of the Limagne, forming as it were a long gulf penetrating the Central Highlands on both sides of the Allier to the E., or rather NE., of the mountains of Auvergne. On the SW. of the Tertiary area of the N. a broad Jurassic belt of lowlands, between the ancient rocks of the Central Highlands and those of the mouth of the Loire, forms the passage of Poitou leading to the other great Tertiary region of F., making up the greater part of the basins of the Garonne and Adour. The most striking feature of this region is the vast and remarkably level plain of the Landes, stretching from the Gironde to the Adour, with a surface composed for the most part of a layer of sand, hardened in many places into a stony crust impervious to vegetation, and bordered on the W. by lines of sand-dunes and a string of coast-lagoons. The **rivers** of F. belong mainly to the basin of the Atlantic, including the English Channel. In the N. and NE. the Scheldt (Escaut), Meuse, and Moselle have their upper waters in F., but finish their course outside its borders. The following is a list of rivers of 60 m. or more in length having their mouths in French coasts, in the order from N. to S. on the NW. and W. coasts, from W. to E. on the Mediterranean coast: *Basin of the English Channel:*—Canche, Authie, Somme, Seine, Touques, Dive, Orne, Vire, Rance. *Atlantic Basin:*—Aulne or Aune, Blavet, Vilaine, Loire, Charente, Sèvre-Niortaise, Garonne, with the Gironde (estuary of the Garonne and Dordogne), Adour. *Mediterranean Basin:*—Tet, Aude, Orb, Hérault, Vidourle, Rhone, and Var. The most important of these in respect of length are the Loire (540 m.), Rhone, Seine, Garonne, and Dordogne, even the last of which, the shortest (260 m.), is considerably longer than the Shannon. Separate articles will be found on these rivers; but here it may be mentioned that of the five great rivers, the Seine is that which presents the greatest facilities for navigation, through the regularity and moderate speed of its flow, especially in its upper and middle course; a circumstance which probably contributed among others to the growth of the cap. of F. on the Seine rather than the Loire. About 75 per cent. of the basin of the Seine consists of permeable rocks, as against only 60 per cent. in the basin of the Loire, the bed of which, moreover, has in its upper parts a much more rapid fall than that of the Seine. These two circumstances tend to regulate the flow of the Seine within narrower limits than that of the Loire, except near the mouth. At Paris the discharge of the Seine varies from 1870 cubic ft. per second at low water to 56,500 in flood, which is in the proportion of 1 : 30. At Orléans the discharge of the Loire varies from 1590 to 265,000 cubic ft. per second, a ratio of 1 : 366. The discharge of the Gironde varies from 1765 to 420,000 cubic ft. per second. Being regulated by the Lake of Geneva, and fed both by the rains of the Saône basin and the melting of Alpine snows, the Rhone never sinks very low; its lowest discharge is 17,650, its highest about 530,000 cubic ft. per second. High water occurs in the Seine basin in winter; in those of the Loire and Gironde in spring, owing to the melting of the snows of the Central Highlands and the Pyrenees; in that of the Rhone in summer, in the mountains, owing to the melting of Alpine snows, in winter, in the plains. The principal **lakes** wholly in F. are the long Alpine lakes of Bourget and Annecy, in deps. Savoie and Haute-Savoie. Part of the Lake of Geneva also is French. In the Pyrenees are the small lakes of Lanoux, Gaube, Oo, &c.; in the Jura, the lake of Nantua (348 ac.); in the Vosges the still smaller, but very beautiful, lakes of Gerardmer, Longemer, and Retournemer. The crowd of small lakes that stud the Dombes (dep. Ain) and the plains of the Sologne and Bresse in Central F. are now being rapidly drained. The only other lakes are the coast-lagoons (*étangs*) on the Bay of Biscay, S. of the Gironde and the Mediterranean; the former (Hourtin, Lacanau, Cazau, Parentis, Aureilhan) fresh water, those on the Mediterranean (W. half of the French coast, Leucate, Sigean, Thau, Valcarès, Berre) salt. (See a list of French lakes, with area and depth, in *Scot. Geog. Mag.*, 1894, p. 259.)

The **climate** of F., like that of Europe generally, shows a decided fall of the winter temperatures from W. to E. and a gradual rise of the summer temperatures in the same direction. The Breton Penin. is especially characterised by its mild winters. The mean Jan. temperature at Brest is nearly as high as at Marseilles. Camellias are grown in the open air throughout Brittany. On the other hand, the northerly rise of the summer and autumn temperatures from W. to E. is illustrated by the gradual rise of the northern limit of vine cultivation, beginning near the mouth of the Loire and gradually rising eastwards to beyond the NE. angle of the country. The rfall. of the plains is mostly 20–30 in., except near the base of mountains. In the Rhone valley there is on the whole a gradual diminution in the summer rains from N. to S., the Mediterranean littoral being nearly rainless in that season. The following particulars will serve to illustrate roughly the climate of F.:—

Brest.		Nancy (725 ft.).
Mean temp.	Jan. 43.5°	34.7°
	July 64.1°	66.6°
Fahr.	yr. 53.1°	54.2°
Mean rfall.	28.4 in.	31 in.
Nantes.		**Lyons.**
Mean temp.	Jan. 39.9°	35.8°
	July 65.8°	70.8°
Fahr.	yr. 52.7°	52.9°
Mean rfall.	25.6 in.	(Macon.) 33.5 in.
La Grande Sauve (331 ft., near Bordeaux).		**Marseilles.**
Mean temp.	Jan. 39.4°	44.2°
	July 68.2°	72.0°
Fahr.	yr. 53.8°	57.5°
Mean rfall.	...	20.1 in.

For further illustrations of the climate of F., see **Amiens, Caen, Ste. Honorine-du-Fay, Lorient** (Armorican, or NW. maritime region); **Vendôme, Périgueux, La-Roche-sur-Yonne** (Girondine, or SW. region); **Paris, Orléans, Poitiers, Bourges** (Sequanian region, or region of the Seine basin and that of the middle Loire); **Clermont-Ferrand, Puy-de-Dôme, Moulins, Limoges, Aurillac** (Central Highlands); **Nancy** (region of NE. plateaux); **Besançon, Lyons, Grenoble, Barcelonnette** (Rhodanian region, or inland region of the Rhone basin); **Avignon, Montpellier, Nice, Perpignan** (Mediterranean region). The **flora** of F., sharing as it does both in that of Central Europe and that of the Mediterranean, is remarkably rich. Its **fauna** still includes the wolf and the wild boar. In no country in Europe is **agriculture** more varied or on the whole more productive than in F. Though the ratio of the total surface of F. to that of the British Isles is only 1.751, the extent of corn-crops in F. has in recent years been more than 3½ times as great as in the United Kingdom. The wheat-crop of F. is next in amount to that of the United States among all the countries of the world for which statistics are obtainable. On the average of the ten years 1881–90, it was estimated to form nearly one-fourth of the whole wheat-crop of Europe; and in addition to wheat and other British crops, F. produces large quantities of maize (principally in deps. Landes, Garonne, Lot-et-Garonne, Basses-Pyrénées, and Tarn), besides the less valuable rye and buckwheat. Besides corn-crops, F. produces all the ordinary British green-crops, potatoes and mangold, each covering more than twice as great an area as in the British Isles. The vine, the most valuable of all the French crops, still covers, notwithstanding the devastations of the phylloxera, an area as large as that occupied by wheat and barley together in the United Kingdom. In recent years it has been cultivated in all except nine deps. and the territory of Belfort. The

leading deps. in respect of quantity are Hérault, Gironde, Aude, Gard, Gers, Pyrénées-Orientales, Saône-et-Loire, Puy-de-Dôme, Maine-et-Loire, and Côte d'Or. In recent years the total production has been under 650 million gallons, as against upwards of 1100 million gallons on the average of the twenty years 1860–79. The deps. that have suffered most from the phylloxera are Charente-Inférieure (where the industry has been almost ruined), Hérault, Gironde, Loire-Inférieure, Rhône, and Saône-et-Loire. The average of sugar-beet (grown principally in deps. Aisne, Nord, Pas-de-Calais, Oise, Somme, and other northern deps.) greatly exceeds the British average of mangold; and large areas are occupied by olive-yards (chiefly in Bouches-du-Rhône, Corsica, Gard, and Alpes-Maritimes). Mulberries, for the rearing of silk-worms (chiefly in Gard, Vaucluse, Ardèche, and Drôme); colza (chiefly in Seine-Inférieure and Calvados); hemp (the fibre chiefly in Maine-et-Loire and Sarthe, the seed in Sarthe, Côtes du Nord, Dordogne, Maine-et-Loire, and Vienne); and flax (chiefly in Nord, Pas-de-Calais, Côtes du Nord, Manche, Gard, Gers, and Haute-Garonne), though the last-mentioned crop is smaller than that of Ireland. Tobacco is likewise a product of no little importance, though the total acreage occupied by it is less than half of that devoted to hops in England. It is grown chiefly in deps. Dordogne, Isère, Lot, and Lot-et-Garonne; hops most largely in Côte d'Or, Nord, and Meurthe-et-Moselle. Where French agriculture is inferior to British is in the amount of produce of crops common to both countries relatively to acreage. If an acre of wheat were as productive in France as in Britain, then the total wheat-crop of France would be at least 6½ times instead of little more than 3½ times that of the British Isles. A steady improvement in French agriculture is, however, shown by the fact that in every decennial period from 1821–30, when the average yield of wheat per acre was 13½ bushels, there has been a rise in the average down to 1881–5, when it amounted to 18 bushels.

The **mineral wealth** of France is greatly inferior to that of the United Kingdom, and the inferiority is most serious in the case of coal. The coal-fields, though small, and not very productive, are, however, scattered over different parts of the country, and the central region—that, accordingly, which is furthest from supplies of sea-borne coal—has the greatest number of centres of local supply. There are numerous coal-fields on the margin of the Central Plateau (except in the projection of this plateau to the W.), and a string of coal-fields across the plateau (by Commentry and the upper valley of the Dordogne) from Decize in the N. to Mauriac, near the foot of Mount Dore, in the S. The most productive coal-field is a continuation of that of Belgium, and the chief centre of production close beside Valenciennes. Next in productiveness are those on or near the eastern side of the highlands which border the basins of the Rhone and Saône on the W., round St. Etienne in the middle, round Creuzot further N., and at Alais in the S. The chief producing deps. are Pas-de-Calais, Nord, Loire, and Gard; next to these Allier and Aveyron. The great bulk of the iron ore produced in France is obtained from the basin of the Moselle in the extreme NE. of the country (deps. Meurthe-et-Moselle and Ardennes). The deps. next in importance under this head are Pyrénées-Orientales, Gard, Isère, Haute-Marne, and Saône-et-Loire (round Creuzot). Sea-salt is obtained from salt-pans on the Western Mediterranean coasts and on the coasts of the Bay of Biscay; rock-salt, near Nancy, in the NE. (dep. Meurthe-et-Moselle), to a smaller extent in deps. Doubs, Jura, Landes, Haute-Saône, Var, &c.

One consequence of the wide dispersal of the French coal-fields, is the fact that the localisation of the great French **manufacturing industries** is governed more by the position of local supplies of raw materials, and the conveniences for obtaining supplies from abroad, than is observable in other countries where the supply of fuel is more concentrated. The woollen industry is chiefly carried on in the N., where there are the principal supplies of native wool, and where supplies of foreign wool are most easily obtained from the R. Plate and from England by way of Dunkirk and Havre, as well as the Belgian port of Antwerp. The principal markets for wool in France in the order of importance are Roubaix, Tourcoing, Reims, Fourmies, and Amiens. Sedan, on the Meuse, in the NE., is another old manufacturing town engaged in the same industry, fostered by the sheep-pastures of Ardennes. Elbeuf, on the Seine above Rouen, and Louviers, a little to the SE., are noted for their woollen (as distinguished from worsted) cloths; and Troyes, on the Upper Seine, has long been noted as the chief seat of French hosiery. The silk manufactures still have their seat in the valley of the Rhone, where they first grew up in consequence of the introduction of the silk-worm. In the cotton industry the manufacturing towns of Normandy are pre-eminent, and above all Rouen. Further N. the chief cotton-market is St. Quentin, to the S. of Cambrai. In the E. cotton factories have been established at Sénones, St. Dié, Épinal, and other places W. of the Vosges, since the transference of the busy cotton-manufacturing district of Alsace to Germany in 1871. Creuzot is the town whose name is most associated with the making of machinery, locomotives, and other railway material, because these industries, in addition to the smelting of iron, are the great staples on the basis of which the town has grown into importance within the last fifty years; but such industries are also largely carried on at Paris, Lille, and other large towns. Limoges (*q.v.*), is noted for its porcelain and earthenware. Glass is made on the coal-fields of the N. and centre; paper at Angoulême in the W., and Annonay in the E.; watches at Besançon in the Jura. Classified according to the total amount of horse-power used in industral operations, the leading deps. are Nord, Seine, Pas-de-Calais, Seine-Inférieure, Loire, Saône-et-Loire, and Meurthe-et-Moselle. Those of Nord and Seine-Inférieure are far ahead of all the others in the amount of horse-power used in textile industries (Nord making use of more than twice as much as Seine-Inférieure); and Nord, Meurthe-et-Moselle, Saône-et-Loire, Loire, and Seine take the lead in metal industries. The rivers of France are much more important as **means of internal communication** than those of England. The Seine (with its tributaries, the Oise, Marne, Aube, and Yonne), the Loire, Dordogne and Garonne, and the Saône, the chief tributary of the Rhone, as well as minor rivers, flow through plains and valleys presenting few obstructions to navigation for the greater part of their course. The impetuous Rhone, though navigable from Lyons, has its course impeded by sandbanks and other obstructions. The importance of the navigation naturally afforded by the rivers is shown by the canal connections between the rivers in the E. and W. The Marne and Rhine Canal unites the Seine navigation to that of the Rhine, beginning at a point on the Marne about 300 m. above the mouth of the Seine. The Burgundy Canal, which connects the navigation of the Seine and Rhone by means of the Yonne and Saône, begins on the former river at a point about 275 m. above the mouth of the Seine, and ends on the latter rather more than 300 m. above the mouth of the Rhone. It crosses the Côte d'Or at the height of 1230 ft., and passes Dijon. The Canal du Centre connects the Loire about 400 m. from its mouth with a lower point on the Saône. The Rhone and Rhine Canal quits the Saône near the point of entrance of the Burgundy Canal, and enters the Rhine valley through the opening known as the Burgundy Gate, between the southern end of the Vosges and the western slopes of the Jura. The Canal du Midi connects the Garonne at Toulouse with the Mediterranean at Cette. All the rivers mentioned are navigable from the points where they are joined by canals, but in some cases the navigation is assisted by lateral canals below the points of junction. The most important of these lateral canals is that on the Garonne below Toulouse, 120 m. in length. On all these canals the navigation is of considerable importance, but the chief inland navigation in France is in the N., between the basins of the Seine, Somme, and Escaut (Scheldt), where the flatness of the surface has favoured canal construction, and where there is a large amount of heavy traffic. Under a law passed in 1879, empowering the state to acquire the canals, about seven-eighths of all the canals of France have become public property, and are now free from tolls. The project of connecting the Atlantic with the Mediterranean by a ship canal across F. has frequently been mooted. The most recent project of the kind laid before the French Chamber is one for a canal from Bordeaux to near Narbonne 376 m. long, 27 ft. deep, with twenty-two locks.

The principal **seaports** of France, in the order of their importance, are Marseilles, Havre, Bordeaux, Dunkirk, Rouen, St. Nazaire, Cette, Dieppe, Boulogne, Calais. **Foreign commerce.**—In recent years wine, grain and flour, raw wool, and raw silk have made up together about 30 per cent. of the value of the special **imports,** and among other leading imports have been timber, raw cotton, hides and skins, oil-seeds, coal, and living animals. Four articles have also made up about 30 per cent. of the value of the **exports** of native origin, namely, woollen and silk manufactures, wine, and raw and waste silk. Among others of importance are leather and leather wares, haberdashery, cheese and butter, raw wool, and cotton manufactures. The raw wool imported into France is mainly derived from South America, and is partly introduced through Belgium. That of Australian origin is mainly imported from the United Kingdom. Oil-seeds are a rapidly growing import from India and other tropical countries, including the French settlements in West Africa and Indo-China. The United Kingdom and Belgium supply most of the coal and coke imported into France, the United Kingdom having the advantage of sea-carriage, and Belgium that of canal and river communication with the chief manufacturing regions of northern F. The countries with which the foreign commerce of F. is mainly carried on, are the adjoining countries of Europe, the United Kingdom being first both in exports and imports. It receives more than a fourth in value of the whole exports. The U.S. usually ranks fourth or fifth among the countries supplying the imports. In the recent history of French commerce, the most striking fact is the rapid growth of the wine import (from Spain, Italy, Algeria, &c.).

The quantity of wine imported is now four times that exported, the value of the import more than two-thirds in excess of that of the export. The **monetary** system of F. is on a gold basis. The money of account is the franc, of the value of about 9½d., divided into 100 centimes. The standard coin is the 20-franc gold piece, nine-tenths fine, gross weight 99.563 grains troy, fine weight 89.607 grains. The same currency with the same names is in use in Belgium and Switzd., and the French franc is equal to the lira of Italy, the peseta of Spain, the drakhma of Greece, the dinar of Servia, the ley of Roumania, and the lew of Bulgaria; the peso of the Argentine Republic, Uruguay, Chile, Ecuador, Guatemala, and Costa Rica, the boliviano of Bolivia, the sol of Peru, and the venezolano of Venezuela and Colombia are each equal to five francs. The **metric system,** the system of weights and measures first adopted in F., and now very widely adopted in other countries, is a decimal system, in which the names of different measures are derived from those of the units by means of the following prefixes:—

Deci-	= $\frac{1}{10}$	Deca-	= 10 times
Centi-	= $\frac{1}{100}$	Hect- or Hecto-	= 100 ,,
Milli-	= $\frac{1}{1000}$	Kilo-	= 1000 ,,

The unit of length is the *mètre*=39.37 in.=3.28 ft. (1 *kilomètre* =.6214 mile); the unit of area the *are* (one square mètre)= 1076.4 sq. ft.=.0247 acre (1 hectare, therefore,=2.47 acres, and 1 sq. kilomètre=247 acres=.3861 sq. m.); the unit of cubic measure the *stère*, or cubic mètre=61,028 cubic in.=35.317 cubic ft.; the unit of liquid measure the *litre* (1 cubic decimètre) =1.76 pint (1 hectolitre accordingly=22.0097 gallons, or 2.7512 bushels: hectolitres per hectare × 1.113=bushels per acre); the unit of weight the *gramme* (1 cubic centimètre at 4° C.)=15.432 grains=.035 oz.=.0022 lb. avoir. (1 hectogramme=3.5274 oz.; 1 kilogramme. or kilo.=2.2046 lbs.; 1 metric quintal=100 kilos. =220.5 lbs.; 1 metric ton=1000 kilos.=2204.6 lbs.=.984 English ton.

The **Government** of France is a republic, the third established in the country, dating from 1870, after the overthrow of Napoleon III. The executive is vested in the President, assisted by a responsible ministry. The legislative power is exercised conjointly by the Senate (300 elected for nine years, one-third retiring every three years) and the Chamber of Deputies (584, elected for four years). The deputies (one for each arr., or two if the population exceeds 100,000) are elected by universal suffrage, every citizen, twenty-one years of age, resident six months in the electoral dist., having a vote. Senators are elected indirectly by a body consisting of Deputies, Delegates from the Municipal Councils, Councillors-General, and District-Councillors. Deputies must be citizens over twenty-five, and Senators over forty years of age; both are paid. The President is elected for seven years by a Congress consisting of the united Chambers. The President and ministers may be impeached of high treason, in which case, as in all other cases of high treason, the Senate acts as a High Court of Justice. The 'Conseil d'Etat' is a consultative body, presided over by the Minister of Justice. F. is divided into 87 deps., each administered by a Prefect representing the Executive. The deps. are subdivided into electoral dists. or 'arrs.' (362), generally under a sub-prefect. There is a still further subdivision of the country into communes, in most of which the population is less than 1500. Each commune has a municipal council for the management of local affairs, under the direction of the Prefect. For judicial purposes the communes are grouped (or in the case of a few larger ones, subdivided) into cantons, in each of which is a Justice of the Peace. The arrs. and the deps. elect councils; these are mainly deliberative, with but little active authority.

Finance.—The revenue is derived mainly from indirect taxes (62 per cent.); direct taxes (land, capitation, door and window taxes, and trade licences); post, telegraphs, and other state monopolies; income from state lands, railways, and a few other sources. **Military** service is compulsory. Every Frenchman between the ages of 20 and 45, not physically disabled, is liable to service during the whole period—three years in the Active Army and ten in its Reserve, six in the Territorial Army, and six in its Reserve. Soldiers in the active army who have attained a certain standard of efficiency may be granted indefinite furlough at the end of one year. The Navy is recruited by conscription and by voluntary enlistment. The 'Inscription Maritime' is a list of all seafaring men between 18 and 50 years of age. The conditions of service are similar to those in the army. Within certain limits as to numbers and fitness for the duties, young men not on the 'Inscription Maritime' are permitted to enter the navy instead of the army. The principal fortresses are:—NE., Lille, Dunkirk, Arras, Douai, Belfort, Verdun, and Briançon; E., Lyon, Grenoble, Besançon; S., Toulon (also the chief naval station) and Perpignan on the Mediterranean, and Bayonne, on the Bay of Biscay, the two latter near the Spanish frontier; W., Rochefort, Lorient, Brest, and Cherbourg on the English Channel. Paris is surrounded by extensive fortifications, and there are many other fortresses. F. is divided into 18 military regions, each under a general of division; for naval administration there are five 'divisions maritimes.' There is no state **religion** in F., the adherents of all sects being by law on an equal footing. Any sect numbering 100,000 may claim a grant. State allowances are made to Roman Catholics, Protestants, Jews, and in Algeria to Mohammedans. At the census of 1881 Roman Catholics formed 78.5 per cent. of the population, Protestants 1.8 per cent., Jews and other creeds less than 1 per cent., the remainder being of no stated belief. Public **education** is under state control, and entirely secular. Ample provision is made for the instruction of all classes in free Primary Schools, Colleges, or 'Lycées,' and the 'Facultés de l'état' providing university education, as the term is understood outside of France. Primary instruction, either at school or at home, is compulsory for children between the ages of 6 and 13, but those over 11 who have passed the necessary examinations may discontinue attendance. Private schools must be conducted by certified teachers. The whole educational system of France is regarded as constituting the university of France, which is under the direction of the minister of education, who bears in this capacity the title of *grand-maître de l'université.* The university is divided into 16 academies in France proper (besides one in Algeria), and the faculties have their chief seats in the capitals of these academies, namely, at Paris, Aix, Besançon, Bordeaux, Caen, Clermont, Dijon, Lille, Grenoble, Lyon, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Marseilles, and Chambéry. Each of the two last has combined 'facultés' for letters and science; Aix, letters only; the others have separate 'facultés' for letters and science. Protestant theology, law, and medicine have also their special 'facultés.' The crown of the whole system, under the minister of education, is the 'Institut de France,' comprising five academies, chief of which is the 'Academy of France.' At the census of April, 12, 1891, there were twelve **towns** (Paris, Lyons, Marseilles, Bordeaux, Lille, Toulouse, Nantes, St. Etienne, Rouen, Le Havre, Roubaix, and Reims) with more than 100,000 inhabitants, 21 with from 50,000 to 100,000 inhabitants, and 24 with a population of from 30,000 to 50,000.

Historical Notes.—The SE. of ancient F., or *Gallia*, was made a Roman province in 121 B.C., and the remainder was conquered by Julius Cæsar in 58–50 B.C. In the fourth century, when the Roman Empire was falling to pieces, various Teutonic tribes poured into Gallia or Gaul, founding the Burgundian kingdom in the SE., and the kingdom of the Visigoths in the S., on both sides of the Pyrenees, with Toulouse as cap. The Franks, a confederation of Germanic tribes, established themselves in Northern Gallia and Germany, and were distinguished as the West and the East Franks; the former became the dominant people in Gallia, and eventually gave their name to the country. The history of modern F., however, begins in the 9th century after the breaking up of the great Western Empire, over which Charlemagne ruled. Louis, his successor in the empire, made his son Charles (the Bald) King of Neustria (the NW. part of modern F.), while Pepin, another son, reigned in Aquitaine. On the death of Pepin in 838 Aquitaine was annexed to Neustria, and here, according to Mr. Freeman, 'we have the first beginning of the kingdom of F.,' now called Karolingia, and entirely separated from Germany. By the treaty of Verdun, 843, still more territory was added. The eastern borderland, known as Lotharingia, a name still surviving in Lorraine, belonged alternately to the Frankish and to the German kingdoms, but subsequently became definitely attached to the latter. Karolingia thus fell short of modern F. towards the E., while on the NE. it included part of what is now Belgium, and in the S. the 'Spanish March.' Meanwhile the great fiefs had been growing up, and the country owning Frankish supremacy was split into a number of semi-independent states, chief of which were the duchy of Aquitaine, S. of the Loire; duchy of Gascony, between the Garonne and the Pyrenees; county of Toulouse, E. of Gascony; and the marches of Septimania and Barcelona, extending SE. as far as the Ebro. In the NW. was Brittany, E. the duchy of Burgundy, with its cap. Dijon, and the duchy of F., cap. Paris. The last-named state was the nucleus of modern F. To it belonged several fiefs, including Anjou and Champagne, and Normandy, granted to Rollo in 912. The kingdom of Burgundy (or Arles, as it was also called from its cap.), which arose anew out of the divisions of the ninth century, formed a separate state lying between the Saône, Rhone, and Alps. Burgundy split up into two parts, a northern and a southern, the former, sometimes called the 'Regnum Jurense,' comprised the territory N. of Lyon, and the latter, Provincia. The N. section again formed two states—the county Palatine (modern Franche-Comté) and Lesser Burgundy (W. Switzerland and N. Savoy). The Burgundian kingdom, after a separate existence of about 1½ centuries, was united to Germany, but from time to time portions were annexed by F., leaving only the part now forming the W. cantons of Switzerland. In the S., besides Provence, were a crowd of small states, including the dauphiny of Vienne, the principality of Orange, the counties of Venaissin and Nice, and several free cities. The election of Hugh Capet, duke

of the French, to the crown in 987, marks an epoch in the development of F. At this time the immediate possessions of the Crown consisted mainly of the later Isle of F. and the government of Orléans. Towards the end of the eleventh century, the small states of Gatinois and Bourges were annexed; Amiens and Vermandois, 1183; Valois, 1185; Artois, 1180–87. There had been a temporary union of Aquitaine with the crown of F. in 1137, when Louis VII. married the heiress of Guienne and Poitou; but by her subsequent marriage with Henry of Anjou, afterwards Henry II. of England, Aquitaine and its fiefs were joined to Maine, Anjou, and Normandy, the sovereignty of which was already united in the person of Henry, while Brittany was practically a dependency of Normandy. During the reign of John of England, Anjou, Maine, Touraine, and Normandy were seized by F., 1202–3, and formally secured, as was also Poitou, by the treaty of 1258. Aquitaine and Gascony still remained to England. The territories forming the later prov. of Languedoc were annexed—Narbonne and other fiefs, 1229, the county of Toulouse, 1270; on the other hand, French claims over Rousillon and Barcelona were withdrawn. Blois and Chartres were annexed in 1234, and Perché in 1257. The marriage of Philip the Fair, 1284, with the heiress of Champagne united that county to the Crown, and with it, for a time, was acquired the sovereignty of Navarre. Navarre was surrendered by Philip of Valois in 1328. The Hundred Years' War between England and F. resulted in the acquisition of Aquitaine, 1451–53, six centuries after its first union with Neustria. The duchy of Burgundy, which had fallen to the Crown in 1361, and was shortly afterwards again separated, had been extending E., N., and NW. It included the counties of Charolois, Flanders, and Artois, and the imperial county of Burgundy, besides numerous fiefs in Germany and in the Low Countries. After the death of Charles the Bold, 1477, Louis XI. got possession of the duchy, while the counties just named became French fiefs. Flanders and Artois passed later under Spanish rule, and were entirely separated from F. in 1525. The only great fief still remaining was Brittany, but the marriage of Charles VIII. with the Duchess Anne in 1491 united it peaceably to the Crown, with which it was finally incorporated, 1532. The bishoprics of Metz, Toul, and Verdun were acquired in 1552. Calais was recovered from the English, 1557. Elsass was gained in 1648, as the result of the Thirty Years' War, and the French frontier extended to the Rhine. A temporary advance into the Low Countries in 1659, and still further in 1668, was checked by the treaty of Nimeguen, 1678. Franche-Comté was conquered in 1668, and Strassburg in 1681. By the treaties of Utrecht and The Barrier (1713 and 1715), a portion of Flanders and other important territories were obtained; the principality of Orange was incorporated, 1714, and Lorraine, 1766. The addition of Savoy and Nice in 1860, and the cession of Elsass (except Belfort) and part of Lorraine to Germany in 1871, constitute the principal changes which have been made in the map of F. during the present century. The temporary extension of French influence under the first Napoleon caused no permanent alteration in the limits of the country. For particulars of colonial expansion, see **France,** table, and under the headings of the various possessions. [Government, &c., and History, by **E. J. H.**]

Frankfurt (am-Main), formerly a free city of Germany, now incorporated with Prussia, and forming the chief town of the govt. Wiesbaden, in the prov. Hesse-Nassau. It lies on both sides of the Main, which divides it into two unequal parts, the city proper being on the N., and its suburb, Sachsenhausen, with which it communicates by bridges, on the S. side. It is situated in 50° 6′ 43″ N., 8° 41′ 24″ E., 19 m. E. by N. of the influx of the Main into the Rhine at Mainz (Mayence). The town arose at a ford of the Main (whence the name, in the

eighth century, *Franconofurd*) where the banks of that river stood high enough to be free from liability to inundation, and soon became a place of importance, as the place where the routes from Franconia (N. Bavaria) by the upper Main valley, and from the NE. on both sides of the Vogelsberg, namely, from Thuringia by Fulda and the Kinzig valley on the E. side, and from the valleys of the Leine and upper Weser by Münden, Kassel, Giessen, and the valley of the Nidda on the W. side, between the Vogelsberg and the Taunus, converged on the valley of the Middle Rhine, along the N. of which valley the Main has now (since 1886) been canalised, so as to form a waterway for vessels of 1000 tons burden. A promenade round the city takes the place of the old fortifications. Principal edifices, the *Römer*, or old palace, in which the Emperors of Germany were elected (from 1356 onwards), and in which are portraits of all the German emperors from Kourad I. to Francis II.; the Thurn-und-Taxis palace, place of meeting of the former diet; the cathedral; an important technical school; two Jews' synagogues; the *Saalhof*, a modern imperial palace; the house of the Teutonic order in Sachsenhausen; the *Haus zum Braunfels*, or exchange; academy of painting, and the Senkenberg museum, with Rüppell's African collection. It has a college, medical institute, an important technical school, several learned, scientific, and literary institutions, including a geographical society. Formerly it was the principal seat of banking and exchange in Germany, and since this branch of business has been gradually transferred to Berlin, it has been constantly acquiring more importance as a centre of trade, especially in vegetable oils, hides, leather, coal, and metals. Principal manufactures, articles of fashion, printing-type, sewing-machines, soap, perfumes. Two large fairs are held here annually. Charlemagne held a council in F. in 793; it was fortified in 838 and 843, and erected into a free city in 1154. Goethe the poet was born here in 1749. Napoleon I. made it cap. of a grand-duchy, and it was incorporated with Prussia, Sept. 20, 1866. Alt. 300 ft. Mean temp., yr. 49.6° F., Jan. 31.1°, July 66.6°. P. (1817) 41,500; (1871) 91,000; (1880) 137,000; (1890) 180,000; including Bockenheim, 198,000.

Frankfurt (an der Oder), tn., Prussia, prov. Brandenburg, on both sides of the Oder, 19 m. S. by W. Küstrin, cap. govt. F., 47 m. ESE. Berlin; important rly. centre; has manufactures of tobacco, potato-starch, earthenware, &c.; seat of a university from 1506 to 1811, when it was transferred to Breslau. P. (1816) 15,100; (1871) 43,200; (1880) 51,000; (1890) 55,400; comm. P. 55,700.

Fraserpet, tn., Brit. India, Coorg, 20 m. E. Merkára (cap. of Coorg), a pleasant retreat during rainy season. P. (1891) <2000.

Fraser River, Brit. Columbia, N. America, rises N. of Mount Brown, in the Rocky Mountains, flows NW. 190 m., then SW. 100 m., when it turns S. in 54° N., and flows through the centre of the colony 370 m. to Hope, when it turns W. and flows 80 m. to its mouth in the Gulf of Georgia, which separates Vancouver I. from the mainland. On the coastland at Yale the F. becomes a navigable river, and for 190 m. from its mouth it is traversed by small and powerful steam-vessels, which force their way up its rapid current. Above that it rushes through a deep cañon, on the sides of which space has been found only with difficulty for the line of the C. P. R., which accompanies the river from Lytton downwards. Its chief tributaries are, on the right, the Stuart R., the Chilcoaten R.; left, the Thompson R. Gold was discovered on the middle course of the F. in June 1856, and soon after on its tributary the Thompson R., and at Lake Shushwap. Length of course, 740 m. Area of basin, 138,000 sq. m.

Frehill, islet, Ire., off W. ct. of the S. of Mayo, in 53° 39′ **N.** *Frei*, or *Frey*, German, 'free.'

Freiamt, comm., Ger., gd.-duchy Baden, circle Freiburg. dist. Emmendingen; composed of several small vils. P.<3000.

Freiberg, or **Přibor,** vil., Austria, Moravia, 24 m. SSE. Troppau. P.<4000.

Freiberg, tn., Ger., Saxony, circle, govt., and 20 m. SW. by W. Dresden, 2 m. W. of the Mulde. It has a cathedral, is the seat of the administration of mines and foundries for the kingdom, and of a mining academy, with Werner's collection of minerals, and a library. The pupils work practically in the neighbouring mines. In the vicinity are silver, copper, lead, and cobalt mines. Extensive smelting works and foundries are seated at Halsbrücke, 3 m. distant. Manufactures gold and silver lace, artificial manures, pigments, leather wares, &c. P. (1871) 21,700; (1890) 29,000; including **Freibergsdorf,** 31,300.

Freiburg (**im Breisgau**), Ger., gd.-duchy of Baden, 24½ m. E. by S. Colmar (Alsace-Lorraine), on the Dreisam, at the foot of the Black Forest, and the mouth of a valley which leads up to the Höllenthal (*q.v.*); cap. circle F. Has a noble Gothic cathedral, with a spire 380 ft. high; a university, with valuable collections, and noted as a school of Roman Catholic theology; a school of forestry; manufactures of chicory, tobacco, and soap, tanning, bell-founding, &c. Alt. 1000 ft. Mean temp., yr. 49.6° F., Jan. 32.6°, July 67.6°. P. (1871) 24,700; (1880) 36,400; (1890) 47,400; comm. P. 48,900.

Freiburg, comm., Prussia, prov. Hanover, 35 m. NE. by E. Bremerhaven, 1 m. from the l. bk. of the Elbe. P.<3000.

Freiburg (**an der Unstrut**), tn., Prussia, prov. Saxony, on the Unstrut, 3 m. S. Rossbach, 21 m. SSW. Halle. P.<4000.

Freiburg, tn., Prussia, prov. Silesia, 36 m. SW. by W. Breslau, 7 m. W. by N. Schweidnitz. P. 8500.

Freiburg, cant., Switzd., bounded E. by the cant. Bern, S. and W. by Vaud, and NW. by the Lake of Neuchâtel, which separates it from the cant. of that name; it includes also three detached pieces, situated in the cant Vaud. Surface hilly in the S. and E., where it is traversed by ramifications of the Bernese Alps; culminating points, the Dent de Brenlaire 7723 ft.; Dent de Folligran, 7716 ft.; Mont Moleson, 4584 ft. above the sea. Principal rivers, the Sarine and the Broie. The greater part of Lake Morat is in this cant. Climate mild in the N. and on the Lake of Neuchâtel. Agriculture is the chief occupation of the people in the N., and cattle-rearing in the S. dists. Corn is grown barely sufficient for home consumption, and dairy husbandry is well conducted. The breeds of horses and cattle are valuable. Timber and peat are important products. It manufactures straw hats, which, with cheese and timber, form the chief exports. The inhabitants are mostly of Gallic descent, and French is the prevalent language in the towns, but German is spoken in the NE. Chief towns, Freiburg, Romont, and Bulle. Area, 644 sq. m. P. (1888) 110,832, mostly Roman Catholics.

Freiburg, French **Fribourg,** tn., Switzd., cap. cant. F., 17 m. SW. by W. Bern, on both banks of the Saane (Sarine), the opposite sides of which are connected by a beautiful wire suspension-bridge. The river affords water-power, which is utilised in the manufacture of ice, sewing-machines, agricultural implements, &c. Seat of the Bishop of Lausanne. German prevails in the lower town, French in the upper. Alt. 1750–2075 ft. P. (comm.) 12,200.

Freienwalde, tn., Prussia, prov. Pomerania, 33 m. E. Stettin. P.<3000.

Freienwalde an der Oder, tn., Prussia, Brandenburg, 30 m. NE. by E. Berlin; has alum and lignite mines. P. 7100.

Frenchay, eccles. par., Eng., Gloucestershire, 4 m. NE. Bristol, P.O. P.<1500.

French Broad, riv., U.S. It rises in the NW. of N. Carolina, in the Blue Ridge Mts., flows N. then NW. and enters Tennessee, through which it flows W. to the Holston, which it joins on the l. bk. 4 m. E. Knoxville; navigable for boats of 15 tons to Dandridge.

French Congo Territory, one of the most promising colonies in Africa. It comprises the countries N. of the Lower Congo, the southern boundary line running from Loëma on the coast to Manyanga on the Congo, and from there along the right banks of the Congo and Ubangi. On the N. and W. it borders the German Kamerun possessions, the boundary running from the mouth of the Campo due E. to the Ngoko and Sango rivs., thence to the intersection of 4° N. lat. and 15° E. long., and then along the last-named meridian to 8° 30′ N. lat. (Kunde French). From there the boundary-line runs to Bifara on the Mayo Kebbi, and along the 10th degree of N. lat. to the point where it meets the Shari, and finally along this river to Lake Chad. A considerable portion of these territories is still entirely unexplored, but the known parts belong to the richest regions of tropical Africa. Palm-oil is already a very important article of export; other products are gums, resins, dye-woods, caoutchouc, cotton, cinnamon, cocoa, pepper, tobacco, and coffee. It is expected that several of these will become of great importance in the near future. The chief drawback is the climate, which is unhealthy for Europeans. The principal French settlements in the interior are Franceville, Madiville, and Bue (all on the Ogowe), Diele (on the Alima), Stefanieville (on the Niadi), and Brazzaville (on the Congo). A number of other stations are situated on the Kwilu. Places of importance on the coast are Libreville (on the Gabun), Mayumba Bay, Loango, and Pointe Noire. The French possessions date back to 1845, when there was a small French settlement on the Gabun. In 1862 this was extended to Cape Lopez; but all efforts to penetrate into the interior were unsuccessful until Savorgnan de Brazza, in 1878, succeeded in crossing the watershed between Congo and Ogowe. In 1880 he reached the Congo. To his efforts the establishment of the present French Congo Territory is almost solely due. [**H. G. S.**]

French Creek, riv., U.S., Pennsylvania, in the NW. It rises in the extreme NE. of Erie co., and flows SW. then SE. to the Allegheny, which it joins on the r. bk. at Franklin, in about 41° 27′ N.

Frenchtown, bor., U.S., New Jersey, Hunterdon co., on the Delaware, 32 m. NW. Trenton by rail. P.<1500.

Frenchville, tn., U.S., Maine, Aroostook co. P.<3000.

French West Africa, vast territories in the western Sudan and western Sahara, the French sphere of influence comprising the Upper Senegal regions and the Upper and Middle Niger regions (including Kong and surrounding dists.), and also (by Anglo-French agreement of Aug. 5, 1890) the extensive Sahara territories S. of Algeria, and N. of a line from Say on the Middle Niger to Barrua on Lake Chad. To these we have to add the French possessions bordering the Atlantic S. of Cape Blanco, viz., Senegal, Rivières du Sud, Ivory and Gold Coast possession, and Dahome. According to Villault de Bellefond, an official of the French East India Company, who had been struck with the traces of French settlements on the W. ct. of Africa during a voyage in 1666, and published on account of them (*Relation des Côtes d'Afrique appelées Guinée;* Paris, 1669), a series of voyages to the coast of Guinea were made on behalf of merchants of Dieppe from 1364 onwards, and in 1383 those merchants founded a settlement there, which they called La Mine, since known by the Portuguese name of Elmina. Villault relates that at the time of his visit, when the place was in the hands of the Dutch, the arms of France were still to be seen on a church then in use. After the abandonment of the settlements of this date no others were founded by the French till the close of the 17th century, when they occupied a few West African coast places, and at the end of the last century, when Mungo Park opened up the interior, Gorée and St. Louis were the principal French settlements; but no efforts were made till the middle of the present century to extend the French sphere of influence to the Niger. Since that time much has been done, with the results above given. Total area estimated at 1,550,000 sq. m. Total P. estimated at 3,000,000. [**H. G. S.**]

Frenda, vil., Algeria, prov. and 105 m. SE. by E. Oran, arr. Mascara, in a healthy, well-watered, and fertile dist. Numerous pre-Roman and Roman remains near. Alt. 3470. P.<2000.

Friesack, tn., Prussia, prov. and 22 m. N. Brandenburg, on the Kleiner Rhin, at the point where it is joined by the F. (drainage) Canal. P. <4000.

Friesche Gat, channel, Holland, between the isls. of Ameland and Schiermonnikoog, prov. Friesland.

Friesenheim, comm., Ger., gd.-duchy Baden, circle Offenburg, 2½ m. N. Lahr. P. <3000.

Friesenheim, comm., Ger., Bavaria, govt. Palatinate of the Rhine, 15 m. N. Spires (Speier). P. <5000.

Friesland, prov. of the Netherlands, on the NE. side of the Zuider Zee (*q.v.*), having landwards the provs. Groningen, Drenthe, and Overijssel. Surface flat, and being in great part below or near the level of the sea, its coasts are protected by dykes. Much of it consists of sandy heaths, but in the N. and W., where there is a rich soil, formerly sea-bottom, stretching inland to Dokkum, Leeuwarden, and Sneek, are some pasture lands, where live stock are reared. Lakes are numerous (Tjeuke Meer, Sloter Meer, De Fluessen, with the Heeger Meer, Sneeker Meer, &c.). Peat forms the principal fuel in use. Woollens and fine linen fabrics, sailcloth, tiles, &c., are manufactured. The chief exports are cattle and dairy produce. It is subdivided into three arrs.; principal towns, Leeuwarden, the capital, Heerenveen, and Sneek, with Harlingen, Franeker, and Dokkum. Area, 3320 sq. m. P. (1889) 335,558. See **Netherlands,** table.

Friesthorpe, par., Eng., Lincolnshire, E. Lindsey div., 10 m. NE. Lincoln, 1 m. WNW. Wickenby stn. P. <250; eccles. par. (**F. with Snarford**) P. <250.

Galajio, tn., Turkey in Europe, prov. Kirk-Kilise, on the Black Sea, 36 m. SE. by S. Burgas.

Galam, French dist., Africa, on the Senegal, cap. Bakel.

Galamus, or **St. Antoine de Galamus,** hermitage, France, dep. Pyrénées-Orientales, 3 m. N. St. Paul de Fenouillet; much visited by pilgrims.

Galan, tn., France, dep. Hautes-Pyrénées, arr. Tarbes, 17 m. NE. by E. Bagnères-de-Bigorre. P.<2000.

Galan, or **Galiant,** good harbour in Long Reach, Strait of Magellan, in 53° 42′ S. and 71° 22′ W.

Galana, Galla word for 'river.'

Galang, isl., En. Archipelago, to the E. of Sumatra, 42–50 m. SE. by S. Singapore.

Galáothí, tn., India, NW. Provs., dist. and 12 m. N. Bulandshahr. P. (1881) 5400.

Galápagos, sometimes spelt in English **Gallapagos** (Spanish, 'tortoise" isls.), group of the Pacific Ocean, on and near the equator, between 89° and 92′ W., 730 m. W. the coast of Ecuador, S. America, to which state they belong. The group consists of five principal and eight small islands; the largest, Albemarle I., being 60 m. in length by 15 m. in breadth, with an elevation of 4000 ft. All are entirely composed of volcanic basalts, and there are upwards of 2000 craters of extinct volcanoes. In respect of climate, there are two well-marked zones dependent on elevation. Up to about 800 ft. (which includes about eleven-twelfths of the entire surface) is the dry zone, which receives only scanty rains, and these only from February to the end of May, and is entirely uncultivable. Above that rains are plentiful during the rainy season, and even during the dry season heavy mists (called as on the coast of Peru, *garuas*) keep the vegetation moist. The vegetation of the two zones differs greatly both in aspect and composition. Below, oases of vegetation, characteristic of an arid region, alternate with stretches of black, grey, or reddish lava. The lower region is, however, the zone of the archil lichen, which long formed the only export. Above, there is, wherever the soil admits of it, a complete covering of green, and in cultivated tracts tropical, sub-tropical, and temperate products (the potato as well as sugar-cane) thrive admirably. Scarcely a dozen plants are common to both zones. The vegetation as a whole is largely endemic. Out of 374 vascular plants in the collection of Hooker and Anderson, 190 are peculiar to the islands. Palms, plantains, and the ginger and arum families are entirely absent. The fauna, too, is to a great extent peculiar. All the reptiles, without exception, are so. Among these is the large land-tortoise (*Testudo elephantopus*), to which the islands owe their name, and which at the time of the discovery of the group by the Spaniards in the 16th century abounded on all the islands, but is now scarce in some, extinct in others. The coasts are frequented by turtles of enormous size. No attempt was made to colonise the group before 1832, which accounts for the fact that most of the islands still retain the names given to them by English explorers and surveyors. The principal islands are Albemarle, Indefatigable, Chatham, James, Narborough; among others are Charles (called in Ecuador, Floreana), Hood, Barrington, Bindloe, and Abingdon. In 1832 the islands were taken possession of by Ecuador, and small plantations have been formed on five of the islands—Charles, Chatham, Indefatigable (Chaves), James (Santiago), and Albemarle. Area of the whole group, 2950 sq. m.

Galapagos, an unimportant group of the W. Indies, Bahamas, N. of Abaco.

Galashiels, parl. burgh., burgh of bar., par., and tn., Scot., cos. Roxburgh and Selkirk, on Gala Water, 3½ m. WNW. Melrose, on the N. B. R.; has extensive manufactures of shawls, plaids, and tweeds from home and foreign wools; the mills are wrought partly by water and partly by steam power. Alt. 385 ft. Market-day, Tu. Par. 8439 ac., P. (1871) 6062; (1891) 11,600; tn. P. (1871) 10,300; (1891) 17,400; parl. burgh, P. (1871) 9700; (1891) 17,300.

Galata, vil., Bulgaria, on the Black Sea, prov. and 3 m. SSE. Varna.

Galata (named by the Genoese after one Galatius—Egli), suburb of Constantinople, on the N. side of the Golden Horn, ⅝ m. W. the Seraglio Point. It is 4 m. in circumference, enclosed by walls, and entered by numerous gates, which are shut at sunset. The inhabitants are mostly European Christians, and G. is the chief seat of the foreign trade of the Turkish capital. It has the custom-house for the port of Constantinople.

Galaţi, Roumania. See **Galatz.**

Galichnik, tn., Turkey in Europe, 50 m. NW. by N. Monastir. P. 2700 (G.).

Galicia (name derived from the castle of Halics), one of the Cisleithan provs. of Austria-Hungary, lies outside the great rampart of the Carpathians, by which it is separated from the other parts of the empire. The surface features of G. vary considerably. The S. and SE. are mountainous, being formed by the mountain ranges and offshoots of the Carpathians (*q.v.*), which give rise to numerous streams and slope down to the valleys of the Vistula, San on the N., and that of the Dniester on the E., whilst N. and E. of these valleys the country rises to altitudes of 1550 ft. and 1300 ft. respectively, thus connecting G. with the plateaux of Poland and Podolia. The average elevation of G. is estimated at 800 ft. above sea-level. The climate is less moderate than that of any other prov. of Austria-Hungary (*q.v.*), G. being exposed to the cold N. and NE. winds, whilst the Carpathians shut out the warm breezes from the Mediterranean. The winters are long and severe, the springs late, and the summers short but hot [**Cracow, Lemberg, Tarnopol, Sereth**]. Nevertheless, 50 per cent. of the total area is used as arable land, 21 per cent. consists of pastures, and 27 per cent. is covered by forests. Cattle-rearing and horse-breeding are of considerable importance. The chief cereals, oats, rye, and barley. Much timber is exported to Russian Poland and Prussia (especially to the port of Danzig). G. has many valuable minerals, the most important of which are salt, petroleum, and coal. Rock-salt and brine are found in large quantities at a great many places, the chief localities being Wieliczka, Bochnia, Lacko, Drohobycz, Stebnik, Bolechow, Dolina, Kalusz, Delatyn, and Kossow. The petroleum and ozokerite industry of G. is increasing from year to year, oil of good quality being found in many parts of the country. Of great importance in this respect are the following localities: — Boryslaw (SW. of Drohobycz), Sloboda-rungurska (near Kolomea), Kryg, Libusza, Polanka, and Fagorzany. Rich coalfields exist in the Cracow district, especially near Jaworzno. Of other minerals must be mentioned iron, lead, and zinc ores near Czerna, and sulphur at Swoszowice (W. of Wieliczka). There are but few manufacturing industries in the country. Biala is a textile centre of some importance, otherwise only distilleries and breweries exist in considerable numbers. The commerce is mostly in the hands of Jews. There are 660 m. of navigable rivers. As to railways, see **Austria-Hungary** and **Carpathians.** River navigation is considerable (660 m. of navigable rivers). The pop. mostly consists of Slavs, of whom the Poles (51.5 per cent. of the total population) prevail in the western, and the Ruthenians (42.9 per cent. of the total population) in the eastern territories. The mountainous parts of the country are inhabited by the Gorals and Huzuls, the former being a branch of the Poles, and the latter of the Ruthenians. The majority of the Ruthenians belong to the Greek Church, whilst the Poles are mostly Roman Catholics. G. has more Jews (700,000) than any other part of Austria-Hungary, and in Lemberg, Cracow, and other large towns the Jews constitute one-third of the inhabitants. G. has two universities, Lemberg and Cracow. From the end of the 14th century to the first division of Poland in 1772, G. formed part of this kingdom. After that date it became a prov. of the Austro-Hungarian monarchy. Area, 30,309 sq. m. P. (1890) 6,608,000. See **Austria-Hungary,** table. [**H. G. S.**]

Galicia, a kingdom of G., was founded by the Suevi in the 5th century. In the 16th, G. was made a prov. or *Audiencia territorial* of Castille, the cap. of which was alternately Santiago, Corunna, Orense. From 1789 to 1833 G. was divided into seven provs.; since 1833 into four: **Corunna, Lugo** (N.), **Pontevedra, Orense** (S.). G. forms a square at the NW. angle of the Iberian Penin., on the W. extremity of the Pyrennean ridge, having the Atlantic W. and N. (Cantabrian Sea), Asturias and Leon (E.), Portugal (S.). The mountains, which cover all G., are branches of the Cantabrian Pyrenees: (1) running NW.–SE. to Cape Finisterre and Ortegal; (2) running NE.–SW., (*a*) to separate the valley of riv. Miño (which crosses the whole of G., NE.–SW.) from the valleys of rivs. Tambre, Ulla, Lerez; (*b*) to separate the valley of riv. Miño from that of its great branch riv. Sil, and to make the high E. border (Sierras de Leon). All the N. and W. coasts are cut by deep *fjords* (*rias*), making numerous and some of the best ports in the world (Ribadeo, Vinero, Ferrol, Corunna, Camariñas, Corcubion, Noya, Muros, Carril, Pontevedra, Vigo). These *rias*, where rivers have their mouths, are navigable to a long distance inland. But the only important river is the Miño (forming the S. border between G. and Portugal), which (though with a dangerous bar) is navigable for more than 20 m. G. is one of the dampest regions in Spain and Europe. Its pastures are extensive; large quantities of cattle are exported (to England); mountains are covered with forests intersected by thickets of shrubs (Gándaras). The people live on agriculture, and are, on the littoral, to a great extent fishermen (principally of sardines). G. is the densest peopled region in Spain (178 per sq. m.). There is a large emigration to the great towns of Spain and Portugal (or into the agricultural dists. of the penins. at harvest-time) and to Brazil and Cuba. No important industries excepting the manufacture of cigarettes. Many valuable but unexplored minerals. Numerous mineral waters. G. forms a military *Capitania general* (Corunna). See **Spain.** [**J. B. R.**]

Gallkonda, range of hills, India, Madras Presidency, Vizagapatam dist., crossed by 18° 30′ N. and 18° 50′ E., about 45 m. from the sea. Alt. 2800–5000 ft. The two highest peaks reach 5345 ft. and 5287 ft.

Gallant, harbour, Strait of Magellan. See **Galan.**

Gallapagos. See **Galápagos.**

Gallarate, tn., Italy, Lombardy, prov. and 23 m. NW. by W. Milan. P. 8000.

Gallas, one of the most important native races of E. Africa. They occupy the inland territories W. of the Somali country between Abyssinia and the equator. Their country is but little known, and is in all probability a plateau connecting Abyssinia with the mountain region of eastern equatorial Africa. The Gallas are of tall stature, and of lighter colour than Bantus and negroes. Their origin is quite uncertain. Their principal occupation is cattle-rearing and horse-breeding, agriculture being of subordinate importance. They are splendid horsemen, and their wild hordes have overrun southern Abyssinia for centuries past. The north-eastern Gallas are fanatical Mohammedans, the others are pagans. According to Paulitschke, the Gallas are identical with the Zenj nation of the early Arabian geographers. They are estimated by Krapf and Paulitschke at seven or eight millions. [**H. G. S.**]

Gallatia, vil., U.S. See **Galatia.**

Gallions, stn., London, Eng. See **Victoria Docks.**

Gallipoli, the ancient *Kallipolis* ('city of beauty'), fortified seapt. tn., S. Italy, Apulia, prov. and 29 m. WSW. Lecce, 127 m. W. by S. Otranto, on a rocky islet in the Gulf of Taranto, on the W. ct., connected by a bridge with its suburb Lizza, on the mainland. Opposite is the small island called '*Isola Sant' Andrea*, with a lighthouse, visible 19 m. Between this island and the town is the harbour, with minimum depth at entrance of 8½ ft.; length of quayage, 3000 ft.; vessels loaded and discharged by lighters. It is noted for its cisterns, excavated in the rock, and peculiarly adapted for clarifying olive oil; and this port is one of the most frequented in S. Italy, exporting large quantities of olive oil, wine, dried figs, &c. Sailors visiting the port frequently suffer from fever. P. 10,800.

Gallipoli, penin., the anct. *Thracian Chersonesus*, extending SW., separates the Dardanelles in the SE. from the Ægean Sea, and Gulf of Saros on the W. and N.; length, 63 m.; breadth, 4–13 m.

Gallipoli, Turkish **Gelibolu,** the ancient *Kallipolis*, seapt., Turkey in Europe, cap. prov. G., on the Dardanelles, near the W. end of the Sea of Marmora, 132 m. SW. Constantinople, and 87 m. S. Adrianople. G. is the principal station of the Turkish fleet, and has manufactures of cotton, silk, earthenware, and morocco leather; is the see of a Greek bishop; residence of a captain pasha; and was the first European town taken by the Turks (1357). Part of the Anglo-French army for the protection of Turkey landed here in 1854. P. (very mixed, including Greeks, Armenians, and Jews, all living in distinct communities—Greeks predominating) 20–30,000.

Galway, Co. of the town of,	22,493	16,959
	1,502,362[1]	214,712

[1] Exclusive of 67,143 ac. under larger rivers, lakes, and tideways.

The great mass of the surface is below 500 ft. in alt., but the W. of the county is mountainous and rugged (2395 ft.). The W. portion (divided into the districts known as Connemara, Iarconnaught, and Joyce's Country, and much visited by tourists on account of its wildly beautiful scenery) is separated from the E. and larger portion of the county by Lough Corrib (navigable from the sea to Cong in co. Mayo), and in the N. the boundary line of the county passes through the middle of Lough Mask. This western region is desolate and sparsely populated, but the soil is capable of high cultivation. The remainder of the county is level and boggy, bog and marsh making up about 15 per cent. of the surface. E. of Lough Corrib almost the whole area is composed of Lower Carboniferous rocks, but with some Old Red Sandstone hills in the SE. W. of Lough Corrib the rocks in the S. are almost wholly of granite, which is followed northwards by Cambrian and Silurian, and Archæan or metamorphic rocks. The coast is deeply indented, the chief bays being Little Killary, Ballynakill Harbour, Mannin, Bertraghboy, Kilkieran, Oranmore, and Dunbuleaun Bays. The chief rivers are the Shannon, which partly bounds the county on the SE., its r. bk. tributary the Suck, eastern boundary of the county, and the Clare. The islands are numerous, the chief being those of Inishbofin, Inishshark, Lettermore, and Gorumna, besides the Aran group. The only mineral of importance is the copper ore found at Roundstone, in the SW. of the county, on Roundstone Bay. The inhabitants are chiefly engaged in agriculture or, on the coast, in fishing. (For agricultural statistics, see **Appendix,** pp. 10–12.) The chief railway line is the Midland Great Western (Dublin to Galway), from which, at Athenry, a line branches N. to Tuam and Claremorris (co. Mayo), S. to Ennis (co. Clare). There is a branch of the Grand Canal between Shannon Harbour and Ballinasloe. Only manufactures, coarse linens, woollen stockings, and, along the shore, kelp. The county returns five members to Parliament, four for the county (N., S., E., and Connemara divs.), and one for the borough of G. In the far W. of the county Irish is largely spoken, there being a population of nearly 18,000 in the county who speak no other language. See **Ireland,** table.

Galway, parl. bor. (one member) and mun. bor., seapt. and market-tn., cap. co. Galway, and co. of itself, at the mouth of the riv. flowing from Lough Corrib into G. Bay, 105 m. W. Dublin, with which city it is connected by the Midland Great Western Rly. One of the Queen's colleges was opened here in 1849. The harbour has two docks, the deeper of which is 22 ft. deep over sill at neap, 26 ft. at spring tides, and it is connected with Lough Corrib by a canal; has extensive herring and other fisheries. Exports consist chiefly of agricultural produce and beautiful black marble slabs of large size. G. has a distillery, saw-mills, brush factories, flour-mills, and near the town a bag factory. Galway was conquered in 1235 by the Anglo-Normans under De Burgh, many of whose descendants still reside in the town. The town suffered greatly during the troubles of the 17th century. Market-days, W. and S. P. (1841) 17,300; (1851) 23,800; (1871) 15,600; (1891) 13,800; parl. bor. P. (1891) 17,000.

Galway Bay, bay in the W. of Ireland, between cos. Galway and Clare. The bay has lighthouses on Eeragh, Straw, Inisheen, and Mutton Is., as well as at the entrance to Galway Docks.

Gama, La, settlement and rly. stn., Argentine Republic, prov. and 180 m. SW. Buenos Aires.

Gamaches, tn., France, on the S. border of dep. Somme, arr. Abbeville, 23 m. E. by N. Dieppe. P. <3000.

Gamakh, Asiatic Turkey. See **Kemakh.**

Gambatesa, comm., Italy, prov., circle, and 16 m. ESE. Campobasso. P. <4000.

Gambia, called by the natives **Ba-diman,** or **Fourel,** *Stachir* of Ptolemy, riv., western Africa, Senegambia, the centre of which region it traverses, entering the Atlantic at Bathurst, 110 m. SE. Cape Verde, in 13° 24′ N., 16° 36′ W., after a WNW. course estimated at upwards of 550 m. At its mouth it is 4 m. across, but immediately within this its width is doubled. Vessels of 300 tons can reach the vicinity of Barrakunda, or Barraconda, in 13° 50′ W., where the navigation is stopped by falls.

Gambia, The, Brit. colony, W. Africa, embracing the terr. on both banks of the riv. G. as far as Yarbutendi. It has been continuously in British hands since the foundation of a fort, now Fort James, at the mouth of the river in 1664, an independent colony in 1843–66, and again since 1888. Value of imports and exports each £1,200,000. Principal exports, ground-nuts; others are maize, india-rubber, and palm-kernels. The one metalled road connects Bathurst, cap., on St. Mary's I., with British Combo on the mainland, across Oyster Creek. Fortnightly steamers from Liverpool carry the mails, and communication is regular with Bordeaux, by Dakar. Four cables connect Bathurst with Europe and other West African settlements. There are not more than fifty Europeans in the colony, which consists chiefly of negroes of the Jolah, Mandingo, and Jollof tribes. P. (1881) 14,150; (1891) 14,266.

Gambier, vil., U.S., Ohio, Knox co., 42 m. NE. Columbus. P. <1500.

Gambier Islands, group in the Pacific Ocean, in 23° 15′ S., 134° 45′ W., at the S. end of the Low Is., or Tuamotu Archipelago, consisting of five large islands and several islets in a coral reef lagoon, and important as being the only known station, except Pitcairn I., between Chile and Tahiti where good water is procurable. The French have exercised a protectorate over the islands since 1844.

Gambier Islands, group in Spencer Gulf, S. Australia, Wedge I., the largest, being in 35° 6′ S., 136° 28′ E.

Gambierton, tn., S. Australia. See **Mount Gambier.**

Gambila, or **Tochi,** riv., Afghanistan and Bannu dist., Punjab, flows E. into the Kuram, which it enters in 32° 37′ N., 71° 6′ E. Its banks afford little opportunity for cultivation.

Gananah, or **Gananeh,** vil., E. Africa, Somali-land, on the Jub, in about 3° 30′ N., 42° 25′ E.

Gananoque, vil. and port of entry, Canada, Ontario, Leeds co., on the l. bk. of the mouth of the St. Lawrence, 18 m. ENE. Kingston; manufactures machinery, agricultural implements, &c. P. <4000.

Ganarew, par., Eng., Herefordshire, div. and 7 m. SW. Ross, 2 m. NW. Symonds Yat stn. P. <250.

Gana'tir, or **Kana'tir, El** (Arabic, 'the bridges'), region of the Algerian Sahara, in about 33° N., and from about 1° 45′ to 3° E.; so called because the intervals of sand between the wadis that cross it are likened by the Arabs to bridges.

Ganavan Bay, Scot., Argyllshire, on the W. ct., in the NE. of the Firth of Lorne, 1½ m. N. Oban.

Ganchow-foo, tn., China. See **Kanchou.**

Ganchu's, vil., W. Africa, on the r. bk. of the Congo, in 3° 18′ S., 16° 23′ E.

Gand, French form of **Ghent.**

Ganda, tn. in the Golo country, E. Africa, in 7° 43′ N., 26° 52′ E.

Gandak, Great, Nárâyani, or **Salgrámi,** the *Kondochates* of the Greeks, riv., Brit. India, NW. Provs. and Behar, rises in the Nepál Himálayas, flows SW. till it crosses the frontier, then SE. on the border of or through the NW. Provs., finally entering the Ganges just opposite Patná. Floods often inundate large tracts on either side. Its lowest discharge is 10,391 cubic ft. per second; the highest recorded flood volume 266,000 cubic ft. per second. During the rains boats can make their way up to Lálganj (about 25 m.), beyond which point it is navigable with great difficulty, never fordable, and full of rapids and whirlpools. Rafts of timber come down from Nepál.

Gandámak, or **Gundamuk,** vil., Afghanistan, 28 m. W. Jalálabad. Here the last survivors of the British force escaping from Kábul in 1842 were massacred, one man alone escaping; and here in 1879 the treaty was concluded by which a rectification of the British Indian frontier on the side of Afghanistan was agreed on.

Gándara, comm., Sámar I., Philippine Is. P. 9000.

Gandáva, fortified vil., Baluchistan, 63 m. WNW. Jacobábád; political cap. of Kachhi Prov. See **Kachh Gandáva.**

Gandáva Pass. See **Mula Pass.**

Gander, lake, two rivs., and a bay, Newfoundland. **Great** (or **Big**) **Gander Lake** extends for about 40 m. from WSW. to ENE. in the NE. of the island, is fed by the **Main Gander R.** and the **South-West Gander R.,** both of which flow from the SW., and is drained NE. into **Gander Bay,** an inlet in 54½° W.

Ganges, tn., France, dep. Hérault arr. and 24 m. NNW. Montpellier, 7 m. SE. by E. Le Vigan. P. <5000.

Ganges (Sanskrit *Gangá,* 'river'), the principal and most sacred river of India. It issues from a Himálayan ice-cave near Gangotri, in the state of Garhwál, at the height of 13,800 ft., breaks through the southern chain of the Himálayas, and enters the plain just above Hardwár, becoming navigable almost as soon as the plain is reached, and flows eastwards and southwards to the Bay of Bengal. On the left it receives from the Himálayas the Gumti, Gogra, and Gandak (Gunduk), and on the left the Jumna. The only great tributary which it receives directly from the southern tableland is the Son, but the Jumna receives from these highlands two great feeders—the Chambal (Chumbul) and the Betwa. Before entering the Bay of Bengal it unites with the Brahmaputra to form one great delta, the largest in the world. [**Delta.**] The principal mouths of this delta in the order from W. to E. are the Húglí, (Hoogly) Matla, Raimangal, Haringháta or Baleswar, and Meghná. The greatest discharge of the G. in time of flood above the delta is above 1,800,000 cubic ft. per second; its smallest discharge at low water sinks to about 45,000 cubic ft. per second. (Compare **Mahánadi.**) In the G. basin the heavy rainfall of the rainy season is gradually carried off by the numerous rivers flowing across a gently sloping plain, and hence the river remains near its highest level for three weeks. During the dry season, again, the G. and its numerous Himálayan tributaries are constantly replenished with water from these mountains, their water having partly fallen as rain on the Himálayan slopes, and partly due at certain periods of the dry season to the melting of the Himálayan snows. Every year more or less devastation arises from floods and shiftings of the river-bed, due to floods in the G. valley [**Goálánda**]. These floods, however, are of importance in the cultivation of such crops as rice, which require great quantities of water in certain stages of their growth, and the fine silt which floods spread over the surface forms a soil of unsurpassable fertility. Hence, in the valley of the G., 'embankments are in few places required to restrain its inundations. . . . If one crop be drowned by the flood, the cultivator calculates that his second crop will abundantly requite him' (Hunter). The Húglí is the most important channel of the delta for navigation, being ascended by ocean-going vessels to Calcutta, 80 m. from the mouth. Higher up the navigation is almost confined to native craft, railway competition, together with the increasing shoals in the river, having put an end to the steamer traffic which was carried on as high as Allahábád down to about 1860. Cargoes are principally brought down stream, and during the rainy season, the boats often returning unloaded during the rest of the year. Among the products carried down in different parts of the course are timber from the Bijnaur forests, destined for Agra and Delhi, and by the Rámgangá and Garra Rivers for Farukhábúd, Cawnpur, and Allahábád; grain and oil-seeds, salt

cotton, stone (from the Mirzapur dist.). The sacredness of the river attracts countless numbers of Hindu pilgrims to bathe in it and various particularly sacred spots, above all at the confluence of the Jumna and G. at Allahábád. Length (according to the contour map of India, Calcutta, 1886), 1455 m.; area of basin, 397,300 m.

Ganges Canals, Upper and **Lower,** system of canals irrigating a large part of the Great Doáb (between the rivers Ganges and Jumna) from Hardwár in the N. (where the Upper G. Canals derive their supply) to a point on the Jumna a little above the confluence of the Betwâ. The original Upper G. Canal was opened in April 1854. The total length is now upwards of 1000 m., but varies as new branches are opened or old ones closed up. About 400 m. available for navigation. Area irrigated about 1800 sq. m.

Gangi, comm., Sicily, prov. Palermo, 23 m. NNE. Caltanissetta. P. 13,800.

Garcia Hernández, comm., Bohol I., Philippine Is. P. 5800.

Gard, riv., France, dep. G., formed by the union of the Gardon d'Anduze and the Gardon d'Alais, and flowing on the whole SE. into the Rhone, which it enters (r. bk.) a short distance above Beaucaire. The G. is subject to terrible floods. At Collias, below the confluence of the Alzon, the discharge, for ten months of the year, is from 210–1400 cubic ft. per second, sometimes in flood 141,000 cubic. ft. Length, about 85 m.

Gard, southern dep., France, partly bounded on the E. by the Rhone, and on the S. by the Mediterranean; divided into four arrs., Nîmes (cap.), Alais, Uzès, and le Vigan. From the Cevennes (here crossed by the railway connecting the valleys of the G. and Allier), which occupy the W. and N. of the dep., the surface slopes rapidly towards the plains of the Rhone and the sea. The culminating point of the dep., l'Aigoual, has an alt. of 5140 ft. The Mediterranean coast is bordered by sand-dunes, behind which stretch numerous marshes. By far the greater part of the dep., except a small portion in the extreme W., belongs to the basin of the Rhone, the principal affluents of which in the dep. are the Ardèche, forming part of the northern boundary, the Cèze, and the G. (the basin of which forms the dist. of Gardonnenque), which all enter from its right bank. Two small rivers, the Vidourle and Vistre, traverse the SW. of the dep.; the former communicates with the sea by the Grau-du-Roi. The climate is mainly of the Mediterranean type. Principal cereals, wheat and oats. The vine occupies nearly 8 per cent. of the surface: before 1875—since when the vineyards have been devastated by the phylloxera—nearly double that. The production per acre, nearly twice the average in France. The production of mulberry leaves and cocoons is the highest in France. In the NW. of the dep. are the rich coal-mines of Bassèges and Grand-Combe, forming together the Alais basin, which ranks in respect of the quantity of coal produced next after those of Valenciennes and the Loire. Lignite is worked in the Bagnols and Barjac basins in the NE. of the dep. Iron ore is also produced and smelted. Alais, Bessèges, Nîmes, and their environs abound in iron and copper works. Alais is also the principal centre of the silk industry. Anciently part of the Roman Provincia, G. afterwards became subject to the Carlovingian kings and the counts of Toulouse. In 1229 Nîmes and Beaucaire became royal towns. Area, 2270 sq. m. P. (1891) 419,388. See **France,** table.

Gard, Pont de. See **Nîmes.**

Garda, Lake of (*Lacus Benacus*), the largest lake of northern Italy, between 45° 26′ and 45° 56′ N., 10° 35′ and 10° 50′ E., enclosed by the provs. Verona, Mantua, and Brescia, and the circle Roveredo, Tirol. Its banks are bold on all sides except the S., where the penin. of Sirmio extends into it. At its N. extremity it receives the Sarco R., and at its SE. end it discharges itself by the Mincio into the Po. Near its E. shore the battle of Rivoli was fought in 1796. Length, N. to S., 35 m.; breadth, 2–10 m; area, 141 sq. m.; greatest depth, 960 ft. Alt. 215 ft.

Garda, in French **Cap de Garde,** cape, Algeria, at the NW. of the Gulf of Bona; has a fort and lighthouse.

Garnkirk, vil., Scot., NW. Lanarkshire, on the C. R., 5½ m. WNW. Airdrie; has fireclay works. P. (including Crow Row and Heathfield)<750.

Garnqueen and Glenboig, united vil., Scot., Lanarkshire, 2½ m. NW. Coatbridge. P.<1500.

Gáro (formerly spelt also **Garrow**) **Hills,** mountainous dist. on the W. frontier of Assam, Brit. India, to the S. of the Brahmaputra; the mountains in the form of long even ridges, with deep valleys between; highest summit, 4650 ft. The mountains, except on the rare spots annually cleared for cultivation (on what is here known as the *jûm* system), are densely clothed with forests, including great quantities of the valuable sál tree, but at present too remote from the means of communication to yield much profit. The Gáros are a robust and active race, of middle height, and dark brown colour. Strangers are liable to fevers of a malarious type.

Garonne, the ancient *Garumna* (probably equivalent to the Gaelic *garvan, garbh amhainn,* 'rough river'), riv., France, rises in the Pyrenees (on the Spanish side), flows NW. then NE. to Toulouse, then on the whole NW. again to its confluence with the Dordogne to form the estuary of the Gironde. Its chief affluents are (r. bk.) the Ariège, Tarn, and Lot; (l. bk.) the Save, Gers, and Gélise. The mean discharge at Tonneins amounts to 23,275 cubic ft. per second, which in flood becomes 350,000–370,000, or, occasionally, 420,000 cubic ft. per second. The G. is officially regarded as floatable downwards from Pont-du-Roi to Boussens, navigable from Boussens to Toulouse. Really navigation commences at Toulouse, where the river is connected with the Mediterranean by the Canal du Midi. Even below Toulouse navigation is carried on mainly by the lateral canal, which follows the r. bk. of the river from Toulouse to Agen (with a branch from Montech to Montauban), and the l. bk. from Agen to Castets, where it rejoins the river a little above the place where the G. makes its last turn to the NW. by N. Total length of canal, 120 m. (including 6½ m. for the branch to Montech). Large ocean vessels ascend the river itself to Bordeaux. Total length of river, excluding the estuary of the Gironde, 355 m.; including that estuary, 400 m. See **France,** rivers.

Garonne, Haute-, dep. in the SW. of France, bounded on the S. by one of the highest portions of the Pyrenees; divided into four arrs.: Toulouse (cap.), Muret, Saint-Gaudens, and Villefranche-de-Lauraguais. The dep., densely mountainous in the extreme S., culminates in Mont Perdiguère (alt. 10,560 ft.), one of the numerous summits which rise round the town of Bagnères-de-Luchon and the magnificent valley of Larboust. Between the crests of these mountains, *ports,* or passes, open, the most frequented of which is the Port de Vénasque, through which runs the road from Bagnères-de-Luchon to the Spanish town of Vénasque (Benasque). The central region of the dep. is formed by a series of Tertiary plateaux and hills, monotonous in aspect, but mostly cultivated, and varying in height from 1150–1500 ft. The whole dep. is drained by the G., the chief affluents of which in the dep. are the Pique and Save (l. bk.), the Salat, Ariège, and Hers (r. bk.). The Saint-Martory irrigation canal is on the G., 20 m. below St. Gaudens. As to climate, see **Toulouse.** The Pyrennean Mountains and those near the r. bk. of the G. are generally bare almost to the base. The valleys, on the other hand, are very fertile, and magnificent pastures varied by fields of oats, maize (called *milloc* in the district), and excellent beans, border the G. The vine covers more than 8 per cent. of the surface, but the production per acre is small. Among minerals a considerable quantity of rock-salt is produced. The marbles of Saint-Béat rival those of Carrara. The dep. is rich in mineral springs, the most frequented being those of Bagnères-de-Luchon, Encausse, and Ganties. After the overthrow of the last bulwark of Roman civilisation towards the close of the 6th century, the basin of the G. passed first to the duchy then to the kingdom of Aquitaine. From 850–1249 Toulouse was the cap. of a powerful county, which in the latter year was practically united to the kingdom of France. Area, 2458 sq. m. P. (1891) 472,383.

Gaz, Persia. See **Gez.**

Gaza, place named in O. and N. T. See **Ghuzzeh.**

Gaza, small isl., Austria, Istria, 8 m. NW. by W. Pola.

Gaza-land, large terr. in SE. Africa, W. of Sofala and Inhambane. The greater part of Gaza-land lies within the Portuguese sphere of influence (prov. of Lourenço Marquez), but the fertile districts of NW. Gaza-land belong to the British possessions. Rivers: Sabi, Gorongoza, Bozi, and Shengane. The eastern parts of the country are low, the north-western mountainous (max. alt. 5000 ft.). Many parts of Gaza-land are fertile, but the vast plains S. of the Sabi R. are often impassable on account of the scarcity of water. Inhabitants: various Bantu tribes, chiefly engaged in pastoral pursuits. (See *Proc. R. G. S.*, 1891, pp. 588–591.) [**H. G. S.**]

Gazeley, par., Eng., Suffolk, Stowmarket div., 5 m. E. Newmarket, 2 m. SW. Higham stn., PM.O.; 5918 ac. P.<1000; eccles. par. (**G. with Kentford**) P.<750.

Gazelle Hafen, Ger. New Guinea, in about 6° 36′ S., 155° 1′ E.

Gazelle Peninsula. See **Bismarck Archipelago.**

Gazimur, silver and lead works, Russia, E. Siberia, govt. Transbaikalia, 71 m. NW. of Nerchinskiy Zavod, on Gazimur R., l. bk. trib. of Arguñ, which flows from the Gazimur Mts.

Gaz Kul. See **Victoria Lake** and **Yarkhun,** riv.

Gazost, comm., France, dep. Hautes-Pyrénées, arr. Argelès, cant. Lourdes; has mineral springs. P.<2000.

Gazzalhátti ('the Elephant Track'), pass, India, Madras Presidency, in 11° 33′ N., 77° 3′ E., formerly the principal pass from Coimbatore into Mysore. The head of the pass is 17 m. from the Mysore frontier. Alt. 2800 ft.

Gazzuolo, comm., Italy, prov. and 11 m. W. Mantua, dist. Bozzolo. P.<5000.

Gcalekaland, or **Galekaland.** See **Transkei.**

Gcalekas, tribe. See **Galekas.**

Gdov, dist. tn., Russia, govt. and 142 m. SW. of St. Petersburg, on Lake Chudskoye. P.<3000.

Gealug, native name of Friday I., Brit. New Guinea.

Geanies, Lower, P.O., Scot., 4 m. from Fearn, Ross-shire.

Géant, one of the principal summits of the Pennine Alps, in the range of Mont Blanc. Alt. 13,180 ft. The **Col** (or pass) **du G.,** leading S. from Chamonix to Courmayeur, is 11,145 ft. high. In the neighbourhood of the pass a few hundred head of the Alpine ibex are preserved by the King of Italy.

Geashill, par. and tn., Ire., E. King's co., bars. G. and Upper Philipstown, 7½ m. ESE. Tullamore, 2½ m. from stn. on the Tullamore and Portarlington Rly., PM.O. Par. 43,299 ac., P.<4500; tn. P.<250.

Geashill, bar., Ire., in the S. of King's co.

Geauga, co., U.S., Ohio, in the NE., to the N. of 41° N., bounded in the E. by 81° W.

Geba, place named in O. T. See **Jeb'a.**

Geba, riv., W. Africa, Portuguese Guinea, flows W. into the Atlantic Ocean, which it enters by a wide estuary (in which are the island and town of Bissao) to the S. of 12° N. Also a Portuguese station on that river, in 12° 12′ N., 14° 37′ W.

Gebel, Arabic, 'a hill.' See *Jebel.*

Gebesee, tn., Prussia, prov. Saxony, 9 m. NNW. Erfurt. P.<3000.

Gebi, isl., Malay Archipelago, Jilolo passage, on the equator, in 129½° E.; about 26 m. long; average breadth, 3 m.

Gebirge, German, 'mountains.'

Gebize, tn., Asia Minor, near the N. side of the Gulf of Ismid, 28 m. SE. by E. Constantinople.

Gebweiler, in French **Guébwiller,** tn., Ger., Alsace-Lorraine, on the r. bk. of the Lauch R., 12 m. NW. by N. Mülhausen; has various textile manufactures. Alt. 880 ft. P. (1871) 11,350; (1890) 12,300.

Geddes, vil., U.S., New York, Ohondago co., on the Erie Canal, 5 m. NW. Syracuse; has extensive salt and iron works, potteries, &c. P.<4500.

Gedding, par., Eng., Suffolk, Stowmarket div., 7 m. SE. by E. Bury St. Edmunds, 3½ m. E. by S. Welnetham stn. P.<250.

Geddington, par., Eng., N. div. of Northamptonshire, 9½ m. N. Wellingborough, 2 m. SE. of its stn. on the M. R., PMT.O. P.<1000.

Gederah (of Judah and Benjamin), places named in O. T. See **Jedireh.**

Gederoth, place named in O. T. See **Katrah.**

Gedgrave, par., Eng., Suffolk, on Batley Creek, 2 m. SW. Orford. P.<250.

Gedik, Turkish 'col,' 'mountain-saddle.'

Gediz, tn., Asia Minor, near the source of the Gediz-Chai, 82 m. S. by E. Brussa.

Gediz-Chai, or **Sárabat,** rises on the E. side of the Ak-Dagh, and flows on the whole W. into the mouth of the Gulf of Smyrna, which it now enters in 38° 37′ N. Formerly it entered that gulf on its N. side, but as its deposits were blocking up the access to Smyrna, its course was diverted into a still older bed in 1886.

Gedling, par., Eng., Nottinghamshire, Rushcliffe div., 3 m. ENE. Nottingham, with stn. (**G. and Carlton**) on G. N. R., P.O. P.<750; eccles. par. (**G. with Stoke Bardolph**) P.<1500.

Geneva, the westernmost cant. of Switzd., is composed of the former republic of Geneva and part of the co. of Gex in Savoy. The pop. is generally of French extraction, and is almost equally divided between Protestant and Roman Catholic. Principal towns, Geneva (the cap.), Carouge, and Plainpalais. Area, 108 sq. m. P. (1888) 105,509. See **Switzerland,** table.

Geneva (French *Genève*, Ger. *Genf*, Italian *Ginevra*, probably from the Celtic root *gen*, *genau*, 'mouth'), tn., Switzd., cap. cant. same name, 85 m. SW. Bern, on the Rhone, at its outlet from the W. extremity of the Lake of Geneva. Lat. of observatory, 46° 11′ 58″ N.; long., 6° 9′ 11″ E. G. has a Gothic cathedral, a university academy, founded by Calvin in 1568, a school of arts and manufactures, public library, and a large collection of curious MSS., botanic garden, observatory, museum of natural history. The Rhone divides the town into two parts; the smaller portion on r. bk. is called the *Quartier St. Gervais*, the principal seat of trade. Between them is 'the island,' a favourite promenade, connected with the town by several bridges, and containing a statue of J. J. Rousseau. Above the island a fine bridge with twelve arches spans the whole width of the Rhone. Hydraulic machinery supplies the public fountains as well as motive-power for G. and adjoining towns. The principal manufactures are watches, musical boxes, chronometers, mathematical instruments, jewellery, cutlery, fire-arms, and musical instruments. Few towns of its extent have produced, or adopted, so many learned men as Geneva. Among these are Calvin, Beza, Cranmer, Lesage, Saussure, de Luc, Lefort, Neckar, and Jean Jacques Rousseau. John Knox, the Scottish Reformer, was long a resident here. It was one of the chief towns of the Allobroges in the times of Cæsar, was subject to the Romans till the beginning of the 5th century, cap. of the second kingdom of Burgundy till 1034, and was under the sovereignty of the Emperor of Germany till the beginning of the 16th century. Calvin introduced the Reformation here in 1535, and from that time G., a free city, was considered the chief seat of Calvinism. It was taken by the French in 1798, and formed, till 1813, cap. of the dep. Leman in the French Empire, under Napoleon I. In 1814, along with a small terr., it joined the Helvetic Confederation. Alt. 1335 ft. Mean temp., yr. 49.2° F., Jan. 32.5°, July 66.7°; rfall. (50 yrs.), 32.13 in. P. (1860) 41,400; (1888) 52,600; with **Plainpalais** and **Les Eaux Vives,** 72,800.

Geneva, Lake of, or **Lake Leman** (Ger. *Genfer-see*, ancient *Lacus Lemanus*), lake of Europe, between Switzd. and the French prov. of Haute-Savoie. It is crescent-shaped; length, 45 m.; breadth, 1½–9 m. The lake is traversed by the Rhone from E. to W., and receives the Dranse, Venoge, and other small rivers. Owing to the superior density of the Rhone water to that of the lake, the river at once sinks on entering, and has hollowed out a subaqueous bed, which has been traced near the S. shore of the lake for nearly 4 m. Its waters have a peculiar deep blue colour, are transparent, and contain a great variety of fish. It is never wholly frozen over, and is subject to *seiches*, or remarkable risings of from 1–4 or 5 or even 6 ft., which are explained by Forel as due to a long or a progressive wave being reflected from the shores of the lake, and giving rise by interference of the primary and reflected waves to stationary or oscillatory waves. Observations made at Vevey have shown that the rise and fall on such occasions indicate two regular oscillations, the duration of the quicker of which is about 35¼ minutes, that of the longer nearly twice as long. The original wave is ascribable to some local shock, such as a sudden gust of wind, a landslip or avalanche, or an earthquake. The greatest *seiches* are observed when the atmospheric pressure is low and variable. The banks of the lake are highly picturesque, the S. bold and lofty, the N. undulating and richly cultivated. Steam navigation was introduced on it in 1823. The *bise*, or NE., and the *bornand*, or SE., wind are regarded as dangerous to shipping. Area, 223 sq. m. Mean alt., 1230 ft.; mean depth, 500 ft.; greatest depth about midway between Lausanne and Evian, 1015 ft. See F. A. Forel, and *Le Léman*, Vol. I., Lausanne, 1892.

Genoa, Italian **Genova,** French **Gênes,** ancient *Genua* (probably of the same root as Geneva), a fortified seapt. city of the kgd. of Italy, cap. prov., at the head of the Gulf of G., Mediterranean, 79 m. SE. Turin. At present it is connected by rail with Piedmont only by the line ascending by the Giovi Pass and passing thence to Novi and Alessandria [**Apennines, A.**], but a line further W., crossing the Apennines by a tunnel and passing by Ovada and Asti to Turin, is now (1893) in progress. Lat. of lighthouse, 44° 24′ 18″ N.; long., 8° 54′ 24″ E. Climate subject to great vicissitudes, the NW. wind (*tramontane*) cold and biting, and the SW. warm and humid. The port, protected seaward by moles (the old and new), on the latter of which is a lighthouse 300 ft. high, is surrounded landward by the city, which rises like an amphitheatre out of the water, being situated on the ridges of hills, and enclosed by two series of walls; the whole embraced by a line of detached forts and outworks, crowning the hills for a circuit of about 7 m. In the older part of the city the streets are steep and very narrow. Among its principal edifices are the Doria-Pamfili, the Royal, Ducal, Brignole, Durazzo, Serra, Spinola, Balbi, Pallavicini, and numerous other palaces, all rich in choice works of art; the cathedral, a Saraceno-Gothic structure; numerous other handsome churches; and the university (founded in 1775), with a library and botanic garden. It is an archbishop's see, and has a royal college, a naval school, and important manufactures of maccaroni and vermicelli, thrown silk, machinery, paper, oils, metals, earthenware, artificial flowers, &c., with marble, alabaster, and coral works. The building of iron and steel ships, torpedo-boats, and locomotive engines is carried on at the suburb of Sampierdarena, and there are other large iron-works at Sestri and Rivarolo. The harbour affords ample water space, and there is a depth of 25–26 ft. of water at the quays (in all 20,000 ft. long), but the development of the port is still hampered by the want of proper docks for the prompt discharge and sorting of cargoes. There are three dry docks (the largest 720 ft. long, 27.9 ft. deep on sill) besides a floating dock 321 ft. long at the bottom, with a lifting power of 3500 tons. The total value of the imports, £17,000,000 to £20,000,000; of the exports, £3,500,000 to £5,000,000. (See **Italy,** foreign commerce). From the 11th down to the 18th century G. was, with some interruptions, the capital of a commercial republic, which planted numerous colonies in the Levant and on the shores of the Black Sea. It was taken by the French in 1797, and ceded to the King of Sardinia in 1815. Mean temp. (15 yrs.), yr. 60.0° F., Jan. 45.5°, July 75.4°; mean rfall. (1833–91), yr. 51.3 in., Oct.–Nov. 15.4 in. P. (1871) 130,300; (1891) 212,000.

Georgia, Russian **Gruzlya,** ancient *Iveria,* a state which, together with Imeretia, Mingrelia, Kakhetia, and Guria, now forms part of Russian Transcaucasia, govts. Tiflis and Kutais. The Georgians, who call themselves *Kartli,* and are named *Guri* by the Persians, are divided into three stems: Georgians proper, Mingrelians and Imeretians, Lazes and Svanetes. In the 3rd century they constituted a mighty state, and under King Vakhtang (466–99) they conquered Mingrelia, Abhasia, Erzerum, and Tiflis. This state lasted till 1424, when it divided into three parts: Imeretia, Kartalinia, and Kakhetia. In 1800 the ruler of the two latter became a vassal of Russia, and after his death, in 1810 Georgia, and later on (1838) Imeretia, were incorporated into the Russian Empire.

Georgia, one of the original thirteen United States, has a coast-line on the Atlantic of 128 m., between S. Carolina and Florida, with an area about that of England and Wales; cap. Atlanta; other chief towns, Savannah, the chief port, Augusta, Macon, and Columbus. Off the coast are numerous well-wooded islands. The surface rises from the coast to about 5000 ft. in the NW., and presents three great natural divisions, known as Lower, Middle, and Upper G. Lower G., covering more than half the state, comprises first the littoral belt, about 20 m. in breadth, mean elevation 12 ft., with numerous swamps, of which the most noted is the great Okefinokee swamp in the S. More inland is the belt of pine-barrens and sand-hills, the land rising by slight gradations to less than 600 ft. at a distance of 140 m. from the coast. Middle G., or the Hill country—a broad plateau in the S., breaking up into ranges of hills in the N.—stretches inland for 60 or 70 m. to the Appalachian foot-hills; mean elevation, 1000 ft. Upper G., covering an area of about 10,000 sq. m. in the NW., contains the last elevations of the Appalachian system. The chief rivers are Savannah, on the Carolina frontier; Ogeechee, and Altamaha, flowing SE. to the Atlantic; and Chattahoochee, on the Alabama frontier, to the Gulf of Mexico: all navigable after leaving the Hill country, where they form falls [**United States,** physical features]. As regards **geological** structure, Tertiary and Quaternary deposits cover the lowlands; Archæan and Palæozoic rocks predominate in the NW.; and Cretaceous rocks in the W.; a belt of Crystalline and Metamorphic rocks traverses the N. and middle of the state. The **climate** is sub-tropical, and very unhealthy on the coasts and islands, where malarial diseases prevail during the summer; the pine-barren district is healthier and, advancing inland, the climate becomes more bracing and salubrious with elevation [**Augusta, Savannah, Tybee Island**]. **Agriculture** is the leading industry, the staple product being cotton, cultivated extensively on the sandy soils of the S. and W. and of the Central and N. parts; the production of long-staple cotton, for which the islands are famous, has of late decreased. Rice and sugar-cane are grown to a small extent in the lowlands. The **minerals** include coal, worked chiefly in Dade county,

the beds being a continuation of the Alabama coalfield; considerable deposits of brown hematite and other iron ores occur; marble, first quarried in 1885, is extensively worked, chiefly in Pickens county; granite in Dekalb county; slate, emery, and graphite are also found. Forests cover large areas, and supply annually more than 200,000,000 ft. of timber; the principal trees are the live oak and the yellow pine, the former found chiefly in the SE. The leading **manufacture** is that of cotton, employing about 10,000 persons (the chief centres at present are Atlanta, Augusta, and Columbus), and now rapidly extending, but the fabrics made are chiefly of the coarser kinds; and the air in the present manufacturing centres (near the coalfields or where the falls afford water-power) does not seem to have the requisite humidity for the spinning and weaving of the finer class of goods. Other manufactures are woollens, steel, and iron; there are also large flour and lumber mills. The Indians formerly inhabiting this region were the Cherokees and the Miscogees. The first white settlement was founded by General Oglethorpe in 1733 as a refuge for debtors and other distressed persons, and named after George II. Within a few years parties of Methodists were brought over by the Wesleys and Whitefield. Area, 59,475 sq. m. P. (1890) 1,837,353. See **United States,** table. [**E. J. H.**]

Georgia, South, isl., in S. Atlantic Ocean, crossed by 54½° S., 37° W. Mean temp. (1 yr.), yr. 34.9° F., Feb. 42.2°, July 28.3°.

Georgia, Strait of, channel, N. America, separates Vancouver I. from the mainland, in 49° N. and 124° W.; average breadth, 20 m. It communicates with the Pacific, N. by Queen Charlotte Sound, and SW. by the strait of Juan de Fuca.

Georgiana, co., New South Wales, crossed by 34° S., and on the E. touching 150° E.

Georgian Bay, large sheet of water, Canada, Ontario, on the NE. of Lake Huron.

Georgiaville, vil., U.S., Rhode I., Providence co., on Woonasquatucket R., 7 m. NW. Providence. P.<1500.

Georgievsk, dist. tn., Russia, N. Caucasia, govt. Terek, 23 m. NE. of Pyatigorsk railway stn. Alt. 996 ft. P. 10,700.

Georgina, or **Sutton,** vil., Canada, Ontario, co. York, near Lake Simcoe, 56 m. by rail N. Toronto; a favourite summer resort. P.<1500.

Georgitsion (yoryitsi), vil., Greece, Laconia, 11 m. NW. Spartē, 40 m. SW. Argos, in comm. **Pellanē.** P.<2000; P. (comm.)<5000.

Georg-Marienhütte, comm., Prussia, Hanover, circle and 4 m. S. Osnabrück, with large mines of brown hematite, and smelting furnaces. P.<2000.

Gera, riv., Ger., flows through Gotha, Schwarzburg-Rudolstadt, Prussian Saxony, and Weimar, and joins the Unstrut 12 m. N. Erfurt, after a course of 38 m.

Gera, tn., central Ger., princip. Reuss, cap. lordship G., on the White-Elster, 35 m. SSW. Leipzig. It manufactures worsted fabrics, accordions, steel organs, machinery, sewing-machines, leather, leather gloves, ivory buttons, tobacco, porcelain, and carriages; and has dye-works, breweries, and brick-kilns. P. (1871) 17,900; (1890) 39,600.

Gerabronn, vil., Ger., Würtemberg, Jagstkreis, 47 m. NE. Stuttgart. P.<2000.

Gerace, tn., Italy, Calabrie, E. ct., prov. and 34 m. E. by N. Reggio; noted for its wine, known as *Lacrima di G.* P. 7700.

Geraci Siculo, comm., Sicily, prov. Palermo, 26 m. N. by E. Caltanissetta. P.<4000.

Geragh, P.O., Ire., co. Cork, 7 m. from Clonakilty.

Gerah El Gellif, salt lake, Algeria, prov. and SSE. Constantine, crossed by 35° 45′ N., and in the E. by 7° E.; bordered by Roman ruins. Area, 20 sq. m.

Gerakarion (*yera*—), vil., Greece, isl. of Zante, 7 m. WNW. Zante.

Geraki (*yera*—), cape, the SE. point of the isl. of Zante.

Gerakounia, isl., Greece. See **Falconera.**

Geraldine, postal-stn., New Zealand, South I., G. co., 18 m. N. Timaru. P.<1500.

Geraldine, old mining tn., W. Australia, Victoria dist., 290 m. N. by W. Perth. P.<1500.

Geralds Pass, Ire., in the E. of co. Armagh, 4½ m. NNW. Newry.

Geraldton, post-vil., Queensland, Nares co., 150 m. SSE. Cooktown; centre of the sugar-growing tp. of **Johnstone R.,** with well-sheltered harbour of fair depth at Mourilyan, 7 m. off.

Geraldton, port and mining tn., W. Australia, chief port of the Central or Victoria dist., on the W. ct., 230 m. NNW. Perth, in 28° 47′ S.; on the rly. from Northampton; now being extended to the Murchison goldfield. Has gold and lead mines, and exports wool, copper, and lead. Mean temp. (6 yrs., 1880–85), yr. 65.5° F., Feb. 74.6°, July 57.5°; rfall. (2 yrs.), 17.13 in. P.<1500.

Gerapetra. See **Kasteli.**

Gerar, place named in O. T. See **Umm el Jerâr.**

Gerard de Nys, or **Gardenay,** isl., Bismarck Archipelago, crossed by 3° 5′ S., 152° 38′ E.

Gérardmer, tn., France, dep. Vosges, arr. St. Dié, 23 m. W. Colmar; an important tourist resort in a lovely part of the Vosges, with hydropathic establishment. P.<3000.

Gerard's Bridge, stn., Eng., Lancashire, on the L. & NW. R., and the L. & Y. R., near St. Helen's.

Gerba, isl., Africa. See **Jerba.**

Gerbéviller, tn., France, dep. Meurthe et Moselle, arr. Lunéville, on the Mortagne, 7 m. S. by E. Lunéville. P.<2000.

Gerbi, or **Zerbi,** isl., Tunis. See **Jerba.**

Gerbier de Jonc. See **Loire,** riv.

Gerbstädt, tn., Prussia, prov. Saxony, 8 m. NE. by N. Eisleben; has copper and silver mines. P.<5000.

Gerdauen, tn., Prussia, prov. E. Prussia, cap. circle, 40 m. SE. by E. Königsberg. P.<3000.

Gerels, vil., Egypt, on the r. bk. of the Rosetta mouth of the Nile, 27 m. NW. Cairo.

Gerez, Sierra de, mt. chain, Portugal, partly on the border of the Spanish prov. of Galicia, between the basins of the Douro and Minho, W. of Montalegre; length, N. to S., 18 m.; is composed of a succession of granite peaks. The culminating point is 4740 ft. high. In 1809 the retreating French army passed through a gorge forming one of the passes of this chain.

Gerga, tn., Egypt. See **Girgeh.**

Gérgal, tn., Spain, prov. Almeria, 18 m. NNW. Almeria; has alum mines and mineral springs. P.<4000.

Gergovie, small basalt-crowned mt., France, dep. Puy-de-Dôme, 4 m. SSE. Clermont, celebrated as having been successfully defended by Vercingetorix against the troops of Julius Cæsar.

Gerica, comm., Spain, prov. Castellón, dist. Viver. P.<4000.

Geringong, New South Wales. See **Gerringong.**

Geringswalde, tn., Ger., kgd. Saxony, 17 m. N. Chemnitz. P.<3000.

Gerizim, mt. named in O. T. See **Jebel et Tôr.**

Gerlan, P.O., Wales, Carnarvonshire, near Bangor.

Gerlingen, vil., Ger., Würtemberg, circle Neckar, 2 m. E. Leonberg. P.<3000.

Gerlogubi, watering-place for cattle, with numerous never-failing wells, E. Africa, Somali-land, Ogadain prov., in about 6° 50′ N., 44° 55′ E.

Gerlos, high valley, Austria, Tirol, opening opposite Zell. In it is the **G.-Wand.** Alt. 7050 ft. The G. Pass joins the Inn valley (Tirol) with the upper Salzach valley (the Pinzgau) at the W. end of the crownland of Salzburg.

Gerlsdorf Spitze, in Hungarian **Gerlachfalva,** highest summit of the Tatra Mts., Hungary. Alt. 8735 ft.

Germade, comm., Spain, prov. Lugo, dist. Villalba. P.<4000.

German, par., Isle of Man, including the town of Peel.

German, tn., isl. Porto Rico, 70 m. WSW. San Juan. P. 9200.

German East Africa, Ger. colony in Equatorial E. Africa, between the Portuguese and British spheres of influence. It includes the coast from the Rovuma R. (10° 30′ S. lat.) to Wanga (4° 40′ S. lat.). In the interior the boundary line runs along the Rovuma to the Msinje valley, thence to Mbampa on Lake Nyassa, and along the NE. and NW. shores of this lake to the mouth of the Songwe R., from there to the mouth of the Kilambo R., Lake Tanganyika, and along the E. shore of this lake to the mouth of the Ruzizi R., whence it is continued to the intersection of 30° E. long. and 1° S. lat.; from this point to the E. coast, see **British East Africa.** To this terr. we have to add the island of Mafia. The coast has but a few small bays, viz., those of Mikindani, Lindi, Pangani, and Tanga. The coast-belt is low and flat, but in the interior the country is mountainous, forming widely extending plateaux, above which many isolated mountain groups rise to great altitudes (Kilimanjaro, 19,720 ft.; Meru, 14,630 ft.; Gelei, 13,780 ft.; Mbeye, 9800 ft.). Rivers (*a*) to Indian Ocean (none of them navigable): Umbekuru, Rufiji, Kingani, Wami, Ruvu; (*b*) to Lake Tanganyika: Malagarazi; (*c*) to Lake Victoria: Kagera, Isanga, Simiu. The climate of the coast-belt is oppressively hot, and unhealthy to Europeans; that of the interior is less dangerous, but unsuitable for European colonisation. Flora and fauna are those of tropical central Africa. The tsetse-fly (*q.v.*) occurs in the coast-area and some other districts. No other African country shows so great a variety of ethnological elements. We distinguish four groups: (1) Arabs, found everywhere in the trading places of the coast and of the interior; (2) Swahili (*q.v.*); (3) Nuba tribes, viz., Masai (*q.v.*), Wakwafi, and Wandorobbo; (4) numerous Bantu (*q.v.*) tribes, forming the great majority of the population. Arabs and Swahili are Mohammedans, the others pagans. G. E. A. is essentially an agricultural country but the fertility of the soil varies greatly, the central plateaux, between the great lakes and the E. coast, consisting mostly of sterile deserts and steppes, whilst the terrs. E. and W. of them are well watered and fertile (Jagga, Usambara, Usagara, Unyamwezi). Principal products: millet and other tropical grains, cassava, bananas, coco-nuts, areca-nuts, cloves, castor-oil, sugar-

cane, and various vegetables; and the Germans have successfully cultivated tobacco, cotton, and coffee. Cattle-rearing and sheep-breeding are likewise of importance. The commerce is considerable, the chief exports being ivory, gum-copal, hides, caoutchouc, tobacco, timber, grain, orchella, and copra; principal imports: textiles, spirits, iron-ware, and glass-beads. Principal trading places (*a*) on the coast: Bagamoyo, Kilwakivinji, Dar-es-Salaam, Pangani, and Tanga; (*b*) in the interior: Tabora, Ujiji, and Mpwapwa. The Germans took possession of various parts of the country in 1884 and 1885, and the present boundaries were determined by agreements with Portugal (1886), England (1886 and 1890), and the Sultan of Zanzibar (1890). The German government is represented by an Imperial governor. Area, 369,000 sq. m. P. estimated at 2,900,000. [**H. G. S.**].

German Empire, in German **Deutsches Reich,** situated in the centre of Europe, between 47½° and 56° N., and between 6° and 23° E. As regards area, the G. E. is the fourth state of Europe, and as regards population the second, only Russia having more inhabitants. It is made up of the states shown in the following table:—

STATES OF THE GERMAN EMPIRE.

	Area in sq. m.	Population in Thousands.[1] End of 1840.	Population in Thousands.[1] End of 1885.	Average per Cent. per Annum, 1840–85. Increase of Pop.	Excess of Births.	Loss or Gain(+) by Migration.	Population in Thousands, December 1, 1890. Total.	Protestants.	Roman Catholics.	Jews.	Pop. per sq. m., 1890.	Increase per cent. per Annum, 1885–90.

[1] These columns from *Statistik des deutschen Reichs, Neue Folge, Band* 44, p. 4.*

Superficial features.—The country slopes gradually towards the N., the highest parts being the southern dists., especially Upper Bavaria, to which belong some parts of the northern Alps. (See **Alps,** SUBDIVISIONS, **B. 4.**) Here the Algäuer Alps contain the Zugspitze (9710 ft.), the highest summit of the G. E. North of this range a large plateau, the *Oberdeutsche Hochebene,* extends between the Alps, the Bavarian Forest Mts., and the Jura. On either side of the Rhine plain in S. Germany [**Baden**] run a series of mountain ranges, viz., on the E. the Black Forest, Odenwald, and Spessart, on the W. the Vosges and Haardt. The Rhine leaving S. Germany forces its way through the Rhenish-Westphalian Mts., an extensive mountainous plateau divided into separate parts by numerous valleys. West of the Rhine are the Hunsrück, Eifel, and Hohe Venn, and east of it the Taunus, Westerwald (with Siebengebirge), and Sauerland. East of the Taunus rise the volcanic groups of the Vogelsberg and Rhöngebirge. The Hercynian Mts. form the great mountain system of central Germany. They comprise two ranges, the general direction of which is from SE. to NW., and several mountain-chains between them. The southern range consists of the Bohemian and Bavarian Forest Mts., the Fichtelgebirge, Thuringian Forest Mts., Werra Mts., and Teutoburg Forest Mts. The northern range commences with the Silesian Mts., called Sudetes proper. Then follow to the NW. the Harz Mts., the last offshoots of this northern range extending to the Leine and Weser. Between these two principal ranges rise the Erzgebirge and Lusatian Mts., connecting the Fichtelgebirge with the Sudetes proper. North of the Hercynian mountain system lies the vast *North German Plain,* extending to the North Sea and Baltic. This plain is, however, by no means a uniform lowland, but is interrupted by a number of elevations, the most important of which are two plateaus ('Landrücken'), viz., the Baltic Lake Plateau (*q.v.*), extending from E. Prussia to Jutland, and the Fläming and its offshoots, situated between the Oder and Elbe.

This great diversity in the orographical features of the G. E. has a favourable influence on the **hydrography** of the country. The G. E. has seven principal rivers, viz., the Memel, Vistula, Oder, Elbe, Weser, Rhine, and Danube. Although all of them, with the exception of the Weser, belong only partially to the

G. E., yet their total navigable length in German terr. amounts to not less than 5900 **m.** The number and mileage of canals is, however, limited, the latter amounting to 1490 m. The principal canals are the Finow and Müllrose Canal, by means of which a connection between the Oder and Elbe is effected; the Ruppin and Plauen Canals, important for the Havel navigation; the Steckenitz Canal, between Steckenitz and Trave; the Eider Canal, connecting the Eider with Kiel; and the Bremervörde Canal, from the Oste to the Hamme. A canal connecting the North Sea and the Baltic is in course of construction (see **North Sea** and **Baltic Canal**), and it is proposed to construct a canal connecting the Elbe at Lauenburg with the Trave at Lübeck. In S. Germany the most important canal is the Ludwigs Kanal, which effects a communication between Danube and Main.

Geology.—Almost all geological formations are represented in the G. E. Palæozoic rocks are largely met with in south and central Germany. The Silurian formation extends in Thuringia and the Harz Mts. Devonian rocks are of great importance on the Rhine, in Westphalia, and Nassau, in the Harz and Sudetes proper, and in various other parts of central Germany. About the Carboniferous formation, see afterwards under coal. Dyassic and Triassic rocks are found in the Vosges, Black Forest, Odenwald, and in central Germany. The Jurassic formations are of great importance in S. Germany. Cretaceous rocks are met with in Prussia, Saxony, Silesia and the Alps. Tertiary deposits occur in many parts of Prussia and S. Germany. Diluvial and alluvial deposits exist all over the country, especially in the N. German plain. Volcanic rocks are found in the Vosges, Black Forest, Hegau, Odenwald, Thuringian and Bohemian Forest Mts., Erzgebirge, Sudetes, Silesia, on the middle Rhine, and in other parts of central Germany.

The **climate** of the G. E. is moderate, and the gradual sloping of the country towards the north compensates for the difference of geographical latitude, and it is for this reason that we find pretty much the same climate all over Germany. The slight differences of climate which are noticeable refer less to the northern and southern than to the eastern and western parts of the empire, eastern Germany having more severe winters than western Germany. There are, however, pronounced local differences, due to altitude and exposure, as exemplified in the contrast between the mild climate of the lovely and fertile valleys of the Rhine, Moselle, Main, and Neckar, as contrasted with the inclemency of the surrounding highlands. The following table may serve for illustration. In all cases the mean temperatures are those of the 15 years 1870–84:—

MEAN TEMPERATURE, FAHR.

The rainfall also is fairly uniform, amounting on the average to about 27 inches—higher in mountainous dists., lower in plains and valleys on the sheltered side of mountains. The **flora** of the G. E. is that of central Europe. Among **animals** may be mentioned the stag, deer, hare, wild boar, wild cat, fox, and badger. Many wild animals, once common, have now almost or entirely disappeared: the ur or auerochs, the bison, and the lynx are no longer to be found, the elk and the beaver are very rarely met with, and the wolf is extinct everywhere, except in Lorraine, the Hunsrück, and the forests of eastern Prussia. Kites, buzzards, herons, snipes, partridges, and wild ducks are numerous. The rivers abound in fish. Agriculture is in a flourishing state. All kinds of cereals are cultivated, rye being the most important. In former times cereals were largely exported, but the population has so much increased that, in spite of the large proportion of arable land (48½ per cent. of the total area of the G. E.), large imports of rye, wheat, barley, and oats are necessary. Other objects of nature of importance are potatoes (⅛ of the total area of arable land), flax, and hemp (Hanover and Posen), tobacco (S. Germany, Thuringia, Silesia), sugar-beet (Anhalt and Prussia), hops of excellent quality (S. Germany and Posen). Fruits and vegetables are grown in enormous quantities, especially in central and southern Germany. The vineyards of Germany cover an area of not less than 300,000 ac. Celebrated are the vines grown in the valleys of the Rhine, Moselle, Main, and Neckar. Cattle-rearing is of importance in E. Frisia, Oldenburg, Mecklenburg, Pomerania, Thuringia, and in many parts of S. Germany. Horses are bred in all parts of the country, the best being those of Schleswig-Holstein, Mecklenburg, and E. Prussia. Sheep-breeding is of less importance than it used to be, and down to the present day Saxony and Silesia are renowned for the excellence of their wools. Fisheries are an important source of revenue in many inland dists., where salmon, trout, carp, silurus, and pike are the principal fish. Sea-fisheries are, however, but little developed. The same is the case with the oyster trade, 5000 tons of oysters being the maximum per annum. Twenty-five and a half per cent. of the total area of Germany is covered with **forests,** the cultivation of which is carried on with the utmost skill and diligence. They form a valuable source of revenue for many dists.

The **mineral productions** of the G. E. rank foremost among the countries of the continent of Europe. Silesia, the Lower Rhine dists., Saxony, and the Harz Mts. are the principal seats of the German mining industries. The Carboniferous formation yields almost inexhaustible quantities of **coal,** the production of which is next, among European countries, to that of the United Kingdom. (See **Appendix,** p. 14.) There are seven large coalfields, viz., that of the Ruhr dist. (Westphalia and the Rhine Prov.), the coal mines of Upper and Lower Silesia, those of south-western Germany (between Neunkirchen and Saarbrücken), the coal-measures of Aix-la-Chapelle and those of Saxony, near Potschappel and Chemnitz. Moreover, there are large deposits of Tertiary coal or lignite, especially on the Rhine, in Anhalt and in the Prussian provs. of Saxony and Brandenburg, the total output being about one-fourth of that of the true coal of the coal-measures per annum. Peat is found in the N. German plain as well as in the Rhön and Hohe Venn Mts. Iron ores are found at many places all over Germany, but only where coal occurs can they be worked at a profit. This is the case with the Rhenish-Westphalian iron ore deposits (in the dists. of Müsen and Siegen), and with the iron ores which are obtained near Wiesbaden and Wetzlar. Other iron ore deposits of great importance occur in Lorraine, W. of the Moselle. The total annual production of pig iron in Germany amounts to more than 3 millions of tons, only Great Britain and the U.S. of America producing larger quantities. Zinc ranks next in importance among the German mining industries. Zinc ores occur in Upper Silesia, in the Rhine Prov., and in Westphalia. The total production amounts to 120,000 tons of raw zinc per annum. The output of lead ores is 90,000 tons annually; the mines are situated in the Rhine Prov., Saxony, and Silesia. Copper is found in Mansfeld, Westphalia, Rhine Prov., Hesse, and the Harz Mts. About 18,000 tons are produced annually. Bismuth is obtained in Saxony, antimony in Thuringia, and quicksilver in Westphalia. Silver is of importance in Saxony, Mansfeld (*q.v.*), and the Harz Mts. About 500,000 lbs. are produced annually. The gold production of Germany is small, amounting to not more than 930 lbs. per annum. The salt production is of great importance; there are large deposits of rock-salt in Prussia, Bavaria, Würtemberg, and Lorraine. The potassium-compounds of Stassfurt are renowned all over the world, carnallite being the principal mineral which is exported in large quantities. Already in antiquity the German coast of the Baltic was celebrated for yielding amber, and to the present day the coast between Danzig and Memel is the principal amber-producing dist. of the world.

Manufacturing Industries have made rapid strides in the course of the present century. The northern slopes of the mountain ranges of central Germany are the seat of the large manufacturing dists. of the empire. The iron and steel works of Germany belong to the most important of the world. Westphalia, the Rhine Prov., and Saxony are celebrated in this respect. Next in importance rank the textile industries of Germany. The value of their annual production is estimated at £80,000,000. The manufacture of woollen textiles is of chief importance in the Rhine Prov., Saxony, Brandenburg, Silesia, and south Germany (including Alsace). The mountainous dists. of Silesia, Lusatia, Westphalia, and of the Harz Mts. are renowned for their linen industry. Cotton and silk goods are manufactured in large quantities in north-western Germany. Other manufactures are: paper, beet-sugar, glass-ware, earthen and china ware, chemical products, and machinery. Breweries and distilleries are of very great importance in many parts of the country, especially in Bavaria and in the north-eastern parts of Prussia.

Means of Communication.—The railway system of Germany is the best of the European continental states; it is carefully adapted to strategical, industrial, and commercial requirements. (See **Appendix,** pp. 4–5.) The inland and foreign **trade** of the G. E. has increased in modern times in gigantic proportions. Exports, especially such articles whose raw products are of German origin, are of very great importance. The trade with foreign countries is principally European. As regards Russia and Austria-Hungary, the imports exceed the exports; but in the trade connections of the G. E. with the western countries of Europe, the imports are far exceeded by the exports. The principal **exports** are iron and ironware, machinery, coal, textiles, paper, porcelain, potteries, glassware, and leather goods. The principal **imports** are cereals and timber. Since 1873 the metric system of weights and measures has been adopted by all the German states. The monetary system is on the gold basis. The unit of account is the mark (1 mark = 100 pfennige); but the standard gold coin is the 20-mark piece, $\frac{1}{2}$ fine, weighing 122.9179 grains troy gross, and 110.6268 grains fine; accordingly somewhat less in value than an English sovereign (113.0016 grains gross, fine weight). The value of the unit of account is about exactly 11$\frac{3}{4}$d. The G. E. is a confederation of the twenty-six states.

Government.—As regards their respective governments, these states are perfectly independent of one another. At the head of them is Prussia, the king of which is German Emperor. In this capacity he is the highest authority in military and political matters, and the international representative of the G. E. The legislative functions of the G. E. are in the hands of the *Bundesrath* (Federal Council) and *Reichstag* (Imperial Parliament). The Bundesrath consists of fifty-eight members, who represent the different states; it deliberates upon bills to be submitted to the Reichstag, and forms seven permanent committees—for war, navy, customs and taxes, commerce, railways, posts and telegraphs, and administration of justice. No change in the constitution of the empire is possible if vetoed by only fourteen members of the Bundesrath. The Reichstag consists of 397 members, who are elected by universal suffrage and ballot. The votes of the Reichstag are by absolute majority. The Emperor has the right to prorogue and dissolve the Reichstag; but no prorogation can last longer than sixty days, and in case of a dissolution the new general elections must take place within the same space of time. The only politically responsible minister of the G. E. is the Imperial Chancellor. He is at the head of the whole administration of the empire. The unity of judicial procedure since 1878 is one of the most important results of the establishment of the empire. The imperial **revenue** is derived from customs and excise duties, stamp duties, interests upon the 'fund for invalids,' profits on posts and telegraphs, and matricular contributions from the different states. The military service is obligatory on all. The duration of service with the colours is two years uninterruptedly, for cavalry and horse artillery three years (Army Act of 1893). The German navy is sufficient for the defence of the coasts and of the commercial and colonial enterprises of the G. E. The chief naval arsenals are at Kiel, on the Baltic, and at Wilhelmshafen, on the North Sea. The number of fortresses of the G. E. is comparatively limited, being in total only 38. They occupy, however, excellent and carefully selected positions, and are constructed in the most effective manner. Some of the most important fortresses are: Magdeburg, Spandau, Küstrin, Danzig, Cologne, Mayence, Metz, Strassburg, Rastatt, and Ulm.

The population of the G. E. consists of more than 45 millions of pure or mixed Germans (see **Historical Notes**), and 3$\frac{1}{4}$ millions of non-Germans. The Germans are divided into two groups, High Germans and Low Germans. The former comprise the Upper Saxons, Franconians, Swabians, and Austro-Bavarians; the Low German group comprises Frisians, Westphalians, and Lower Saxons. As regards the non-German inhabitants of the empire, there are 2$\frac{1}{2}$ millions of Poles in Posen and Silesia, 50,000 Czechs in Silesia, 150,000 Lithuanians in E. Prussia, 140,000 Wends in Lower Lusatia, 140,000 Danes in Schleswig, and 220,000 Frenchmen in Alsace-Lorraine. The German **language** is spoken by 55 millions of people in central Europe, and extends far beyond the political boundaries of the empire. High German is the language of literature, but there are numerous dialects, the most important being Low German, which is spoken by more than 10 millions of North Germans. **Religion.**—62.7 per cent. of the population are Protestants, 35.9 per cent. Roman Catholics, 1.2 per cent. Jews, and the remaining 0.2 per cent. belong to other creeds. **Education** in Germany is on the whole very good. It is on a higher level in central and south-western Germany than in many parts of Bavaria and Prussia. Everywhere the education of children between the ages of six and fourteen is compulsory. The pride of Germany are her 21 universities, with a staff of more than 1800 professors and '*privat-docenten*' (corresponding somewhat to what are known in Scotland as extra-mural lecturers), and attended by more than 20,000 students. In addition to the universities, numerous technical high-schools exist.

Historical Notes.—Nothing definite is known about the autochthonic population of ancient Germany. The first knowledge of a people called *Germani* was obtained by Pytheas of Massilia (4th century B.C.). At that time they occupied the country E. of the Rhine and N. of the Main. But shortly afterwards they pushed towards the S., subduing numerous Celtic tribes, and even threatening the Roman Empire (Cimbri and Teutones, 102 and 101 B.C.). At Cæsar's time German tribes had taken possession of a part of Gaul, but by his victory over Ariovistus, the Rhine became the boundary between Gaul and *Germania Magna*. The victory of Arminius in the Teutoburg Forest (9 A.D.), and the resistance of the Germans against the attacks of Germanicus (14–16 A.D.), made the majority of the German tribes independent of the Romans. The lower Rhine, however, and the country between the middle Rhine and the Danube (*agri decumates*) became provs. of the Roman Empire. In the course of the Peoples' Migration (4th and 5th centuries A.D.) many German tribes left their original abodes, and either perished or became completely Romanised; and about a century afterwards the Bavarians, Alemans, Thuringians, Saxons and Franconians were the only tribes inhabiting German terrs. At that period all the terrs. E. of the Elbe were subdued by Slav tribes. Charlemagne (768–814) was the first under whose reign the German race held the political superiority in western Europe, but under his successors only the eastern parts of the Carolingian Empire remained German, the western becoming completely Romanised. By internal feuds as well as by the invasions of Normans, Moravians, and Magyars the country suffered greatly. It is due to the Saxonian dynasty (919–1024 A.D.) that Germany made herself independent and respected by her neighbours. Henry I. (919–936) successfully repulsed the Magyars, and his son, Otto the Great (936–977), was the founder of Germany's greatness in the early part of the Middle Ages, by subduing the terrs. between Elbe and Oder, by completely vanquishing the Magyars, and by regaining the Roman imperial crown of Charlemagne. But the Italian policy of Otto the Great proved fatal to his successors, and internal feuds and external enemies reduced the power of the emperors. The Franconian dynasty (1024–1125) was especially unfortunate in this respect. Henry IV., a talented and gifted prince, found it impossible to fight at the same time the recalcitrant German nobility and the ambitious Italian clergy under the leadership of the energetic Pope Gregory VII. The emperor's disgraceful surrender at Canossa (1077 A.D.) was followed by the complete victory of the clergy under his successor, Henry V. (1106–1125). But a new era commenced with the Hohenstaufen dynasty (1138–1268). Their reign was the most illustrious period of the old G. E. Mighty emperors and warriors like Frederic I. (1152–90), Henry VI. (1190–97), and Frederic II. (1215–50) ruled over the G. E., which at that time extended from Sicily to the shores of the North Sea and Baltic. Arts, science, and literature flourished during the Hohenstaufen period, and the Crusades, although politically an entire failure, were of the utmost importance, by bringing occidental strength and power into contact with oriental art and learning. But the foreign policy of the Hohenstaufen dynasty proved fatal, as in former times: Germany was neglected, and the stubborn opposition of the Church to the Italian policy of the emperors was the ruin even of this powerful dynasty. Its fall involved the decline of the imperial power. From 1273 to 1806 the sovereigns of the G. E. were dependent on a number of German princes, the so-called 'electors,' whose sole aim was to limit as much as possible the imperial power, and to exercise a complete control over it. Under these circumstances the constitution became more and more oligarchic, and only very few of the emperors, like Sigismund (1410–37), were powerful enough to raise the authority of the imperial crown to something like the old standard. The history of Germany during this period is, however, of the utmost importance, from the fact that three events of universal importance took place in Germany during the 15th, 16th, and 17th centuries, viz., the invention of the art of printing by Gutenberg in 1450, the reformation of the Church by Dr. Luther (commencing 1517), and the Thirty Years' War (1618–48). The last-named event was the greatest calamity that ever befell central Europe. By this terrible war many parts of Germany were completely devastated, and the imperial power sank into insignificance during the 17th and 18th centuries. During this time **Prussia** (*q.v.*) came more and more into prominence. It was but natural that any political complication would be the death-blow to the old empire. This was the case when, at the beginning of the 19th century, the Confederation of the Rhine was founded under the protectorate of Napoleon I. The majority of the German princes seceded from the empire, and consequently the Emperor Francis II. resigned his crown on the 6th of August 1806. From this date to 1871 Germany was split up into a number of independent states, politically, with the exception of Prussia, more or less insignificant. But by the victorious war against France

(1870–71), and by Bismarck's genius, the new G. E. was created under the leadership of Prussia. On January 18, 1871, King William I. of Prussia was elected German Emperor. Since the establishment of the new empire Germany has acquired a number of colonies in Africa and in the Pacific Ocean. See **German East Africa, Kamerun, Damara-land,** and **Namaqua-land.** [**H. Gers, riv., France, rises in the Pyrenees, flows N. and enters the l. bk. of the Garonne above Agen. Length, nearly 106 m.; but except after long rain, a mere brook, muddy and neither navigable nor floatable.

Gers, dep., France, in the SW., formed from various dists. of Gascony. The general aspect of the valleys and watercourses of the dep. is that of an immense fan, having its centre of radiation in the plateau of Lannemezan, NE. of Hautes-Pyrénées, and W. of Haute-Garonne. The highest point in the dep. is not more than 1300 ft. Chains of hills, formed of Tertiary rocks and rising from calcareous clays, run from S. to N. of the dep., and do not entirely cease before the l. bk. of the Garonne is reached. Most of the water-courses descend to the Garonne, only two in the W. entering the Adour. All without exception are scantily supplied with water, the gravelly soil of the plateau of Lannemezan allowing too much of the surface water to be lost in the ground. The principal are the Save, Gimone, Gers, and Bayse, or Baïse. The climate is generally mild and agreeable; rain is very abundant; storms frequently accompanied by hail are much dreaded in spring and early summer. The principal cereals are wheat and oats. The vine occupies more than 15 per cent. of the surface, and the average production per acre is more than half that of France generally. Mineral productions are insignificant. From the 10th to the 12th century the dist. detached from the gd.-duchy of Gascony got divided into several cos., among which that of Armagnac became preponderant, and ended by securing all the other fiefs with the exception of Astarac. Its supremacy terminated in 1473 with the annexation of the county to the crown of France. Area, 2429 sq. m. P. (1891) 261,084. See **France,** table.

Gharbiye, or **Gharbieh,** prov., Lower Egypt, made up of the northern and larger portion of the area between the two main arms of the Nile Delta.

Ghardaia, Ghardeia, Gardaia, or **Rhardaia,** the chief tn. of the Mzab Confederation in the Algerian Sahara, built on the slopes of a dolomitic hill on the r. bk. of the Wadi Mzab, 85 m. WNW. Wargla, in 32° 29′ N., 3° 54′ E. Alt. 1800 ft. P. 28,800.

Ghar el Mela ('salt-mines'), European **Porto Farina,** tn., Tunis, at the N. side of an inlet now very shallow (3–5 ft.), but at one time forming an excellent harbour (a great resort of pirates), N. of the mouth of the Mejerda, 25 m. N. Tunis. P. <2000.

Gharian (or **Ghurian**) **Jebel,** mt. range, Tripoli, to the S. of the town of Tripoli, N. Africa.

Gharra, petty state, Central India, feudatory to Gwalior.

Ghar Roubban, or **Gar-Roubban,** tn., Algeria, prov. Oran, arr. Tlemsen, with mines of copper and lead.

Gharsa, shot, Tunis. See **Rharsa.**

Ghat, oasis, Tripoli, Fezzan, 255 m. W. by S. Murzuk. Belongs to Turkey since 1874. Alt. 7945 ft.

Ghátál, tn., Brit. India, Bengal, dist. Midnapur, 40 m. W. by N. Calcutta. P. (1891) 13,900; Hindus, 3500.

Ghâts, or **Ghauts** (Sanskrit, 'a stair' or 'mountain pass'), **Eastern** and **Western,** the mountain ranges forming the SW. and SE. boundaries of the great Indian tableland. The **Western Ghâts,** or **Sahyádri Mountains,** form the loftiest and most continuous range. They stretch from the valley of the Taptí, in 21° 21′ N., 73° 45′ E., for 800 m. along the western side of the penin., at a distance of 10–60 m. from the coast. The range increases in elevation as it extends southwards, and at Mahabaleshwar, in 18° N., is 4700 ft. above the sea. S. of this it decreases, till in lat. 15° it is only 1000 ft., and still farther S. it again rises and reaches its culminating point to the N. of the Nílgiris (*q.v.*), which form a somewhat detached area of mountains and tablelands at the junction of the Eastern and Western Ghâts, in Mulaina-giri (6307 ft.) in the W. of Mysore. The Ghâts, if we include the Nílgiris, terminate abruptly in the precipices forming the N. side of the Pálghát gap. Seen from the surface of the tableland, indeed, the Ghâts scarcely present the appearance of mountains. They are rather low hills crowning the edge of the tableland. This is especially the case with the Eastern Ghâts, which are lower and less continuous than the Western range, so that the name is sometimes restricted to their more continuous portion S. of the Kistna. They likewise differ from the Western Ghâts in being more winding in their course, and in leaving a much wider stretch of plains between their base and the sea-coast (the Bay of Bengal). Seen from the sea, the Western Ghâts have the appearance of an unbroken range of mountains parallel to the coast, and everywhere close to it. Only a narrow strip of lowland fills the mouths of their numerous short valleys. From the boldness and precipitous character of the trap rocks, of which the Western Ghâts are largely composed, many parts of the range are nearly inaccessible, and their natural fastnesses having been improved by art, the hill forts of the Ghâts have always been regarded as the bulwarks of the Deccan [**Mahrattas**]. The amount of moisture condensed in these mountains is very great, in some places above 200 in. annually [**Matheran, Mahábaleshwar, Karwár, Mangalore**]. For further particulars as to the climate, and also as to the geology, see **India.** The numerous torrents which traverse the low lands between the Ghâts and the sea stagnate as they approach the coast, and form a series of shallow lakes called backwaters. The principal passes are the Thál-ghát and the Bhor-ghát, respectively NE. and SE. of Bombay (*q.v.*). The principal sanitary hill stations are Matheran and Mahábaleshwar.

Ghasal, or *Ghasal*, Arabic, 'gazelle.'

Ghaziábád, tn., Brit. India, NW. Provs., dist. Meerut, 15 m. ENE. Delhi; a railway junction. P. (1881) 12,100; (1891) 10,200; Hindus, 6800; Moham. 3100.

Ghazípur, city, Brit. India, NW. Provs., cap. dist. G., on the low alluvial northern bank of the Ganges, 40 m. ENE. Benares; headquarters of the Government opium dep., where all the opium from the NW. Provs. is collected and manufactured under a monopoly. There is a monument to Lord Cornwallis, who died here in 1805. The dist. is one of the hottest and dampest in the NW. Provs. P. (1881) 32,900; (1891) 45,000; Hindus, 30,400; Moham. 14,200.

Ghazni, Ghuznee, Ghizneh, or **Ghizni,** famous fortified city, Afghanistan, on the W. extremity of a hill range, 78 m. SW. Kábul, in 33° 34′ N., 68° 19′ E. It stands on a scarped rock, 280 ft. above the adjacent plain on its W. side. Its walls, about 35 ft. in height, and flanked with numerous towers, form an irregular square about 1½ m. in circumference, the whole being enclosed by a *fausse-brage* and a wet ditch. In the NE. part of the town is the citadel, with a palace, magazine, and granary. The whole city is, however, commanded by adjacent heights. From its elevated position the winter cold is intense; from 10–20° below zero. It has several bazaars, and is an entrepôt for the trade between Afghanistan and the Punjab. Old G., destroyed in the 12th century, is about 3 m. NE. Its ruins cover an extensive space; and here are two fine minarets, and the tomb of Mahmúd of G., whence the so-called 'gates of Somnáth' were removed in 1842. Under the dynasty of Mahmúd of G., and his father, Subuktigin, in the 10th and 11th centuries, G. was the cap. of an empire reaching from the Ganges to the Tigris, and from Jaxartes to the Indian Ocean. It was stormed and taken by the British under Lord Keane, July 23, 1839; in 1842 the garrison surrendered it to the Afghans, but it was retaken in the same year by the troops under General Nott. Alt. 7279 ft. (Curzon). P. estimated at from 3000–10,000.

Gheber, small isl., French W. Africa, in the mouth of the Senegal.

Ghedi, comm., Italy, prov. and 9 m. SSE. Brescia. P. <4000.

Gheel, comm., Belgium, prov. and 25 m. E. by S. Antwerp, arr. Turnhout. From time immemorial idiotic or insane persons of peaceable habits from the neighbouring provs. have been boarded here at farmhouses, &c. P. 14,200.

Gheluwe, comm., Belgium, prov. W. Flanders, arr. and 9 m. SE. Ypres. P. <5000.

Ghemme, comm., Italy, prov., dist. and 14 m. NW. Novara, on the Mora. P. <4000.

Ghenneh, city, Egypt. See **Keneh.**

Ghent, French **Gand,** German **Gent,** a city of Belgium, cap. prov. E. Flanders, 30 m. WNW. Brussels, at the confluence of the Scheldt and Lys, and on railway from Ostende to Cologne, and at the head of a ship canal, admitting vessels of 2500 tons burden (17½ ft. draught), and connecting it with Terneuzen on the Scheldt in Holland. It is enclosed by walls 7 or 8 m. in circumference, entered by seven gates, and is intersected by numerous canals, dividing it into twenty-six islets, the most important of which, and that which formed the nucleus of the city, is now known as *La Cuve* (in Flemish *De Kuyp*). Principal structures, the university, with a library; the cathedral, dedicated to St. Bavon, and containing pictures by Rubens and the brothers Van Eyck; the belfry, the church of St. Michael, containing the famous 'Crucifixion' by Van Dyck; the *Grand Béguinage*, a convent of vast extent belonging to a community of unmarried women under temporary vows. G. is an archbishop's see, the residence of the military commandant for Flanders, and the seat of a chamber of commerce, and of important schools of engineering and arts and manufactures. It has always been important as an emporium of trade. Manufactures cotton yarn and cotton tissues on a large scale, linens ('hollands' being a specialty), soap, &c., and has large bleachworks. It has two dry and two wet docks, the latter 18 and 21 ft. deep respectively, and is connected by shallow ship canals with Bruges and Termonde, as well as with Terneuzen by the larger canal above-mentioned. The antiquity of G. is proved by the large number of Roman remains found in and near the town, which is, however, first mentioned by name in the 7th century. In 1180 it became the cap. of Flanders, with which it was annexed to Burgundy under Philip the Fair in the 14th century. Its liberties having been curtailed, it broke out in revolt, and for seven years (1338–45) was governed by the leader of the revolt, Jacques d'Artevelde. It continued, however, to flourish chiefly through its commerce and its woollen manufactures. In the 16th century it revolted against Charles V., who was born here in 1500, and who had succeeded to the Burgundian dominions, and it suffered greatly under the oppression of his son Philip II. of Spain, under whom it was finally reduced to subjection in 1584. By that time,

however, its prosperity had declined, not to be regained for centuries. During the French Empire under Napoleon I., from 1793 to 1814, the cap. of the dep. Scheldt. A treaty of peace between England and the United Provinces was concluded here in 1814. P. (1867) 126,000; (1880) 131,400; (1890) 149,700; including **Ledeberg** and **Mont-Saint-Amand**, P. 171,900.

Gheringhap, post-tn., Victoria, Grant co., 10 m. NW. Geelong. P. <1500.

Giannutri, Isola di, isl., Italy, off the W. ct., in 42° 16′ N., to the S. of Mt. Argentario.

Giant's Castle, summit of the Quathlamba Mts., on the frontier of Natal and Basuto-land, in 29° 20′ S. Alt. 9657 ft.

Giant's Causeway, a celebrated formation of prismatic basaltic columns, 16 m. ENE. Portrush, with which it is connected by an electric railway, N. ct. of Ire., Ulster, co. Antrim, W. of Bengore Head, and about 2 m. NNE. Bushmills. The coast here is for a great distance distinguished by curious and magnificent basaltic cliffs and caves; but the 'causeway,' properly so-called, is a platform projecting into the sea from the base of a stratified cliff about 400 ft. in height, and resembling a pier 700 ft. in length, 350 ft. in breadth, and rising to 30 ft. in height above the strand. It is separated by trap rock dykes into three divisions, comprising together about 40,000 perfectly formed, closely united, and very dark coloured polygonal columns, each consisting of many pieces, the joints of which are articulated with the greatest nicety. Their depth below the surface is unascertained.

Gibraltar, strongly-fortified seapt. tn. and garrison belonging to Great Britain, near the S. extremity of Spain, on a mountainous promontory, E. of its bay, and on the N. side of the Straits of Gibraltar, at the entrance of the Mediterranean, 60 m. SE. Cadiz. Lat. of the Mole, 36° 7′ 3″ N.; long., 5° 21′ 2″ W. The celebrated rock (ancient *Mons Calpe*, one of the 'pillars of Hercules') forms a promontory connected with the continent by an isthmus of sand ⅝ m. long, and consists of a mass of brownish grey limestone or marble, containing numerous caves, and is 3 m. in length N. to S., by 1½ to ⅝ m. in breadth. Area nearly 2 sq. m. It rises abruptly to 1439 ft. above the sea on all sides except the W., and is everywhere fortified by works of great strength and extent; besides which there are two galleries excavated in the rock, 2 m. in length, and of sufficient width to admit carriages. At Europa Point, its S. extremity, are a signal-house and a lighthouse. Surface parched in dry weather, but after rain covered with vegetation. The zoology of the rock comprises snakes, rabbits, woodcocks, and small monkeys, the only species of that group found native in any part of Europe. The town is built on its W. side, which shelves down to the bay; and here the fortifications have latterly been greatly improved and strengthened. The harbour is good, and protected by two moles, one 1100, the other 700 ft. in length. Gibraltar was made a free port in 1704, and still remains so, the only customs dues levied being those on alcoholic liquors. It is the entrepôt of a considerable trade between the United Kingdom and the N. of Africa, and a calling-place for Mediterranean steamers. Spain complains greatly of the smuggling carried on across the British frontier, but an arrangement has now been concluded by which it is hoped this will be checked. The currency is that of Spain. The Moors, on their first incursion into Spain in 1711, took possession of the town and of Mons Calpe, to which they gave the name of *Jebel-al-Tarik*. It was ceded to Spain by the Moors in 1462, and taken by the English, under Sir G. Rooke, in 1704. Under Lord Heathfield it withstood successfully a memorable siege by the French and Spaniards in 1779–83. The government is entirely in the hands of the governor. Mean temp., yr. 65.2° F., Jan. 56.5°, Aug. 77.5°. P. (1871) 25,200, including 6500 military; (1891) 25,000, including 5900 military.

Gibraltar, tn., Venezuela, Zulia, 290 m. WSW. Carácas. P. 3000.

Gibraltar, Bay of, inlet of the Mediterranean, near the S. extremity of Spain, Andalucia, between the Rock of Gibraltar on the E. and Cape Carnero on the W. Length and breadth about 6 m. each; greatest depth, 110 fathoms. It is well sheltered, and admirably adapted for shipping. On its E. side are the town and harbour of Gibraltar, and on the W. the Spanish town and port Algeciras.

Gibraltar, Strait of, ancient *Fretum Herculeum*, the narrow W. entrance to the Mediterranean, between Spain on the N. and Morocco (Africa) on the S. Length, about 50 m.; breadth, 8½–23 m. Proceeding W. to E., Capes Trafalgar and Tarifa, and Europa Point (S. extremity of Gibraltar Rock) are on its N., and Capes Spartel, Tangier, and Ceuta on its S. sides. A strong current runs here from the Atlantic Ocean into the Mediterranean sea, and an undercurrent (due to the difference in salinity) from the Mediterranean into the Atlantic.

Gibraltar Point, cape, Eng., on the E. ct. of Lincolnshire, at the entrance to the Wash.

Girls (plural *ghirla*), Russian for branch of a river in a delta.

Girnár, a remarkable mt., India, towards the SW. of the penin. of Káthiáwár, 230 m. NW. Bombay. Alt. 3500 ft. Around its base are several valleys, gorges, and hills of moderate height, covered with jungle. The mountain is peculiarly sacred, having several Jain temples.

Girnigoe Castle, a former stronghold of the Sinclairs, Scot., Caithness, on the coast, 2½ m. N. by E. Wick; now in ruins.

Giromagny, tn., France, in the terr. of Belfort, on the Savoureuse, arr. and 8 m. NNW. Belfort. P. <4000.

Giron, tn., Colombia. See **Jiron.**

Gironde, estuary, France, formed by the confluence of the rivs. Garonne and Dordogne, 13 m. N. Bordeaux. Length, 45 m.; breadth, 2–6 m., its mouth being 3 m. across. It is navigable throughout, but encumbered with sandbanks, and subject at flood-tide to a heavy reflux from the sea, termed the *mascaret*, similar to the *barre* in the Seine.

Gironde, maritime dep., the largest in France, in the SW., mainly to the S. and W. of the estuary of the Gironde and the R. Garonne, but partly to the E. of the river and estuary; formed from various dists. of the ancient government of Guyenne. The whole littoral, in the W. of the dep. (in all about one-twentieth of the surface), belongs to the region of the Landes, which is separated from the sea by a system of sand-dunes consisting of from 2–4 parallel chains, sometimes connected by cross-ridges, varying in height from 35–300 ft., and extending for 75 m. The intervening valleys are locally known as *lettes* or *lèdes*. To this region belong the basin of Arcachon and the *étangs* of Lacanau and Hourtin. The average density of population is less than one-third of that even of the country dists. of the rest of the dep. Between the Landes and the l. bk. of the river lie two dists. celebrated for their vineyards. The dist. above Bordeaux, more particularly known as the *région girondine*, includes several fairly high hills. Médoc, the dist. below Bordeaux, was formerly separated from the port of Verdon by marshes, which are now however reclaimed. Between the Garonne and Dordogne extends the most hilly, picturesque and fertile portion of the dep., known as Entre-deux-Mers. To the N. of the latter river, in order from E. to W., are the three regions of Libournais, Fronsadais, and Blayais. Almost the whole of the dep. belongs to the Gironde basin. The climate is generally mild, but unseasonable frosts occur up to the middle and even the end of April, and sometimes at the beginning of autumn; and hailstorms are dreaded. The principal cereals are wheat and rye, but the agricultural wealth of the dep. consists in its vineyards, which cover more than 12 per cent. of the surface (in 1873, before the ravages of the phylloxera, more than 18 per cent.), and whose produce has been renowned for its quality since the 17th century, and even since the time of the Romans. The three great vineyards are Château-Margaux, Château-Lafitte, and Château-Latour, all in the Médoc region. This dep. ranks second on the list of forest deps. in France, the first being dep. Landes; the *landaise* portion being covered with forests of sea-pines. Mineral wealth unimportant, though a little sea-salt is produced. Principal town and seaport Bordeaux. Oyster fishery is carried on round the Landes basins, particularly that of Arcachon. Leech rearing is also carried on. Divided into six arrs.: Bordeaux (cap.), Bazas, Blaye, Lesparre, Libourne, and La Réole. Area, 4141 sq. m. P. (1891) 793,500. See **France,** table.

Girotte, lake, France, Savoie, between the valleys of Beaufort and Bonnant, ¾ m. long by ¼ m. broad. Greatest depth, 325 ft. Its bottom waters contain a considerable proportion of sulphate of lime and a certain amount of sulphuretted hydrogen, and have a constant temp. of 45° F., the lowest temp. of the lake (39°–40° F.) being found at a depth of 80–90 ft.

Girroirs, rly. stn., Nova Scotia, co. Antigonish, 62 m. from New Glasgow.

Girton, par., Eng., Cambridge, Chesterton div., 3 m. NW.

Cambridge; since 1873 seat of a college for women, connected with the university of Cambridge (*q.v.*), originally founded at Hitchin in 1869, but transferred hither in 1873, 1 m. W. Histon stn., PO. P. <500.

Girton, par., Eng., Nottinghamshire, div. and 8 m. N. by E. Newark, 2½ m. NE. Carlton on Trent stn. P. <250. See **Scarle, South.**

Girvan, par. and tn., Scot., S. Ayrshire, on the W. ct., 10 m. SW. Maybole, on the G. & SW. R., at the mouth of the Water of G. A rising watering-place, with boulder strewn beach, but with facilities for sea-bathing; has a harbour 11 ft. deep at high water spring tides. Handloom weaving is still carried on, but the winter herring fishery is now the chief industry, though latterly it has been declining; also a trade in coal. Market-day, M. Par. 14,580 ac., P. <5000; tn. P. <4500.

Girvan, Water of, small stream, Scot., S. Ayrshire, issues from a small lake called the G. Eye (4½ m. W. by S. of the S. end of Loch Doon), flows N., NW., and then SW. till it enters the sea at Girvan.

Girvin, settlement and rly. stn., Canada, Assiniboia, 75 m. NW. by W. Regina.

Girwa, riv., India. See **Gogra.**

Gisborne, or **Poverty Bay,** post-tn. and port of entry for Poverty Bay, New Zealand, North I., Cook co., on the E. ct., 85 m. NE. Napier, in 38° 45′ S.; mineral oil has been found in the neighbourhood. P. 3000.

Glamorgan, co., Tasmania, E. ct., crossed in the middle by 42° S.

Glamorganshire, co., in the S. of Wales, bounded on the S. by the Bristol Channel, belonging almost entirely to the diocese of Llandaff, but with small portions in that of St. David's; cap. Cardiff; other chief towns, Llandaff, Swansea, Merthyr-Tydfil, Aberdare, Neath, Pontypridd, and Barry; divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Eastern	73,921	72,463
Rhondda	19,441	68,721
Western, or Gower	105,419	57,261
Mid	120,330	61,865
Southern	144,232	75,772
Parl. bors.	53,616	351,136
Total	516,959[1]	687,218[1]

[1] The administrative county has an area of 516,966 ac., but its population is identical with that of the ancient county.

Surface mountainous in the N., level in the S., the 'Vale of Glamorgan' being unsurpassed for fertility in Wales. The chief rivers are the Tawe, Neath, Taff, Rhymney (Rumney), the last forming the boundary on the Monmouthshire border, and in the W. the Llwchwr, or Loughor, which forms part of the western boundary. The greater part of the county is occupied by the Coal Measures, the great coalfield of S. Wales [**Wales**] extending through the whole length of the county from E. to W., and through the whole breadth of the county N. of Swansea Bay. Older rocks (Old Red Sandstone and Lower Carboniferous Limestones) are met with in the parts that jut S. into the Bristol Channel—the Gower Penin., between Burry Inlet and Swansea Bay, and the dist. to the W. of Cardiff. The quality of the coal rendering it specially valuable for smelting purposes and for use in steam-ships, the coalfield has been developed with extraordinary rapidity since the great expansion of the iron industry and the rise of ocean-steaming, in consequence of which the population of the county has increased since the beginning of the present century at a more rapid rate per cent. than that of any other county in the British Isles. Coal is now mined almost all over the county, Aberdare, Pontypridd, and Rhondda valley, Merthyr-Tydfil, Port Talbot, and Briton Ferry (at all of which there are blast-furnaces) being among the principal seats of the industry. There are also blast-furnaces at Swansea, Cardiff, Dowlais, Bridgend, and Landore. Besides coal, iron ore abounds in the county; but the production is comparatively small, the ore being so refractory that the smelters find it more advantageous to depend on imported (principally Spanish) ore. It is mined at Llanharry (about the middle of the S. div.), where also ochre, umber, and limestone are obtained. The inhabitants are chiefly occupied in mining industries, and industries connected with metals—iron, tin, and copper-smelting, and the manufacture of tin and zinc-plate, and nickel. For agricultural statistics, see **Appendix,** pp. 7–9. The chief railway systems are the L. & NW. R., the G. W. R., the Taff Vale Rly., following the course of the Taff R. from its mouth to Merthyr-Tydfil, and sending off short branch-lines in the SW. to Cadoxton, and in the W. (from Pontypridd) to Treherbert, where it is joined by the Rhondda and Swansea Bay line and the Rhymney line from Rhymney Bridge to Cardiff, descending the upper part of the Rhymney valley. Another important line is the Barry Rly., from Cardiff to Barry by Cadoxton, with a mineral line from Hafod to Barry. Merthyr-Tydfil is connected by canal with Cardiff, this canal being joined by another from Aberdare. In the W. of the county is the Neath and Swansea Canals, in the lower parts of the valleys of the Neath and Tawe respectively. The parl. bors. are Merthyr-Tydfil, Swansea (2 members each), and Cardiff with dist. (1 member). See **Wales,** table, and **Gower.**

Glan, riv., Ger., Palatinate of the Rhine, partly on its NW. frontier, flows NE. into the Nahe; not navigable.

Glan, harbour, Philippine Is., on the S. ct. of Mindanao I., E. side of Sarangani Bay, in 125° 15′ E.

Glärnisch, mt. mass, Switzd., cant. and to the SW. of the town of Glarus. Alt. Hinter-G., 9580 ft.

Glarus (probably named after *St. Hilarius*, the patron saint of the monastery of Säckingen, to which the valley belonged), tn., Switzd., cap. cant. G., on the Linth, 19 m. E. Schwytz. Alt. 1545 ft. Mean rfall. (12 yrs), 60 in. P. 5400.

Glarus, or **Glaris,** German-speaking cant., Switzd., enclosed by the cants. St. Gall, the Grisons, Schwytz, and Uri.; cap. G. It is a *cul-de-sac*, consisting of the valley of the riv. Linth and its affluences, which pour themselves into the Lake of Wallenstatt, on its N. frontier; on all other sides it is hemmed in by high mountain ranges, and the Tödi, at its S. extremity, 11,885 ft. in height, is the loftiest summit in E. Switzd. Orchards are numerous, but little corn is grown. Cattle rearing and manufactures of cotton goods form the chief occupations of the inhabitants. The extensive water-power of the cant. is largely made use of in the factories. The Schabzieger cheese (a kind of cheese flavoured with blue melilot, then reduced to powder and pressed into moulds) is wholly made in this canton. Principal mineral product, slate. Area, 267 sq. m. P. (1888) 33,800 (three-fourths Protestants, the remainder mostly Roman Catholics). See **Switzerland,** table.

Glaryford, stn., Ire., NW. co. Antrim, bar. Kilconway, 17½ m. SE. Coleraine, with stn. (**Glarryford**) on the Ballymena and Portrush Rly., P.O. (**Glarryford**).

Glasgow, vil., Brit. Guiana, on the l. bk. of the Demerara, 24 m. SSW. Georgetown.

Glasgow (glas'ko), co. of a city and parl. and royal burgh, Scot., Lanarkshire, extending into Renfrewshire, on the Clyde, 47½ m. by rail WSW. of Edinburgh, and 400 m. NNW. London. Lat. of observatory, 55° 52′ 42.6″ N.; long., 4° 17′ 38″ W. The city is divided by the Clyde, the larger portion being on the N. side. The most ancient part of the town is on elevated ground on the NE., where stands the cathedral of St. Mungo, a fine old Gothic structure, supposed to have been founded in 1197, though very little of the structure of that date survives. The present building, which bears marks in its architecture of various dates of erection, is supposed to have been commenced towards the middle of the 13th century. Length, 319 ft.; height of tower and spire, 225 ft. The crypt of the cathedral is remarkable both for its extent and beauty. The choir is now used as a parish church. Since 1859 nearly all the windows, both of the church and crypt, have been fitted with stained-glass windows. The High Street, the centre of the old city, leads southwards down a gentle slope to the Saltmarket and Gallowgate, once the abode of well-to-do inhabitants, but which afterwards sank to the condition of slums, but have since been improved by the operation of the City Improvement Trust, founded in 1866. SW. of the cathedral, in the High Street, stood the university, founded in 1450, but which has been cleared away to make room for a railway stn. In 1868 the foundation-stone of the new university, opened in 1870, was laid by the Prince of Wales. The building stands on a commanding site at the west end, and has cost upwards of £500,000. The university, well endowed, consists of a chancellor, rector, dean, principal, professors, and students; and has a library with over 175,000 vols., and a museum founded by Dr. W. Hunter. Connected with the university are an astronomical observatory, and the Western Medical School, an extra-mural school in special connection with the Western Infirmary (general hospital). Among other educational institutions is the Glasgow and West of Scotland Technical College, founded in 1886, with which are incorporated Anderson's College, founded in 1796, and the College of Science and Arts; there are also a Free Church Theological College, and a Veterinary College, to which an Agricultural College is affiliated. Of the public buildings, the most noteworthy, in addition to the cathedral and the new university buildings, are the municipal buildings, opened in 1889. G. is supplied with water from Loch Katrine by magnificent aqueducts opened by Queen Victoria in September 1859. Public parks include the Green (140 ac.), Botanic Gardens and Kelvingrove in the W., Queen's S., and Alexandra E. There are several cemeteries, chief of which is the picturesque Necropolis, E. of the cathedral and on the N. bank of the river, containing among many others the monument to John Knox. Numerous railways communicate with the surrounding districts, and the Clyde affords great facilities for steam-boat conveyance, and an underground railway facilitates communication between the E. and W. districts of the city. The prosperity of G. has resulted largely from the conversion of the Clyde from a fordable stream into a river navigable by the largest vessels. As early as 1566 an attempt was made to cut a channel through a sandbank at Dumbreck, above Dumbarton. In 1755, Smeaton enumerated twelve shoals between Glasgow and Dumbarton, of which that at Ponthouse Ford, now within G. harbour, had a depth at low water of only 1¼ ft. The first Act of Parliament authorising improvements in the river was obtained in 1759, and a second in 1760. In 1768, the construction of rubble jetties and the removal of shoals was begun. Under the powers conferred on the Clyde Trust by Acts of 1809 and 1825, improvements were continued till, in 1836, there was a depth at the Broomielaw at low water of 7 ft., while the tide, which in 1755 had scarcely been felt, gave a high water depth at neap and spring of 12 and 15 ft. respectively. Further powers were obtained by Acts of 1840, 1857, and 1873, and the channel has now a uniform depth of 24 ft. between G. and Port-Glasgow. The harbour extends W. from Victoria bridge on both sides of the river. The lower harbour has a depth of 24–28 ft. at ordinary spring tides. Besides basins in connection with private establishments, there are two tidal docks, Kingston and Queen's, the latter with a depth of 27–30 ft. at ordinary spring tides. Cessnock Dock, the largest of all, will, when completed, afford depths of 20–28 ft. at low water, 31–39 ft. at high water, average spring-tides, and will have 3760 yards of quayage, an area of 34⅝ ac. water-space, of which rather more than a third was already available in Feb. 1894. G. is celebrated as the Scottish emporium of trade and manufactures. The commercial history of G. begins in the 15th century, when fish-curing, which continued to be a leading industry till the middle of the 18th century, was established. In the 17th century there was a fair inland and a limited foreign trade. The colonial trade of G. developed rapidly after the Union, and at one period (1771) more than half the tobacco imported was brought here. The American War ruined this trade, but a fresh field for commerce was found in the W. Indies. In 1816 trade with India began, and this has since been vastly developed and extended to all quarters of the globe. As a port of commerce with the U.S., G. is surpassed only by London and Liverpool. For statistics of the port, see **Appendix,** p. 13. Exports of British produce, principally manufactured iron and steel, machinery, pig iron, cotton, linen and jute, yarn and thread, spirits and ale, and coal; imports, flour, wheat, maize, tobacco, sugar, brandy, saltpetre, petroleum, leather, and woollen yarn. Almost every manufacture is represented in G.; its leading industries comprise shipbuilding, cotton-spinning and weaving, printed calicoes, linen, carpets, iron and engineering works (including locomotive building and the construction of marine engines), pottery and glass, with all the manufactures depending on these, distilleries, breweries, dye-works, bleach-fields, &c. Textiles were little developed till after the Union, though the manufacture of cloth had been early introduced. The importance of the linen manufacture dates from 1720. Between 1730 and 1745 many new industries were introduced. The use of the steam-engine for cotton-spinning dates from 1792, and the introduction of power-looms from about the same period; thenceforward the growth of the cotton industry was marvellously rapid. The chemical works at St. Rollox, established in 1800, cover 13 ac. The first pottery was commenced in 1728; there are now about twenty potteries. G. has numerous foundries where the heaviest work for ships, marine and other engines, boilers, and all kinds of forgings and steel castings are manufactured. More iron and steel ships are built at G. and on the banks of the Clyde below G. than at any other port in the kingdom. Fuel is supplied in abundance from the surrounding collieries. Coal is first mentioned in 1578, when coal-pits were opened, probably in the Gorbals. G. was early distinguished for superior letterpress printing, its Foulis' edition of the classics and other books. The Romans had a station on the R. Clyde, in the locality of G., which they retained till the year 426. Antoninus' Wall commenced a few miles W. of the city. In 560 the see of G. is said to have been founded by Kentigern or St. Mungo; about the year 1115 the see was refounded by David, Prince of Cumberland. It was erected into a burgh of barony by William the Lion in 1180, and by James II., 1454, made a burgh of regality. Towards the end of the 15th century it was converted into an archbishopric, and in 1636 into a royal burgh. The name 'G.' does not appear till the 12th century, but there were two villages on the site, Deschu and Cathures; the former name is supposed to be a corruption of 'Cleschu,' whence 'Gleschu,' 'Glasgu,' 'Glasgow;' 'Glas'=green, 'ghu'=beloved, 'the beloved green place.' Birthplace of General Sir John Moore, Lord Clyde, Sir Thomas Munro, and Thomas Campbell the poet. The burgh sends seven members to House of Commons. Alt. 66 ft. Mean temp., Jan. 37.5° F., July 57.2°; annual rfall. 45.4 in. P. (1801) 77,385; (1821) 147,043; (1851) 329,097; (1871) 491,846; (1891) parl. and mun. burgh, P. 565,000; mun. burgh at same date, including extensions under Act of 1891 subsequent to the census, 656,000; royal burgh (equivalent to city par.), P. 176,800.

Glastonbury, Brit. name *Yniswitryn* ('isle of the glassy water'), the Roman *Glasconia,* mun. bor. since the time of Queen Anne, Eng., Somerset co., E. div., 5 m. SW. by S. Wells, 25 m. SW. Bath, with a stn. on Somerset and Dorset Rly. It is situated in a penin. formed by the riv. Brue, between the Polden and Mendip hills, and anciently known as the I. of Avalon or Apples. Many of the houses have been built out of the materials of its superb abbey, once covering 60 acres, but of which, the ruins of the church, with St. Joseph's chapel and the abbot's kitchen, now form the chief remains. Other structures of interest are a market cross, St. George's inn, formerly the abbey hospitium, the tribunal, the abbey house, the great gatehouse, now also an inn, the hospital of St. Mary Magdalen, founded in 1246. Manufactures: sheepskin, mats, rugs, gloves, and pottery. Peat is dug between G. and Highbridge. Chalybeate springs led from the hill called **G. Tor** at one time enjoyed a high reputation. About a mile N. of the town remains of a village of marsh dwellings have been discovered. Mun. bor., 5000 ac., P. 4100; par., 7166 ac., P. 4200.

Glastonbury, tn., U.S., state and on R. Connecticut, co. and 6 m. below Hartford. P. <4000.

Glendale, vil., U.S., S. Carolina, Spartanburg co., near the W. of N. frontier. P <1500.

Glendalough, electoral div., Ire., NE. co. and 10 m. WNW. Wicklow, bar. Ballinacor N., 8 m. from Rathdrum stn. It takes its name from the **Vale of G.** ('glen of the two lakes'), a valley about 2 m. long and ⅔ m. wide, renowned for its picturesque and romantic scenery, and containing scattered ruins of an ancient city, which was the see of a bishop from the 6th century to 1214, when the bishopric was united to that of Dublin. The chief ruins are those of 'Seven Churches' (a name sometimes given to the valley), which are noted for their simple but beautiful architecture. One of them was the old cathedral. In the side of a precipice overhanging one of the two lakes of the valley is a small recess known as the bed of St. Kevin, the founder of the first Christian church in the valley (about the close of the 5th century). PT.O.

Glendarragh, electoral div., Ire., Sligo, dist. Tobercurry.

Glendaruel, narrow valley, Scot., Argyllshire, traversed by the R. Ruel, opening S. into the head of Loch Riddon, to the N. of the Kyles of Bute, 10 m. long, P.O.

Glendaruel, post-tn., Victoria, Talbot co., on Bell's Creek, 18 m. from Ballarat. P. <1500.

Glen Dessary, narrow valley, Scot., in the W. of Inverness-shire, stretching 4 m. WNW. from the head of Loch Arkaig.

Glendevon, par., Scot., Perthshire, on the Devon, 12½ m. SE. by S. Crieff, 5 m. SSE. Auchterarder, P.O.; 9133 ac. P. <250.

Gloucester, co., Canada, in the NE. of New Brunswick, on Chaleur Bay and the Gulf of St. Lawrence.

Gloucester, vil., on the ct. of Dutch Guiana, in 56° 42′ W.

Gloucester (glŏs'ter), the ancient *Glevum*, or *Claudia* (Anglo-Saxon, *Gleowceaster*), city, co. in itself, parl. bor. (1 member) and mun. bor. (since time of Henry III.), and port, England, cap. co. G., Tewkesbury div., on l. bk. of the Severn, and on the G. W. & M. Rlys., 7½ m. W. by S. Cheltenham, 33 m. NE. Bristol. It occupies a slight eminence on the E. bank of the Severn, where it divides to enclose the island Alney, each of the two channels being here crossed by a bridge. The cathedral, formerly the church of a rich Benedictine abbey, but converted into a cathedral at the time of the dissolution of the monasteries by Henry VIII. in 1541, is one of the finest in England. Its architecture is mainly Norman, but replaced and partly overlaid in the choir and transepts by Early English. It is the place of a triennial musical festival, alternately with Worcester and Hereford. A statue of Bishop Hooper is erected near the spot of his martyrdom. G. has manufactures of cutlery and shipbuilding, extensive wharves, railway waggon works, steam flour and saw mills, chemical works, manufactories for agricultural implements, &c., and a considerable trade with the Baltic and other foreign ports. For shipping statistics, see **Appendix,** p. 13. The Berkeley Canal, 16 m. in length, from G. to Sharpness Docks, enables vessels drawing 13–15 ft. to reach the city. The College School, near the cathedral, is a foundation school; the Crypt Grammar School has an exhibition to Pembroke College, Oxford; and the Blue Coat Hospital was founded in 1666 by Sir Thomas Rich. Adjoining the public park and pleasure grounds, SE. of the city, is a saline chalybeate spa, discovered in 1814. Parliaments have been held in G., by Richard II. in 1378, and Henry IV. in 1407. *Glevum*, said to be derived from the British *Caer-Glow*, 'the fair city,' was a place of importance when made a Roman station under Claudius in 44; and throughout the Saxon and Norman periods it retained a large share of importance. Its bishopric, founded by Henry VIII., was united with that of Bristol in 1836, and comprises the co. of G. and parts of Somerset and Wiltshire. Market-days, W. and S. Mean temp. (14 yrs., 1861–63, 1867–78), yr. 50.3° F., Jan. 38.8°, July 63.5°. Mun. bor. P. (1801) 5800; (1851) 17,600; (1871) 31,800; (1891) 39,400.

Gloucester, post-tn., New South Wales, G. co., 70 m. N. by E. Newcastle. P. <1500.

Gloucester, co., New South Wales, on the E. ct., crossed by 32° S.

Gloucester, city, U.S., Massachusetts, Essex co., on the ct., 14 m. ESE. Salem, near the S. extremity of Cape Ann Penin. G. has one of the best harbours on the coast, and is the chief cod and mackerel fishing port in the world; the neighbourhood abounds in granite quarries. About 2 m. from it is Norman's Woe, the scene of the wreck of the *Hesperus* of Longfellow's poem. Favourite resort for summer visitors and artists. P. (1880) 19,300; (1890) 24,700.

Gloucester, city, U.S., New Jersey, Camden co., on the Delaware, opposite the S. end of Philadephia (Penn.). P. 6600.

Gloucester, co., U.S., New Jersey, in the SW., bounded on the NW. by the Delaware, below Philadephia (Penn.).

Gloucester, co., U.S., Virginia, in the E., bounded on the SW. by York R., and on the E. partly by Chesapeake Bay.

Gloucester, New, tn., U.S., Maine, Cumberland co., 22 m. N. Portland by rail. P. <1500.

Gloucester Island, Pacific. See **Piraoa.**

Gloucester Road, stn., Eng., London. See **Brompton.**

Gloucestershire, co., in the W. of England, on both sides of the Severn and the upper part of its estuary, belonging, with the exception of small portions in the dioceses of Oxford and Worcester, to the diocese of Gloucester and Bristol; cap. Gloucester; other chief towns, Cheltenham, Stroud, and Cirencester, divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Middle or Stroud	76,152	56,488
N. or Tewkesbury	192,619	50,340
E. or Cirencester	261,507	53,341
Forest of Dean	117,560	52,793
S. or Thornbury	131,207	62,951
Bristol, parl. bor. (portion in Gloucestershire)	8,366	234,815
Cheltenham	6,886	49,775
Gloucester, parl. bor. of	1,437	39,444
Total	795,734[1]	599,947[1]

[1] The administrative co. includes part of the co. bor. of Bristol in the ancient co. of Somerset. Area, 796,731 ac. P. 645,574.

Physically and geologically the county falls into four divs.—the hill dist. (Cotswolds) extending from N. to S. in the E., and belonging to the Oolites; the level dist. between these hills and the Severn, belonging to the Lias; and the two coal basins of Bristol (S. of the Severn) and the Forest of Dean (NW. of the Severn). The chief rivers are the Severn (navigable throughout the county), Avon, Lower Avon (on the S. border, where it is navigable throughout), Wye, and Thames, whose two headwaters, the Coln and the Churn, lie wholly within this county, which contains also the upper parts of its tribs., the Leach and Windrush. Minerals are important. Coal is mined in many places, the Forest of Dean and Bristol being the chief centres. The Forest of Dean also abounds in iron ore, which is mined at Cinderford (which has also blast-furnaces), Bream, Coleford, Newland, Mitcheldean, E. Dean, Lydbrook, and Lydney. Among other minerals are ochre (at Winford) and freestone (Stroud and other places). The Vale of the Severn is noted for its cornlands, rich pastures, and general fertility; in the hills sheepfarming forms an important industry. The manufactures are silk, hosiery, woollens, gloves, stockings, cotton, baskets, brushes, combs, shoes, earthenware, glass, nails, and pins. The **Stroud Valley** is noted for its broadcloths. The chief railway systems are the M. R., G. W. R., and in the W. of the county the Severn and Wye, Severn Bridge and Monmouth Rly.

(through the Forest of Dean). The Thames and Severn Canal lies wholly within the county. An important ship canal ascends to Gloucester (*q.v.*). The people of this county had a great share in the conquests of Wales and Ireland; and in the Middle Ages the monasteries were numerous and powerful. In Berkeley Castle Edward II. was killed (1327), and in the Yorkist war the battle of Tewkesbury was fought in this county (1471). See **England,** table.

Glounthane, P.O., Ire., co. Cork, 1 m. from Queenstown Junc.

Go, Japanese, 'hinder.'

Goa, comm., Philippine Is., Camarines. P. 5600.

Goa, colonial terr. of Portugal, larger than Staffordshire, on the W. ct. of India, 15°–16° N. lat., 72 m. long (in a NW.–SE. direction), 37 m. wide, between the Indian Ocean and British India, from which it is separated (N.) by riv. Arondem (forming the frontier on the side of the native state of Sáwantwári), and (NE., E., and SE.) by the Western Ghâts, the spurs of which (with heights from 2000 ft. to about 4000 ft.) divide the fluvial basins of the Portuguese terr. Two rivers, the Mandovi and Inari, drain two-thirds of the whole land, and form, at their common mouth, several islands, on one of which lies, besides the ruins of the first *Cidade de G.* (Velha, or Old G.), founded by Albuquerque in 1510, **Nova** (or **New**) **G.,** or **Panjim** (founded 1765), the present capital of Portuguese India (1082 m. S. of Bombay). The rivers are navigable far into the land, and form very good ports (Tiracol, Chaporá, Aguada), and above all Marmagáo, now the terminus of a railway, connected, through the Kwisim (Cuissim) Ghât, with the Anglo-Indian railways. The lands are of great fertility. Cereals, rice, tropical fruits, pepper, cinnamon, medicinal plants are produced. The interior is covered with forests giving very valuable woods (teak). Iron is abundant. Nova G. is very unhealthy. The heat is intense and constant. There is a dry season (Dec.–May) and a rainy one (June–Nov.). Mean temp. 82° F.; max. (Dec.) 96°; min. (Jan.) 69°; rfall. 120 in. (See **India,** climate.) G. has an archbishop, 'Primate of the East,' with Roman Catholic jurisdiction over many terrs. beyond the Portuguese establishments. Besides the terr. of Goa proper, the prov. of Goa includes Damán (Damão) and Diu, forming the whole of Portuguese India (*Estados da India*). Goa proper, official area, 1447 sq. m.; according to Danvers, 1062 sq. m. P. (1887) 495,000; prov. 1605 (Danvers, 1196½) sq. m., P. (1887) 572,000. [**J. B. B.**]

Goadby, par., Eng., Leicestershire, Melton div., 9 m. SW. Oakham, 2½ m. WSW. East Norton stn. P. <250. See **Billesdon.**

Goadby Marwood, par., Eng., Leicestershire, Melton div., 10½ m. SW. by W. Grantham, 2½ m. ESE. Long Clawson and Hose stn., P.O. P. <250.

Goajira, penin., jutting 120 m. NE. into the Caribbean Sea to the W. of the Gulf of Maracaibo, formerly claimed partly by Venezuela, but now (since 1891) wholly belonging to Colombia, of which it forms a national terr. Surface level in the SW., covered with detached ranges of volcanic hills towards the N., the northernmost of these hills being the only part which has a sufficient rainfall to be really fertile; elsewhere agriculture is dependent on wells and tanks. Thinly peopled by G. Indians. See *Proc. R. G. S.,* 1885, pp. 781, &c. (with map).

Goálanda, municip., Brit. India, Bengal, dist. Faridpur, on the r. bk. of the Ganges, at the confluence of the Brahmaputra, 40 m. W. by N. Dacca, terminus of the Eastern Bengal Rly., and point of departure of Assam steamers. The site has frequently been changed owing to the destructive floods and shiftings of the river channel, in consequence of which none but temporary buildings are now erected. P. (1881) 8700.

Goálpárá, tn., Brit. India, Assam, the largest in dist. G., on the l. bk. of the Brahmaputra, 70 m. W. Gauháti, in a very malarious situation. The civil station is built on the summit of a hill rising 250 ft. above the plain. The dist. is considered very

unhealthy, both for Europeans and natives. P. (1881) 6700; (1891) 5400; Hindus, 3500; Moham. 1700.

Goascoran, riv., Central America (*q.v.*), flows S. into the NW. arm of the Gulf of Fonseca, partly on the E. frontier of Salvador.

Goat Fell, mt., Scot., isl. of Arran, 3½ m. NNW. Brodick. Its upper portion is of granite formation; its lower, clay-slate and old red sandstone. Alt. 2866 ft.

Goathill, par., Eng., Somerset, S. div., 7½ m. E. Yeovil, 2½ m. E. Sherborne. P. <250.

Goathland, par., Eng., Yorkshire, N. Riding, div. and 7½ m. SW. by S. Whitby, on the NE. R., with whinstone quarries, PM.O.; 9032 ac. P. <500.

Goathurst, par., Eng., Somerset, div. and 3 m. SW. by W. Bridgwater, P.O. P. <500.

Goat Island, isl., in the Pacific Ocean, 3 m. SW. Juan Fernandez, about 5 m. in circumference, 500 ft. high, and is volcanic and desolate. Called by the Spaniards Santa Clara.

Goat Island, the smallest of the Bashi Is., En. Archipelago.

Goat Island, U.S. See **Niagara Falls.**

Goatstown, P.O., Ire., N. co. Tipperary, bar. Lower Ormond, 10½ m. SW. Parsonstown.

Gobardánga, tn. and municip., Brit. India, Bengal, dist. 24 Parganás, 33 m. NE. Calcutta. P. (1881) 6200; (1891) 6700; Hindus, 4700; Moham. 2000.

Gobardhán, ancient tn., Brit. India, NW. Provs., Muttra dist., in 27° 30′ N., 77° 30′ E. P. 5400; Hindus, 5100.

Gobardhángiri, fortified hill on the W. frontier of Mysore state, India, in 14° 9′ N., 74° 43′ E., commanding the old pass that leads by the famous Falls of Gersoppa.

Gobbins Cliffs, The, Ire., E. ct. co. Antrim, about 54° 50′ N.

Göbek, tn., Asia Minor, 46 m. E. by N. Alashehr.

Gober or **Gubir,** dist. inhabited by a heathen tribe in the N. of Sokoto, central Sudan.

Gobha, Gaelic (in place-names *Gow,* or *Gowan*), 'a blacksmith.'

Gobi (Mongolian, 'desert'), called by the Chinese **Shamo** ('sea of sand'), or sometimes **Shaho** ('river of sand'), from the fact that the sand-dunes of which it is in places composed are constantly moving from SW. to NE.; a vast region, mainly desert, lying to the E. of Chinese Turkistan, and W. of Manchuria, from which it is separated by the Khingan Mts., and between China proper in the S., and the more mountainous and better watered parts of Mongolia in the N. General alt. about 3000–3300 ft. The names Shamo and Shaho misrepresent the general character of the surface of this region, the greater part of which is covered with a loamy coarse sand mixed with gravel, considerable tracts here and there being strewn with boulders and pebbles of all sizes. The term desert, moreover, is not strictly applicable to the greater part of the G. W. of about the meridian of 100° E. large areas of true desert occur, but further E. summer rains (occasionally falling two or three days in succession) and the melting of winter snows give a steppe-like character to the surface, allowing of the growth of sufficient vegetation to afford food for horse and camel caravans. Sands are to be seen chiefly in the Ordos (within the great N. loop of the Hwang-ho). Among other parts of the G. known by special names are the Galbun (Galpin, or Golbin) G., NW. of the Ordos, the Alashan or Lian (or Little) G., W. of the Ordos, and the Tashun G., W. of the line of oases from Ngansi-chou to Barkul. See **Mongolia.**

Gobindganj, vil., Brit. India, Assam, dist. and 13 m. W. by N. Sylhet. P. (1891) <5000.

Gobowen, vil., Eng., Shropshire, 2½ m. NE. Oswestry, on the G. W. R.; has coal-mining. PMT.O.

Gobur, or **Godfrey's Creek,** postal-tp., Victoria, Anglesey co., 68 m. NNE. Melbourne. P. <1500.

Gobwen, small vil., E. Africa, 2½ m. from the mouth of the Jub; has two very ancient Arab forts, one on each side of the river.

Goch, tn., Prussia, Rhine Prov., 40 m. NW. Düsseldorf, circle and 7 m. S. Cleve. P. 6500.

God'alming (Saxon, *Godhelm's Ing,* 'the meadow of Godhelm'), mun. bor. (since 1575, extended 1892), Eng., Surrey, div. and 4 m. SW. by S. Guildford, with two stns. (**G. New** and **G. Old**) on the L. & SW. R. Manufactures of paper, leather, stockings, gloves. Since 1872 G. has been the seat of the Charterhouse public school, originally founded in 1611 by Thomas Sutton at Smithfield, London, where the great hall of the old school (now occupied by the Merchant Taylors School) is still used for the annual celebration of Founder's Day (Dec. 12th). Market-days, W. and S. P. <3000; par. 9049 ac., P. 10,500.

Godávari, or **Godavery** ('the cattle-giving'), the longest river in the peninsular portion of India, and that which has the largest basin. Its source is in the Western Ghâts, a little to the S. of the 20th parallel, near the village of Trimbak. On a hill behind that village is an artificial reservoir (3500 ft. above sea-level), which receives drop by drop the water from a trickling spring that has been regarded as the source from time immemorial. The river flows with a nearly easterly course across the greater part of the tableland, but turns to the SE., where it receives on its l. bk. the Pránhíta, the most important of all its tribs., which empties into it from the N. the united waters of the Wardhá and the Waingangá. On entering the plains the G., like all the other rivers which cross the Eastern Ghâts, forms a delta, the surface of which is now seamed with irrigation canals led from the river, which is dammed at the head of the delta (Dowlaishvaram), so as to supply 3000 cubic ft. per second at low water, 12,000 cubic ft. in flood. The Wardhá, Pránhíta, and lower G. form together the most important line of navigation in the G. basin, all the more important because the Wardhá flows through a very fertile valley, which is also rich in coal. In this line of navigation there are, however, three serious interruptions. The gorge of the G. through the Eastern Ghâts, a gorge beginning where the Sábari flows in from the N., is navigable throughout. The first interruption to navigation—the first barrier, as it is called—occurs at Dúmagúdiem, about 165 m. from the sea; the second just below the confluence of the Pránhíta; the third beginning about 40 m. higher up, and stretching for an equal distance upwards. This last stretch, which reaches to the neighbourhood of the important trading town of Chándá, can be navigated in time of high water, and so also can the first barrier if the river is very high. To render this entire line of navigation unbroken works were begun by the Government, but were abandoned on account of the expense. Length, 795 m.; area of basin, 121,379 m. (Contour Map of India, Calcutta, 1886.)

Godávari, dist., Brit. India, Madras, mainly made up of the delta of the Godávari R. (*q.v.*); cap. Cocanáda. Beriberi endemic in the dist., but for the most part confined to the natives. See **Madras,** table.

Godbout, or **Goodbout River,** Canada, Quebec, Saguenay co., flows SE. then S. to the St. Lawrence, which it enters in about 67° 38′ W.

Godden Green, P.O., Eng., Kent, 2½ m. NE. Sevenoaks.

Goddington, or **Godington,** par., Eng., Oxfordshire, Woodstock div., 5 m. SW. Buckingham, 3 m. NE. Marsh Gibbon and Poundon stn. P. <250.

Gödöllö, comm., Hungary, Buda, 15 m. NE. Budapest, with magnificent imperial castle having a park and zoological garden. P.<5000.

Godolphin, eccles. par., Eng., Cornwall, 5 m. NW. Helston, P.O. (**G. Cross**). P.<1500.

Godolphin Hill, Eng., Cornwall, between Marazion and Helston, 12 m. WSW. Falmouth. Alt. 530 ft.

Godra, tn., India. See **Godhrá.**

Godrevy Island, Eng., Cornwall, on the N. side of St. Ives Bay, with lighthouse, showing lights visible 17 and 15 m.

Godsfield, par., Eng., Hampshire, Petersfield div., 8½ m. NE. by E. Winchester, 3 m. N. Alresford stn. P.<250.

Godshill, par., Eng., Hampshire, Isle of Wight, on the Yar, 3 m. NW. Ventnor, 1½ m. S. Merstone stn., PM.O.; 6628 ac. P.<1500.

God's Lake, Canadian NW. Terrs., crossed by 54½° N., and in the extreme W. by 95° W., drained NE. by God's R.

Godstone, par., Eng., Surrey, div. and 6 m. E. Reigate, 2 m. N. by W. of its stn. on the SE. R.; has deposits of silver sand and white sand. PMT.O., and PM.O. (**South G.**). 6830 ac. P.<2500; eccles. par. (**G. with Walkingstead**) P.<2000.

Godthaab, or **Godhaab** (Danish, 'good hope'), the oldest Danish colony in Greenland (founded 1721 by Hans Egede), on the W. ct., in 64° 10′ N.; seat of the inspector of the S.; has a good harbour. Mean temp. (11 yrs.), yr. 28.7° F., Feb. 14.0°, July 44.2°; rfall. (10 yrs.), 24.26 in.

Godullahütte, part of Orzegow, Prussia, prov. Silesia, govt. Oppeln, circle Beuthen. P.<3000.

Godwal, tn., India, state of and 89 m. SW. by S. Haidarábád.

Godwick, Eng., Norfolk, Mid div., 18 m. E. King's Lynn, 4 m. SSE. Raynham Park stn. See **Titteshall.**

Godwin-Austen, the name given in 1888 by the Royal Geographical Society to the Himalayan peak K², in 35° 53′ N., 76° 34′ E., in honour of the first explorer of the mountains of this region. It is the highest known summit in the world except Mount Everest. Alt. 28,265 ft. (*tr.*).

Goede-Hoop, or **Good Hope,** the northernmost point of New Guinea, in the W. of the island.

Goede Hoop, De ('the good hope'), vil., Dutch Guiana, on the l. bk. of the Koppename, 43 m. W. by S. Paramaribo.

Goeree, or **Goedereede** ('good roadstead'), isl., Holland, prov. S. Holland, formerly an island at the mouth of the Maas, between Brouwershaven Gat and Goereesche Diep, now connected by dykes and polders with the isl. of Overflakkee; the town G. is on the E. ct. P. (tn.)<2000.

Goes, or **Tergoes,** fortified tn., Holland, isl. of S. Beveland, prov. Seeland, 12½ m. E. Middelburg; connected by canal with the R. Scheldt. P. (comm.) 6600.

Goes, tn., Portugal, prov. Estremadura, dist. Coimbra, at the foot of the Serra da Estrelha. P. (comm.)<4000.

Goeta-elf, Sweden. See **Göta-elf.**

Goethite, vil., U.S., Alabama, Tuscaloosa co., 25 m. SW. Birmingham. P.<1500.

Goff's Oak, eccles. par., Eng., Hertfordshire, par. and 1½ m. NW. Cheshunt, P.O. P.<1000.

Goffstown, tn., U.S., New Hampshire, Hillsborough co., on Piscataqua R., 13 m. S. by W. Concord. P.<2000.

Gogar, hamlet, Scot., Midlothian, 1 m. NNW. from its stn. on the N. B. R., on G. Burn, 4½ m. SE. by S. South Queensferry.

Gogebic, settlement, U.S., Michigan, G. co., at the head of G. Lake, 44 m. ESE. of the NW. corner of the state. The county is in the extreme NW. of the state, on Lake Superior and the Wisconsin frontier. See **Ironwood.**

Gogebic Lake, 12 m. long, is drained from its N. end first E. into the Ontonagon R., and by that N. into Lake Superior.

Gogebic Range, range of hills, U.S., Michigan and Wisconsin, parallel to the S. shore of Lake Superior, one of the principal dists. producing iron ore in the U.S.

Göggingen, market-vil., Ger., Bavaria, govt. Swabia, on the Wertach, circle and 2 m. SW. Augsburg. P.<4000.

Gogho, or **Goghá,** tn., Brit. India. See **Gogo.**

Goginan, seat of lead-mines, Wales, Cardiganshire, 7½ m. NE. Aberystwith, PM.O.

Gogmagog Hills, a range about 3 m. SE. Cambridge, with traces of a Roman camp with a triple entrenchment.

Gogo, tn., India, Káthiáwár Penin., Bombay, dist. Ahmadábád, on the W. side of the Gulf of Cambay, 45 m. W. Broach. The natives are reckoned the best sailors or *laskars* in India. The roadstead is a safe refuge during the SW. monsoon. P. (1881) 7100; (1891) 6600; Hindus, 3200; Moham. 2900.

Gogo, or **Gagho,** tn., western Sudan, on the l. bk. of the Niger, where it flows SE. in about 16° 15′ N.; cap. of the empire of the Songhai or Sonrhai from the beginning of the 11th to the 16th century, now a miserable village.

Gogolin, vil., Prussia, prov. Silesia, circle Strehlitz, 29 m. NNW. Ratibor. P.<3000.

Gogoyan, par., Wales, Cardiganshire, 4 m. SW. Tregaron. P.<250.

Gogra, riv., India, rises at the height of 13,000 ft. above the Tibetan tn. of Tákla Khár, near the sources of the Sutlej and the Brahmaputra, flows SE. then S. through Nepál under the name of the Karnáli, or Kauriala, on entering the plains of the Tárai gives off an eastern branch known as the Girwa, which reunites with the western (Kauriala) branch in Brit. terr. (in the Kheri dist. of Oudh). After the reunion the river again assumes a SE. direction till it joins the Ganges just above Chapra. Faizábád is the only large town on its banks. Principal trib. the Sarda, which joins it on the r. bk. ENE. of Lucknow. The river is navigable throughout its whole course in Indian terr., and its traffic is important. Depth in mid channel nowhere less than 6 ft. Length, 570 m.

Gogunda, tn., India, Rájputána, 107 m. SSE. Jodhpur.

Gohad, fortified tn., Central India, Gwalior state, in 26° 25′ N., 78° 29′ E. P. (1891) 5400; Hindus, 4600; Moham. 600.

Gohána, tn., Brit. India, Punjab, dist. Rohtak, 47 m. NW. Delhi. P. (1881) 7400; (1891) 7700; Hindus, 2800; Moham. 4100.

Gohfeld, vil., Prussia, prov. Westphalia, circle Herford, 32 m. E. by S. Osnabrück, 9 m. SW. Minden. P.<5000.

Gohlis, former large vil., Ger., N. of Leipzig, in which it is now included.

Gohna, Himalayan vil., in Brit. Garhwál, in 30° 23′ N., 79° 34′ E., on the Birah-ganga, a l. bk. trib. of the Ganges. Here a series of landslips, the largest occurring on Sept. 22, 1893, caused by the damming of the river, the formation of a lake, which subsisted till Aug. 26, 1894, when the dam collapsed.

Göhren, vil., Prussia, prov. Pomerania, isl. of Rügen, on the E. ct., 27 m. E. Stralsund. P.<2000.

Goil, Loch, inlet, Scot., Argyllshire, in the SE., ascending 7 m. NNW. from the W. side of Loch Long.

Goindl, tn., Brit. India, NW. Provs., dist. Hamírpur. P. (1891) 5300; Hindus, 5100.

Goin Loch, or **Blackwoodhill Dam,** Scot., E. Renfrewshire, 10 m. SSE. Paisley, drained SW. into the R. Irvine.

Goisern, vil., Upper Austria, 30 m. ESE. Salzburg, 6 m. S. Ischl. P.<2000.

Golto, comm., Italy, prov. and 8 m. NW. Mantua, dist. Volta Mantovana, on the Mincio. P. 5600.

Gojam, dist., in the S. of Abyssinia, bounded by the Bahr-el-Azrek (Abai), both on the E. and S.; military cap. Monkorer; commercial cap. Basso.

Gojeb, torrent of the Galla lands, S. of Abyssinia, r. bk. trib. of the Gugsa.

Gök, Turkish, 'blue,' 'blue-green.'

Gokak, tn., Brit. India, Bombay, dist. Belgáum, 51 m. N. by W. Dhárwár. P. (1881) 10,300; (1891) 12,100; Hindus, 9600.

Gokarn, tn., Brit. India, Bombay, dist. N. Kánara, on the W. ct., 77 m. SW. by S. Dharwar; place of pilgrimage. P. (1891)<5000.

Gokcha (**Gök-chai,** Armenian **Sevanga**), alpine lake, Transcaucasia, govt. Erivañ, 40° 9′–40° 37′ N., 45° 1′–45° 40′ E. Alt. 6345 ft. Length, 45 m.; width, 20 m.; maximum depth, 57 fathoms. Surrounded by mountains 12,000 ft. high, and fed by numerous streams. Its level is subject to considerable periodic variations; has one island, Sevanga, with a monastery on it. Area, 527 sq. m.

Gokinai, in the old div. of Japan, the provincial group round Kyoto, N., and E. of Ozaka Bay (Izumi-Nada).

Goklan, tribe. See **Guklan.**

Gokong, tn., Lower Cochin-China, about 37 m. S. Saigon

Gök-su, riv., Asia Minor. See **Selhun.**

Goktelk, gorge, Upper Burma, about 20 m. E. Mandalay, on the route of the railway to Thibaw.

Gol, Mongolian, 'lake.'

Göl, Turkish, 'lake.'

Gola, or *gala,* Slavonic, 'wood.'

Gola, territory, Africa. See **Liberia.**

Golá, tn., Brit. India, NW. Prov., dist. Gorakhpur, on the Kunna, 73 m. NNE. Benares. P. (1881) 7200; (1891) 6100; Hindus, 5400; Moham. 700.

Gola, isl., Ire., off NW. ct. of co. Donegal, at N. of entrance to Gweedore Bay, in lat. 55° 6′ N. On the E. **G. Roads,** which affords a safe anchorage.

Golada, comm., Spain, prov. Pontevedra, dist. Lalin. P. 5100.

Golághát, vil., Brit. India, Assam, dist. Sibságar, 88 m. SW. Dibrugarh. P.<5000.

Golan Head, cape, Ire., on a small island at N. of entrance to Galway Bay.

Goland, electoral div., Ire., Donegal, dist. Killygordon.

Golant, P.O., Eng., Cornwall, on riv. and 2 m. N. Fowey.

Golbanti, vil., Brit. E. Africa. See **Borabini.**

Golborne, par., Eng., Lancashire, Newton div., 5½ m. S. by E. Wigan, on the L. & NW. R.; has coal. PMT.O. P. 5600.

Golborne Bellow and **Golborne David,** adjoining pars., Eng., Cheshire, the former 7 m. SE. Chester. P. (of each)<250.

Golcar, par. and tn., Eng., Yorkshire, W. Riding, Colne Valley div., 3 m. W. by S. Huddersfield, with a stn. on the L. & NW. R. P. 9100.

Golconda, decayed city, India, in an arid, rocky desert, state and 7 m. W. Haidarábád, once the cap. of a powerful kingdom of same name; still possesses a fort crowning a rocky ridge of granite, which alone gave importance to the site. The diamonds for which it used to be famous were merely cut and polished here, being found chiefly in the SE. of the Nizam's dominions.

Golconda, vil., U.S., Illinois, Pope co., on r. bk. of Ohio R., 122 m. SE. St. Louis. P. <1500.

Golconda, post and mining tn., Tasmania, Dorset co., 20 m. by rail NNE. Launceston. P. <1500.

Golconda, vil., U.S., Nevada, co. and on Humboldt R., and the Central Pacific Rly., 168 m. NE. Carson City. P. <1500.

Goldap, tn., Ger., Prussia, prov. E. Prussia, cap. circle G., 55 m. S. by E. Tilsit. P. 6600.

Goldau, vil., Switzd., cant. and 5½ m. WNW. Schwiz, at the S. foot of the Rossberg, by a landslip of which mountain the formerly existing village of the same name, with the villages Bussingen, Rother, and a part of Lowerz, were totally buried with 450 persons and many cattle, and Sept. 1806.

Goldberg, tn., Prussia, prov. Silesia, circle G.-Hainau, on the Katzbach, 12 m. WSW. Liegnitz; woollen manufactures. P. 6400.

Goldberg, tn., Mecklenburg-Schwerin, circle Parchim, 37 m. E. Schwerin. P. <4000.

Goldcliff, par., Eng., Monmouthshire, S. div., on the N. bk. of the R. Severn, 4 m. SE. by E. Newport. P. 250.

Gold Coast, ct. region and Brit. colony and protectorate in W. Africa, forming part of Upper Guinea. The Gold Coast extends from Newtown (W. of Cape Three Points) to Denu (E. of Cape St. Paul). It is a monotonous tract of land, the greater part of which is hilly, as the SW. offshoots of the Akposso Mts. approach the coast between Axim and the Volta R. Rivers: Tanoe, Ankobra, Busum-Pra, Volta, and Tojie. The climate is oppressively hot, and very unhealthy to Europeans. Inhabitants: numerous negro tribes (Ahanta, Dankira, Tufol, Fanti, Adangbe, &c.), their chief occupation being commerce. Principal exports: palm-oil, palm-kernels, india-rubber, kola-nuts, timber; chief imports: textiles, hardware, spirits, and tobacco. The whole region is more or less auriferous, and in past times large quantities of gold were exported, but the abolition of slavery caused the decline of the gold industry among the natives, and the great obstacles to European enterprise are the unhealthiness of the climate, and the difficulties of transport, as roads are absolutely wanting. Chief towns and roadsteads: Axim, Elmina, Cape Coast Castle, Winnebah, Accra, Christiansborg (old Danish fort, adjoining Accra, seat of Governor), and Kita. There is cable connection with England, and regular steam communication with England (African Steamship Co., and British and African Steam Navigation Co.), and Germany (Woermann Line). Estimated area of colony, 15,000 sq. m.; of protectorate, 24,000 sq. m. Estimated P. 1,500,000 (150 Europeans). See R. F. Burton and V. L. Cameron, *To the Gold Coast for Gold*, London, 1883. [**H. G. S.**]

Gold Cove, Newfoundland, at head of White Bay, 56° 55′ W.

Golden, tn., Ire., S. co. Tipperary, bar. Clanwilliam, 4 m. WSW. Cashel, on the l. bk. of the Suir, P.O. P. <500.

Golden, city, U.S., Colorado, Jefferson co., 11 m. W. Denver. Alt. 5684 ft. (R.R.). Mean temp. (1 yr.), yr. 51.6° F., Jan. 31.5°, July 75.5°; rfall., yr. 17.55 in., March–July 11.07 in. P. <3000.

Golden Ball, P.O., Ire., SE. co. Dublin, bar. Rathdown, 4½ m. NW. Bray, 2 m. from Carrickmines stn.; lead-smelting works near.

Golden Bay, in NW. of South I. of New Zealand. See **Massacre Bay.**

Gonda, tn., India, Káthiáwár Penin., 88 m. N. Diu.

Gonda, tn., Brit. India, Oudh, cap. dist. G., 69 m. E. by N. Lucknow, occupying a site originally a jungle, in the centre of which was a cattle-fold (*Gontha,* or *Gothám*) protected from wild beasts. P. (1881) 13,700; (1891) 17,400; Hindus, 11,600; Moham. 5700.

Gondal, fortified tn., India, Bombay Presidency, cap. of G. state, in 21° 58′ N., 70° 53′ E. P. (1881) 13,500.

Gondar, tn., Abyssinia, cap. of the prov. of Dembea in Amhara, 68 m. NW. by N. Debra Tabor, 25 m. N. of Lake Tsana. Near it the ruins of the fort of Gimp, built by the Portuguese as a residence for the king, but burnt by King Theodore. Alt. variously estimated at from 6200–7500 ft. Mean temp. (2 yrs., 1832-33), yr. 66.9° F., Jan. 66.9°, July 62.4°. P. in last century 30,000, now reduced to about 8000.

Gondo, Gallery of, Switzd., cant. Valais, the most remarkable on the Simplon route, 596 ft. long, cut in the granite. Close to the mouth of the gallery the roaring waterfall of the Frascinonne leaps from the rocks close to the road, and is carried over it by a bridge.

Gondo'koro, vil., En. Sudan, on the r. bk. of the Nile, in 4° 54′ N., 9 m. above Lado. Alt. 1526 ft.

Gondomar, comm., Spain, prov. Pontevedra, dist. Vigo. P. 7900.

Gondrecourt, comm., France, dep. Meuse, arr. Commercy, 21 m. SW. by W. Toul. P. <2000.

Gondwáná ('the land of the Gond race'), an imperfectly defined tract, India, between 18° and 24° 30′ N., 77⅓° and 87° E., now mainly included in the Central Provs. It is hilly, comprising the eastern portion of the Vindhya and Mahadeva Mts., and in some parts 5000 ft. above the sea. The country is wild and covered with jungle, and the original natives, the Gonds, who speak a Dravidian dialect, which survives chiefly in the S. and W. of G., are savage and cruel. They were one of the earliest and most powerful of the original dynasties of India. See **India,** Geology.

Goodwan Plateau, in the E. of the S. African Republic, with a precipitous escarpment of 1500 ft., fronting the Kaap valley.

Goodwick, PM.O., Wales, Pembrokeshire, on bay and 1½ m. NW. Fishguard.

Goodwin, vil., U.S., S. Dakota, Deuel co., 145 m. N. by E. Yankton. P. <1500.

Goodwin Sands, range of shoals at the S. extremity of the North Sea, extending off the E. ct. of Eng., co Kent, between the N. and S. Forelands, 5–8 m. from the coast; the roadstead, termed the Downs, lies between them and the mainland. Length about 10 m. by 1½ m. in breadth. They are divided into two parts by Trinity Bay and the Swash, in many places bare at low water, and owing to their shifting and loose nature and position near the entrance to the Thames, have, perhaps, proved more fatal to life and property than any other known quicksands. Floating lights, with bells rung during fogs, are placed upon them. The name has been conjectured to be connected with a British word *guydn*, meaning 'a soft tenacious soil.' By popular tradition the name has been connected with Earl Godwin (Camden speaks of the Godwyn Sands), the shoals being held to represent a former island said to have belonged to Earl Godwin, and to have been submerged, when one of the abbots of St. Augustine, Canterbury, to which the island had been transferred, diverted the funds for the maintenance of the seawall round the island to the erection of Tenterden steeple.

Goodwood, vil., Canada, Ontario, co. and 27 m. NNE. Toronto. P. <1500. See also **Bryanston.**

Goshen, vil., U.S., New York, Orange co., 29 m. SW. by S. Poughkeepsie. P.<3000.

Goslar, tn., Prussia, prov. Hanover, 18 m. S. by W. Wolfenbüttel, on an affluent of the Oker, at the NE. foot of the Harz, at the foot of the Rammelsberg, a mountain rich in silver and other metallic ores, which have been mined from an early date, and are still worked, though they have lost a good deal of their former importance. Smelting, and beer brewing, and various other industries are carried on. Slate quarries near. Fortified by Henry the Fowler early in the 10th century; was formerly a frequent seat of the German Diets, and residence of the emperor, and still retains an old imperial palace. G. is the seat of the mining council of the Harz, and of the corn depôt for the Prussian portion of that region. The first part of the name is derived from the R. Gose, a small stream which joins the Oker near G., but the origin of the termination *lar,* which occurs also in Wetzlar, Fritzlar, and many old German names, is doubtful (Egli). P. (1825) 5700; (1890) 13,200; (comm.) 13,300.

Gospel Oak, stn., Eng., London, N. St. Pancras div., 4½ m. NW. by N. St. Paul's, on the Hampstead Junc. Rly.

Gosport, vil., U.S., Indiana, Owen co., on r. bk. of W. branch of White R., 39 m. E. by S. Terre Haute. P.<1500.

Gosport and Alverstoke, fortified seapt. tn. (urban sanitary dist.), Eng., co. Hants, W. of and separated from Portsmouth by the mouth of Portsmouth Harbour, across which a floating bridge connects the two towns. It is at the termination of a branch of the L. & SW. R., and has another stn. (**G. Road**) on the same railway, 77 m. SW. London. Inhabitants mostly engaged in government works, or in retail trade, yachting, and shipping. Sail-making and the manufacture of yacht-stoves and yacht iron-work are also carried on in private establishments. The ramparts form an inner line of defence, while an outer circle of forts completes a fortified barrier enclosing Portsmouth, Portsea, and Gosport. It has extensive barracks, the Royal Clarence victualling yard, and a powder magazine, and contains the largest naval hospital in the world, Haslar Hospital. P. (**G. with Alverstoke**) (1801) 7500; (1871) 22,600; (1891) 25,400.

Gos Rejeb, tn., eastern Sudan, on the l. bk. of the Atbara, 70 m. NW. Kassala, on the caravan route from Suakim (Sawákin) to Sennar.

Gotha, tn., central Ger., cap. duchy Saxe-Koburg Gotha, 14 m. W. by S. Erfurt, both towns lying amidst the foot-hills on the N. side of the Thuringian Forest. It stands on the declivity of a hill crowned by the palace of Friedenstein, the usual residence of the sovereign of Saxe-Koburg and G., containing a gallery of paintings, a large library with several thousands of MSS., and various museums of arts and sciences. Manufactures comprise machinery, fire-engines and fire-hose, porcelain, tobacco, colours, lead and tin toys, &c. The town is also an important seat of the book trade, and is well known as the seat of the geographical establishment of Justus Perthes. Lat. new observatory, near the foot of the Seeberg (a hill 1335 ft. high SE. of the town), 50° 56′ 37″ N., 10° 42′ 38″ E. G. is an old city, first mentioned under the name of Gotaha in 770; surrounded by walls in 930 by Gothard, Abbot of Hersfeld, who afterwards came to be regarded as the patron saint of the town. Cap. of the duchy of G. 1640–1825. P. (1816) 10,600; (1871) 20,600; (1890) 29,100.

Gotham, par., Eng., Nottinghamshire, Rushcliffe div., 6½ m. N. Loughborough, 3 m. ESE. Trent Junc., with gypsum-mines, PM.O. P. <1500.

Gothenburg, Swedish **Göteborg,** tn. and seapt., Sweden, prov. G. and Bohus, on the W. ct., 82 m. W. Jönköping, near the mouth of the Göta-elf. Manufactures textiles (principally cotton, also woollen), joinery, matches, wood-pulp, paper, which along with pit-props, deals, and other wooden goods, iron and zinc ore, pig and rolled iron, butter, and grain, form the chief exports. Harbour 17 ft. deep at entrance; there is a depth of 16–20 ft. alongside of the Skeppsbron quays. Mean temp., yr. 44.8° F., Feb. 29.9°, July 62.8°; rfall. 31.07 in. P. (1871) 57,400; (1890) 104,700.

Grampians (*Drum Alban*), mt. chain, Scot., forming the natural rampart which separates the Highlands from the Lowlands. Its limits, owing to numerous parallel ridges and scarcely connected branches, are difficult to define, but the mountains may be said to stretch from the W. coast of Argyllshire and Dumbartonshire NE. across the island, terminating on the E. and NE. coasts of the cos. Aberdeen and Banff, in two branches running on each side of the riv. Dee. This mountain chain is composed of granite, porphyries, schists, quartzite, and marble. General aspect wild and rugged, especially on the N. side. On the S. hills the slopes are more gentle, the pasture finer, and the numerous defiles which indent the range often present scenes of the most romantic beauty. The streams flowing from the N. side are affluents of the Findhorn, Spey, Don, and Dee; those on the S. join the Forth, Tay, and S. Esk. See **Scotland,** Surface.

Grampians, mt. range, Victoria, stretching crescentwise N. and S. between 35° 52′ and 37° 38′ S., and 142° 25′ and 112° 47′ E., bounding E. the basin of the Glenelg and its affluents. Height of Mount William, its central and loftiest peak, 8600 ft.

Grampound, par., Eng., Cornwall, St. Austell div., on the R. Fal, 7½ m. ENE. Truro, 2 m. SE. by E. Grampound Road stn., on the G. W. R., PMT.O. Market-day, S. P. <500. See **Creed.**

Gran, probably from the Slavonic *Gron, hron,* 'river.'

Gran (Hungarian **Esztergom,** ancient *Strigonium*), royal free city, with magistracy, Hungary, cap. co. G., and earliest cap. of Hungary, with a steam-packet station on r. bk. of the Danube, opposite the influx of the Gran, 24 m. NW. by N. Budapest. Seat of primate of Hungary; birthplace (about 969) of Stephen, first king of Hungary; has strong sulphate of magnesia springs. Chief edifice, an unfinished cathedral, occupying with the archbishop's palace and chapter-house a precipitous height, formerly the site of a fortress. Alt. 510 ft. P. (1869) 8800; (1891) 9300.

Granada, prov. (since 1834), Spain, Andalucia, composed only of the central part of the old Moorish kingdom of G., detached in 1238 from the califate of Córdoba, occupying the upper valleys of rivs. Jenil, Guadiana Menor, and Almeria, and the surrounding mountains as far as the Mediterranean (64 m. of coast), formerly comprising also the valley of the upper Guadalquivir (now in Jaën). It was the last Spanish terr. to be conquered by the Christians (Jan. 1492). From the central Sierra Nevada rivers run in all directions, reaching, ultimately (N.), the Guadalquivir and (S.) the Mediterranean. G. has all the climates, from African ones, in the lowlands and sheltered valleys, up to those of more N. countries, on the high snowy summits (some above 11,000 ft.), and therefore a very rich flora, with all economical plants, from cereals to vine, cotton, and sugar-cane, presenting some of the more picturesque scenery in the world (Alpujarras, Sierra Elvira, &c.). The garden-like valleys, the orchards of the *vegas,* between the mountain ridges (above all *la vega,* near Granada, with more than 40 m. around), are celebrated for their fertility and for their old Arab irrigation works. Mineral deposits are important, but, to a great extent, unworked. Many well-known springs of mineral waters. Some industries were prosperous in old times (silk in Alpujarras). At present manufactures are very limited (sugar, distilleries, linen and wool). The two ports, Almuñécar and Motril, are insufficient. Trade chiefly overland. See **Spain, Andalucia, Sierra Nevada.**

Granada, the old Phœnician *Karnattah,* the (Latinised) *Iberian Illiberis, Liberini* ('new town'), tn., Spain, 130 m. E. by S. Seville, cap. prov. G., on the banks of riv. Jenil, and traversed by riv. Darro, its affluent, on the N. slope of Sierras Nevada, built on the border of a well irrigated plain [**Granada,** prov.], on three hills said to be like the parts of an open *pomegranate,* on one of which are the *Torres Bermejas* ('red towers,' the original part), and on the highest of the three the Alhambra (Arabic, *alhamara,* 'the red'), the most celebrated of its many monuments, palace and castle of the Moorish kings, the masterpiece of Arab architecture (11th to 15th century), an irregular mass of houses and towers on a commanding height, surrounded by groves, and of which the bastioned walls, arches, halls of the Abencerrages and ambassadors, court of lions, mezquita, and the unfinished palace of Charles V. are the portions most worthy of notice. Of its Christian edifices the most important is the cathedral, with nave and four aisles, founded in 1529, and containing the magnificent tombs of Ferdinand and Isabella, Joanna, the mother of Charles V., and of Philip I. Seat of a university founded 1531, an archæological museum founded 1879, and centre of a military *Capitania general* (comprising provs. G., Almeria, Malaga, Jaën). Mean alt. 2250 ft.; alt. of meteorological station, 3409 ft. Mean temp., yr. 58.7° F., Jan. 43.0°, Aug. 77.0°; rfall. (10 yrs.), 39.33 in. P. in Moorish times said to have reached 500,000; (1860) 67,300; (1887) 73,000.

Gran Canaria, or **Grand Canary,** one of the Canary Is., the cap. of which is Las Palmas; highest point, Los Pechos, 6400 ft. high.

Gran Chaco (Spanish, 'great hunting-ground'), a vast region in the middle of S. America, extending through eastern Bolivia, western Paraguay, and the N. of the Argentine Republic, between 18° and 30° S. and 57° and 63° W., divided into three sections: the Chaco Boreal (N.), from the plains (llanos) of Chiquitos to the Pilcomayo, with an area of about 81,000 sq. m.; the Chaco Central, between the Pilcomayo and Bermejo, 72,000 sq. m.; and the Chaco Austral (S.), between the Bermejo and Salado, 77,600 sq. m. The whole is a sandy formation sloping from N. to S., and from WNW. to ESE.; uniformly flat except in the part of the Chaco Boreal, which separates the basins of the Parapiti and Pilcomayo. There are no regular observations as to the climate; but there appears to be a very marked dry season from May to November, alternating with a rainy season, in which the rains are so abundant as to fill the whole region with vast lagoons, and almost to convert it into one vast lake. The Chaco Boreal is one vast forest, in which the quebrachos and algarrobos predominate. Further S. forests are not so unbroken, though they extend over vast areas. The region is very scantily peopled by uncivilised Indians. See also **Pilcomayo** and **Bermejo.**

Grancy, vil., Switzd., cant. Vaud, 9 m. NW. by W. Lausanne. P. <2000.

Grande, isl., Brazil, SW. of Rio Janeiro, in 23° 12′ S. and 44° 15′ W.

Grande, Cagayan, or **Tago, Rio,** the longest riv. in Luzon, Philippine Is., flows N. into the middle of the bay on the N. ct.

Grande Baie, Canada, Quebec. See **Ha Ha Bay.**

Grande Brière, marshy, peaty plain, France, dep. Loire-Inférieure, N. of St. Nazaire, in the penin. between the Vilaine and the mouth of the Loire.

Grande Chartreuse, La, France. See **Chartreuse.**

Grande, Rio ('great river'), riv., Brazil, Bahia, flows E. then NE. and joins the São Francisco at Barra, in 11° 56′ S. Its l. bk. trib., the Preto, is connected with the Sapão, and it again with the Rio do Somno, which flow along the base of the Chapada de Mangabeira and joins the Tocantins in about 8° 35′ S., forming a waterway navigable by canoes between the São Francisco and the Tocantins. See also **Paraná.**

Grande, Rio, riv., Central America, Costa Rica, flows W. into the mouth of the Gulf of Nicoya; numerous rapids impede the navigation.

Grande, Rio, riv., Colombia, Isthmus of Panama, flows SE. into the Gulf of Panama, to the W. of the town of Panama. The Panama Rly. runs through the upper part of its valley, which was to have been followed to its mouth by the Panama Canal.

Grande, Rio, Guatemala. See **Motagua.**

Grande, Rio, riv., Spain. See **Guadalfeo.**

Grande, Rio, the **Koli** of the Mandingoes, and **Mayo-Kabu** or **Mayo-Komba** of the Fulahs, coast riv., western Africa, Senegambia; rises in Futajalon, in French terr., flows on the whole W. through Portuguese terr., and joins the Geba at the head of its estuary.

Grande (or **Bravo**) **del Norte, Rio** (great riv. of the N.), or **Rio Grande,** large riv. of the U.S., rises in the San Juan Mts., in the SW. of Colorado, in about 37° 45′ N., 107½° W., flows first E. then S. through New Mexico, and finally SE. into the Gulf of Mexico, forming the whole of the SW. frontier of Texas; chief trib. the Pecos, l. bk. Its navigation is impeded by rapids and shoals, but small steamers have ascended from the sea to Kingsbury Rapids, about 450 m. up. Total length about 1800 m.

Grande de Matagalpa, Rio, riv., Central America, Nicaragua, flows E. into the Caribbean Sea, in about 12° 45′ N.

Grande de Mindanao, Rio, riv. See **Palangui.**

Grande de Santiago, riv., Mexico, issues under the name of Rio de Lerma from the Lake of Lerma (E. of Toluca and SW. of the city of Mexico), and flows first NW. into the Lake of Chapala, issues from that lake on the N. side, and still flowing NW. passes near the city of Guadalajara, then turns WNW. and enters the Pacific in 21° 40′ N. near San Blas. Difficult of navigation on account of the numerous falls and the rapidity of its course in its upper parts, and on account of its shallowness, at least in the dry season, lower down. Length roughly estimated at about 600 m.

Grand Entry Harbour. See **Magdalen Islands.**

Grande Rivière. See **Mauritius.**

Grande Robine, canal, France, dep. Gard, joins the town Aigues-Mortes with the Mediterranean.

Grande Ronde, The, beautiful valley, Union co., Oregon, near the NE. corner of the state, drained NE. by the Grande R. into the Snake.

Grande-Sauve, La, E. Bordeaux, in 44° 46′ N., 0° 19′ W. Alt. 331 ft. Mean temp., yr. 53.8° F., Jan. 39.4°, July 68.2°.

Grandes Rousses, glaciated mt., France, in the SE., on the frontier of deps. Isère and Savoie. Alt. 11,500 ft.

Grand Étang, vil., Canada, Nova Scotia, Cape Breton I., Inverness co., on W. ct., 58 m. NW. by N. Sydney. P. <1500.

Grangemouth, seapt. tn., Scot., co. Stirling, on the Firth of Forth, at the mouth of the Carron, starting-point of the Forth and Clyde Canal, near the Forth, with a terminal stn. on branch line of the N. B. R., on which the C. R. has running powers, 2½ m. NE. by E. Falkirk. It has a graving dock, a harbour for vessels drawing 11 ft. of water, two docks belonging to the C. R., the larger of which has a depth of 16–22 ft. on the sill at high water, and outside the harbour a sea-wall 850 ft. long, alongside which the largest ships can lie. The port has regular steam-communication with London, and considerable trade with the Continent (for statistics, see **Appendix,** p. 13). There are coal-mines near, establishments for shipbuilding, sawmills, brick and tile works, and a rope and sail factory. P. (1871)<3000; (1891) 6400.

Graz, or **Gratz** (connected with Slavonic *grad*), tn., Austria, cap. Styria, on the Mur, at the head of the first important expansion of the valley of that river, and built round the foot of the truncated, isolated conical hill called the Schlossberg, which rises about 400 ft. above the town, and was fortified even in the time of the Romans. It is the seat of a bishop, and has a university, a technical high school, and other important educational institutions. It has grown rapidly since the introduction of rlys. and steam factories. The valley of the Mur affords rly. communication both N. and S., and it has likewise rly. communication eastwards by the valley of the Raab. Its manufacturing industries (machinery, iron-wares, paper, leather, &c.) are promoted by the vicinity of the lignite of the Kainach valley, the most important deposit of mineral fuel in the Alps. In the neighbourhood are the cold mineral springs of Radegund, and the health-resort of Tobelbad. Alt. 1165–1235 ft. Mean temp., yr. 48.6° F., Jan. 29.0°, July 67.8°. P. (1869) 81,000; (1880) 98,000; (1890) 112,100.

Great Barrier Island, isl., off the E. ct. of the North I., New Zealand, off the mouth of Hauraki Gulf, just S. of 36° S. A small island to the W. is known as Little Barrier I.

Great Barrier Reef, series of coral reefs off the E. ct. of Australia, beginning about 1° N. of the Tropic of Capricorn, and extending for a distance of 1250 m., advancing into the latitude of Torres Strait, which it nearly closes. The widest part is in the S., where it extends for about 100 m. from E. to W., and in that part also it lies furthest from the coast (150 m.). As it narrows towards the N. it comes nearer to the coast, being in many places within 10 m. of the land, opposite the promontories, and generally not more than 15 or 20 m. distant. At low tide the surface of the reef is just above the level of the surface of the water, and at all states of the tide the border of the reef can be distinguished by the strong breakers that wash over it. The reef, however, is not continuous. It is broken up by many deep channels, some of which are narrow, others from 10–12 m. wide, enabling vessels to take either an inner or an outer route. The principal of these channels are the Bligh Entrance, in 9° 20′ S., 143° 45′ E., which affords the best access to the outer route from Torres Strait; the Olinda Entrance, in 11° 20′ S.; the Raime I. Entrance, in 11° 40′ S.; and Flinders Passage, E. of Townsville and N. of Bowen, Queensland, in 19° S., 148° E. The route within the reef along the Australian coast has the advantage of a calm and beautiful sea, owing to the protection which the reef affords, and is that preferred by steamers, whose course can be more easily controlled than that of sailing vessels. But this route is one that requires careful navigation, and above all at night, when the reef cannot be made out at a greater distance than half a mile. By day it is visible at a distance of 4 m. from the bridge, and 7 m. from the rigging. Hence sailing vessels that take the inner route proceed on their course only by day, anchoring for safety at night; and as a rule such vessels go outside of the reef altogether into the open ocean, and pass through one of its northern channels into or out of Torres Strait. The most valuable products of the reef are pearls and pearl shells from *Meleagrina margaritifera*, and trepangs (*Stichopus vulgaris, Holothuria mammifera*, and *Actinopyga obesa*). The whole area enclosed by the reef cannot be less than 100,000 sq. m. See *The Great Barrier Reef of Australia: its Products and Potentialities.* By W. Saville-Kent. London, 1893.

Great Basin, at one time called also **Fremont's Basin,** a vast region of inland drainage in the SW. of the United States, considerably larger than France, covering portions of Nevada (nearly the whole), Utah, Oregon, and California, between the Sierra Nevada on the W., and the Wasatch Mountains on the E., bounded on the S. by the mountains of S. California, and on the N. by the low water-parting forming the limit of the Columbia basin. General level of broadest part, 4000–5000 ft. It is traversed everywhere by mountains trending usually N. and S., and rising from 1000–4000 ft. above the level of the plateau. Intervening valleys almost 20 m. wide, and often of great length. The hills are barren, the earth parched and almost destitute of higher vegetation, and it is only on the banks of streams that grass and trees or cultivated fields are seen. The soil where irrigation can be applied is exceedingly fertile. There are broad flats covered with salts, usually nitrate of soda, which are perfectly barren. The lakes are numerous (in the E. Great Salt Lake and Lakes Utah and Sevier, in the W. Lakes Malheur and Harney, the Humboldt and Carson Sink, Lakes Carson, Walker, &c.), and all of them are either salt themselves, or they add their waters to a salt lake. The lakes in the NE. are relics of a much larger lake, called Lake Bonneville, which in a recent geological period extended over a fourth of the area of the G. B. Another extinct lake of great size in the NW. of the G. B. (principally in Nevada, but partly in California) has been called Lake Lahontan. (See *Monographs of the U.S. Geological Survey*, vol. i., Washington, 1890.) **Soda Lake** and **Death Valley,** in this region, are peculiar depressions of the surface, 4000 ft. below the general surface of the plateau, and even some distance below the level of the sea. Vast deposits of silver ore are ascertained to be stored among the mountains all over the country.

Great Bay, U.S., New Jersey, in the SE., in 39½° N., between Burlington and Atlantic cos.

Great Bear Lake, Canada. See **Bear Lake, Great.**

Great Bend, city, U.S., Kansas, Barton co., on the l. bk. of the Arkansas R., 175 m. W. by S. Topeka. P.<3000.

Great Bend, settlement, U.S., N. Dakota, Richland co., 50 m. S. Fargo.

Great Bend, bor., U.S., Pennsylvania, co. and on the r. bk. of the N. branch of the Susquehanna R., opposite **G. B. Village,** 40 m. N. by W. Scranton. P.<1500.

Great Bras d'Or Channel, off the E. of Cape Breton I., Nova Scotia, just N. of 46° N.

Great Bridge, stn., Eng., S. Staffordshire, on the G. W. and L. & NW. Rlys., 2½ m. NE. Dudley.

Great Central Lake, Brit. Columbia, Vancouver I., drained SE. by Alberni Canal into Barclay Sound.

Greatconnell, par., Ire., N. co. Kildare, bar. Connell, 6 m. E. by N. Kildare; 4584 ac. P.<1000.

Great Dividing Range. See **Australia,** Surface.

Great Eastern Railway, important rly. system, Eng., having almost a monopoly in the counties between the Thames estuary and the Wash; London terminus, Liverpool Street.

Great Egg Harbor, inlet, U.S., New Jersey, between Atlantic and Cape May cos., in 39° 18′ N.

Great Falls, city, U.S., Montana, Cascade co., 115 m. NE. by N. Butte City. P.<4000.

Great Falls, vil., U.S., New Hampshire, Strafford co., on Salmon Falls R., 34 m. E. by N. Concord; has vast cotton mills, driven by water-power supplied by the Salmon R. P.<2000.

Great Fish River, or **Back's River** (Indian name, Thlew-ee-

Choh), riv., Canada, NW. Terrs., rises close to the N. shore of Lake Aylmer (Mackenzie basin), and flows NE. over a succession of granites and sands, forming numerous rapids, which render the river almost useless for navigation, and expanding in places into lakes, the largest of which are the connected series Pelly, Garry, and Macdougal, in 66° N. It finally enters the Arctic Ocean by a wide estuary in 68° N., 96° W. At its mouth is Montreal I., where relics of Sir John Franklin's party were discovered. Ironstone abounds on its r. bk. near its head.

Great Fish River, S. Africa, Cape Colony, rises in the Sneeuwberg (Snowy Mts.), flows tortuously SSE. through the dists. Somerset, Albany, &c., and enters the Indian Ocean near 33° 77′ S. and 27° 2′ E., after a SE. course of about 230 m. A bar at its mouth renders it inaccessible except by boats. The rlys. from Port Alfred and Port Elizabeth after their union ascend its valley from Commadagga.

Great Island, Ire., co. and 3 m. NE. and on N. side of Wexford Harbour.

Great Island, the largest of the Furneaux group, in the E. of the Bass Strait, Tasmania.

Great Kei, riv. See **Kei.**

Great Lake, Tasmania, is the largest lake of that country, and is 3800 ft. high, in the Central Highlands of the island, co. Westmorland, 30 m. SW. Launceston; drained S. by the Shannon through the Ouse into the Derwent; 13 m. long by 3–8 m. broad; area, 28,000 ac.

Greatman's Bay, Ire., NW. co. Galway, at the N. of entrance to Galway Bay.

Great Neck, vil., U.S., New York, Queen's co., 15 m. NE. Brooklyn. P. <1500.

Great Northern Railway, an important rly. system, Eng.; main line, London (King's Cross) to York. Numerous branches on either side.

Great Northern Railway (Ire.), a rly. system in the N. of Ire.; main line, Dublin (North Wall) to Belfast; numerous branches in Ulster, also a branch from Drogheda to Oldcastle (Westmeath); headquarters at Dundalk.

Great North of Scotland Railway, rly. system, Scot., headquarters at Aberdeen, whence there are lines to Banff, Elgin, Dyce, Culter, Peterhead, Fraserburgh, and Braemar, the last known as the Deeside Rly.

Great Pedro Bluff, cape, Jamaica, on the S. ct., in 77° 44′ W.

Great Salt Lake, lake with no outlet, U.S., Utah, between 40° 40′ and 41° 45′ N., and 111° 50′ and 113° 10′ W., is 80 m. long by 32 m. broad. It contains numerous rocky isles, the largest, Antelope, being 18 m. long. The lake is from 10 to 50 ft. deep. It is fed by Bear, Ogden, Weber, and Jordan Rivs., all too small for navigation. In 1850, its area was 1700 sq. m., and its water contained 22.4 per cent. solid matter. Between 1861 and 1869 it increased in depth 11 ft., and had in 1869 an area of 2360 sq. m., and a percentage of 14.8 of solid matter in solution—chloride of sodium, 11.862; chloride of magnesia, 1.490; sulphate of soda, 0.932; and smaller amounts of potassium and lime. This is about three times the percentage in sea-water. In later years its area has diminished somewhat. See **Great Basin.**

Great Sandy Island, Queensland, on the ct., stretching from Wide Bay to Hervey Bay, of which it forms the E. side; crossed by 25° S.; 65 m. by 10 m. Barren soil. Excellent fishing. Sometimes called Frazer's I.

Great Slave Lake, large lake, Canada, NW. Terrs., between 61° and 63° N., 108½° and 118½° W., 300 m. long by nearly 60 m. wide; area, 7100 sq. m. Very irregular in shape; forms in the E. two large bays, McLeod's Bay in the N., and Christie's Bay in the S., nearly separated by a large island. Connected in the E. through Lockhart's R. (unnavigable) with Artillery Lake, Clinton-Golden Lake, and Aylmer Lake. From its W. issues the Mackenzie R. Contains trout, a kind of salmon, and other fish. Freezes in winter to a depth of 6–7 ft.

Great Slave River, Canada, NW. Terrs., issues from the W. of Lake Athabasca, flows N. and enters Great Slave Lake by a large delta; ascended by sea-going steamers to the rapids near Fort Smith (a little N. of 60° N.), where there is a portage of 13 m., above which it is navigated by river steamers to its head.

Great Slide, settlement, Canada, prov. Brit. Columbia, on Bella Ceola R., 245 m. NW. by N. Vancouver.

Great Smoky Mountains. See **Appalachian Mts., B. I.**

Great South Bay, lagoon, U.S., New York, between Fire I. Beach and the mainland of Long I., in 72½–73½° W.

Great Southern & Western Railway, the chief rly. system in the SW. of Ire.; main line, Dublin (North Wall) to Cork.

Great Valley, U.S. See **Appalachian Mountains, B. I.**

Great Victoria Desert, the southern part of the desert in the eastern half of W. Australia.

Great Village, seapt., Canada, Nova Scotia, Colchester co., on Cobequid Bay, 54 m. WSW. Pictou. P. <1500.

Great Western Road, stn., Scot., Lanarkshire, Partick div., in a W. suburb of Glasgow, on the N. B. R.

Great Western, Queensland. See **Watsonville.**

Great Western, postal-vil., Victoria, Borung co., 8 m. by rail SSE. Stawell; has slate quarry near. P. <1500.

Great Western Railway, one of the largest rly. systems of Eng.; main line from London (Paddington) to Bristol, Exeter, and Penzance; numerous ramifications over the western cos. as far N. as Chester, and in Wales principally S. Wales, but also to Barmouth and Blænau Festiniog in N. Wales. Locomotive and carriage works at Swindon.

Greatworth, par., Eng., S. div. of Northamptonshire, 6½ m. E. by N. Banbury, 2½ m. WSW. Helmdon stn., P.O. P. <250.

Grebenstein, tn., Prussia, prov. Hesse-Nassau, 11 m. NNW. Kassel. P. <3000.

Greco, or **Grego,** cape in SE. of Cyprus, in 34° 57′ N.

Greco Milanese, comm., Italy, prov. and dist. Milan. P. <4000.

Gredos, Sierra de, mt. range, Spain, to the N. of 40° N., and stretching nearly E. and W. between 4½° and 6° W., between the headwaters of the Alberche and Tormes on the N., and that of the Tietar on the S., the Alberche, where it turns southwards, separating it from the Sierra de Guadarrama. Highest peak the Plaza de Almanzor, 8730 ft. Principal pass the Puerto del Pico, in about 5° W.

Greece, a kingdom in the SE. of Europe, in the E. of the Mediterranean, comprising a peninsular portion, with the Ionian Is. on the W., and Eubœa, the Cyclades, and other islands on the E., in the Ægean Sea; two of these islands, Leukas and Eubœa, being separated from the mainland only by very narrow channels, that of Leukas not being navigable by ships. The kingdom is divided into provs. (*nomoi*), eparchies (*eparkheiai*), and demes (*dēmoi*) or communes. The area and pop. of the provs. are shown in the following table:—

Provinces (*nomoi*).	Area in sq. m.	Pop. in Thousands. 1879.	1889.	Incr. p. cent. '79–'89.	Pop. per sq. m.

[1] Census 1881.

The peninsular part of the country is itself divided into two portions by the isthmus of Corinth, which forms the connecting link between N. and Mid Greece on the one hand, and the Peloponnesus or Morea on the other hand, the latter running out into four minor peninsulas, the southernmost of which, the peninsula of Mani or Mainē, ends in Cape Tainaron or Matapan, in 36° 23′ N., 22° 29′ E. The isthmus separates the Gulf of Ægina on the E. from that of Corinth or Lepanto, continued beyond the narrows in 22° E. by the Gulf of Patras, and the minor peninsulas of the Peloponnesus form in the order from W. to E. the Gulfs of Messenia or Korōnē, Laconia or Marathonēsi, and Nauplia or Argolis. By far the greater part of the **surface** is mountainous, and the **coasts** are mostly high and cliffy, the principal stretches of the coast-line having a different character being those on both sides of the Gulf of Patras, and on the NW. and W. of the Peloponnesus. The principal plains are those of Thessaly, drained by the R. Peneios (Peneus) in the NE. of the country, the basin of that river being divided by mountain spurs into two sections, corresponding pretty nearly

with the nomoi of Trikkala (in the W.) and Larissa (in the E.). The other considerable plains are those traversed by the Sperkheios at the head of the Gulf of Malia or Zeituni, separated from the plains of Thessaly by Mount Othrys; the plain in Bœotia, formerly occupied for the most part by Lake Kopais (*q.v.*); and a plain in the W. in Acarnania, traversed by the lower Akhelōos or Aspropotamos. In the Peloponnesus there are hardly any districts that can be described as plains. The greater part of the surface there is upwards of 1650 ft. in height, the principal areas below that level being the valley of the Eurotas and adjoining tracts N. of the Gulf of Laconia, and in the lower valley of the Alpheios (Ruphia) in the W. A narrow tract under that elevation, in which are the towns of Karytaina and Megalopolis, connects these two districts. The mountains of G. comprise few chains of any considerable length, even in proportion to the size of the country. Among the few is Mount Othrys, already mentioned as separating the valleys of Thessaly from that of the Sperkheios, a range stretching E. and W. on the parallel of 39°, and attaining in Gerakobuni in the E. an alt. of 5670 ft., in Hagios Elias in the W. one of 4215 ft.; another is the range on the E. of the plain of Larissa and the Gulf of Volo, known in the N. as Ossa or Kissavos, 6405 ft., and in the S. as Pelion (Plaisidi, 5305 ft.); a third, Mount Taygetos or Pentedaktylon, runs S. through the peninsula of Mani, reaching in Hagios Elias the height of 7870 ft. Among other notable peaks are Bardousia (8185 ft.), Nkiona (8240 ft.), and Parnassus (8065 ft.), all in Phthiotis and Phocis, and Helikon (5735 ft.), in Bœotia. The **geological structure** of the country accounts in a great measure for the peculiar character of the hydrography. The greater part of the country is composed of limestones of Cretaceous age, or belonging to the formations immediately preceding. The remainder of the surface is mainly occupied (at least in the Peloponnesus) by neogene marls, sands, and sand-stones, and conglomerates, with strips or more extensive tracts of alluvium on the coasts, especially at the head of the bays. The islands on the W. are similar in structure. The Cyclades, on the other hand, are mostly composed of metamorphic rock, Mēlos and Santorin volcanic. The peninsula of Methana, in the Gulf of Ægina, is likewise of volcanic origin (trachytic). The rocks of G. are much faulted, and earthquakes are very frequent. Seven different areas independently liable to earthquake shocks are distinguished: (1) the Corinthian, extending from the isthmus of Corinth to Patras, a district in which shocks are very frequent and sometimes violent, the parts suffering most severely being the incompact alluvial strip on the coast; (2) the Phocæan, from Delphos to beyond Lidorikion; (3) the Agrinian in the W. of Mid and N. Greece, from Agrinion to Vonitsa and Prevesa; (4) the Ionian, embracing the S., and especially the SW., of the Peloponnesus and the Ionian Is. northwards to Leukas; (5) the region of the Cyclades; (6) the Eubœan district from Chalkis to Thebes; and (7) the Thessalian plains. Hot springs are numerous; almost all rich in common salt, and near the sea, most having also more or less sulphur. Wherever limestones are found, and to a less extent in the districts of the conglomerates, the **surface water** disappears to a large extent in fissures (here called *katavothrai*), and circulates underground till it reappears in clear and nearly constant springs (*kephalaria* or *kephalovrysi*) at the junction of the limestone with the neogene marls or some other hardly permeable rock. The principal rivers are the Peneios, Sperkheios, and Akhelōos, all already mentioned in N. and Mid G., and the Eurotas or Iri, the Pamisos, and Alpheios in the Peloponnesus. It is noteworthy in this peninsula that, on the E. side from the Gulf of Ægina to the Eurotas, there is not a single perennial or even periodic stream, whereas on the W. side, from the Pamisos to the Gulf of Corinth, they are all perennial, or at least periodic, all dangerous torrents, liable to swell to destructive dimensions, and rolling enormous masses of débris down to the sea. Most of the lakes of G. are either coast lagoons (like that of Agoulinitza) or lakes with underground outlets, and liable from time to time to be entirely drained off and disappear. The chief lakes are Bolbeis or Karla, in the E. of Thessaly, at the base of Mount Pelion; Amvrakia and Trikhonis, in Acarnania and Ætolia; Lykeri and Paralimni in Bœotia, through which Lake Kopais is now drained into the sea; and Pheneos (Phonia) and Stymphalos, in the N. of the Peloponnesus. The **climate** of G. is that of the Mediterranean generally, the chief characteristics being moderate temperatures and dry or nearly rainless summers. [**Europe,** climate; **Corfu, Athens.**] At Athens there are five months—April, June, July, August, and September—in which the mean rfall. is less than four-fifths of an inch. Northerly winds (the Etesians of the ancient, the Meltemia of the modern, Greeks) prevail in July and August and sometimes during the first half of September. On the coasts these are modified by the occurrence of land- and sea-breezes, but in enclosed valleys calms generally prevail in the intervals during which the northerly winds of this period do not blow. Malaria is a scourge throughout the whole country. Not even the most elevated village is free from the dreaded malarial fevers, but the peculiar seats of such diseases are the low grounds and hill country of the coast region, composed of alluvium and incompact neogene deposits; and the period when it reaches its height is August and September, that is, towards the end of the dry season, and especially after the first rains. Malaria appears to be much more severe than in ancient times, probably owing to the neglect of cultivation and want of care in regulating the surface water. G. is pre-eminently an **agricultural** country. The **products** of most importance is that of currants, the cultivation of which is chiefly pursued in the Ionian Is., where the sweetest and best-flavoured fruit is grown, and in the provs. of Achaia and Elis, at the head and along the S. shore of the Gulfs of Corinth and Patras; other southern fruits are also grown, particularly olives. The mountain districts are almost exclusively agricultural, wheat and barley being the chief crops. Maize is cultivated to an alt. of 3600 ft. The native grain production is, however, insufficient for the requirements, especially on the Cyclades and in the currant-producing districts. The cultivation of cotton, already considerable, is increasing, the reclaimed plain of Kopais being well adapted for this crop. The principal **forest tree** is the Aleppo pine, next in number are various oaks (the Valonia oak of economic importance), firs, and black pines. Forests give place to low scrub at an alt. of 6200–6500 ft. **Fish** are abundant off the coasts, but the Greeks are not fishermen. The **wild animals** include, in the Morea, foxes, and even a few jackals. The eagle, vulture, and hawk are the commonest birds of prey. The chief **minerals** are the silver-lead, and manganiferous iron and zinc ores of Laurium (at the SE. extremity of Attica), and the iron ores of the isl. of Seriphos (SW. of Syra). Recently a beginning has been made with the working of extensive deposits of argentiferous barytes on the isl. of Mēlos (Milo), where also manganese ores and sulphur are worked. Anciently iron ores were worked in Laconia, but the ores, though abundant, are not sufficiently rich or well situated to be worked profitably under modern conditions. Metals and metallic ores make up 20 per cent. of the value of Greek exports. Among the minor minerals is the statuary marble of the isl. of Paros. The anciently celebrated black marble quarries of Tainaron have not yet been identified with certainty. **Manufacturing establishments** using steam or water power are rapidly increasing in Athens and the other large towns. They are principally confined to the production of coarse cotton and other textiles, but machinery is made at the Piræus. The making of furniture and shipbuilding are important. The **means of communication** are still defective. The first rly. (from Athens to the Piræus) was opened in 1869. It is on the ordinary gauge. Narrow-gauge rlys. now run from Athens to the Laurium mines, and along the E. side of the isthmus of Corinth, and along the N. and NW. coasts of the Peloponnesus to Pyrgos, with a branch from the isthmus to Mylos (Myli), the port of Argos, now being continued by Tripolis to Kalamai (Kalamata). Of the rlys. now in progress, is that which has been constructing since 1890 from Athens to Larissa. It is on the ordinary gauge, and is intended to be ultimately brought into connection with the rly. from Belgrade to Salonica. Already a rly. runs through the Thessalian plain from Larissa to Trikkala, describing a great curve to the S., so as to pass near Pharsalos. The ship-canal which, since 1893, has afforded a passage through the isthmus of Corinth, is important not only as effecting a saving of time (about half a day) in the voyage between the E. and W. of Greece, but also as enabling ships to avoid the often dangerous voyage through the rocky waters in the S. of Greece. Currants make up fully half the value of Greek **exports.** England and France together receive more than 60 per cent. in value; Russia, England, and Austria-Hungary furnish fully that percentage of imports, nearly 40 per cent. of which consists of grain. **Money, Weights,** and **Measures.**—The unit of currency is the *drachma* (*drakhmē*), of the same weight and fineness as the franc, but =only about 8½d., and divided into 100 *lepta*; the Grecian *pike*=⅔ of an English yard; the *stremma*=¼ of an English acre; the *oke*=2.80 lbs. avoirdupois; the *baril* (wine)=16.33 imperial gallons. **Government, Army,** and **Fleet.**—The government is a constitutional hereditary monarchy. The executive authority is vested in the king and his ministers, the heads of seven departments, and the legislative in a single Chamber of Representatives, called the *Voulē*. Deputies (since 1886, 150 in number) are elected by manhood suffrage for a term of four years; they receive payment. The Voulē must meet annually for not less than three, nor more than six months. Service in the **army** is compulsory. Every man over twenty-one years of age must serve. The period of service is nineteen years, two of which are with the colours, eight and seven in the reserve, the remainder in the militia. The navy, which is insignificant, is manned partly by conscription, partly by enlistment. The period of service is two years. The **population** of G. is of very mixed origin. Anciently the whole country was occupied by Hellēnes, but from the 3rd century onwards Goths, Heruli, and Slavs formed settlements of greater or less extent, Slavs along with Avars settling in great numbers towards the end of the 6th century. A still more important admixture is that of the Albanians, whose settlements date principally from

the 13th and 14th centuries, when G. was in a large measure depopulated by misrule and pestilence (the black death in 1348). The Albanian language is still spoken to a large extent, not only in N. Greece, but also in the Peleponnesus (especially on the Gulf of Ægina and at the head of the Gulf of Corinth). There is a considerable Italian element in the Ionian Is., but modern Greek, or so-called Romaic, that is, the language of the (Eastern) Roman Empire, is gradually spreading over the whole country, and through the efforts of the educated classes is being more and more approximated to the Greek of ancient classical times. The prevailing **religion** is that of the Greek Orthodox Church, but complete toleration and liberty of worship prevails. **Education** is free throughout, from the primary schools to the university of Athens, and between the ages of five and twelve compulsory, but in country districts the law is not well enforced. The following are the principal towns, in order of population, above 20,000:—Athens, Piræus, Patras, and Hermoupolis. **Historical notes.**—G. as a single state is entirely a creation of modern times. The kingdom dates from 1830, when a rebellion of the Greeks against the Turks resulted through the intervention of the great powers in the establishment of Greek independence. An area of about 5200 sq. m., with a population of about 300,000, was added to the kingdom by the treaty of Berlin in 1878. See C. Wordsworth, *Greece* (London, 5th ed., 1868); R. C. Jebb, *Modern Greece* (London, 1880); Dr. A. Philippson, *Der Peloponnes* (Berlin, 1891), with two maps on the scale of 1 : 300,000, one geological (coloured according to the nature of the rocks), the other topographical and hypsometrical; Kiepert's *Uebersicht der Höhenverhältnisse der Hellenischen Länder in Europa* (Berlin, 1869), is a hypsometrical map of the whole of G. A new edition of the official map of G., in twenty sheets, on the scale 1 : 200,000, was published in 1880.

Green Lake, a beautiful lake, U.S., near Georgetown, Colorado.

Green Lake, co., U.S., Wisconsin, S. of 44° N., and crossed by 89° W.; takes its name from a beautiful lake (15 m. by 3 m.) in the middle of the county.

Greenland (Danish **Grönland**), a detached portion of America, roughly triangular in shape, lying between lats. 59° 49′ and 82° N., and longs. 70° and 20° W., or at its broadest about 700 m., though most of it is much narrower, its entire area being about 700,000 sq. m. The coast is intersected by deep narrow fjords, but with the exception of a strip of varying breadth bordering the sea. The country is entirely overspread by a thick glacier sheet, rising to the height of 7000 ft. and sloping E. and W., its overplus being discharged in the shape of icebergs. A few 'nunataks,' islets formed by peaks still unsubmerged, and all near the edges, are the only signs of uncovered land in this dreary uninhabited interior. A few mountains rise to some height on the mossy ice-shaven, ice-free coast stripe, the highest of which is Sukkertoppen (4000 ft.) on the W., and Petermann's Peak (11,000 ft.) on the E. coast; but except here and there some birches in sheltered places in S. Greenland, the creeping willow is the only semblance of tree growth in the country. Its flora and fauna are essentially Arctic, the musk ox, ermine, and lemming not extending further S. than Scoresby Sound on the E., and Cape York on the W. coast, though the intermediate shore is inhabited by them. On the E. coast there are one or two Eskimo families, and about 250 people N. of Melville Bay; but the population is mostly concentrated on the W. coast between Cape Farewell and 73° N., in little 'kolonis' or settlements under Danish officials, who administer the government and the trade in oil, ivory, seal-skins, &c., as a monopoly of the Danish crown, though entirely for the benefit of the natives. The mean annual value of the products exported is about £45,000. In 1890 the total population of the two Inspectorates of N. and S. Greenland was 10,516, of which 309 were European officials and their families, or an increase of 5 per cent. in ten years. Of these people 1668 are engaged in whale and seal fishery, 365 ordinary fishermen, 33 are settlers, 47 are hunters, and 3 own cattle, a few of which have been introduced into S. Greenland, where a few potatoes and other vegetables but no grain can ripen. The W. coast natives, much intermixed with European blood, are all civilised; the E. and NW. coast people, in all about 300, are still barbarians. A little coal, mined on Disco I. and the Noursoak Penin. for local use, and cryolite, from S. Greenland, are the only economic minerals. The climate is extremely severe, though the sea does not freeze over in S. Greenland. During winter snow falls heavily, and all communication with the outer world is cut off from October till May or June. [**Lichtenau, Julianehaab, Ivigtut, Fredrickshaab, Godthaab, Sukkertoppen, Egedesminde, Jakobshavn, Upernivik.**] G. was discovered by Red Erck in A.D. 986, and up to the Middle Ages was settled by Norsemen. It was subsequently rediscovered and explored, so far as the coasts are concerned, by various modern navigators (**Arctic Regions**). The nature of the interior has been ascertained by the researches of Whymper, Brown, Nordenskjöld, the Danish Royal Geographical Commission, Nansen, who in 1888 for the first time crossed from the E. to W., and Peary, who in 1886 made an expedition into the interior from the W. coast, and in 1892 doubled the N. end of the country to Independence Bay, in 34° W. long., though the ice-covered character of the interior, the termination of the country in about lat. 82°, and the convergence of the coasts had as early as 1875 been presaged by Brown from a study of the November ice, the tides, and the distribution of Arctic animals.

Greenock, seapt., manufacturing tn., par., and parl. burgh, Scot., W. Renfrewshire, on the l. bk. of the Clyde, at its mouth, on the G. & SW. R. and the C. R., and (**Upper G.**) on the C. R., 3½ m. S. by W. Helensburgh. The town carries on shipbuilding, sugar-refining on a large scale (the first refinery erected in 1765), the making of steam-boilers and steam-engines, including locomotives, anchors, chain-cables, sail-cloth sails, woollen goods, &c. In the factories extensive use is made of water-power, the principal water-works (all of which belong to the Corporation) being on hills above the town, and thus in a situation affording facilities for providing the necessary falls. The port has five dry docks, the James Watt wet dock, and six tidal harbours, including the Garvel Basin and the Great Harbour now in progress, which, when finished, will have a depth, the one of 30, the other of 38 ft. at high water. The Prince's Pier affords 1382 ft. of quayage along the Clyde, with a depth of 16 ft. at low, 26 ft. at high water, and being connected by a covered way with the terminus of the G. line of the G. & SW. R. was formerly the principal place of starting and landing of passengers by the Clyde river-steamers, but has latterly been superseded in this respect to a large extent by Gourock. Birthplace of James Watt (1736–1819), the improver of the steam-engine. Mean temp. (16 yrs., 1861–72, 1877–80), yr. 47.5° F., Jan. 38.8°, July 58.5°; rfall. (1866–85), 64.4 in. Market-day, F. Tn. P. (1735) 4100; (1851) 36,700; (1871) 57,100; (1891) 63,400; parl. burgh P. 63,100.

Greenwich (Anglo-Saxon *Grena* or *Grene-vic*, 'green bay'), parl. bor. (1 member), market-tn., and par., Eng., in the ancient co. of Kent, but now included in the administrative co. of London, on r. bk. of the Thames, 4 m. SE. by S. St. Paul's, London, with two stns. (**G.** and **G. Park**) on the L. C. & D. R., and three stns. (**G., Maze Hill,** and **Westcombe Park**) on the SE. R. It has a naval hospital, the noblest establishment of the kind in Europe, and the finest palatial structure in England. It occupies the site of the royal palace of Placentia; was commenced in the reign of Charles II., and in the reign of William III. was granted as an asylum for disabled seamen of the navy. This hospital was formerly arranged in dormitories and dining-halls for about 2700 old or disabled seamen, but there are now only a few pensioners in the building; the greater number now reside with their friends, receiving their pensions for personal use; and the building is utilised for the Royal Naval college, transferred here from Portsmouth. The most notable rooms of the hospital are a chapel, with rich marble carved work, and a painting, by West, of the shipwreck of St. Paul; and a spacious hall, 106 ft. in length by 56 ft. in breadth, decorated with representations of sea-fights, statues, portraits, and relics of naval heroes. The building covers 20 acres. Detached from the edifice are the buildings of an upper and lower school for 800 sons of naval officers and seamen, which have been much enlarged. G. Hospital was in 1732 enriched with the forfeited estates of Lord Derwentwater. The management of its revenue is vested in commissioners under the Admiralty. The town also contains Trinity Hospital, founded by the Earl of Northampton, 1613, for twenty pensioners. G. was a royal residence from the year 1300 to the reign of William and Mary. Henry VIII. was born and baptized here, and here he married Anne of Cleve. It was also the birthplace of Queens Mary and Elizabeth, and here Edward VI. died. G. Park, between the hospital and Blackheath, first enclosed by Duke Humphrey of Gloucester, protector in the reign of Henry VI., contains about 200 acres of undulating and wooded land, and has numerous herds of deer. On one of its eminences, 160 ft. above the river, is the Royal Observatory, founded by Charles II. in 1674, the residence of the astronomer-royal, and from which the longitudes on all British maps and charts are reckoned. Lat. 51° 28′ 38.2″ N., long. 0° 0′ 0″. Mean temp., **G. Observatory,** alt. 155 ft. (20 yrs., 1861–80), yr. 50.2° F., Jan. 38.3°, July 63.9°; rfall. (1866–80), 26.1 in. Market-days, W. and S. Metropolitan urban sanitary area, P. 165,413; par. P. 57,200; parl. bor. P. (1851) 105,800; (1871) 169,400; (1891) 78,200. See **Poplar.**

Grenada, W. India I., belonging to Great Britain, Windward group. Lat. of St. George 12° 7′ N., long. 61° 48′ W. Surface mountainous in the centre, where several small lakes occupy extinct volcanic craters. Climate unhealthy; soil fertile. Principal product formerly sugar, now cacao, which furnishes about five-sixths of the total value of the exports, which amounts from £2–300,000. Other important products fruit, sugar, and cotton. The United Kingdom furnishes on the average fully half the imports, and receives fully 90 per cent. of the exports. Chief tns., St. George, the cap., Charlotte Town, and St. Mark on the W., St. Patrick on the N., and St. Andrew on the E. coast. G. was discovered by Columbus in 1498, and was first named Ascension. From 1674 to 1762 it was a prosperous French colony. In the latter year it was taken by the British, to whom it was confirmed by the treaty of Paris in 1763. Vessels anchor in 50–60 ft. of water, and load and discharge by lighters. P. including the **Grenadines,** a group of small isls. extending N. towards St. Vincent, the largest of which is Carriacou (1871) 37,700; (1891) 53,200.

Grimsby, vil., Canada, Ontario, Lincoln co., 17½ m. ESE. Hamilton, on Lake Ontario, and a railway. P. <1500.

Grimsby, parl. bor. (1 member), mun. bor. (since the time of King John) and co. bor., Eng., Lincolnshire, at the mouth of the Humber, 30 m. NE. Lincoln, and 15 m. SE. of Hull, the terminal stn. of the M. S. & L. R. and E. Lincolnshire Rly. stns. (**Great G.** and **G. Docks**) in the diocese of Lincoln. It is connected by steam-packets and sailing vessels with Holland, N. Europe, the Baltic, &c. Has four dry and five wet docks, the largest of which, the Alexandra Dock (48 ac.), has a depth on sill of 14–19½ ft. at high water. Exports the manufactures of W. Yorkshire and Lancashire; imports raw wool and woollen yarn, flax, rags, and other raw products of Russia, Denmark, Hamburg, &c., besides tobacco, grain, fish, fruit; more fish are landed at this port than at any other in the British Is. except London. Shipbuilding is carried on to some extent, and there are rope-walks, breweries, seed and bone-crushing mills, and manure works. G. has a free grammar school, and a park of 27 ac. Numerous tumuli, traces of fortifications, and the discovery of Roman and Saxon coins seem to point G. out as a British settlement. Market-days, M. and F. Mun. and co. bor. P. (1801) < 2000; (1851) 8900; (1871) 20,200; (1891) 51,900; parl. bor. P. (1851) 12,300; (1871) 27,000; (1891) 58,700; par. P. (**Great G.**) 33,300.

Grison, isl., W. Indies, in the Grenadines group, in 12° 20′ N.

Grisons, Ger. **Graubünden,** Ital. **Grigioni,** the largest cant. of Switzd., cap. Chur (Coire), bounded N., W., and SW. by the cants. St. Gall, Glarus, Uri, and Ticino, and on other sides by Lombardy and the Austrian and Lichtenstein dominions, but from all which it is nearly shut off by lofty mountain ranges. The whole canton is traversed by mountain ranges belonging to the Rhætian Alps [**Alps,** SUBDIVISIONS, **II. A. 3**]. Nearly one-half of the population speak German, the remainder the Romansh or Rumonsh dialect, except those in the southern valleys, who speak Italian. It comprises the Engadine (*q.v.*) or upper valley of the Inn, with the sources and early affluents of the Rhine, and tributaries of the Ticino and Adda, being little more than a mass of mountains and narrow valleys. Climate cold and severe in the upper valleys, which are covered with snow during seven months of the year; but notwithstanding the cold, the dryness combined with the rarity of the air in such high valleys as those of Davos and the upper Engadine, has been found to be very beneficial in some cases of chest complaint. Scenery very magnificent. In this cant. are 240 glaciers. Fruits and a little wine are exported; but the corn, hemp, flax, &c., produced are insufficient for home consumption, and cattle form the principal wealth of the inhabitants. Many flocks and herds are driven hither from Italy in summer to pasture. The chief mineral riches are iron (in the Val Mesocco), silver and lead in the valleys of Davos and Schams, and copper in the valley of Schams, but few mines are wrought. Its manufactures are mostly domestic; the principal are of cotton and linen fabrics. Transit trade active across the Splügen, St. Bernard, and Septimer passes. See also **Alps,** PASSES, **III.** (6)—(10*e*). Area, 2773 sq. m. P. (1888) 94,800. See **Switzerland,** table.

Grödner Thal, Ital. **Val Gardeina,** valley between Brixen and Bozen, in the Tirol, Austria; the inhabitants (Ladiner) speak a Romance dialect.

Grodno, a Lithuanian govt. of W. Russia, annexed to Russia in 1793, having the Polish govts. of Suwalki, Lomża, Siedlce, and Lublin in the W., Volhynia in S., Minsk in E., and Vilno in N. Surface undulating in N. and NE. (670 to 920 ft.), and gently sloping towards a woody and marshy plain in the S. Soil clayey and sandy. Watered by the Niemen and the western Bug on its W. frontier, and by their tribs., the Narev, the Bobr, and many others, and the Yatsolda, trib. of Pripet. All these are important channels for navigation, connected by canals (**Bug, Niemen, Dnieper**). Large parts are covered with marshes, or with thick forests (**Byelovyezhskaya Pushcha**). Climate wet and cold, the average temperature at Grodno being, yr. 42° F., Jan. 22°, July 73°; yearly rainfall, 20.5 in. Population consists of White and Little Russians (30 per cent.), Lithuanians (27 per cent.), Poles (22 per cent.), and Jews (12 per cent.); 53 per cent. of the population are Orthodox Greeks, and 34 per cent. Catholics. G. is the most fertile of the Lithuanian provs., and in good years it has a surplus of corn. Flax and hemp are cultivated, besides cereals. Woollen cloth factories and distilleries attain a certain importance. A considerable trade is carried on, timber, cattle, corn, hemp, flax, and wool being exported abroad, and woollen cloths to Poland and Russia. Area, 14,931 sq. m. P. (1860) 862,854; (1892) 1,510,030.

Grodno, cap. of above govt., is situated on r. bk. of Niemen, on the main railway line from St. Petersburg to Warsaw, 533 m. SW. of the former. It is well provided with educational institutions, and has several old Catholic monasteries. Considerable amounts of corn are shipped down the Niemen. P. (1860) 20,120; (1891) 49,950.

Guad, guada, the name given to the rivs. in Spain by the Moors, from the Arabic, *Wadi.*

Guadaira, riv., Spain, prov. Seville, flows NW. by W. to the Guadalquivir, which it joins a few miles below Seville.

Guadajoz, riv., Spain, Andalucia, flows N. then WNW. into the Guadalquivir below Córdoba.

Guadalajara, tn., Mexico, cap. Jalisco, 120 m. SSW. Zacatecas, 285 m. WNW. Mexico. Founded in 1542, it has long been one of the chief cities of Mexico. It now carries on various manufactures, and is the seat of a mint, a university, and an academy of painting. Alt. 5140 ft. Rfall. (7 yrs.), 35.36 in. P. 95,000.

Guadalajara, tn., Spain, cap. of prov. G., on the Henares, 32 m. NE. by E. Madrid. P. 11,200.

Guadalaviar (from Arabic *Wadi-l-Abyadh*, 'white river'), **Túria,** or **Rio Blanco** ('white river'), riv., Spain, rises on the N. side of the Montes Universales, within 3 m. of the source of the Tagus, flows first E., turns S. at Teruel, and finally flows ESE. into the Mediterranean about 3 m. below Valencia. The first part of its course is mainly through deep gorges of Jurassic limestones; in the plains it is largely used for irrigation.

Guadalcanal, tn., Spain, prov. and 48 m. N. by E. Seville, in a plain near the Sierra Morena; formerly had mines of silver, and now carries on coal-mines. P. 6200.

Guadalcanar, isl., one of the larger members of the Solomon group, Pacific Ocean, just N. of 10° S., crossed by 160° E., about 100 m. long by 34 m. broad. Discovered by Mendaña in 1568, and originally called by the Spaniards Guadalcanal. Surface largely mountainous, rising to 8000 ft. Generally densely clothed with forests, but with some open, grassy, hilly country in the NW. Natives, Papuans of a dark colour. Principal towns, Aola and Lunga, both on the N. ct.

Guadalcazar, tn., Mexico, state of and 40 m. NE. San Luis Potosi. Important quicksilver-mines near. P. 13,000.

Guadalen, riv., Spain, flows SW. to the Guadalimar, which it joins to the E. of Linares.

Guadalete ('the small river'), riv., in the SW. of Spain, flows SW. past Arcos into the Bay of Cadiz at Puerto de Santa Maria.

Guadalfeo, or **Rio Grande,** small coast riv., southern Spain, prov. Granada, flows through the principal valley of the Alpujarras, turns S. to enter a breach between the Contraviesa on the E. and the Sierra de Almijara on the W., and enters the Mediterranean SW. of Motril.

Guadalhorce, or **Guadaljorce,** riv., in the S. of Spain, rises at the W. end of the Sierra de Alhama, and flows W. then S. then SE. into the Mediterranean, to the W. of Malaga; liable to destructive floods.

Guadalimar ('red river'), riv., Spain, rises on the SE. side of the Sierra de Alcaráz, and flows SW. to the Guadalquivir, which it joins to the N. of Jaën; receives on the r. bk. the Guadarmena from the N. side of the same sierra, a river longer than the part of the G. above the confluence, and at least as copious.

Guadalope, riv., Spain, rises on the S. side of the Sierra de San Just, and flows E. then NE. to the Ebro, which it joins just to the W. of the meridian of Greenwich; length, 93 m.

Guadalquivir (from the Arabic *Wadi-el-kebir*, 'the great river'), riv., in the S. of Spain, rises at the Cañada de Fuentes, at the height of 1580 ft., on the N. slope of the Sierra de Pozo, flows first NE. through the narrow valley between that range and the Sierra de Cazorla, but meeting a spur of the Sierra de Segura turns SW. through the gorge known as the Tranco de Monzique, and maintains that direction on the whole to its mouth. Below this gorge it winds through a picturesque valley containing the town of Andujar, and then passing through the rapids of Montoro emerges on the Andalusian plain, becomes navigable for boats at Córdoba, and a few miles above Seville becomes subject to the action of the tide. By dredging it has been made navigable to Seville, 70 m. from its mouth, for vessels of 3000 tons. About 30 m. lower down it breaks up in passing through an unhealthy marshy region, known as the *Marismas*, subject to regular inundation, into three arms, which reunite, enclosing the islands called *Isla Mayor* and *Isla Menor* ('larger' and 'smaller island'), and shortly after the reunion enters the Atlantic at San Lúcar de Barrameda, to the S. of the sand-dunes of *Arenas gordas*, which separate the *Marismas* from the sea. Its principal tribs. are the Guadalimar (*q.v.*) on the r., and the Guadiana Menor on the l. bk. in the upper part of its course, and the Jenil on the l. bk. lower down. As both the latter derive feeders, and the Jenil indeed is wholly supplied from the Sierra Nevada, the melting of the snows of that range in summer (the dry season) tends to maintain the level of the G., whose volume is consequently tolerably constant. For the most part high water is not more than 8 ft. above the normal. Great floods are rare. The most terrible known hitherto are those of 1626 and 1642, the former of which caused the destruction of 3000 houses in Seville. Length, 374 m.; area of basin, 21,580 sq. m. (Strelbitsky).

Guadalupe, tn., Spain, prov. Cáceres, 33 m. E. Trujillo, with a celebrated ancient Hieronymite monastery (founded in the 14th century). P. <3000.

Guadalupe, tn., Colombia, Santander state, dep. and 19 m. SW. Socorro. P. <5000.

Guadarrama, comm., Spain, prov. and 26 m. NW. Madrid. P. <2000.

Guadarrama, Sierra de, the principal mt. range between the old provs. of Old and New Castile. It describes a northerly curve with a general trend from SW. to NE., beginning in the SW. at the valley of Alberche which separates it from the Sierra de Gredos (a westerly continuation of the Guadarrama range known as the Paramera de Avila lying to the N. of the upper course of that river), and ending in the NE. in the Altos de Barahona, a little to the W. of the route followed by the railway connecting the valley of the Ebro with central Spain by the valleys of the Jalon and Henares. Mainly composed of granite, but in the E. of Silurian slates, which latter are succeeded to the S. by gneiss containing the silver veins of Hiendalaencina. Highest summit the Pico de Peñalara (7800 ft.), NNW. of Madrid; next in height the two Cabezas de Hierro ('iron summits'), respectively 7770 and 7745 ft. In the E. to the E. of the pass of Somosierra (in 3° 36′ W., 4690 ft.) rises the conspicuous pyramid of Ocejón (8545 ft.). The pass leading from Madrid to Segovia and Valladolid is the Puerto de Navacerrada (5705 ft.), near which a railway tunnel has been in progress for some years. At present the only railway leading NW. from Madrid (to Avila) crosses the Paramera de Avila in the tunnel of La Cañada (4460 ft.), the highest railway tunnel in Europe.

Guadazaon, riv., Spain, in the E. of prov. Cuenca, flows S. then SE. to the Cabriel, which it joins in about 39° 41′ N.

Guadeloupe, W. Indian isl., one of the principal French colonies in the Atlantic. Lat. of Fort Irois, 16° N.; long., 61° 45′ W., about 25 m. N. Dominica, and SE. Montserrat. It is divided into two islands by the Rivière Salée ('Salt River'), an arm of the sea, 5 m. long, and 100 to less than 400 ft. broad, with depth (nowhere more than 16 ft.) for vessels of from 40–60 tons. The E. island, the so-called Grande Terre, in reality scarcely three-fourths of the area of the W. island, is 36 m. long by 12 m. broad. It is generally low, of coral formation, with a dry sandy, but, with adequate rain, fertile soil. G. Proper, the W. island, is 35 m. long by 18 m. broad, and is traversed by mountains, three of which are extinct volcanoes, the culminating point (4870 ft.) being the active volcano of La Soufrière (so-called from the sulphur vapour it emits). SW. of this mountain is a boiling spring, issuing from out of the sea. The island is well watered and fertile. Basse-Terre is the chief town, with an indifferent harbour. The contiguous and dependent islands are Marie Galante, Désirade (Deseada), and Saintes. Earthquakes are common; a severe one occurred in 1843. The principal plantation product is sugar-cane, but coffee, cacao, cotton, tobacco, and vanilla are also grown. The population, originally Carib, is now similar to that of the other W. Indian islands. The island with its dependencies is ruled by a governor and a colonial council of French residents. Principal towns Basse-Terre, the seat of govt., on the SW., and La Capesterre, on the SE. of G. Proper, and Pointe-à-Pitre, the most populous and in many respects the most important town in the colony, on the SW., and Le Moule on the N. coast of Grande Terre. The island was discovered by Columbus Nov. 4, 1493, when it was known to the Caribs as Karukera. It was colonised in 1635 by the French, afterwards taken by the English, and finally delivered to the French in 1810. In 1848 slavery was abolished by a decree of the French Republic. Mean rfall. (Cafeiere de Pérou) (19 yrs.), 126.7 in. Area, 533 sq. m. P. (1871) 113,350; (1891)

150,000. Area with dependencies (including besides the islands above named, the island of St. Barthélemy and the French part of St. Martin), 687 sq. m. P. (1869) 175,000; (1891) 182,000.

Guadiana ('the river of Anas' [the anct. name]), an important riv., Spain and Portugal, its basin lying between those of the Tagus and Guadalquivir. Its true headwater, known as the Záncara, rises in 40° N. SW., of Cuenca, and flows first S. then W.; but the name of G. was long given to a stream, now known as the G. Alto, rising in the dist. of La Mancha called the Campos de Montiel, 15 m. NE. Villahermosa, and flowing NW., partly underground (reappearing at intervals in small lakes known as *Los ojos*, or eyes, *de la G.*), towards the true G., but dying out in a marsh before reaching the main stream, which pursues a westerly course to Badajoz, after which it turns SW. then S., and flows partly through Portugal partly on the Portuguese frontier. Its mouth is divided by sandbanks into several arms, of which that known as La Canela has a depth of 15 ft. on the bar even at ebb tide; but large ships can ascend only to Ayamonte and Castro-Merim, and smaller vessels only to Mertola, 35 m. up. Chief affluents on right, the Giguela and Guadaranque; on left, the Jabalon, Zujar, and Ardila. Length, 515 m.; area of basin, 23,300.

Guadiana, tn., Mexico. See **Durango.**

Guadiana Menor, riv., in the S. of Spain, flows E. then NNW. into the Guadalquivir, which it joins about 3° 14′ W.

Guadiaro, riv., Spain, enters the Mediterranean 11 m. NE. Gibraltar, after a course of 40 m., generally S.

Guadiato, riv., Spain, Andalucia, flows SE. then SW. to the Guadalquivir, below Córdoba.

Guadiela, riv., Spain, prov. Cuenca, flows W. to the Tagus, about 40° 25′ N.

Guadix (Arabic *Wadi-ash*, 'River of Life'), city, Spain, prov. and 26 m. E. by N. Granada, on l. bk. of the G. (one of the headwaters of the Guadiana Menor). It is enclosed by old walls and mulberry plantations. Its vicinity has curious geological features, and near it are the warm mineral baths of Graena. Reconquered from the Moors in a sanguinary battle in 1315. P. 12,000.

Guaduas, tn., Colombia, Cundinamarca, a few miles E. of the Magdalena, 45 m. NW. Bogotá. P. 11,000.

Guafo, isl., Chile. See **Huafo.**

Guagno, tn., Corsica, arr. Ajaccio, cant. and 4 m. from Soccia, with hot springs (124° F.). P. <2000.

Guagua, comm., Philippine Is., Luzon, prov. Pampanga. P. 10,000.

Guahan, Guaján, or **Guam,** the southernmost and largest of the Marianne Is., or Ladrone Archipelago, Pacific Ocean, in 13° 27′ N. and 145° E. It is about 100 m. in circumference, surrounded by coral reefs, and has a town and a roadstead defended by two Spanish forts. The island is thickly wooded, and well watered and fertile. The chief town, Agaño, on the W. ct., is the seat of the Spanish viceroy of the group.

Guaianeco Islands, group of isls. off the W. ct. of Chile, at the N. entrance to the Messier Channel, in 47° 45′ S.; principal island, Byron.

Guaicuhy, tn., Brazil, prov. Minas Geraes, at the confluence of the riv. G. and the São Francisco. P. 3000.

Guaicuhy, or **Rio das Velhas,** riv., Brazil, prov. Minas Geraes, an eastern branch of the São Francisco, flows generally NW. parallel to the Serra do Espirito Santo, and enters the São Francisco in 17° 12′ S.; navigable for more than 217 m. from Sabara, in 19° 50′ S., 45 m. NW. Ouro Preto. At its confluence the G. discharges 7382 cubic ft. per second.

Guainia, riv., S. America. See **Negro, Rio.**

Guaira, La, tn., Venezuela, the seapt. of Carácas (*q.v.*), and the most important in the republic; has a harbour, with water area of 90 acres accessible to the largest ships, and with depth alongside quays of 10–40 ft. The town was destroyed by an earthquake in 1812. P. 14,000.

Guajaba, isl., Cuba. See **Cayo Guajaba.**

Guajahu, riv., Brazil, state of Maranhão, rises in the SW. of the state, and flows NE. then N. into the Bay de São Marcos, to the W. of the isl. of Maranhão, of which an arm of this river forms the southern boundary; navigable from Chapada.

Guajan. See **Guahan.**

Guajara, an arm of the Tocantins, leaving the estuary of that river on the r. bk., in 2° N., and rejoining it at the town of Pará (Belem); encloses the isl. of Carnapijo.

Guajara-Mirim, rapid on the Madeira. See **Madeira.**

Guanacaste, western dep. of the Costa Rica republic.

Guanaceví, tn., Mexico, state of and 135 m. NW. by N. Durango; mining centre. P. <4000.

Guanacos, paramo or mt. desert, in the middle chain of the Andes of Colombia, NE. of Popayan.

Guanahani, the native name of the isl. in the W. Indies on which Columbus first landed, Oct. 12, 1492, and to which he gave the name of San Salvador; formerly identified with Cat I., now generally identified with Watling I. See *Proc. R. G. S.*, 1892, pp. 591, &c.

Guanaja, isl., Caribbean Sea. See **Bay Islands.**

Guanaja, tn., Cuba, N. ct., 175 m. NW. Santiago de Cuba, in 77° 42′ W.

Guanajay, tn., Cuba, 22 m. SW. Havana, in 83° 39′ W. P. (comm.) 9500.

Guanajayabo, comm., Cuba, 86 m. E. by S. Havana. P. 8100.

Guanajuato, interior state of Mexico, on the Mexican central plateau and its SW. slopes to the Santiago-Lerma valley. It is one of the richest and more densely peopled of the Mexican states, with inexhaustible lead, gold, and (principally) silver ores (*vena madre* de G.), which are even used in the building of the houses. Mountainous ridges traverse the state NW.–SE. (Sierras Gorda and G. with the mining region), having between them very fertile *llanos* (Bajio, San Felipe). See **Mexico,** table, &c.

Guanajuato ('frog mountain'), tn., Mexico, cap. state of G., 80 m. S. by W. San Luis Potosi, built on both sides of a narrow defile called the **Cañada de Marfil,** is one of the richest mining dists. of Mexico, terminus of a branch line 11 m. long connected with the Mexican Central Rly. at Silao (750 ft. lower). Seat of a mint and of various textile industries, besides those connected with mining. Alt. 6660 ft. P. 52,100.

Guanal. See **Punta Guanal.**

Guanaparo, riv., S. America, Venezuela, state of Zamora, flows 230 m. E. to the Portuguesa, which it joins 25 m. NW. San Fernando de Apure.

Guarcino, comm., Italy, prov. Rome, 32 m. ESE. Tivoli. P. <3000.

Guarda, the ancient *Lancia Oppidana*, fortified tn., Portugal, prov. Beira, cap. dist., at the NE. end of the Serra da Estrella, 65 m. ENE. Coimbra; seat of a bishop. Alt. 3409 ft. Mean temp., yr. 50.2° F., Jan. 37.7°, Aug. 67.7°. P. (comm.) <5000.

Guarda, vil., Switzd., cant. Grisons, 29 m. E. by S. Chur, in the Lower Engadine. P. <2000.

Guardaful (Portuguese **Guardafu,** 'beware'), cape, at the E. angle of Somali-land, E. Africa, at the mouth of the Gulf of Aden, in 11° 50′ N.; long. variously determined at from 51° 19′ 8″ (Captain Owen, 1823) to 51° 30′ 50″ (Captain Weatherhead, 1809). By Captain Fleuriot de Langle (whose determination of the long. of Raz Hafun is given in the article **Continents**) it was determined in 1861 at 51° 26′ 34″, and by another observation at 51° 26′ 52″.

Guardal, or **Barbata,** riv., Spain, prov. Granada, flows S. from La Sagra, then WSW., and unites with the Fardes to form the Guadiana Manor.

Guardavalle, comm., Italy, prov. and dist. Catanzaro, 20 m. S. Squillace. P. <4000.

Guardbridge, vil., Scot., E. Fife, on the N. B. R., on the E. ct., at the mouth of the Eden, 4 m. WNW. St. Andrews, P.O. P. <750.

Guardia, or **Kampanon,** cape, Greece, the NE. point of Andros I.

Guardia, comm., Spain, prov. Pontevedra, dist. Tuy. Mean temp., yr. 57.7° F., Jan. 47.0°, Aug. 68.6°. P. 6000.

Guardia, La, comm., Spain, prov. and 28 m. ESE. Toledo. P. <4000.

Guardia, Punta della, cape, Italy, in the S. of Isola di Ponza, in 40° 52½′ N.

Guardiagrele, tn., Italy, Abruzzi e Molise, prov. and 12 m. S. by E. Chieti. P. 9200.

Guardia Lombarda, comm., Italy, prov. Avellino, on the Lombarda, 3 m. NE. St. Angelo de Lombardi.

Guardia San Framonti, comm., Italy, Campania, prov. and 13 m. NW. Benevento. P. <5000.

Guardiella, suburb of Trieste, Austria.

Guareña, comm., Spain, prov. Badajoz, 17 m. E. by S. Mérida. P. 6400.

Guarena, riv., Spain, in the SE. of Leon, flows NNW. to the Douro.

Guarico Blanco, riv., Venezuela, state of Miranda, flows S. past Calabozo into a branch of the Apure, 12 m. E. San Fernando, after a S. course estimated at 200 m.

Guaricura, isl., Brazil, in the Amazon, opposite the town Para, near the mouth of the Xingu.

Guarisamey, vil., central Mexico, state and W. of Durango; once a noted silver-mining centre.

Guarlford, eccles. par., Eng., Worcestershire, Great Malvern and Madresfield pars. P. <500.

Guarne, tn., Colombia, dep. Antioquia, 6 m. E. Medellin.

Guarumo, tn., Colombia, Cundinamarca, on the r. bk. of the Magdalena, 75 m. ESE. Medellin. Alt. 580 ft.

Guascama, the most southerly point of the Colombian coast, in 2½° N.

Guash, or **Wash,** riv., Eng., rises in Leicestershire, and flows E. through Rutland into the Welland, on the borders of Lincolnshire, near Stamford. It waters a vale of high fertility. The form Guash is usually confined to the upper part of the river.

Guaso Nyiro, riv., Brit. E. Africa, rises in the Aberdare range, and flows NE. then E. past the base of Mount Kenia, and gradually dwindles away in the Larrian or Lorian swamp (N. of 1° N., in about 39° 33′ E.). Receives from the SW. the **Guaso Narok** ('black river'), in about 0° 30′ N., 37° E.

Guastalla, fortified tn., Italy, Emilia, prov. Reggio, on r. bk. of the Po, 18 m. NE. by E. Parma. P. 11,300.

Guatavita, vil., Colombia, dep. Cundinamarca, 20 m. NNE. Bogotá, at the foot of a hill having a rich coal-mine. Lake G. near it is about 9 m. long, very deep, and had anciently on its banks many highly venerated Peruvian temples. P. 7000.

Guatemala, a republic in Central America, occupying the high lands at the base of the Yucatan penins., 274 m. long (W.–E.), 171 m. wide at its narrowest part (from the Atlantic, on which there is a coast-line of 93 m., to the Pacific, with a coast-line of 154 m.), with an area equal to one-half of Great Britain. S. Guatemala is formed by (1) a mountainous district, the SE. and E. continuation of the Sierra Madre (see **Mexico, Chiapas**), attaining in its general alt. 5500–8000 ft. (*altos*), and then (SE.) lowering to 1600 ft., very abrupt along the Pacific coast, more gradually sloping N., although varied with high ridges and deep valleys, until it reaches (2) a low marshy terr. around Lake Peten; (3) an alluvial band on the Pacific coast, with some lacustrine depressions near the shore. On the S. of the high terrace of the Cordillera volcanoes rise to a great height, the highest (Fuego) 13,940 ft. in the SE. From the mountains five principal fluvial systems interweave their branches, the more important draining the lands NW., through the Usumacinta, to the Gulf of Campeachy, and E. to the Gulf of Honduras; the largest is the Rio Grande (340 m., navigable by *bongos* some 120 m.). **Geology.**—Volcanic rocks, some of Quaternary age, spread around the now more or less active volcanoes, and all over S. and centre of G. cover the Archæan formations (granite, mica schists), which are followed by Mesozoic rocks to lacustrine Tertiary (Calcareous) region on the coast. **Mineral Products.**—Silver is mined at Alotepeque, in Chiquimula; gold on the Rio Grande, and at Libertad, in Izabal; mercury at Huehuetenango; iron, copper, lead (Cumbre de Chixoy), tin, sulphur also occur, the last being worked in large, always increasing, quantities. Mineral waters, Escuintla, Ciudad Vieja, on the Pacific coast. **Climate.**—As a tropical, mountainous region G. varies with altitude. Temperature on the lowlands uniform (mean 92° F., sometimes 104°). As to the plateau, see **Guatemala,** tn. Rain is everywhere abundant, but, as elsewhere in Central America, most copious on the Atlantic slopes exposed to the NE. trade winds. Rainy season May–Dec., but on the Atlantic warm slopes heavy mists are frequent, and rain almost constant. The highlands generally are very healthy (with occasional goitre, *gueguecho*). The hot and the damp valleys and the lacustrine littoral of the Pacific are very unhealthy. The **flora** of G. is a continuation of the E. Mexican. Forests, which abound everywhere, are particularly dense on the N., the NE. slopes, and in the hot valleys (barrancas). On the lowlands of the Pacific coast are extensive groves of palms and bamboos (some about 100 ft.). Towards Lake Peten the flat lands are mostly covered with savannahs. Bananas, coffee, sugar-cane grow from 1600 ft. to 5000 ft. **Fauna.**—G. is in the Mexican division of the neotropical zoological region, with many South American types. It is very rich in birds (the Quetzal, *Trogon resplendens*, being adopted, since 1871, as the emblem of the republic). Many insects, some very dangerous (the *niguas* entering the skin of the human feet). Almost all the fishes and a crocodile in Lake Peten are endemic species. Turtles abundant (Golfo Dulce). **Ethnography.**—The Indians inhabiting G. are principally of Maya (**Yucatan**) or Aztec (**Mexico**) origin. The languages still spoken are numerous, but many are extinct. Caribs are mixed with negroes (*Zambos*) on the Atlantic and N. The Spanish blood is very little apparent, although the Spanish language is suppressing all others. Very little immigration (Italians). The population is concentrated on the highlands, where the principal towns are: the capital, Quezaltenango, Coban, Totonicapan, San Marcos. **Agricultural Products.**—Coffee (cultivated since 1859) is the principal commercial product. Sugar-cane, tobacco, cacao (in the hottest, dampest, most unhealthy regions), cochineal (since 1811 but very decadent), tropical fruits. Indian corn (which produces, in the low hot zone, two, sometimes three, crops a year), beans, and bananas are the general food. Wheat, potatoes (above 5800 ft.), rice, vanilla, rubber (from *Castilloa elastica*), and cinchona, are also among the products. Lands are extensively fertile. N. savannahs produce magnificent pastures for cattle and horses. Sheep on the *altos*. **Commerce.**—The Pacific ports, San Jose and Champerico, are very insufficient, the former being the most important. On the Atlantic side (Gulf of Honduras) Amatico, Golfete, and Golfo Dulce (with ports Izabal, Livingston) afford spacious shelter, but are very shallow, Puerto Barrios (in the Bay of Santo Tomas) being the only port for ships drawing 13–16 ft. The **exports** are coffee (⅞ths of the total), sugar, fruits, skins and leather, wood, caoutchouc, silver. The **imports,** cottons, flour, machinery, wines, cattle. Exports and imports in 1888, £2,300,000; in 1892, £3,400,000. Trade principally with Great Britain and United States; next France, Germany. **Means of Communication.**—Roads are very bad. Railways are still in fragments connecting the

Pacific ports with the interior: (1) San Jose–Escuintla–Guatemala (72 m.); (2) Champerico–Retalhulen–San Felipe (27 m.); (3) Puerto Barrios (Bay of Santo Tomas); total, 120 m. The railway connecting Central America with Mexico will pass through the Peten region. **Public Institutions.**—An *Assemblea Nacional* is elected for four years; a president for six. G. is divided into twenty-three departments. Instruction is gratuitious and compulsory. There is an army (3700) and a militia (67,000). No official religion, although the Roman Catholic predominates. **Money.**—The *peso* or dollar ($6\frac{1}{2}$=£1). **Weights and measures** are the old Spanish [see **Bolivia**]. **History.**—G. was occupied in the 13th century by the Quichei, Cachiquels, and Zutugils [see **Mexico**]. In 1524 it was conquered by Alvarado. Under Spain it belonged to an *Audiencia real* (including Chiapas to Costa Rica) of the viceroyalty of New Spain, but used to be itself called 'kingdom.' From 1821 to 1824, it was independent; from 1824 to 1847, part of the Federation of Central America; 1838 to 1864, under the dictatorship of Raphael Carrera. First Constitution, 1879 (modified, 1885–89). Area, 46,800 sq. m. P. (1778) 360,000; (1872) 1,190,000; (1892) 1,500,000. More than two-thirds are Indians, the rest (*Ladinos*) very mixed. [**J. B. R.**]

Guatemala, tn., cap. of the republic of G., on the plateau, in 14° 40′ N., 90° 30′ W., 5 m. from the Pacific, and 15 m. from the Gulf of Honduras, dating in its present situation only from 1776, built of low houses in consequence of the liability to earthquakes [**G. Antigua**]. The climate is healthy. It has a university, polytechnic college, libraries, and a museum. Alt. 4850 ft. Mean temp. (4 yrs., 1879–82), yr. 65.6° F., Jan. 61.9°, July 66.7°; mean rfall., 39 in.; 141 days of rain; snow occasional. P. 70,000.

Guatemala Antigua, or **G. la Vieja** (both meaning 'old G.'), sometimes called simply **La Antigua** ('the old'), tn., 15 m. WSW. of the present city of Guatemala, originally founded by the Spaniards in 1524 on the N. slope of the Volcano del Agoa, but destroyed by an eruption of that volcano in 1541, after which it was rebuilt on its present site (about 3 m. NE. of the original one), in a beautiful valley between the volcanoes del Agoa and del Fuego. Destroyed by an earthquake in 1773, again rebuilt, and after attaining a population of 20,000, again destroyed by an earthquake in September 1874.

Guateycas, gulf of the Pacific Ocean, Chile, containing the Archipelagos of Chiloe and Chonos.

Guaura, tn., Peru. See **Huaura.**

Guaviare, or **Guayabero,** riv., Colombia, flows E. 450 m. to the Orinoco, which it joins near San Fernando, in about 3° 50′ N.; principal affluent is the Inirida.

Guavlyú, tn., Uruguay, dep. and 35 m. N. Paysandú, with extensive meat-packing establishment.

Guayacan, tn., Chile. See **Herradura** (bay).

Guayama, tn., isl. of Porto Rico, S. ct., 37 m. S. by E. San Juan, in 66° W. P. 13,500.

Guayanavieja, Venezuela, Bolivar, on the r. bk. of the Orinoco, 150 m. SSW. of the SW. point of the isl. of Trinidad.

Guayanilla, comm., Porto Rico, S. ct., in 66° 48′ W. P. 7800.

Guayaquil, the principal seapt. and seat of trade in Ecuador, cap. prov. Guayas, 165 m. SW. by S. Quito, situated in 2° 12′ S., 79° 52′ W., on the r. bk. of the Rio Guayas, at a point on that riv. about 35 m. above the mouth, at the head of navigation for large vessels, and only about $1\frac{1}{2}$ m. distant from the Estero Salado, an inlet running parallel to the estuary of the Guayas to the W. It is well laid out, and has some good public edifices; but it is entirely built of wood, and on low ground, ill supplied with water, unhealthy, and infested with vermin. Arrangements have been in progress for more than 20 years for draining the city and for providing a good water supply, but are not yet (1893) completed. A line of diligences has been established to Quito, and the first part of a railway to Quito, starting at Duran, on the l. bk. of the Guayas, opposite G., has been completed. G. is the seat of a bishop, and of a university. There are large gas-works, an ice-factory, brewery, and shipbuilding yards. The principal exports and imports are those of Ecuador (*q.v.*) generally. P. (1871) estimated at 22,000; (1890) 44,800, of whom 4400 were foreigners.

Guayaquil, Gulf of, inlet of the Pacific, between lat. 2° and 4° S., long. 80° and 81° W. It receives the Guayaquil, Daule, and Tumbez Rivs., and contains many isls., most of which are low, flat, mangrove-covered isls., near the S. shore or in the estuary of the riv. Guayas. The principal island, however, Puná (32 by 12 m.), is of this nature only in the middle of the E. side. It divides the gulf into two channels, the Canal de Jambeli on the E. side, 5 m. wide at its narrowest part, and forming the only approach to G., though its navigation is rendered dangerous by shifting sandbanks, and the Canal del Morro on the W. side, $1\frac{1}{2}$ m. wide, and still more dangerous. The whole of the NW. shore of the gulf is avoided by navigators on account of a broad belt of reefs and sandbanks which borders it, and the absence of any safe roadstead.

Guayas, riv., Ecuador, rises in the W. chain of the Andes, where it is known as the Zapotal or Caracol R., flows on the whole SW., takes the name of Rio de Bodegas on passing the tn. of Bodegas (or Babahoyo), and becomes known as the G. only on turning S. after receiving the Daule from the N. Besides the Daule it receives the Vinces from the N., and the Chimbo or Rio de Yaguachi on the l. bk. from the E. Navigable by large ocean vessels to Guayaquil, by river steamers all the year round to Bodegas, by canoes all the year round to Zapotal, near the base of the Andes. Area of basin, 13,300 sq. m.

Guayas, prov., in the SW. of Ecuador, cap. Guayaquil; surface level or gently undulating. See **Ecuador,** table.

Guayaberas, gold-mining settlement in the N. of Uruguay, not far from Corrales (dep. Rivera).

Guaybamba (another form of **Guallabamba**), riv., Ecuador. See **Esmeraldas, Rio.**

Guaycurns, Indians in the southern portion of the Californian Penin.

Guaycurus, Indians of Gran Chaco, S. America, chiefly in the angle between the rivs. Paraguay and Pilcomayo.

Guaymas, seapt., Mexico, Gulf of California, 275 m. W. Chihuahua, in 27° 58′ N., chief port of the state of Sonora, in which it is situated; connected by rail with the U.S. rly. system at Nogales. Natural harb., well sheltered and affording anchorage close in shore in 4–5 fathoms of water. P. 7000.

Guernsey, the anct. *Sarnia*, the second in size of the Channel or Anglo-Norman Is., 30 m. W. the coast of Normandy, 17 m. NW. Jersey; length, 9 m.; greatest breadth, 5 m. Lat. of St. Peter's Port, its cap., the only town on the isl. (80 m. from Weymouth, and 140 m. from Southampton), 49° 27′ N., long. 2° 33′ W. Its form is triangular, and its coast-line of about 30 m. is indented with bays, and surrounded by sunken rocks. Surface gently varied, but generally sloping from the S., where the cliffs are lofty, to the N. coast, which is low. It is well watered. Soil rests on a structure almost everywhere syenite or hornblendic granite and syenitic gneiss, and is with the aid of seaweed and artificial manure rendered very fertile. Climate moist, but healthy, and so mild that oranges, melons, figs, myrtles, and the G. lily flourish luxuriantly. Farms average from 5–12 ac., the land being greatly subdivided under the law which gives to each son an equal share in his father's landed property. Chief crops are vegetables, wheat, barley, and apples for cider. The orchards likewise furnish pasture for the famous breed of cows, which are larger and more valued than even those of Alderney, and yield on an average 1 lb. of the finest butter per day throughout the year. Swine are numerous. Immense quantities of grapes and tomatoes are grown under glass. Chief exports (the total value of which exceeds £300,000), vegetables, fruit, cattle, granite, the last-mentioned article being an extremely hard, compact, and weather-resisting material, almost unrivalled for paving, and forming the sole export of the small port of St. Sampson's. There are several brickfields and ornamental pottery works. It has an entrepôt for strong wines for the London houses. Customs duties are moderate, and provisions are cheap. Steamers communicate frequently with Southampton, Weymouth, Jersey, and Alderney. The isl. is divided into ten pars., forming a deanery of the Church of England, in the diocese of Winchester. The natives of the lower orders speak the old Norman French, and French is used alternately with English in the services of all the churches. The isl. is under a lieutenant-governor, who represents the sovereign in the assembly of the States, a parliamentary body composed of a bailiff (appointed by the Crown) and twelve jurats, who compose the Royal Court, the procureur or attorney-general of the isl., the beneficed clergy, and fifteen delegates elected by the parishioners. The Royal Court has jurisdiction over all the Channel Is. except Jersey. G. formed a part of the duchy granted by Charles the Simple to the Norman Rollo, to whose descendants it has now belonged for nearly 1000 years. It is defended by strong fortifications, and has a well-organised militia, all males between the ages of sixteen and sixty being obliged to serve. Mean temp. (40 yrs.), Feb. 43° F., July 60.6°; mean rfall. 37½ in. Area, 16,005 ac. (25 sq. m.). P. (1881) 32,600; (1891) 35,243 (1400 to the sq m.). Area of G. and its dependencies of Alderney, Herm, Jethou, Le Marchant, Great and Little Sark, and Brechou, 19,605 ac. P. (1831) 26,100; (1891) 37,716, the increase having been uninterrupted at each decennial census since 1831, except in the period 1861–71. See *Scot. Geog. Mag.*, 1886, p. 720.

Guiana, in its widest signification, a geographical term indicating the region bounded on the N. and E. by the Atlantic, on the S. by the Amazons, on the W. by the Rio Branco, and thence northwards to the mouth of the Orinoco. This terr. is claimed and settled by Venezuela, England, Holland, France, and Brazil, in the order named, from NW. to SE. and S. The area and population of **Colonial Guiana** are shown in the following table:—

	Area in sq. m.	Population.	
		Thousands.	Date.
British Guiana . . .	109,000[1]	278[2]	1891
Dutch	46,060	56	1889
French	30,460[3]	30	1890

[1] Official estimate including all terr. claimed by Great Britain.
[2] In 1871, 193,500; in 1881, 252,000.
[3] Area actually occupied. Extensive territories are claimed from Brazil.

Almost the only cultivated districts of **Colonial Guiana** belong to a belt of very low, but very fertile, alluvial coastlands, 10–50 m. in breadth, and composed of blue clay and sand. These lowlands are protected from the ocean by mudflats and sandbanks, held together by the roots of mangroves, and intersected by a network of canals; but the whole region is generally flooded in the rainy seasons (two). Behind the lowlands is a forest region, about which comparatively little is known, save that it is exceptionally rich in timber, gums, medicinal plants, oils, balsams, and flowers, and rises by a series of gentle terraces up to 3000 ft. in the Imataca and Pacaraima or Parima Mts. in the W., and to the same elevation in the Acarai and Tumuc-Humac Mts. in the S. A group of isolated sandstone peaks, of which Roraima (*q.v.*) is the best known instance, stands on the boundary of Brit. G. and Venezuela. The whole of G. is abundantly rich in streams; they rise in the mountains and descend by falls and cataracts to the lowlands, where they frequently anastamose; but navigation is hindered by mud-bars, and invariably checked at 10–150 m. from the sea by the falls (*e.g.*, Kaieteur, 800 ft. in the Potaro, a trib. of the Essequibo). The principal rivs., proceeding SE. from the Orinoco, are the Amakuru, Barima, Waini (trib. Barama), Pomerun, Essequibo (tribs. Rapununi and Mazuruni, and the Cuyuni, a trib. of the Mazuruni), Demerera, Berbice, Corentyne, Coppename, Saramacca, Surinam, Maroni or Marowyne and its continuation the Lawa or Awa (trib. Tapanahoni), Mana, Sinnamary, Kuru, Approuague, Oyapock, and Aragouary, the provisional boundary of French G. with Brazil. The Corentyn separates Brit. from Dutch G., and the Maroni (400 m. long) the latter from French G. The Essequibo, the longest riv., exceeds 600 m. Besides the large timber, palms, creepers, ferns, orchids, and lilies are conspicuous features of the forest landscapes. Birds—*e.g.*, bell-bird, humming-birds, oriole, toucan, jacamar, trogon, curassow, cock of the wood, jacana, tinamou, sun-bittern, parrots, besides numerous commoner species, are the most distinctive forms of the fauna; the mammals include the jaguar, peccary, tapir, sloth, armadillo, ant-eater, agouti, capybara, opossum, racoon, coati, porcupine, vampire bat, and manatee; and there are swarms of insects, amphibia, snakes, fishes (including the electric eel). The **climate** is hot and moist, ranging from 70°–90° F. in the inhabited parts. The rainfall is heavy, 120–140 in. on the coast, higher in the savanna (forest) region. There are two rainy seasons, Dec. to Feb. and May to Aug. Yellow fever is a frequent visitant, and leprosy is endemic. The upland region (600–1300 ft.), touching the Tumuc-Humac Mts. in the S. of French G., is stated to be fairly healthy, and to possess a fertile soil. Gold is obtained by washing and quartz-crushing in all the colonies; silver, iron, and coal exist in French G., and diamonds in Brit. G. The waterways are the principal means of communication, roads being few. **History.**—This part of the world was visited by Raleigh, Hutten, and others in quest of

the fabulous El Dorado; but the Dutch were the first to plant colonies on the Essequibo about 1613, the English followed suit on the Surinam in 1650, and the French on the Kourou and Oyapock in 1664 and 1674. In 1667 Surinam was given to the Dutch in exchange for New Amsterdam (New York). In 1803 the English dispossessed the Dutch, but restored Surinam in 1813, retaining Demerara. Slavery was abolished in Brit. G. in 1834, in French G. in 1848, in Dutch G. in 1863. **British G.**, or **Demerara.**—A new (North-Western) dist., extending from the Essequibo to the Orinoco, has been opened up since 1883. The cultivation of the sugar-cane, gold-mining, and wood-cutting are the principal occupations. Eighty per cent. of the annual aggregate exports, which reach 2–3 millions sterling, are for sugar, and eleven per cent. for gold (60,000–100,000 oz.—250 oz. in 1884). The imports, consisting of provisions and manufactured goods, are valued at 1½–2½ millions sterling. Nearly all the import trade, and three-fourths of the export trade, are carried on with the United Kingdom. The population embraces Europeans, Negroes, Indians, Hindus, Chinese. The Asiatics perform nearly all the plantation work. The Indians—Caribs, Arawaks (of Carib stock), and aborigines—number about 10,000. A line of railway, 21 m., connects Georgetown, the cap., with Mahaica. New Amsterdam is the only other town. There are three counties, Berbice, Demerera, and Essequibo, and the North-Western Dist. The governor is appointed by the crown, and is assisted by an executive council and a legislative body, the Court of Policy, of fifteen members, of whom eight are elected directly by the people. Six additional elected members are added to the Court of Policy, to determine questions of finance and taxation. See *Brit. G. Directory* (annual), and *Proc. R. G. S.*, 1892. **Dutch G.**, or **Surinam.**—A portion of terr. between the Awa and the Tapanahoni, upper arms of Maroni, was definitively ceded to Dutch G. in 1891. The principal productions are cocoa, sugar, gold, all exported to the annual value of £90,000–150,000. Timber, balata, bananas, and coffee are also exported. Here too, as in the other colonies, the Negroes and Indians grow for their own sustenance manioc (cassava), bananas, rice, maize, sweet potato, yams, and other tropical fruits. The exports average about £350,000 annually; the imports some £500,000. Trade with Holland, U.S., and United Kingdom. Besides the cap., Paramaribo, which contains fully one-half of the total population, there are eight administrative divisions. The bulk of the people are Moravian Brethren. There are Hindus, Javanese, Chinese, an influential colony of Jews, some 20,000 Indians, and 4000 Bush Negroes, descendants of escaped slaves, who exist in semi-independence in the savanna dists. The governor is assisted by an executive council and a partly elective legislative body. The colony costs the mother-country £10,000–20,000 a year. See Kappler, *Surinam* (in German), 1887. **French G.**, or **Cayenne,** the eastern boundary, is by treaty the 'river of Vincent Pinzon,' which is provisionally taken by the French to be the Aragouary, and embraces the small republic of Kunani (*q.v.*), which lies between the Oyapock and the Araguay. The coast is higher than in Brit. and Dutch G., and the Îles de Salut form a good harbour. The total trade, almost entirely with France, barely exceeds half a million sterling. The chief export is gold. Cap. Cayenne. The colony is in a backward and deplorable state, being used as a place of transportation for Arabs and Negroes from Algiers and Tunis, and for Asiatics from Annam and Tongking, and costing France more than £50,000 sterling a year. See H. A. Coudreau, *La France Equinoxiale* (1887); F. Hue, *La G. Française* (1890); and L. Brunetti, *La G. Française* (1890). Of the remainder of G., **Venezuela** claims all the terr. W. of the Essequibo from its mouth to its source. This claim is, however, resisted by Eng., who maintains that her sovereignty is limited in the W. by the rivs. Takutu and Cotinga (as far as Roraima), thence to the Imataca Mts., and so N. to the mouth of the Orinoco. **Brazilian G.** extends along the southern side of English, Dutch, and French Guiana, from the Atlantic to the Rio Branco, and is limited on the S. by the riv. Amazon.

Guimbal, comm., Ilo-Ilo I., Philippine Is. P. 11,600.

Guin, Switzd. See **Düdingen.**

Guinea, a name applied to the whole of the African ct. from the Senegal to the S. limit of Portuguese Terr., and to the large **gulf** between the part of the coast which trends E. and W., and that which trends N. and S. in that region. The name was originally applied by the Portuguese in the form *Guine* to the region near the Senegal from a native kingdom with a similar name, and was gradually extended in its application with the progress of Portuguese discoveries in the 15th century. The part N. of the Gulf of Guinea is known as Upper G. (Senegambia, Sierra Leone, Liberia, Gold Coast, Lagos, &c.), that to the E. of that gulf as Lower G. (Kamerun Terr., French Congo Terr., Angola). For an account of explorations in the Gulf of Guinea, see *Scot. Geog. Mag.*, 1888, pp. 177, &c., pp. 233, &c.

Guines, Los, tn., Cuba, 30 m. SE. Havana. P. 12,600.

Guledgarh, or **Guledgud** (census), tn., Brit. India, Bombay, dist. Kaládgi, 53 m. S. Bijápur. P. (1881) 10,600; (1891) 15,500; Hindus, 13,600.

Gülek-Boghaz, the Turkish name of the Cilician Gate (*q.v.*).

Gulf Stream, marine current of the N. Atlantic Ocean, so called because first recognised as a distinct current at the mouth of the Gulf of Mexico (Strait of Florida). It originates partly in the N. Atlantic equatorial current, which is divided on encountering the eastern members of the W. Indian Is. into branches, the main branch passing north-westwards outside the archipelago, a smaller portion passing between these isls. into the Caribbean Sea, and thence into the Gulf of Mexico. After penetrating a certain distance into that gulf this feeble current becomes deflected to the NE., where it becomes strengthened (probably in consequence of the inflow of river water into the gulf), and passes out at the straits as a well-marked current, about 30 m. wide, with a speed of about 4 m. an hour, and a temperature above 80° F., and with water of a deep blue colour, due to the high degree of saltness. This current then unites with the portion that creeps along the outside of the W. Indies, and thence proceeds north-eastwards, shallowing, spreading out, and finally breaking up into branches (a marine delta) as it advances. As a distinct current it comes to an end between long. 30° and 40° W., but a great deal of its waters is swept north-eastwards to the shores of Europe and Iceland (**Gulf Stream Drift**) under the influence of the prevailing south-westerly winds, and is well recognised even on the Murman Coast, and the W. coast of Novaya Zemlya. A portion of these waters, however, returns southwards along the coast of Portugal and the NW. of Africa.

Gulgong, mining-tp., New South Wales, Phillip co., 70 m. N. Bathurst. P. <1500.

Gulgula, ruined city, N. Afghanistan, in the valley, and facing the gigantic figures and excavations of Bamian.

Gulhek, Persia. See **Gulahek.**

Gulistan, or **Gulistan Karez,** vil., Brit. Afghanistan, Pishin, 38 m. NW. Quetta. Alt. 5112 ft.

Gulladuff, tnld., Ire., SE. co. Londonderry, bar. Loughinsholin, 14½ m. NNE. Cookstown, 1 m. from Knockloughrim stn. P. <250.

Gullane, electoral div., Ire., Kerry, dist. Ballylongford.

Gullane (gil'en), vil., Scot., Haddingtonshire, 4½ m. WSW. North Berwick, 3 m. NW. Drem Junc., PMT.O. **G. Point,** a cape, 1½ m. W.

Gulleghem, comm., Belgium, prov. W. Flanders, arr. and 7 m. W. Courtrai, cant. Moorsele. P. <4000.

Gull Island, islet, Ire., co. Waterford, in 7° 26′ W.

Gull Islands, two isls. (Great and Little G.), U.S., New York, at the entrance to Long I. Sound, in the Race (so called from the swiftness of the current).

Gull Lake, stn., Canada, dist. Assiniboia, on the C. P. R., 546 m. by rail W. Winnipeg.

Gull Lake, lake, Canada, Ontario, Haliburton co., 75 m. E. by N. Collingwood, drained S. into Lake Balsam.

Gull Rock, islet, Eng., Cornwall, ½ m. from S. ct., in 4° 53′ W.

Gulmarg, or **Gulmerg,** vil., Kashmír, 30 m. W. Srínagar; summer retreat of the European residents of that town.

Gulpaigan, or **Gilpaigan,** tn., Persia, prov. Irak-Ajemi, 102 m. NW. by W. Ispahan. Alt. 6090 ft.

Gulran, vil., in the NW. of Afghanistan, Badghiz, 60 m. NNW. Herat.

Gulvain, mt., Scot., Inverness-shire, in the W., 2½ m. SSE. of the head of Loch Arkaig. Alt. 3224 ft.

Gulval, par., Eng., Cornwall, St. Ives div., 1½ m. NE. by N. Penzance, PMT.O.; 4355 ac. P. <1500.

Guma, tn., Eastern Turkistan, prov. Khotan, on the Kilian R., 80 m. SE. Yarkand, is enclosed by a fortified wall; the dist. is richly cultivated.

Gumaca, comm., Philippine Is., Luzon, prov. Tayabas. P. 7500.

Gumál, Gomal, or **Gomul,** riv., Afghanistan and India, flows S. then E. across the Suláiman Mts. into the Indus; used for irrigation. It gives name to a pass (alt. 7500 ft), also called the **Ghwálari Pass,** but this latter name specially belongs to a part of the route to the S. of the G., in about 32° 5′ N., 70° E. *Proc. R. G. S.* 1879, p. 52; *R. G. S. Supp. Papers,* vol. i., pp. 381–90.

Gumbinnen, tn., Prussia, prov. E. Prussia, 36 m. SSE. Tilsit; has various manufactures, and important colt market. P. 11,900.

Gumbum, lamassery, China. See **Kumbum.**

Gümenje, tn., Turkey in Europe, prov. and 35 m. NW. Salonica; wine-growing centre.

Gumeracha, tp., South Australia, Adelaide co., 20 m. ENE. Adelaide. P. <1500.

Haarlem, vil., Cape Colony, div. Uniondale. P. <1500.

Haarlem, or **Harlem,** city, Netherlands, cap. prov. N. Holland, 11 m. W. Amsterdam. The cathedral of St. Bavon contains the famous Haarlem organ. The statue of L. Coster, the reputed inventor of movable printing types, and a native of this town, stands in the market-place. It has also steam cotton mills, bleaching, dyeing, and printing mills, and small manufactures of silk fabrics, carpets, lace, ribbons, soap, and a typefoundry. It is the centre of the important Dutch trade in flowers and flower seeds. The painters Ostade, Philip Wouverman, Berghem, and Ruisdael, with Vanderhelst and Adriaan Brouwer were natives of Haarlem. P. (1869) 27,300; (1889) 52,000.

Haarlem, isl., Palk's Strait, off the N. extremity of the isl. of Ceylon.

Haarlemmer Meer (Haarlem Lake), former lake, Netherlands, prov. N. Holland, 2 m. SE. Haarlem, about 33 m. in circumference. It was formed gradually. In the middle of the 13th century it consisted of three separate lakes, the united area of which was about 22,500 ac., and by the middle of the 19th century the three had coalesced into one of nearly double that area. The lake has been drained (drainage completed in 1852), and 41,700 ac. of land have thus been gained. It now gives name to a comm., the population of which in 1869 was 11,300; in 1889, 15,500.

Haarstrang, or **die Haar,** ridge, Prussia, prov. Westphalia, on the r. bk. of the Möhne and Ruhr, about 50 m. long, stretching E. and W.; has many fossils of marine animals.

Haast Mountain, Southern Alps, New Zealand, NE. of Mount Aorangi (Cook). See **Tasman Glacier.**

Haast, settlement, New Zealand, South I., Westland co., on the W. ct., 120 m. WNW. Timaru, at the mouth of the **Haast R.**

Haast's Pass, New Zealand, across the Southern Alps, at the head of the Haast R. valley, in 44° 5′ S.

Haay, isl., Scot., Hebrides, in the Sound of Harris, between Harris and N. Uist.

Hab, riv., on the W. frontier of Sind, India, for some distance the boundary between British terr. and Balúchistán, enters the Arabian Sea in 66° 42′ E.

Habab, African tribe. See **Ababdeh.**

Habban, tn., S. Arabia, 172 m. NE. Aden, situated in the midst of a plain of about 60 sq. m., 124 m. NW. of the port of Bir Ali. (*Jour. R. G. S.*, 1871, p. 232.) P. 2–3000.

Habberley, par., Eng., Salop, Oswestry div., 8½ m. SW. Shrewsbury, 2 m. ESE. Minsterly stn. P. <250.

Habbie's Howe, hollow, Scot., 13 m. WSW. Edinburgh, at the S. base of the Pentland Hills, near the head of the N. Esk; the scene of Allan Ramsay's 'Gentle Shepherd.'

Habblesthorpe, part of par., Eng., Nottinghamshire. See **Leverton, North.**

Habelschwerdt, tn., Prussia, prov. Silesia, cap. circle H., 59 m. S. by W. Breslau, 37 m. SE. by E. Trautenau (Bohemia); gives name to a part of the Sudetes Mts. P. 5600.

Habergham Eaves, par., Eng., Lancashire, partly included in bor. of Burnley; 4217 ac. P. 46,900.

Habersham, co., U.S., Georgia, on E. frontier, and S. of 35° N.

Habesh (Arabic, 'a conglomeration of tribes'), the Arab name of Abyssinia.

Habibas Islands, group of rocky islets 7 m. from ct. of Algeria, 30 m. W. Oran.

Habichtswald ('hawk's wood'), woody volcanic mt. ridge, Prussia, W. of Kassel; on its W. side are two rich coal-mines. Alt. 1950 ft.

Habitants, Les, vil., W. Indies, on W ct. of Guadeloupe I., in 16° 3′ N.

Habkern, vil., Switzd., cant. Bern, 3 m. N. Interlaken. P. (comm.) <2000.

Habra, riv., Algeria, prov. Oran, formed 19 m. SW. Mascara by the union of four streams, flows N., and after uniting with the Sig enters the Mediterranean about 12 m. lower down, in about 0° 10′ W. In 35½° N. its waters are held back by a dam, 1568 ft. long, 131 ft. high, and 128 ft. broad, below which the water is used for irrigation. In 1881 this dam, known as the *barrage de Perrégaux*, burst in a great flood, but it has since been reconstructed. Total length of river, 146 m.

Habr Awal (or **Awel**), tribe, E. ct. Africa, living near the head of the Gulf of Aden, from Zeila to Berbera.

Habr Gerhajl, tribe, E. Africa, living S. of the E. section of the Habr Awal.

Habrough, par., Eng., Lincolnshire, N. Lindsey div., 8 m. WNW. Great Grimsby, 1 m. NE. of its stn. on the M. S. & L. R., P.O. P. <500. See **Killingholme.**

Habsburg, or **Hapsburg,** vil., Switzd., cant. Aargau, near the r. bk. of the Aar, 2½ m. SW. Brugg. To the N. of the village is the castle of H. (11th century), the original seat of the imperial family of Austria. P. (comm.) <2000.

Habsburg, Neu, castle, Switzd., on the Küssnacht arm of the Lake of Lucerne, cant. and 3 m. E. by S. Lucerne.

Haddington, royal burgh, market-tn., and par., Scot., cap. co., on the Tyne, terminus of a branch of N. B. R., 18 m. E. Edinburgh, 7 m. S. by W. North Berwick. It is perhaps the largest market in Scotland for corn and other agricultural produce. Fairs in April and October. H. is a very ancient royal burgh, and holds its last charter dated 1624. King Alexander II. was born here in 1198. The town disputes with Gifford the honour of being the birthplace of the Reformer John Knox. Alt. 147 ft. Market-day, F. Par. 12,113 ac., P. 5200; tn. and royal burgh, P. <4000.

Haddington Hill, hill, Eng., Buckinghamshire, div. and 5½ m. SE. by S. Aylesbury.

Haddingtonshire, or **East Lothian,** co., Scot., having about 17 m. of coast on the NW. and N. on the Firth of Forth, and 13 m. on the NE. on the German Ocean, in both cases exclusive of windings. Its surface sinks from the Lammermuir Hills, or more properly uplands (highest point 1749 ft., about the middle of the S. border), towards the N. and E. Only stream of importance the Tyne, which enters the county from Midlothian and flows NE. and enters the German Ocean about 3 m. W. Dunbar. The hill tracts, which have smooth rounded outlines, and are adapted for the most part for little but sheep-pastures, though the lower spurs are in some cases carefully cultivated to the top, are mainly composed of Silurian shales with flagstones, graywackes, and other rocks of Silurian age, associated in places with members of the Upper Old Red Sandstone. The lowlands are mainly of Carboniferous age, the NE. half from the meridian of N. Berwick belonging chiefly to the Calciferous Sandstone period, and containing extensive volcanic remains of that period in the form of porphyritic lavas, coarse ash, breccias, and agglomerates. In places these remains form isolated hills, Garleton Hill (590 ft., on the top of which is the monument to the Earl of Hopetoun), composed of lava and tuff, to the N. of Haddington, North Berwick Law (612 ft.) and Traprain Law (724 ft., near East Linton), both volcanic vents filled with crystalline rocks. The W. half of the lowlands mainly belongs to the Carboniferous Limestone, including the upper and lower limestones and a middle series containing coal and ironstones adjoining the coalfield of Midlothian. Coal, including splint and parrot coal, is mined at Tranent, Ormiston, Prestonpans, and Macmerry. Ironstone was till recently mined at the last-mentioned place, where there are iron-works. Red hematite was formerly mined on Garleton Hill. The county has long been noted for its agriculture. A strip of rich soil is found along the base of the hills, where lie the villages of Salton, Gifford, Garvald, Stenton, Spott, Innerwick, and Oldhamstocks, in that order from W. to E. Further N. a band of tough intractable clay stretches across the county, but in the neighbourhood of Dunbar this gives place to a rich loam and light clay, noted for its wheat, oats, and potatoes. (For agricultural statistics, see **Appendix,** pp. 10–12.) The N. B. R. main line runs from W. to E. through the county to Dunbar and thence along the coast into Berwickshire, and has branches to North Berwick, Haddington, and Macmerry. Principal towns, Haddington (the county town), Dunbar, North Berwick, Tranent, and Prestonpans. The county returns one member to Parliament. Area, 173,447 ac. P. (1891) 37,500. See **Scotland,** table.

Haddiscoe, par., Eng., Norfolk, S. div., 9 m. SW. Yarmouth, on the G. E. R., P.O. P. <500; eccles. par. (**H. with Toft Monks**) P. <1000.

Hadnall, par., Eng., Salop, Newport div., 5 m. NNE. Shrewsbury, on the L. & NW. R., PMT.O. P. <750.

Hadramut, more commonly but apparently improperly **Hadramaut,** a name sometimes applied to the part of S. Arabia between Yemen and Oman, sometimes restricted to the region extending E. from Yemen and the dependencies of Aden to about

51½° E., bounded on the N. by desert; but originally, it would appear, and still strictly, applied to a valley in this latter region running for about 100 m. first parallel to the coast, and then bending round to the SE. and opening into the Indian Ocean at Seihut in 51½° E., where it discharges the scanty waters of the neighbouring plateau (*akaba*), which is furrowed by its tributary valleys or ravines, and in the S. descends rather abruptly to the narrow littoral tract (*sahil*). The littoral tract is extremely arid, but contains numerous hot springs, which are utilised by means of underground channels to fertilise tracts here and there. The principal cultivation is in the valleys, where groves of date-palms abound. Cap. and chief town in the interior Shibam, at the meeting-place of the chief valleys; chief coast towns, Mokalla, Sheher, Koseir, and Seihut. The main valley was first reached by Europeans in 1893, when it was entered by Mr. Leo Hirsch, and afterwards by Mr. and Mrs. Bent. See *Geog. Jour.*, 1894, pp. 315, &c. Principal port, Makalla. Area about 100,000 sq. m. P. estimated at 500,000.

Hadres, tn., Lower Austria, dist. Haugsdorf. P. <3000.

Hadrian's Wall, the Roman wall connecting the Tyne and the Solway in the N. of England. It began at Newcastle, and kept generally 2–4 m. N. of the Tyne, in Cumberland N. of the Irthing, crossed the Eden at Carlisle, and terminated on the Solway at Port Carlisle. The wall was of stone, bordered by a ditch on the N. and a line of ramparts on the S. It is named after the Emperor Hadrian, who probably built it about 119 A.D. About ninety years later it was restored by Severus. Remains of the wall can still be traced in many places.

Hadselö, or **Ulfö,** isl., off the N. ct. of Norway, the most southerly of the Vesteraalen group.

Hadsor, par., Eng., Worcestershire, Droitwich div., 6 m. SSW. Bromsgrove, 1 m. E. Droitwich, on the Worcester and Birmingham Canal. P. <250; eccles. par. (**H. with Oddingley E.**) P. <500.

Hague, tn., U.S., New York, Warren co., on N. of Lake George, 52 m. S. by W. Burlington (Vt.). P. <1500.

Hague, Cap de la, cape, France, the NW. point of penin. of Cotentin, dep. Manche, on the English Channel.

Hague, The, Dutch, **s'Gravenhage** ('the Count's enclosure,' a hunting seat of the princes of Orange. See *Hag*), or **Den Haag,** French **La Haye,** tn., Netherlands, cap. prov. of S. Holland, and the usual residence of the court, and the seat of the States-General, though Amsterdam still retains the nominal title of cap. of the Netherlands, on a branch of the Leyden and Rotterdam Canal, 14 m NW. Rotterdam, and 33 m. SW. Amsterdam, 4 m. from the watering-place of Scheveningen, on the North Sea, with which The H. is connected by a magnificent avenue bordered by trees; 52° 3′ N., 4° 18′ E. It is enclosed by a moat, crossed by drawbridges, and many streets are intersected by canals, bordered with rows of trees. All the principal edifices are in the Vyverberg, or great square of its north or fashionable quarter. The national museum comprises collections of Chinese and Japanese curiosities, and of Dutch national relics, with a rich gallery of Dutch paintings, among which is Paul Potter's celebrated 'Bull.' The royal library is remarkably rich in ivories, paintings, *incunabula,* and MSS. The Binnenhof, appropriated to the States Assembly and the chief govt. offices, comprises a portion of the residence of the ancient counts of Holland. A road called the Voorhout leads N. to the park called the Bosch, on one side of which a zoological and botanic garden has been laid out. Printing and various manufactures are carried on. Birthplace of the astronomer Huygens, the physician Boerhaave, and the place where Spinoza, to whom a monument has been erected, died (1677). P. (1869) 82,000; (1889, including Scheveningen) 160,500.

Hagworthingham, par., Eng., Lincolnshire, S. Lindsey div., 11 m. S. Louth, 4 m. NW. by W. Spilsby stn., PMT.O. P. <500.

Haha, prov., Morocco, on the Atlantic coast, near Cape Gir; chief town, Mogador.

Ha Ha Bay, or **Grande Baie,** bay and summer resort, Quebec, Chicoutimi co., stretching 7 miles WSW. from the riv. Saguenay, in 70° 46′–55′ W., and receiving from the S. the **Ha Ha R.,** which issues from **Ha Ha Lake** in the S. of the co.

Hahndorf, tp., S. Australia, co. and 15 m. SE. by E. Adelaide; has goldfields near. P. <1500.

Hahn's Peak, vil., U.S., Colorado, Routt co., 110 m. E. by S. of the NW. corner of the state; gold-mines. P. <1500.

Haí, Chinese, 'sea.'

Hai, tn., Turkey in Asia, vilayet and 106 m. NW. Busra, sanjak Muntefik. P. 5000 (mainly Shiah Moham.).

Haicheng, or **Haichung,** tn. Manchuria, prov. Liautung, 32 m. E. by N. Newchwang; scene of a defeat of Chinese by Japanese, December 19, 1894.

Haid, vil., Austria, Bohemia, 27 m. W. Pilsen. Alt. 1550 ft. P. <2000.

Haida, tn., Austria, Bohemia, 22 m. W. Reichenberg. P. <3000.

Haidarábád, or **Hyderábád,** tn., Brit. India, Sind, dist. H., 90 m. ENE. Karáchi; the old cap. of Sind, to the E. of the Indus, standing on one of the few insignificant limestone ridges that traverse the Indus valley. Noted from earliest times for its manufactures, ornamented silks, silver and gold work, and lacquered ware. Alt. 94 ft. Mean temp., yr. 79° F., Jan. 63°, June 91°; rfall., yr. 8.0 in., July–Aug. 6.0 in. P. (1891) 54,600; Hindus, 32,100; Moham. 22,000; with cantonment, 58,000.

Haidarábád, or **Nizám's Dominions,** large native state, India, confined to the southern tableland. It owes its second name to the title conferred by the Mughal emperor in the early part of last century on the nobleman who afterwards became the first ruler of the present dynasty, and who fixed his capital at the city of Haidarábád, divided into the districts named in the following table:—

Haidarábád (Nizám's Dominions).	Area in sq. m.	Pop. 1881.	Pop. 1891.	Increase 1881–91.	Pop. per sq. m. 1891.

[1] Including 6600 employed on railways.

The terr. still under native administration [**Berar**] is bounded in the NE. by the Wardhá, Pránhíta, and Godávari, in the S. by the rivs. Tungabhadra and Kistna, the line of which is continued roughly north-eastwards to the Godávari by the Eastern Ghats, which complete the southern or south-eastern boundary. In the NW. the terr. extends to the Ajanta Hills, which separate it from part of Bombay; farther E. the northern boundary is mainly formed by the riv. Pengangá, the southern limit of Berar. The whole course of the riv. Manjira, the chief r. bk. trib. of the Godávari, is within the western boundary of the state, but the three more important rivers, the Godávari, Bhímá, and Kistna, are all cut by the irregular western boundary separating Haidarábád from Bombay. The Godávari and the Sina, the latter a trib. of the Bhímá, form part of this boundary in certain places. The surface is varied, and presents no very marked features. The soil is equally varied even on the level tracts. In some places there occurs the black soil (*regar*), characteristic of the Deccan; in others, a coarse red soil, far from fertile; in others again, a finer and richer red soil, believed to be first accumulated in the form of ant hills. As to the climate, see **India** and **Secunderábád.** Among the grain crops, in addition to the commoner millets, *rágí* has a prominent place. Cotton is grown in considerable quantity, and in some places of specially good quality. Indigo and sugar-cane are among the other more valuable products of agriculture. Fruits are abundant, and some of these, as the melons and pine-apple of Haidarábád, and the purple grapes of Daulatábád, have a high reputation outside the limits of the state. Among domestic animals may be mentioned sheep and horses, the latter of which have long been noted. The rivers have only a minor value as means of communication. The standard-gauge railways which establish communication between Bombay and Madras cross the SW. angle of the state, and from this line the Nizám's railway, also standard-gauge, proceeds eastwards past Haidarábád, to which there is a short branch, and finally south-eastwards to Bezwáda, at the head of the Kistna delta, in Madras. A branch from this line goes to the Singareni coalfield.

Haidarábád, tn., India, cap. H. state, in 17° 21′ 45″ N. and 78° 30′ 10″ E.; founded in 1589, and first called Bhágnagar, is situated towards the S. of the state, on the Musi R., a trib. of the Kistna. It is a walled town, standing amidst wild and picturesque scenery, and is inhabited by the most varied population in India, and the most warlike in aspect. Its chief buildings are the palace of the Nizam, several mosques, and towering above all the magnificent pile forming the British Residency. P. with suburbs, including Secunderábad (1881) 355,000; (1891) 415,000.

Haidarábád Assigned Districts. See **Berar.**

Haidargarh, pass, Brit. India. See **Hosangadi.**

Haidas, tribe. See **Queen Charlotte Islands.**

Haide, or *Heide,* Teutonic, 'a heath.'

Haidra, celebrated ruined site, 7 m. from the Algerian frontier of Tunis, 20 m. in a direct line NE. Tebessa.

Haiduci Čokar Pass. See **Balkan Mountains.**

Haidzuong, fortified tn., Tongking, on an arm of the Songkoi delta, 32 m. E. by S. Hanoi, cap. of prov. of same name.

Haie Descartes, La, comm., France, dep. Indre-et-Loire, on the Gartempe, arr. Loches, 29 m. S. Tours. P. <2000.

Haifa, Caiffa, Khaifa, or **Kaiffa** (the *Scaminum* of St. Jerome and Eusebius), seapt., Syria, 32° 49′ N., 35° E., 9 m. SSW. Acre, at the foot of Mount Carmel, starting point of a projected railway to the Hauran and Damascus; roadstead open to the NW., with good anchorage in 6 fathoms of water, and steamboat stn. There is a German colony in the neighbourhood, dating from 1870; and more recently a colony of Russian Jews has been settled near. P. 3000.

Haifeng, or **Haifong,** tn., China, prov. Kwangtung, 135 m. E. Canton.

Haifong, or **Haiphong,** tn. and seapt., with French settlement, Tongking, on the Cam, one of the branches of the Songkoi delta, in 20° 51′ 43″ N., 106° 40′ 45″ E. ('the great pagoda'), situated amidst marshes, 60 m. in a direct line, 144 m. following the windings of the river from Hanoi; the only port in the interior to which vessels drawing 13 ft. of water can penetrate. A sandy bar prevents the entrance of vessels of larger size. There are floating iron wharves and a pontoon, 540 ft. long, but no docks. Imports consist chiefly of Chinese silks, English cotton, and various medicines; exports tin, lacquer, varnishing oils, raw cotton, &c. Mean temp., yr. 75.6° F., Jan. 61.7°, Aug. 84.6°. P. at least 10,000, including many French.

Haifung, tn., China, prov. Shantung, 98 m. SSE. Tientsin.

Haigh, Teutonic, 'an enclosure.' See *Hag.*

Haigh, par., Eng., Lancashire, Ince div., 2½ m. NNE. Wigan (*q.v.*), 1 m. E. Red Rock stn., with coal-mines, PMT.O. P. <1500.

Haigh, stn., Eng., Yorkshire, W. Riding, on the L. & Y. R., 4½ m. NW. Barnsley, P.O.

Haighton, par., Eng., Lancashire, Blackpool div., 4 m. NE. by N. Preston, 1 m. NW. Grimsargh stn. P. <500.

Haiju, tn., Korea, 54 m. NW. Chemulpo, in 38° 1′ N.

Haikeu, tn., China. See **Hoihou.**

Haïl, improperly **Hayll,** oasis, Arabia, at the E. end of the Jebel Aja, about 280 m. NE. Medina.

Hailákándi, vil., Brit. India, Assam, dist. Cachar, 80 m. W. by S. Manipur. P. (1891) <5000.

Haile, par., Eng., Cumberland, Egremont div., 7½ m. SE. by S. Whitehaven, 2 m. NE. Beckermet stn. P. <250.

Hailes, par., Eng., Gloucestershire, Tewkesbury div., 8 m. NE. by E. Cheltenham. P. <250. See **Didbrook.**

Hailes, New, stn., Scot., Midlothian, 1½ m. W. by S. Musselburgh, on the N. B. R.

Hailey, par., Eng., Oxfordshire, div. and 6 m. WSW. Woodstock, 1½ m. N. by W. Witney. P. <1500; eccles. par. (**H. with Crawley**) P. <1000.

Hailey, vil., U.S., Idaho, cap. Alturas co., 95 m. E. Boise. P. <1500.

Haileybury College, Eng. See **Hertford.**

Hai-Ling, isl., on the S. ct. of China, prov. Kwangtung, SW. of the Bay of Canton.

Hailsham, par., Eng., Sussex, div. and 6½ m. N. by W. Eastbourne, on the L. B. & S. C. R.; 5330 ac. P. <3500; eccles. par. (**H. with Polegate**) P. <3500.

Hail Weston, par., Eng., Huntingdonshire, div. and 8 m. SW. Huntingdon, 2½ m. WNW. St. Neots stn., P.O. P. <500. See **Southoe.**

Haimer, El, caravan stn. in the Nubian desert, on the road from Assuan to Sennâar; has brackish spring water.

Hain, Teutonic, 'an enclosure.' See *Hag.*

Hainan, large isl., in the S. of China, separated by H. Strait from the penin. in the S. of the prov. of Kwangtung, to which it

belongs; chief town, Kiungchou, near the N. ct., a treaty port (harbour at Hoihou). The central and southern portions are mountainous, but the whole northern half is a plain, mostly undulating, but level to a great extent, and broken occasionally by low ridges and isolated hills. The island is subject to typhoons and earthquakes. The coast opposite the mainland, and all the low-lying land up to the base of the hills (which are inhabited by the Lis, a simple, kindly, hospitable people), is peopled by Chinese immigrants. Area, 13,166 ac. P. (estimated 1890) 2,000,000.

Hainau, tn., Prussia, prov. Silesia, 10 m. WNW. Liegnitz. P. 8100.

Hainault, or **Hainhault** (hā'nawlt), **Forest,** a former forest, Eng., Essex, to the SE. of Epping Forest, and separated from it on the NW. by the Roding valley, 3 m. NW. Romford; contained the Fairlop Oak, under which an annual fair was held for centuries. Disafforested about 1855, and now mainly under the plough.

Hainaut, formerly spelt also **Hainault,** middle prov. on the S. frontier of Belgium (*q.v.*), traversed in the SE. by the valley of the Gambre, cap. Mons; contains the two richest coalfields of Belgium (respectively round Mons and Charleroi). Area, 1437 sq. m. P. 1,049,000.

Hainaut, an old div. of French Flanders, now comprised in dep. Nord.

Hainburg, tn., Austria, crownland Lower Austria, 25 m. E. by S. Vienna, on the r. bk. of the Danube; has the ruins of a castle of the Knights Templars on a rock rising from the Danube. P. 5100.

Haindorf, tn., Austria, Bohemia, dist. Friedland. P. <3000.

Haine, riv., Belgium, prov. Hainaut, flows W. 40 m. past Mons and St. Ghislain to the Scheldt, which it joins opposite Condé, dep. Nord, France, whence it is navigable to Mons. The prov. Hainaut derives its name from this river.

Haines, mission stn., U.S., Alaska, on N. side of Chilcoot Inlet, in 59° 14′ N. and 135° 27′ W.

Haine St. Paul, comm., Belgium, prov. Hainaut, arr. Mons, 11 m. W. by N. Charleroi. P. 5000.

Haine St. Pierre, comm., adjoining Haine St. Paul on the E., arr. Thuin. P. 5000.

Hainewalde, vil., Ger., kgd. Saxony, govt. Bautzen, dist. Gross-Schönau. P. <3000.

Hainfeld, market-vil., Lower Austria, 30 m. WSW. Vienna. P. <2000.

Hainford, Eng., Norfolk. See **Haynford.**

Haing-gyi, or **Negrais,** isl. See **Bassein,** riv., Burma.

Hainhault Forest, Eng., Essex. See **Hainault.**

Hainholz, vil., Prussia, prov., circle, and dist. Hanover. P. <3000.

Hainichen, tn., Ger., kgd. Saxony, 10 m. WNW. Freiberg; has manufactures of cloth and flannel, japanned leather, tanneries, &c.; the birthplace of Gellert. P. 8300.

Haining, tn., China, prov. Chekiang, on Hangchow Bay, 28 m. NE. by E. Hangchow.

Hainton, par., Eng., Lincolnshire, E. Lindsey div., 9 m. W. by S. Louth, with a stn. (**S. Willingham and H.**) on the G. N. R., PMT.O. P. <500.

Hainworth, eccles. par., Eng., Yorkshire. See **Ingrow.**

Haiphong, tn., Tongking. See **Hai-fong.**

Hairmyres, stn., Scot., Lanarkshire, on the C. R., 6½ m. S. by E. Glasgow.

Haisbro', Eng. See **Happisburgh.**

Hais, El, oasis. See **El Hayz.**

Haisthorp, par., Eng., Yorkshire, E. Riding, Buckrose div., 16 m. S. by E. Scarborough, 4 m. SW. by W. Bridlington, 1½ m. W. Carnaby stn. P. <250.

Haitan, isl., China, in the strait of Formosa, in 25° 35′ N. and 120° 27′ E.

Haitang, vil., China, prov. Süchwan, 143 m. SW. by S. Chengtu-fu. Alt. 6490 ft. Also called Ning-yuch.

Haiti (from an old Carib name meaning 'rough land'), the second in size and in population of the W. Indian Is., situated between Cuba, from which it is separated by the Windward Passage, and Puerto Rico, from which it is separated by the Mona Passage; the mainland between 17½° and 20° N., and 68° 20′ and 74½° W. Discovered by Columbus, who landed at the Bay of the Mole St. Nicolas in the NW. of the isl., on the 6th of December 1492. By Columbus it was called *Española*, 'little Spain,' whence the Latinised name of **Hispaniola.** It was afterwards called also Santo Domingo, after its chief town. The isl. is irregular in shape, sending out to the W. two long penins., one, that of Tiburon, towards Jamaica, and the other, that of St. Nicolas, towards Cuba, and terminating in the E. in two other penins., these, however, of very unequal size, bounding on the N. and S. the large Bay of Samana. The **surface** is very varied. There are four principal mountain chains. In the middle section of the isl. there runs parallel to the N. ct. the range of Monte Cristi, which reaches in the Loma Diego Campo the height of 4000 ft. To the S. of this range stretches the largest plain in the isl., the Vega Real ('royal garden'), from the Bay of Manzanillo in the W., to the Bay of Samana in the E., 140 m. long by 15–30 ft. broad. There next follows a chain, or series of chains, with a WNW.–ESE. trend, running through the whole isl. from the Cap à Foux at the W. end of the St. Nicolas penin. to the S. shore of the Bay of Samana. The highest part of this series is about the middle of the isl., and is known as the Sierra de Cibao (from a Carib word meaning 'stony'), whose culminating peaks are the Pico de Yaqui, 9695 ft., the Pico del Valle, 8625 ft., and a little to the S. the Loma Tina, 10,300 ft., the highest mountain in the W. Indies. The third chain, running from about the middle of the western gulf to the region lying N. of the Gulf of Neiba, is nearly parallel to the former, and culminates in the Loma Barranca, 7495 ft. The fourth occupies nearly the whole of the penin. of Tiburon, and runs eastwards to the S. shore of the Gulf of Neiva, rising in the Mornes de la Hotte at the W. end of the penin. of Tiburon to 7395 ft., in the Sierra de la Selle, about the E. end or root of that penin., to 8905 ft. Two of the four chief **rivers** water the Vega Real, both rising in the Sierra de Cibao, the Yaqui, after descending to the plain, flowing WNW. to the Gulf of Manzanillo, and the Yuna E. to the head of the Bay of Samana. The two others flow through the hilly or undulating valleys between the second and third main chains of the isl., the Artibonite, collecting numerous headwaters from a circle of mountains and finally flowing W. to the large Haitian Gulf, and the Neiba or Yaqui Chico ('Little Yaqui') flowing S. to the Gulf of Neiba. The **climate** and vegetable **products** are similar to those of the other W. Indian Is. The most important export product is coffee. Forests including valuable cabinet and dye-woods (mahogany, brazil-wood, logwood, &c.) abound over the whole isl. About nine-tenths of the **people** are negroes, and the remainder mulattoes. At the time of the discovery of the isl. the native Carib population was estimated by Columbus to number about 900,000. This estimate was probably excessive, but there is no doubt that between that date and 1508, when the colonists estimated the number of the natives at 60,000, there was an enormous destruction of human life, due to the barbarities inflicted by the Spaniards on the natives in compelling them to aid in the search for gold. In 1533 there are said to have been only 4000 surviving Caribs, and by the middle of the 18th century the original natives had all died out. The loss of native labour thus brought about was made good here as elsewhere by the importation of African negroes as slaves. The island remained entirely a Spanish possession till the 17th century. In the first half of that century the French began to settle permanently in the Haitian Gulf, and in the treaty of Ryswick (Rijswijk), in 1697, the western portion of the island was definitely ceded to France. In the course of the next century this part of the island became the seat of numerous cotton and sugar plantations, belonging to wealthy French planters employing negro slaves. This state of matters was put an end to by the outbreak of the French Revolution, when a rebellion broke out among the negroes, in consequence of which the white population was extinguished, the whites being either massacred or compelled to make their escape to other isls. In the course of these troubles the Spanish portion of the island had been ceded (1795) to France, and it remained attached to the French portion when the island declared its independence in 1801, and again on the 1st Jan. 1804. This independence was gradually recognised by foreign powers, in 1825 even by France, but on condition of the payment of a large indemnity. By the French portion of the island this settlement was accepted, but the Spanish portion refused to share in the payment which ultimately led (in 1844) to the separation of the Spanish portion. Since that date accordingly the island has been divided into two negro republics, a western, occupying about ⅗ths of the island, known as the Republic of Haiti, in which French is the official language, and an eastern, known as Santo Domingo, in which the official language is Spanish.

Haiti, republic, about one-third of the size of Ire., in the isl. of H., composed of the two western penins. and the land joining them as far E. as a nearly straight line (apart from minor irregularities), connecting the Bay of Manzanillo in the N., in 71° 48′ W., and the mouth of the Pedernales, in 71° 40′, in the S. Mountainous; only river the Artabonite. The most important export is coffee, which is sent chiefly to Havre, Hamburg, and Antwerp. Among other exports are cacao, cotton, sugar, mahogany, and logwood. All kinds of industry are, however, in a backward state owing to the indolence of the people, the want of means of communication with the interior, and recurring political and financial troubles. Irrigation is required, but neglected. Coffee-pulping and peeling machines are only beginning to be introduced. There are no railways, but contracts have been signed for the construction of lines from Port-au-Prince, the cap., and the port of Cape Haitien, on the N. ct., to the interior. The legislative assembly is composed of two chambers, the lower elected for a term of five years by the direct vote of all male citizens engaged in some occupation, the upper nominated by the lower from lists presented by the executive and the electoral colleges. The French system of weights and measures is in use, and French coins circulate. The local monetary unit is the *gourde*, of 100 cents, equal to the peso of Peru, &c.; value about 3s. 4d. Area, 11,072 sq. m. P. (1887) 960,000, or 87 to the sq. m.

Haiyan, tn., China, prov. Chekiang, on Hangchow Bay, 50 m. ENE. Hangchow.

Haiyan, ruins, Palestine, *Ai* in the O. T., 31° 55′ N., 35° 16′ E., 9 m. N. by E. Jerusalem.

Haiyang, tn., China, prov. Shantung, on the E. ct., 58 m. S. by W. Chifu.

Haiyangso, tn., China, prov. Shantung, on the Yellow Sea, 50 m. S. by E. Chifu.

Haiyüntau, isl., Manchuria, in Korea Bay, 39° N., 123° 10′ E.

Haiz, tn., in the SW. of Arabia, southern Yemen, about 19 m. from the sea, and 55 m. NNE. Mokha; noted for its manufacture of earthenware. P. (adult male) 2000.

Haizdar, fertile plain, Turkish Armenia, SE. of Lake Van.

Hajamro, or **Hujamree,** the name of one of the mouths of the riv. Indus, in Sind. It enters the Arabian Sea in about 24° 5′ N.

Hajar, Batn el ('entrails of rocks'), part of the Nile valley of Nubia, between the second cataract (Wadi Halfa) and Dar Seikkot, having a length of about 93 m.

Hajarein, tn., Hadramut, S. Arabia, in 15° 29′ N., 46° 22′ E.

Hajar (or **Hejer**), **El,** name applied to that portion of the Arabian coast of the Persian Gulf N. of the Bahrein Gulf as far as Koeit.

Hajar-Rum ('stones of the Romans'), vil., Algeria, prov. Oran, 19 m. E. Tlemsen, with ruins of the Roman *Castra Severiana.*

Hajdú-Böszörmény, tn., with magistracy, Hungary, prov. Hajduken, 13 m. NNW. Debreczen. P. (1850) 14,900; (1869) 19,200; (1890) 21,200.

Hajdú-Dorog (or **Dolog**), market-tn., Hungary, prov. Hajduken, 21 m. N. by W. Debreczen. P. (comm.) 8700.

Hajdú-Hadház, tn., Hungary, prov. Hajduken, 12 m. N. by E. Debreczen. P. (comm.) 8000.

Hajdú-Nánás, tn., with magistracy, Hungary, prov. Hajduken, 20 m. S. Tokay. P. 14,500.

Hajduken, or **Hajdú,** co., Hungary, crossed by 47½° N., 21½ E., cap. Debreczen; so called because during the Ottoman invasion into Hungary several towns defended themselves by establishing local constabularies, which were called Hajdú, over which ruled a captain of the dist.

Hajdú Szoboszló, tn., with magistracy, Hungary, prov. Hajduken, 12 m. WSW. Debreczen. P. 14,700.

Hajeb, El, ruined site, S. Tunis, about 37 m. SW. Kairwan.

Hajl Abbas, vil., Asia Minor, 80 m. N. Angora. Near are some remarkable caves.

Hajl-Bairamli, tn., Turkey in Europe, prov. Seres, 27 m. NNE. Salonica.

Hajl Bajur Bay, bay, on the E. side of the Caspian Sea, Russian Transcaspian Terr., in about 39° N.

Hajl Bektash, important salt-mines, Asia Minor, vilayet and 110 m. SE. Angora, 50 m. WNW. Kaisariye.

Hajl Hamza, vil., Asia Minor, pashalic Sivas, 68 m. SSW. Sinope, near the l. bk. of the Kizil Irmak, here crossed by a stone bridge. The mountains in the vicinity, over an area of 300 sq. m., present geological peculiarities which indicate the presence of silver. Old shafts have been discovered, which are said to have been worked in classic times.

Hajl-Kandil, vil., Upper Egypt, prov. Siut, on the r. bk. of the Nile. Near the village is the mount of *Tell-el-Amarna* (*q.v.*).

Hajlkhak Pass. See **Bamian.**

Hajl-Köl, tn., Asia Minor, 30 m. WNW. Amasia. P. <3000.

Hajln, tn., Asia Minor, near the r. bk. of the Gök-zu, vilayet and 82 m. NE. by N. Adana, sanjak Khozan. Alt. 4595 ft. P. 12,000; Gregorian Armenians, 7500; Moham. 3500 (Cuinet).

Hájipur, tn., Brit. India, Bengal, dist. Muzaffarpur, on the l. bk. of the Gandak, at its confluence with the Ganges, 8 m. N. Patná, with an old fort. P. (1881) 25,100; (1891) 21,500; Hindus, 17,900; Moham. 3600.

Hajira, El, oasis, Algeria, prov. Constantine, 45 m. NNE. Wargla, on the route to Tuggurt.

Hájo, vil., Brit. India, Assam, dist. Káműrúp, 12 m. WNW. Gauháti. Near it is the celebrated Mahámuni temple, annually visited by thousands of pilgrims from all parts of India.

Hajós, comm., Hungary, co. Pest, 10 m. SE. Kalocsa. P. < 5000.

Hakari, mt. dist., Turkish Kurdistan. See **Hakkiari.**

Hakata, tn., Japan, near the NW. ct. of Kiushiu, prov. Chikuzen, 70 m. NNE. Nagasaki, port of Fukuoka, with celebrated silk manufactures. P. 23,000.

Haken Berg, mt., Ger., E. of Mecklenburg-Schwerin, 30 m. SE. Rostock.

Hakersay, one of the smallest of the Hebrides Is., Scot., between Barra and S. Uist.

Hakkiari, Hakkari, Hekkiari, or **Hakari,** mountainous dist., Kurdistan, on the borders of Turkey and Persia, between Lakes Van and Urumia. About one-half of the population Mohammedan Kurds, one-half Nestorian Christians. Gives name to a Turkish vilayet. See **Ottoman Empire.**

Hakkas, an aboriginal tribe of the prov. of Kwangtung, China. Numbers of them have emigrated from Canton to Formosa.

Hakodate, or **Hakodadi,** seapt. tn. and treaty port (opened to commerce in 1854), Japan, on a peninsula at SW. extremity of Yezo, in Sangar or Tsugaru Strait, at the foot of a bold rock (1157 ft.) often compared to Gibraltar. The harbour is completely land-locked, easy of access, and spacious enough for the largest navy to ride in. The water is deep, and the anchorage good. The town is regularly built with streets at right angles to each other, paved, macadamised, drained, and kept remarkably clean. The town has a naval school; and in 1889 water-works were constructed. H. has regular communication with Aomori and Yokohama, but the foreign trade is of little account. Chief exports to foreign countries edible seaweed, bêche-de-mer (iriko), sulphur, dried fish, and fish-manure; total value under £150,000. Mean temp. (14 yrs., 1859–63, 1877–86), yr. 47.6° F., Jan. 27.4°, Aug. 70.1°; rfall. (7 yrs.), 44.45 in. P. (1871) 14,600; (1890) 55,700.

Hakluyt, high cape on the NW. ct. of Spitzbergen, in 79° 74′ N. and 10° 54′ E.

Hakone, vil., Japan, prov. Sagami, isl. of Honshiu, 58 m. SW. Tokyo, 8 m. WSW. Odawara, on the r. bk. of a lake famous for the beauty of its scenery, in a volcanic chain of mountains rich in mineral waters, generally sulphurous and warm; becoming a Japanese Davos Platz. A magnificent avenue of giant pines, cedars, and cypress lead to H. along the border of the lake. At a neighbouring pass, called the **H. Pass,** crossed by the coast road from Tokyo to Kyoto, there was formerly a barrier (*kwan* or *kuvan*), with reference to which the W. part of Honshiu was spoken of as **Kwansai** (W. of the barrier), the E. as **Kwanto** (E. of the barrier).

Hakscheen Vley. See **Hogskin Vley.**

Haku-yama, or **Siro-yama,** both meaning 'white mountain,' mt., in the W. of Honshiu, Japan, 35 m. SSE. Kanazawa. Alt. 9185 ft.

Hal, comm., Belgium, prov. Brabant, on the Senne, arr. and 10 m. SW. by S. Brussels, on the Charleroi Canal; has manufactures of sugar and chicory. P. 10,500.

Hal, Hungarian, 'fish.'

Hála, Old, tn., Brit. India, Sind, dist. Haidarábád, 107 m. NE. by E. Karáchi, near the E. or l. bk. of the Indus, the threatened encroachments of which caused the partial abandonment of the town (in 1880) and the building of **New H.** (formerly known as **Murtizábád**) 2 m. off, on the Allganj Canal. P. **New H.** (1881) <4000; (1891) 5100; Hindus, 1700; Moham. 3300.

Hála Mountains, a name sometimes given to the Kirthár Mts. between Sind and Baluchistan.

Halibut Island, N. Pacific Ocean. See **Sannak Island.**

Halicz, tn., Austria, crownland Galicia, on the r. bk. of the Dniester, 48 m. SW. by W. Tarnopol, with the ruins of a castle formerly the residence of the princes of H.; once the most important principality of the country. The Karaite Jews of Galicia live principally in and round H. P. <4000.

Halidon Hill, hill, Eng., 2 m. NW. Berwick-upon-Tweed; in 1333 scene of the battle which preserved the town for the English.

Halifax, seapt. city, Canada, cap. Nova Scotia, H. co., on its SE. ct., 90 m. SW. by S. Pictou. It stands on the declivity of a hill 250 ft. high facing the harbour (originally called Chebucto), and its houses are mostly of wood, though elegant and substantial stone and brick buildings are yearly becoming more numerous; has the residences of the military commandant and admiral, two sets of barracks and military hospital, ordnance and commissariat departments, Dalhousie College. The harbour (6 m. long, average width 1 m.) affords excellent anchorage in 12-15 fathoms, can float the largest vessels alongside its wharves, and is open at all seasons, its navigation seldom being interrupted by ice. As chief naval station of Brit. N. America, H. has a large dockyard (graving dock 593½ ft. long, and three patent slips, one with lifting power of 3000 tons), and harbour and city are protected by eleven fortifications. Seat of an Anglican and Roman Catholic cathedral, and university. Carries on all branches of manufactures pursued in the dominion. On E. side of the harbour is the town of Dartmouth. It is the chief rendezvous of the British navy on the N. American station, and the winter calling-place of the royal mail steamers (Allan and Dominion lines); E. terminus of the C. P. R. and Grand Trunk (Intercolonial) systems. Shortest sea route to Spithead (Eng.), 2510 m. H. was founded in 1749 by the Hon. Edward Cornwallis, governor of Nova Scotia, who named it in honour of Earl of Halifax. It is an important military post. It is also the chief naval station for the provs. and the W. Indies. Mean temp., yr. 42.6° F., Jan. 22.1°, August 63.8°; rfall. (19 yrs., 1869–88), 47.17 in.; snowfall, 83.81 in. P. 38,600.

Halifax (original name *Horton*), parl. bor. (2 members), mun. bor. (since 1848), co. bor., and par., Eng., Yorkshire, W. Riding, Elland div., diocese of Ripon, 6 m. SW. by W. Bradford, on the G. N., L. & Y., and L. & NW. Rlys., 209 m. from London by rail. It is built partly on the slope and partly on the top of a gentle hill a little to the N. of the Calder, and was originally, according to Camden, called Horton. Has coal-mines, custom-house, and bonding warehouses, and manufactures of woollen goods of the lighter class, and carpets. It is to the woollen industry that the town owes its growth and prosperity. In the latter half of the 15th century it had only 13 houses, but that industry was introduced before the close of the century, and as early as 1520 the woollen goods of this town had a high reputation. There are four public parks—the Savile park recreation ground (56 ac.), Shrogg's park (46 ac.), Bankfield park (9 ac.), with a mansion containing an art-gallery and museum, and the Akroyd park and museum. There are also free libraries, a set of public baths, a magnificent town hall (opened 1863), and the piece-hall, a vast quadrangle containing 315 rooms or warehouses, in which the manufacturers formerly kept their cloths for sale, now used by the corporation as a wholesale market. Among the schools are grammar schools founded by Queen Elizabeth and Matthew Broadley (1647), and a blue-coat school. The charities include two sets of almshouses (founded by Sir F. Crossley and his brothers), the Crossley orphan home and school, and the Waterhouse charities, bequeathed in 1750. The water supply is furnished by reservoirs at Warley Moor, Castle Carr, and Mixenden, and the riv. Calder communicates with Hull on one side, and with Liverpool, by canal, on the other. Market-day, S. Parl., mun., and co. bor. P. (1801) 8900; (1851) 33,600; (1871) 65,500; mun. and co. bor. P. (1891) 89,800; parl. bor. P. 82,900; par. P. 48,100.

Halle, in German topography. See *Hall.*

Halle, tn., Prussia, prov. Westphalia, 20 m. SE. Osnabrück, 8½ m. WNW. Bielefeld, cap. circle H.; manufactures sailcloth and pack-linen. P. <2000.

Halle, city, Prussia, prov. Saxony, govt. Merseburg, cap. circle, on the Saale, in 51° 24′ N., 18 m. E. by S. Eisleben, and at the junction of railways to Magdeburg, Leipzig, and Weimar, 20 m. WNW. Leipzig. Its university, founded in 1694, had united to it in 1815 that of Wittemberg, and possesses a valuable library, museums, chemical laboratory, botanic garden, &c. Near the city are salt springs (*Halloren*), yielding upwards of 300,000 cwt. of salt annually. H. is the seat of the mining board for the provs. between the Elbe and Weser. It is an ancient city; first mentioned in 806; already a considerable town in 965, when it came into the hands of the Archbishops of Magdeburg; in the 13th and 14th centuries a flourishing Hanse town. In the present century it has grown rapidly, in consequence of the development of manufacturing industries fostered by the presence of extensive beds of lignite in the neighbourhood; now the centre of paraffin-refining, the raw material for which is obtained from these beds; carries on also sugar-refining, and the manufacture of machinery, textiles, porcelain, &c. Michaelis, the theologian and orientalist, and Handel were born here. P. (1850) about 40,000; (1871) 52,600; (1890) 101,300; including **Giebichenstein,** 115,900.

Ham, West, mun. bor. (since 1856), parl. bor. (2 members), co. bor., and par., Eng., Essex, immediately to the E. of London, from which it is separated by the riv. Lee, on the G. E. and London, Tilbury, and Southend Rlys., and including in its area the Victoria Docks, and a portion of the Royal Albert Docks; has also the locomotive and other works of the G. E. R. and London, Tilbury, and Southend Rly. Cos., besides iron and shipbuilding, and india-rubber and gutta-percha works, sugar refineries, and soap and jute works, &c. The parish church dates from the 12th century. West H. Park is about 80 ac. in extent. The London northern outfall sewer passes through the entire length of the borough. Fifty years ago West H. did not contain 6000. Its enormous growth is due chiefly to the desire of manufacturers to escape the restrictions imposed by the Metropolitan Board of Works under the Act of 1854; par. 4706 ac. P. (1871) 62,900; (1891) 204,900.

Hamad (Arabic, 'the hard and stony ground'), vast desert, northern Arabia, extending from the mountains of Hauran and the Euphrates valley in the N. to Jof in the S. It consists of a stony plateau, with an altitude rising slightly to the N. The only two permanent localities of the H. are those of **Kaf** and Itteri, small oases on the Wadi Sirhân.

Hamada, tn., Japan, on the W. ct. of Honshiu, 200 m. NE. by N. Nagasaki.

Hamadan (generally believed to be the ancient *Ecbatana,* although Ferrier believes that city now to be represented by Kangavar or Kengover), tn., Persia, prov. Irak Ajemi, 185 m. WSW. Teheran; situated at the E. base of the Elvend Kuh, at the meeting-place of two pass-roads across the Zagros Mts., leading by Kangavar to Kermanshahan, hence an important entrepôt for the commerce between Bagdad and the modern cap. of Persia. Noted for its manufactures of leather, felts, and its copper-work; it also manufactures and dyes cottons. Near it is an edifice containing the tomb of Avicenna, resorted to by numerous pilgrims. It also contains the traditional tombs of the Jews Mordecai and Esther. Has an American high school for boys. Alt. 6156 ft. (Schindler); 6280 ft. (Curzon). P. 40–50,000 (Polak).

Hamah, or **Hama,** ancient *Epiphania,* tn., Syria, on the Nahr-el-Asy (Orontes), 30 m. N. Homs, in a plain irrigated by means of water-wheels (*norias*) driven by the current of the river; seat of a kaimakam; manufacture of mantles; caravan station between the N. and the S.

Hamburg, settlement, Cape Colony, div. Peddie, 25 m. S. King William's Town.

Hamburg (name derived from Hammaburg, *i.e.*, 'castle in the Hamme,' the latter being the name of the forest covering the district), free Hanseatic terr. and town in NW. Germany, near the mouth of the Elbe. A terr. of 158 sq. m. belongs to H., comprising the town of H. and its surroundings, several islands situated in the Elbe, the dist. of Ritzebüttel, and several small enclaves. The country is flat, forming part of the fertile 'marshes' near the North Sea. The H. terr. is one of the states of the German Empire, and is represented by one member in the Bundesrath, and by three members in the Reichstag. The town of H. is the most important commercial centre of Germany, and next to Berlin the largest city of the empire. Lat. of observatory, 53° 33′ 7″ N., long. 9° 58′ 25.5″ E. H. is situated on the Lower Elbe. Above H. this river divides into two arms, the Norder-Elbe and the Süder-Elbe. The town is chiefly situated on the r. bk. of the Norder-Elbe, and is divided by the Alster, a northern affluent of the Elbe, into two parts, the 'Altstadt' on the l. bk. of the Alster, and the Neustadt on the r. bk. Various suburbs surround these parts, the most important being the suburb of St. George on the eastern, and that of St. Pauli on the western side of the Alster. The Norder-Elbe and the Alster form numerous subdivisions and canals, called 'Fleete.' These are characteristic features of H., which have, however, greatly changed in appearance during the last fifty years. Moreover, the Alster forms a lake, called Aussenalster, on the northern side of the town. The general appearance of H. in modern times has been changed by two events of great importance, viz., the enormous conflagration by which the greater part of old H. was destroyed in 1842, and secondly, the great harbour improvements which have been in progress since 1883. At the present time the finest parts of the town are situated near the Alster; they are celebrated for the superior style of their buildings. The great conflagration of 1842 destroyed many public buildings and churches. The most important was the celebrated church of St. Nicholas, which was, however, splendidly rebuilt in pure Gothic style after designs by the celebrated British architect Sir Gilbert Scott. This church has a noted tower 482 ft. high. But the chief characteristics of H. are its foreign trade and commercial enterprise. The 'Altstadt' forms the commercial centre. Although the town is 65 m. distant from the sea, its harbour is always accessible to vessels drawing 20 ft., and at high water ordinary spring tides to vessels drawing 24 ft. The most important docks, including the Sandthorhafen, Grasbrookhafen, and Dampfschiffhafen on the N. side of the Norder-Elbe, and all those on the S. side belong to the free-port (*Freihafengebiet*). The position of the port among those of the world, with the value of its commerce in recent years, is shown in the table in the **Appendix,** p. 14, and the following table shows its growth in twenty years:—

Years.	Ships Entered.	Register Tons.	Ships Cleared.	Register Tons.
1865	5186	1,223,000	5186	1,216,000
1875	5260	2,118,000	5209	2,085,000
1885	6790	3,704,000	6798	3,712,000

Most of the ships visiting H. are German and English, then follow those of the Netherlands, Norway, Sweden, and France. As regards imports, those of Great Britain and the United States of America are of principal importance. H. has ample railway facilities, six railway lines diverging from H. in various directions. The principal imports are sugar, textiles, coffee, wool, cotton, tobacco, spirits, wines, machinery, saltpetre, and petroleum; the principal exports are iron and ironware, machinery, woven textiles, woollen and worsted yarns, glass-ware, cattle, cereals, and timber. Emigration is also one of the important factors of H.'s foreign connections. On the average, more than 30,000 emigrants annually pass through H. In addition to the commerce, the industries of the town are of considerable importance; distilleries and breweries, tobacco, sugar, and iron factories, and chemical works have to be mentioned, most of these being in direct connection with the trade of the town. H. was founded by Charlemagne (about 810 A.D.) as a stronghold against the Slavs, and as early as 834 it became the seat of an archbishop. But nevertheless it was of subordinate importance until the end of the 12th century, as the town of Bardowiek, higher up the Elbe, was one of the commercial centres of NW. Germany in the early parts of the Middle Ages. At the beginning of the 13th century, however, H. took the lead on the Elbe, and in 1242 it concluded an alliance with Lübeck and Bremen, this alliance forming the nucleus of the great Hanseatic League. H.'s greatness dates from the time when local coast navigation was superseded by extensive maritime trade connections. During the 16th century its commercial connections with Great Britain became of the utmost importance, and in the 18th century its great trans-Atlantic trade commenced to flourish. But up to the present time its commercial importance has not yet reached its climax. Its population has been increasing at the rate of more than 3½ per cent. per annum during the last five years, which is more rapid than that of any other town of the German Empire, and its spirit of commercial enterprise is livelier than ever. Joining the German Customs Union in 1888 has greatly improved H.'s commercial position. Mean temp. (15 yrs.), yr. 47.2° F., Jan. 33.1°, July 63.4° P. (beginning of 14th century) 7000; (beginning of 19th century), 100,000; (1850) 150,000; (1875) 348,000; (1885) 471,000; (1890) 569,000. [**H. G. S.**]
